December 2024

Tacoma Dome Link Extension

Draft Environmental Impact Statement

PRESENT AND REASONABLY FORESEEABLE ACTIONS

Appendix G

SOUNDTRANSIT

U.S. Department of Transportation
Federal Transit Administration

G. Present and Reasonably Foreseeable Actions

Appendix G, Present and Reasonably Foreseeable Actions, provides additional details on the actions considered in analysis presented in Chapter 5, Cumulative Impacts, of the Draft EIS. The analysis considers the potential cumulative long-term impacts of TDLE in conjunction with past, present, and reasonably foreseeable actions. These actions include, but are not limited to activities that have been proposed in comprehensive/management/budget plans or have been submitted as a part of a permitting process. The actions also include larger public projects that often have development documentation available and private projects where development information may be limited or not publicly available.

Figures G-1 through G-4 show the general location of present and reasonably foreseeable actions in the TDLE study area that were used to identify potential cumulative impacts. Table G-1 lists these projects.

Data Sources: King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2023).

Tacoma Dome Link Extension

Table G-1 Present and Reasonably Foreseeable Actions

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
Federal Way Segment				
1	WSDOT SR 509 Completion Project	Federal Way	2019–2028; Stage 1a (bridge over SR 99 near S 208th Street) was completed in winter 2022, currently Stage 1b is in progress, with Stage 2 expected to begin late 2024.	Phase I extends SR 509 between S 188th Street and I-5/S 272nd Street and includes construction of 4 general-purpose lanes on a tolled facility and interchange improvements at S 188th Street, 24th/28th Avenue S, and I-5. Project would add I-5 auxiliary lane adjacent to Meadowbrook Landfill (WSDOT 2023a).
2	Sound Transit Federal Way Link Extension	Federal Way	Construction began in 2020 and is currently expected to be completed in 2026	This project extends light rail from Angle Lake Station in the city of SeaTac to the Federal Way Transit Center. The 7.8-mile extension includes three stations in Kent/Des Moines near Highline College, S 272nd Street, and the Federal Way Transit Center. All three stations add parking for a total of 3,200 spaces along the route (Sound Transit 2024a).
3	The Commons at Federal Way Pad Sites	Federal Way	Construction began in 2022	Restaurant and retail space will be expanded at The Commons mall in Federal Way.
4	Pape – Kenworth Development	Federal Way	Construction began in 2020	NE corner of I-5 and S 320th Street. Frontage improvements on the north side of S 320th Street between I-5 northbound ramps and 32nd Avenue S and a half-street improvement on 32nd Avenue S (City of Federal Way 2020a).
5	Widen S 324th Street between Pacific Highway S (SR 99) and 23rd Avenue S	Federal Way	TBD	Widen existing road to 5 lanes (City of Federal Way 2015).
6	BPA Tower Replacement	Federal Way	Prior to TDLE	Near S 324th Street, new towers would be built to raise transmission lines adjacent to existing towers (BPA 2020).
7	City of Federal Way City Center Access Project	Federal Way	Depending on funding construction may begin as soon as 2027	Team is moving forward with evaluating various options for interchange modifications at S 324th Street and possible local street improvements, including: • S 312th Street from 23rd Avenue S to Military Road • 32nd Avenue S from S 320th Street to Military Road • 320th/324th couplet (one-way streets) • HOV lanes on S 320th Street between Pacific Highway S and Military Road (City of Federal Way 2022)

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
8	FUSION Family Center Project	Federal Way	Opened in 2020	Land use proposal to redevelop existing motel located at 1505 S 328th Street to a social services transition housing facility for families experiencing homelessness (FUSION Federal Way 2023).
9	Creekside Commons Townhomes	Federal Way	TBD	Rezone 10 acres for 94 zero-lot-line townhome units at S 333rd Street and 20th Avenue S.
10	Woodbridge Corporate Park (Weyerhaeuser Campus Redevelopment)	Federal Way	Construction started summer 2022, planned completion for 2025	Current effort underway to redevelop Weyerhaeuser Campus as industrial, warehouse use. Woodbridge Buildings A and B are under construction with three additional buildings in the planning stage (Industrial Realty Group 2022).
11	City of Federal Way – S 336th Street Water Quality Facility at Highway 99	Federal Way	Unknown. Construction was scheduled to begin in 2019	Storm drain improvements and a new water quality facility in the West Hylebos Watershed near the intersection of Pacific Highway and S 336th Street (City of Federal Way 2014).
12	Widen S 336th Street between Pacific Highway S (SR 99) and 20th Avenue S	Federal Way	TBD	Widen existing road to 5 lanes (City of Federal Way 2015).
13	Sound Transit Operations and Maintenance Facility South	Kent or Federal Way	2024-2032	The Operations and Maintenance Facility South (OMF South) will construct an operations and maintenance facility to support Sound Transit 3 system expansion. Three sites currently under evaluation in a separate environmental impact statement from TDLE: one site on the Midway Landfill in Kent and two sites in Federal Way (Sound Transit 2024b).
14	Smith Brother's Farm	Federal Way	Construction began 2022	Construct a 45,300-square-foot warehouse building for storage and distribution of dairy products. The building will include warehouse and office spaces, loading docks, truck parking and employee parking (City of Federal Way 2021).
South Federal Way Segment				
15	City of Federal Way – 16th Avenue S: S 344th Street to S 348th Street	Federal Way	2021–2026	Construct an auxiliary southbound lane along 16th Avenue S between S 344th Street and S 348th Street (City of Federal Way 2020b).
16	I-5 – Southbound Collector-Distributor Lane and 356th Street Intersection Improvements	Federal Way	Construction suspended as part of the WSDOT I-5 – SR 161/SR 18 Triangle Improvements.	Project includes a new roundabout on S 356th Street at the SR 161 and 16th Avenue S intersections, a new southbound I-5 exit to S 356th Street and SR 161, and a new southbound I-5 exit to SR 18. The existing loop ramp to eastbound SR 18 would be eliminated (WSDOT 2023b).
17	South King Fire & Rescue Fire Station at 35100 Pacific Highway S	Federal Way	Construction is scheduled to begin by 2024	Build an emergency response fire station.

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
18	WSDOT I-5 – SR 161/SR 18 Triangle Improvements	Federal Way	Currently suspended, no timeline available	Phase 1 includes adding a new exit from SB I-5 to S 356th Street with roundabouts, rebuilding SB I-5 exit to SR 18. Phase 2 includes adding a northbound lane on I-5 and a 2-lane ramp from northbound I-5 to eastbound SR 18 (WSDOT 2023b).
19	Lakehaven Sewer Pump Station #33B	Federal Way	Completed 2023	Installation of a new sewer pump station, gravity line, and force main improvements at 200 S 359th Street. The new pump station is a replacement of an existing pump station on an easement dedicated to Lakehaven Water and Sewer District (Lakehaven Water and Sewer District 2023).
20	Cemetery Access Road at St. George Cemetery	Puyallup Tribe of Indians	Completed summer 2021	Constructed a new roadway to access St. George Cemetery.
21	Federal Way Mixed-Use Development	Federal Way	Construction in progress 2023	New mixed-use development consisting of 240 residential units, commercial retail space, and 450 parking spaces at the SE corner of S 348th Street and 1st Avenue S on an 8.33-acre site.
22	SR 99-Porter Way Intersection Improvements	City of Milton	Construction began October 2023, anticipated to be completed in fall 2024	Improvements will accommodate an additional travel lane to increase mobility for vehicles and large trucks. Sidewalks and a signal system upgrade are included in the project (TIB 2023).
Fife Segment				
23	Taylor Way Rehabilitation Project	Fife	Completed November 2021	Includes improvements to roadway surfacing, intersections, and pedestrian facilities on Taylor Way between 11th Street and SR 509 (City of Tacoma 2023).
24	SR 167 Frontage Road	Fife	TBD	Construct new street adjacent to the west side of the future SR 167 extension. The street will connect between 8th Street E and Wapato Way E overcrossing of I-5 at Pacific Highway E. Planning and engineering was funded to begin in year 2022.
25	WSDOT SR 167 Completion Project	Fife	2020–2029	This project includes Stage 1a (completed), Stage 1b (under construction), and Stage 2a and b. Connect SR 167 between SR 512, I-5, and SR 509. Construction of 4 general-purpose lanes on a tolled facility; interchange improvements at N Meridian, Valley Avenue E, I-5, 54th Avenue E, and SR 509 (WSDOT 2023c).
26	70th Avenue E and I-5 Bridge Replacement	Fife	Completed 2021	Reconstruct and relocate the 70th Avenue E bridge over I-5 as part of the SR 167 Extension Project. New bridge will have 4 lanes and pedestrian and bicycle facilities. City of Fife contribution = $1,000,000 (City of Fife 2020).

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
27	SR 167 Relocation of Interurban Trail and Trailhead	Fife	Completed 2022	Relocate the existing trail and trailhead from 20th Street E to existing trail. Improvements to be built concurrent with the 70th Avenue E bridge relocation (City of Fife 2020).
28	20th Street E from 70th Avenue E to Freeman Road	Fife	TBD	Reconstruct 20th Street E as a 3-lane roadway. Planning and engineering is funded to start in 2025 (City of Fife 2020).
29	62nd Avenue E Reconstruction – North Segment	Fife	TBD	Reconstruct 3-lane roadway with curb, gutters, sidewalks, and drainage. Planning and engineering is funded to start in 2025 (City of Fife 2020).
30	12th Street E from 54th Avenue E to 59th Avenue E	Fife	TBD	Widen to 3 lanes (City of Fife 2020).
31	Extension of 59th Avenue E Phase 2	Fife	TBD	Completion of 59th Avenue E sidewalk and utility underground improvements north from Pacific Highway E to 12th Street E. Planning and engineering was funded to start in 2023 (City of Fife 2020).
32	62nd Avenue E Nonmotorized Overpass of I-5	Fife	TBD	Construct new 62nd Avenue E pedestrian bridge over I-5 from 20th Street E to Pacific Highway E. Planning and engineering was funded to start in 2023 (City of Fife 2020).
33	62nd Avenue E from 20th Street E to Pacific Highway E	Fife	TBD	Extend 62nd Avenue E from 20th Street E to Pacific Highway E, including I-5 overpass. Planning and engineering is funded to start in 2025 (City of Fife 2020).
34	Fife City Center subarea planning and new streets – Pedestrian Scale Grid in City Center	Fife	TBD	Update the City Center subarea plan with specific proposals for growth and evaluation and mitigation measures. This would include the construction of new streets in Fife's City Center to create pedestrian-scale block lengths; the target length is 330 feet from center to center of intersecting streets. Planning and engineering was funded to start in 2021 (City of Fife 2024).
35	20th Street E Reconstruction – 56th Avenue E to 64th Avenue E	Fife	TBD	Reconstruct and widen to a 3-lane roadway with curbs, gutters, sidewalks, bike lanes, drainage improvements, and underground aerial utilities. Construct new signal at 62nd Avenue E. Planning and engineering was funded in 2021 (City of Fife 2020).
36	Pacific Highway E Signal Interconnect	Fife	TBD	Interconnect traffic signals on Pacific Highway E from Willow Road E to 59th Avenue E. Planning and engineering was funded to start in 2021 (City of Fife 2020).
37	20th Street E and 58th Street E Signalization	Fife	TBD	Signalization of intersection. Planning and engineering was funded to start in 2021 (City of Fife 2020).

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
38	12th Street E Reconstruction	Fife	In construction 2023	Reconstruct to 3-lane roadway with curbs, gutters, sidewalks, and drainage from 62nd Street E to Alexander Avenue E (City of Fife 2020).
39	I-5/54th Avenue E Interchange Improvements	Fife	Completed in 2020	Rebuilt western half of the interchange, and maintain the eastern half of the interchange and the existing 54th Avenue E bridge over I-5 (City of Fife 2020).
40	52nd Avenue E – New Road	Fife	TBD	Construct a new street from Pacific Highway E to 12th Street E. Planning and engineering was funded to start in 2022 (City of Fife 2020).
41	51st Avenue E – New Road	Fife	TBD	Construct new street from Pacific Highway E to 12th Street E. Planning and engineering was funded to start in 2022 (City of Fife 2020).
42	Pacific Highway E Street Lighting	Fife	TBD	Construct street lighting on Pacific Highway E from Alexander Avenue E to 54th Avenue E. Planning and engineering for Phase 1 was funded to start in 2023 (City of Fife 2020).
43	20th Street E from 50th Avenue E to 56th Avenue E	Fife	TBD	Widen to 5 lanes. Planning and engineering was funded to start in 2022 (City of Fife 2020).
44	23rd Street E Extension – 51st Avenue E to 54th Avenue E	Fife	TBD	New connection to improve street grid network. Will connect to future I-5 and 54th Avenue E interchange ramps. Planning and engineering was funded to start in 2023 (City of Fife 2020).
45	Frank Albert Road E from 20th Street E to Pacific Highway E	Fife	Planned completion 2024	Extend Frank Albert Road E from 20th Street E to Pacific Highway E, including I-5 overpass. Planning and engineering was funded to start in 2023 (City of Fife 2020).
46	20th Street E and Frank Albert Road E Signalization	Fife	TBD	Signalization of intersection. Planning and engineering was funded to start in 2022 (City of Fife 2020).
47	20th Street E Preservation – Industry Drive E to 54th Avenue E	Fife	TBD	Overlay 3-lane roadway. Planning and engineering was funded in 2022 (City of Fife 2020).
48	Canyon Road Connection Project	Tacoma	Construction is scheduled to begin in 2025, with completion planned for 2027	Extension of Canyon Road E between Pioneer Way E and 70th Avenue E in Fife. Provides connection between Frederickson and Port of Tacoma (Pierce County 2023).
49	Puyallup Tribe of Indians Integrative Medicine Expansion	Puyallup Tribe of Indians (location in Fife)	Preparation of Environmental Assessment began in 2023	The Puyallup Tribe of Indians Integrative Medicine site has been selected for a future regional specialty referral center. Indian Health Services is developing the facility on Puyallup Tribal Lands to reach a regional clientele.

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
50	Port of Tacoma Interchange Improvements Phase II	Tacoma	2023	A series of highway projects to provide operational improvements and high-occupancy-vehicles (HOV) lanes on I-5, including improvements connected to replacing the bridge over the Puyallup River and ramps connecting to Port of Tacoma Road. Phase I was completed 2020 (City of Fife 2021).
51	spuyaləpabš Trail	WSDOT	Planned completion for 2029	A planned trail to connect Puyallup to Fife and downtown Tacoma. Preliminary engineering, and environmental analysis was completed in 2023, the trail is expected to be completed in 2029 (WSDOT 2023d).
Tacoma Segment				
52	I-5 – Portland Avenue to Port of Tacoma Road - Southbound HOV (part of I-5 - SR 16 Tacoma/Pierce County HOV Program)	Tacoma	Completed in 2022	This project replaces the southbound I-5 Puyallup River Bridge and brings it to current seismic standards and demolishes the old bridges. The project also modifies the Port of Tacoma Road on-ramp, rebuilds the East L Street overpass, replaces existing concrete pavement, and upgrades signing, illumination, stormwater collection facilities, and water quality treatment facilities (WSDOT 2023e).
53	First Creek Park	Tacoma	TBD	The Puyallup Tribe of Indians is proposing a new green space, landscaping, walking path, and play area near the new Emerald Queen Casino and Hotel in Tacoma.
54	Pipeline Trail Phase III	Tacoma	Completed 2020	Construct a shared-use path segment between E 56th Street and E 72nd Street (City of Tacoma 2023b).
55	E 11th Street Bridge Corridor Study	Tacoma	TBD	Studying alternatives for the E 11th Street Bridge Corridor to determine whether the bridge over the Puyallup River and viaduct should be replaced, repaired, relocated, or demolished without replacement (City of Tacoma 2023a).
56	Portland Avenue Freight Access Improvement Project	Tacoma	TBD Development of design estimated to be completed in winter 2024	Replacement of asphalt pavement with concrete, roadway rechannelization, bicycle facilities and sidewalks (as needed), and traffic signal changes that could increase safety and freight mobility.
57	Service Development Plan for Amtrak Cascades	Tacoma	TBD Development plan scheduled to be completed in Q1 2024	WSDOT is developing a Service Development Plan for Amtrak Cascades for potential service improvements, including additional trains at the Tacoma Dome Station (WSDOT 2023f).
58	South Tacoma Way Corridor Safety Improvements	Tacoma	Construction completed 2019	Construct needed safety improvements along S Tacoma Way/E 26th Street corridor beginning at East G Street.

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
59	TRAX at 415 E 25th Street	Tacoma	Construction began in 2021, Construction has been delayed as they seek a new developer to take on the project.	Mixed-use development with 115 apartments, 17,000-square-foot market space, 55 parking stalls (BLDCN17-0043, SDEV17-0053, WO17-0121). Pre-construction meeting held June 13, 2019, for building permit. SDEV and WO permits are ready to issue pending pre-con meeting. DEMOC19-0019 approved and ready to issue as of October 22, 2019.
60	Rail Crossing Improvements	Tacoma	Construction began 2023	Working with Sound Transit to create quiet zones at both the 6th Avenue and S 19th Street crossings (City of Tacoma 2023a).
61	Koz Development	Tacoma	Completed in 2020	Mixed-use development, including 152 apartments, on Puyallup Avenue and East C Street.
62	Mixed-Use Development at 217 E 25th Street	Tacoma	Construction began 2021	Construction of a new $20M, 142,000-square-foot, 152-unit multi-family apartment building, consisting of five levels residential over one ground level consisting of residential and work-live units, and one level below-grade parking.
63	Mixed-Use Development at 209 E 26th Street	Tacoma	Construction began 2021	Construction of a new $20M, 142,000-square-foot, 152-unit multi-family apartment building, consisting of five levels residential over one ground level consisting of residential and work-live units, and one level below-grade parking.
64	Tacoma Convention Center Hotel	Tacoma	Completed in 2020	Construction of a 22-story hotel adjacent to the Greater Tacoma Convention and Trade Center, with 300 hotel rooms, ballroom, and approximately 400 parking spaces.
65	Prairie Line Trail Phase II	Tacoma	Construction began in February 2024 and is scheduled for completion in January 2025	Construct 1/3-mile-long pedestrian and bicycle trail along the former BNSF Railway Line from S 21st Street to S 23rd Street (City of Tacoma 2023a).
66	Sound Transit Double Tracking Sounder	Tacoma	TBD	Double-tracking lines will be added at three segments of the Sound Transit track, near Tacoma Dome Station, between where the Sound Transit-owned track branches off from the BNSF-owned Railroad (Tacoma Rail Junction) and Portland Avenue, between S Pine Street and S 66th Street in South Tacoma, including a possible replacement of the S 66th Street bridge, and between Lakewood and DuPont. Funding was awarded for initial conceptual engineering and environmental review in 2022, which is expected to be complete in 2026. Construction is not yet funded (Sound Transit 2024c).
67	Hilltop Tacoma Link Extension	Tacoma	Construction completed and operation began in 2023	This Sound Transit project would double the length of the existing Tacoma Link, starting with the relocation of the Theatre District station and adding six new stations and expanding the Operations and Maintenance Facility located on E 25th Street (Sound Transit 2024d).

Table G-1 Present and Reasonably Foreseeable Future Actions (continued)

	Actions in the Project Vicinity	Jurisdiction	Construction Duration or Status	Description
68	South J Street Bicycle Boulevard	Tacoma	Construction planned to begin summer 2024	This project will construct a 2-mile bicycle boulevard on J Street from N 3rd Street to S 27th Street, along with improved east-west bicycle connections via 6th Avenue, S 11th Street, Earnest S Brazill Street, S 17th Street, and S 18th Street, to facilitate access to Sound Transit's Hilltop Tacoma Link light rail and the Hilltop Business District (City of Tacoma 2023a).
69	Water Flume Line Trail Phase III	Tacoma	Construction scheduled to begin in August 2024, estimated completion in December 2025	Construct trail along S Tacoma Way between South M Street and S Pine Street. This project will include ADA-compliant curb ramps; new storm drains; pedestrian crossing markers; traffic signal upgrades, including enhanced pedestrian safety; and trail user amenities, including pedestrian-level lighting; signs; and Pierce Transit bus stop pads. Phase 3 may be constructed between South M Street to Sprague Avenue and Sprague Avenue to S Pine Street as two separate phases (City of Tacoma 2023a).
70	I-5 – SR 16 Realignment HOV Structure and Connections	Tacoma	Completed in 2019	Construction of HOV lanes and direct-access ramps at I-5/SR 16 Nalley Valley interchange (WSDOT 2019).
Planning Projects				
–	Tideflats Interim Regulations	Tacoma	Ordinance adopted November 2021	The City is reviewing a continuation of limitations on residential encroachment on the Port Tideflats, limitations on new high-risk/high-impact uses, and limitations on new non-industrial uses within the Port Tideflats (City of Tacoma 2023c).

Tacoma Dome Link Extension

Draft Environmental Impact Statement

POTENTIALLY AFFECTED PARCELS

Appendix H1

SOUNDTRANSIT

U.S. Department of Transportation
Federal Transit Administration

APPENDIX H1 POTENTIALLY AFFECTED PARCELS

1 PARCELS POTENTIALLY AFFECTED FOR THE BUILD ALTERNATIVE

All TDLE alternatives would permanently affect public and private property for track and station right-of-way as well as transit integration, road realignment, staging, and mitigation. This appendix lists likely property acquisitions based on current conceptual designs and the existing conditions at the time the analysis was conducted. The properties listed and mapped in this appendix should not be interpreted as the final determination regarding property acquisitions because the list will be updated as the project design is refined. Accordingly, the number and type of displacements could vary between what is disclosed in this Draft Environmental Impact Statement (EIS) and what is ultimately required. For example, currently vacant properties might be developed between the publication date of this EIS and the beginning of project construction.

There are two types of potential affected properties reported in the table and maps:

- **Partial acquisition** – A portion of a parcel would be permanently acquired, but the current use would likely not be displaced. In some instances, such as larger parcels that hold multiple uses, a business or residential unit on a parcel could be displaced while other uses remain.
- **Full acquisition** – The entire parcel would be permanently acquired, and all current uses would be displaced. In some instances, full acquisitions include parcels that may not be needed for the project but would be affected to the extent that current uses would be substantially impacted.

Please note that the information in Tables H1-1 to H1-6 does not identify whether or not a property is a partial or full acquisition. The tables identify whether or not a property is affected for a particular alternative, which provides for comparison of the different alternatives. Figures H1-1 to H1-94 illustrate the permanent project footprint. During final design, the scope of impacts may or may not change. In addition to the potential property acquisitions described, the project would also require aerial and utility easements as well as temporary construction easements and use of public rights-of-way not listed here.

2 CONSTRUCTION IMPACTS AND RELOCATION OPPORTUNITIES FOR THE BUILD ALTERNATIVES

2.1 Temporary Construction Impacts for the Built Alternatives

Construction of TDLE would require property for construction staging, construction access, and temporary construction easements in each segment. Table H1-7 summarizes the acreage and parcels needed for construction.

Table H1-7 Construction Impacts for the Build Alternatives

Alternative	Estimated Temporary Construction Footprint (Acres)	Affected Parcels
Federal Way Segment		
Preferred FW Enchanted Parkway	47	13
Preferred FW Enchanted Parkway with Design Option	49	3
South Federal Way Segment		
SF Enchanted Parkway[1]	80	31
SF I-5	68	27
SF 99-West	87	45
SF 99-West with Porter Way Design Option	94	50
SF 99-East	91	49
SF 99-East with Porter Way Design Option	107	41
Fife Segment		
Fife Pacific Highway	62	65
Fife Pacific Highway with 54th Avenue Design Option	55	59
Fife Pacific Highway with 54th Span Design Option	55	59
Fife Median	62	65
Fife Median with 54th Avenue Design Option	55	59
Fife Median with 54th Span Design Option	55	59
Fife I-5	64	39
Fife I-5 with 54th Avenue Design Option	63	37
Fife I-5 with 54th Span Design Option	63	36
Tacoma Segment		
Preferred Tacoma 25th Street-West	45	25
Tacoma 25th Street-East	45	23
Tacoma Close to Sounder	31	18
Tacoma 26th Street	33	27

(1) The construction footprint and affected parcels are the same with the SF 352nd Span Station Option.

2.2 Estimated WSDOT and Local Jurisdiction Right-of-Way Needs

Table H1-8 summarizes the estimated amount of Washington State Department of Transportation (WSDOT) and other rights-of-way the project would require.

Table H1-8 Estimated WSDOT and Local Jurisdiction Right-of-Way Needs[1]

Alternative	Estimated WSDOT Right-of-Way Occupied (Acres)	Estimated Other Right-of-Way Occupied[2] (Acres)
Federal Way Segment		
Preferred FW Enchanted Parkway	5	1
Preferred FW Enchanted Parkway with Design Option	5	1
South Federal Way Segment		
SF Enchanted Parkway[3]	14	3
SF I-5	18	4
SF 99-West	1	8
SF 99-West with Porter Way Design Option	1	7
SF 99-East	1	9
SF 99-East with Porter Way Design Option	1	8
Fife Segment		
Fife Pacific Highway	6	9
Fife Pacific Highway with 54th Avenue Design Option	6	9
Fife Pacific Highway with 54th Span Design Option	6	10
Fife Median	6	9
Fife Median with 54th Avenue Design Option	6	9
Fife Median with 54th Span Design Option	6	10
Fife I-5	7	1
Fife I-5 with 54th Avenue Design Option	7	1
Fife I-5 with 54th Span Design Option	7	2
Tacoma Segment		
Preferred Tacoma 25th Street-West	10	12
Tacoma 25th Street-East	10	10
Tacoma Close to Sounder	10	7
Tacoma 26th Street	10	10

Note:

(1) Right-of-way estimates include only existing state, county, and local rights-of-way and not Tribal properties.

(2) Estimated Other Right-of-Way Occupied includes city rights-of-way that are currently used for roads or vacant, which would be fully or partially converted for light rail use.

(3) Right-of-way needs are the same with the SF 352nd Span Station Option.

2.3 Relocation Opportunities

To determine the relocation opportunities in the project vicinity, Sound Transit researched market conditions for available residential and commercial real estate in the project area. As shown in Tables H1-9, H1-10, and H1-11, the research considered real estate markets within the cities of Federal Way, Milton, Fife, and Tacoma. These cities offer the most likely relocation opportunities in the study area. Although property uses may change before construction of TDLE, research indicates that there would be opportunities for businesses, residents, and others displaced to be successfully relocated within the same general area. Some properties with unique characteristics, such as churches, industrial uses, homeless shelters, or hotels, could be more challenging to relocate and may require construction of new facilities.

Table H1-9 Property Available for Relocation in the Study Area[1]

Type of Property	Buildings/Units	Total Square Feet	Vacancy Rate	Listings (2020)
Apartments	50,907	42,010,255	4.5%	6
Office	1,239	17,117,906	9.2%	27
Industrial	1,239	41,269,173	5.1%	22
Retail	2,530	26,201,462	2.5%	56
Hotel	72	0	0	2

Sources: CoStar 2020
Notes:
(1) The study area or market is defined by the cities of Federal Way, Milton, Fife, and Tacoma, and includes a small area of unincorporated Pierce County. Tribal parcels are not considered available for relocation opportunities.

Table H1-10 Multi-Family Residential Property Available for Relocation in the Study Area

Type of Property	Toral Residential Units	Vacancy Rate	Average Rent per Unit
Federal Way/Des Moines	15,3018	4.7%	$1,825
North Tacoma[1]	19,638	5.8%	$1,762

Source: CBRE 2023
Note:
(1) Subarea includes Tacoma, Fife, Milton, and the portions of unincorporated Pierce County within the study area.

Table H1-11 Single-Family Residential Property Available for Relocation in the Study Area

Type of Property	Residential Units for Sale	Median Sale Price
Federal Way	132	$608,000
Milton	19	$540,000
Fife	12	$453,000
Tacoma	533	$470,000

Source: Redfin 2023

Sound Transit would help relocate businesses or residences displaced as part of the project. Relocation services provided by Sound Transit include compensation as well support services that consider the unique needs of those being displaced. These services are intended to reduce the inconveniences and hardships associated with being displaced. Sound Transit's relocation policies are summarized in Section 4.1 of the Draft EIS.

2.3.1 Retail

There is enough retail space for sale and for lease to relocate retailers displaced as part of the project. To be successful, retailers often have specific siting requirements, and Sound Transit would perform a case-by-case assessment of the available retail inventory to identify locations that meet the retailers' specific needs. Examples of retailers that may require special consideration are the Pick-Quick in Fife and businesses within Freighthouse Square. Outreach to retailers with unique needs, such as the vendors in Freighthouse Square who share a food court, is ongoing.

2.3.2 Industrial

Adequate industrial space is available in the market to relocate industrial building owners and tenants displaced as part of the project. Industrial users requiring specific lot sizes and utilities may be more difficult to relocate. For industrial users with specific needs, like large lots for storage or truck movement, such as Joe Hall Construction in Fife or Corliss Resources in Federal Way, Sound Transit may need to look outside the market area for a suitable site.

2.3.3 Hotels

Displaced hotel owners would have to locate properties that are for sale or locate suitable sites and develop new hotels. Existing hotels in the study area are limited to Pacific Highway in Fife and E 26th Avenue in Tacoma. All alternatives in the Fife Segment would displace the King's Motor Inn along Pacific Highway. Although hotels do come up for sale, the unique location and layout demands of the displaced hotel may make finding an existing comparable hotel property difficult. New development sites may provide the best opportunity for replacement.

2.3.4 Single-Family Residential

There is a sufficient supply of comparable single-family homes available to accommodate the residents displaced by the project. While comparable homes are available in the general area, displaced residents may have to choose a location in a different neighborhood. Mobile home residents will likely experience difficulty relocating within the same neighborhood if they are seeking to relocate to or move mobile homes to other mobile home parks. Because mobile home parks are often full and not a plentiful source of housing, these types of relocations provide challenges for affected residents as well as the agency. As with all residential displacements, Sound Transit would work to find a comparable replacement property and ensure that properties are affordable for displaced parties.

2.3.5 Multi-Family Residential

Multi-family displacements include the market rate CrossPointe Apartments in South Federal Way. An adequate supply of market rate alternate housing exists, but low-income housing opportunities are limited. Depending on market conditions at the time of displacement, the replacement properties may cost more. Sound Transit would work with residents to identify suitable replacement dwellings as described in Section 4.1 of the Draft EIS.

Appendix H2 Land Use

Appendix H2 contains supporting information for Section 4.2 of the Tacoma Dome Link Extension (TDLE) Draft Environmental Impact Statement (EIS).

1 LAND USE PLANS, GOALS, AND POLICIES

Sound Transit reviewed regional, state, and local plans to identify goals and policies applicable to TDLE. The following sections summarize applicable plans and discuss the project's consistency with them. Tables H2-1 through H2-7 at the end of this section provides a select list of goals and policies from the relevant plans and discusses TDLE's consistency with each of them. While the tables address a number of specific goals and policies, many policies are not listed because they are not applicable or relevant to TDLE (e.g., the policy addresses an area outside the TDLE study area). TDLE would also be required to comply with all permits and approvals from applicable federal, state, and local agencies prior to construction. TDLE is generally consistent with plans and polices in the study area.

1.1 State Regulations and Regional Plans

There are numerous regional and state regulations and planning documents that establish the framework for local land use and transportation plans and programs in the TDLE project area. The Washington State Growth Management Act is the major regulation governing growth management and comprehensive planning in Washington. The primary documents guiding regional planning include *VISION 2050* (PSRC 2020), *The Regional Transportation Plan* (PSRC 2022), Sound Transit's *Regional Transit Long-Range Plan* (Sound Transit, 2014a), the *King County Comprehensive Plan* (King County, 2022), and the *Pierce County Comprehensive Plan* (Pierce County, 2023). Sound Transit has also developed a *Transit-Oriented Development (TOD) Program Strategic Plan Update* (Sound Transit, 2014b). The following subsections provide an overview of each.

Washington State Growth Management Act

Plan Summary

The Washington State Growth Management Act (GMA), adopted in 1990 to mandate comprehensive planning, provides a complete framework for managing growth and coordinating land use development with the construction of transportation facilities and other infrastructure. Local, county, and regional plans in Washington are required to be consistent with the policies of the GMA. The GMA includes 13 planning goals for managing urban growth, protecting agricultural lands, reducing sprawl, and encouraging multimodal transportation systems. The overall goals of the GMA encourage development in urban areas where adequate public facilities and services exist or can be provided efficiently, and they encourage efficient multimodal transportation systems that are based on regional priorities and are coordinated with county and city comprehensive plans.

Comprehensive plans require elements that address land use, housing, capital facilities, utilities, rural development (counties only), and transportation, among others. In addition, the transportation element is required to be consistent with the land use element. Coordination of

land use and transportation is a key component of the GMA. The GMA also mandates cities and counties to establish a process in their comprehensive plans to make the provision for siting essential public facilities, including state or regional transportation and transit facilities.

Project Consistency

TDLE alternatives, including potential stations, would be located within the Cities of Federal Way, Milton, and Tacoma, all of which have adopted comprehensive plans and regulations. The TDLE alternatives are generally consistent with the provisions in the GMA in that it would connect urban centers, reduce sprawl outside urban growth boundaries, and provide transportation system and mobility improvements that support future employment and population growth.

Washington State Shoreline Management Act

The Washington State Shoreline Management Act (SMA) addresses three basic policy areas applicable to development of the state's shorelines: Shoreline use, environmental protection, and public access. The SMA requires all counties and most towns and cities with shorelines to develop and implement local land use policies and regulations to guide the use of shorelines, called Shoreline Master Programs, that are consistent with the SMA. Shoreline Master Programs for local jurisdictions are further discussed below in Section 3.3.

Puget Sound Regional Council VISION 2050

Plan Summary

VISION 2050, adopted by Puget Sound Regional Council (PSRC) in October 2020, serves as the most recent update of the Puget Sound Region's integrated long-range growth management strategy for the four-county metropolitan planning area: King, Kitsap, Pierce, and Snohomish Counties. VISION 2050 focuses on sustainability and encourages the wise use of existing resources and transit investments to strengthen economic, social, and environmental resiliency while addressing climate change and housing needs. Policies and actions in the plan are intended to increase housing choices and affordability, provide equitable opportunities, sustain a strong economy, significantly reduce greenhouse gas emissions, keep the region moving, restore the health of Puget Sound, protect open space networks, focus growth within regional centers and high-capacity transit station areas, and coordinate with and support local planning efforts.

The plan lists a series of multicounty planning policies that are further developed and supported within individual county and city comprehensive plans. VISION 2050 strategies and polices are located within nine elements: regional collaboration, regional growth strategy, environment, climate change, development patterns, housing, economy, transportation, and public services.

Project Consistency

VISION 2050 contains many goals and policies applicable to TDLE. Table H2-1 provides information on the goals and policies of VISION 2050 and how TDLE would be consistent with them.

Puget Sound Regional Council Regional Transportation Plan

Plan Summary

The PSRC Regional Transportation Plan was adopted by PSRC in May 2022. The Regional Transportation Plan is the long-range plan for transportation in the central Puget Sound Region through 2050 and is the transportation element of VISION 2050. The transportation-related plans of the cities, counties, transit agencies, and region form the basis for the plan, which identifies what improvements to highway, transit, rail, ferry, bicycle, and pedestrian systems are needed in order to meet anticipated growth in the central Puget Sound Region.

The Regional Transportation Plan includes an updated regional transit network based on the efforts of the region's transit agencies to integrate more frequent and direct connections to the high-capacity transit network, including investments approved as part of Sound Transit 3 in November 2016.

Project Consistency

TDLE is identified in the Regional Transportation Plan and is a key component in the development of a regional high-capacity system linking urban centers. In addition, the TDLE would allow jurisdictions to better implement transit- and pedestrian-oriented land use patterns where current zoning allows such development to occur.

Sound Transit Regional Transit Long-Range Plan

Plan Summary

Sound Transit's Regional Transit Long-Range Plan represents the agency's goals, policies, and strategies to guide the long-term development of a high-capacity transit (HCT) system, particularly light rail, to connect the people of Pierce, King, and Snohomish Counties. Sound Transit's adopted 2005 Regional Transit Long-Range Plan was updated in 2014. As the regional transit authority under Chapters 81.104 and 81.112 RCW, Sound Transit is responsible for regional HCT system planning in the context of the PSRC Regional Transportation Plan. Beginning with Sound Transit's 1996 Regional Transit Long-Range Vision, the long-range plans have supported the adoption of several measures to implement HCT projects, including Sound Move in 1996, Sound Transit 2 (ST2) in 2008, and Sound Transit 3 in 2016.

Project Consistency

A potential extension of light rail between Federal Way and Tacoma was introduced in Sound Transit's 2005 Regional Transit Long-Range Plan and again in the Plan's 2014 update. Funding for TDLE was included in Sound Transit 3.

Sound Transit – Transit Oriented Development Policy and Program Strategic Plan

Plan Summary

Adopted in September 2011 and updated in April 2014, Sound Transit's *Transit Oriented Development (TOD) Program Strategic Plan Update* describes Sound Transit's vision, goals, and strategy for creating TOD on and around its stations, transit centers, and park-and-ride lots. The plan defines TOD as compact public and private development that supports transit use by emphasizing pedestrian and transit access, such as clustering development and mixing land

uses and activities at and around transit facilities. The purpose of this strategy is to assist the integration of land use and transit in an environmentally responsible and equitable way.

Specifically, the plan outlines an implementation strategy for Sound Transit's TOD program, recognizing that interagency, intra-agency, and public collaboration and support are critical factors for implementing the Sound Transit Board's policies concerning property disposition (Resolution No. R2013-30) and TOD (Resolution No. R2018-10). Of particular importance is the transformation of light rail transit station areas into livable transit communities. Sound Transit's 2012 TOD policy was updated by the Sound Transit Board in 2018 through the adoption of the Equitable Transit Oriented Development Policy, which establishes a framework for Sound Transit to assess and evaluate equitable TOD outcomes early in system planning throughout all phases of transit project delivery.

Project Consistency

TDLE would act as a catalyst in the local jurisdiction station areas that have planned for and allow increased densities. Any TOD on surplus land owned by Sound Transit in station areas would follow the implementation strategy for Sound Transit's TOD program as laid out in the Sound Transit TOD Program strategic plan and Sound Transit's TOD policies.

1.2 Local Land Use Plans

King County Countywide Planning Policies

The 2021 King County Countywide Planning Policies (CPPs) create a shared and consistent framework for growth management planning for all jurisdictions in King County, including the City of Federal Way. The CPPs implement VISION 2050 and reflect new priorities addressing equity and social justice. King County is currently in the process of updating its comprehensive plan, which is anticipated to be adopted by the end of 2024. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-2 discusses the goals and policies of the King County Comprehensive Plan and how TDLE would be consistent with them.

Pierce County Comprehensive Plan and Countywide Planning Policies

The Pierce County Comprehensive Plan was originally adopted in November 1994, with the most recent amendments passed in April 2023, effective July 2023 (Pierce County 2023), and applies to unincorporated Pierce County. The plan elements related to TDLE include Land Use, Environment, Housing, and Transportation. The plan also includes CPPs to guide growth and future land use decisions in Pierce County over a 20-year period. The CPPs provide a framework from which county and city comprehensive plans are developed and adopted, ensure consistency within the county, and apply to the county as a whole, including cities such as Fife and Tacoma as well as the Puyallup Tribe of Indians. Pierce County is currently in the process of updating its comprehensive plan, which is anticipated to be adopted by the end of 2024. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-3 discusses the goals and policies of the Pierce County Comprehensive Plan and how TDLE would be consistent with them.

City of Federal Way Comprehensive Plan

The City of Federal Way Comprehensive Plan was adopted in 1990, updated and amended periodically over the years, with the most recent major update in 2015 (City of Federal Way 2015). The elements in the comprehensive plan identify the goals and policies adopted by the City of Federal Way to shape the community and meet the challenges of growth. Elements identified in the plan and related to TDLE include Land Use, Transportation, Economic Development, Natural Environment, and City Center. The City of Federal Way is currently preparing a subarea plan for the South Station Subarea, anticipated to be adopted as part of the city's 2024 Periodic Update to the Comprehensive Plan. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-4 discusses the goals and policies of City of Federal Way Comprehensive Plan and how TDLE would be consistent with them.

City of Milton Comprehensive Plan

The City of Milton Comprehensive Plan was substantially updated in 2015, and most recently amended in 2018 (City of Milton 2018). The Plan provides a roadmap for future change and growth within the City along with a legal framework to guide future land use, transportation, utility, housing, capital facility, and other City policy decisions. Elements identified in the plan and related to TDLE include Land Use and Transportation. The City of Milton is currently in the process of updating its comprehensive plan, which is anticipated to be adopted by the end of 2024. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-5 discusses the goals and policies of the City of Milton's Comprehensive Plan and how TDLE would be consistent with them.

City of Fife Comprehensive Plan

The City of Fife first adopted its Comprehensive Plan in 1996, with a major update in 2005 and annual updates to various plan elements as needed, with the most recent amendment in 2012 (City of Fife 2012a). It provides the community's decision makers with goals, policies, and implementation methods to guide the future shape, character, and form of the City over the next 20 years. Elements identified in the plan and related to TDLE include Land Use, Transportation, Housing, and Economic Development. The City of Fife is currently in the process of updating its comprehensive plan, which is anticipated to be adopted by the end of 2024. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-6 discusses the goals and policies of the City of Fife's Comprehensive Plan and how TDLE would be consistent with them.

City of Fife City Center Planned Action

The City of Fife began a visioning process in 2012 to design a downtown area that is the center of commercial, civic, cultural, and recreational activities (City of Fife 2012b). The City of Fife wanted to take advantage of the opportunity created by a number of regional transportation improvements, including TDLE, to build upon, reinforce, and refine the TOD land use principles already adopted in the City's existing land use plan documents. The City is now in the process of creating a City Center Plan to serve as a blueprint for development in Fife over the next few decades, which involved the development of a City Center Planned Action EIS. The updated plans may include proposals to rezone areas to eliminate Industrial and Community Commercial categories in the city center and allow mixed-use. The plan would also provide new street standards consistent with complete streets for TOD, higher building allowances, and minimizing residential parking requirements.

Project Consistency

The City of Fife City Center Planned Action is predicated on the construction and operation of TDLE and would support multimodal connections and TOD near the station.

City of Tacoma One Tacoma Plan

One Tacoma is the City's Comprehensive Plan, which was substantially updated in 2015 and most recently amended in 2022 (City of Tacoma 2022). The Plan guides decisions on land use, transportation, housing, capital facilities, parks, and the environment. It also sets standards for roads and other infrastructure, identifies how they will be paid for, and establishes the basis for zoning and development regulations. The plan takes a long-range perspective on topics that address the physical, social, and economic health of the City. Elements identified in the plan related to TDLE include Urban Form, Environment + Watershed Health, Housing, the Transportation Master Plan, and the South Downtown Subarea Plan (discussed separately below). The City of Tacoma is currently in the process of updating its comprehensive plan, which is anticipated to be adopted by the end of 2024. Any updates following the publication of this Draft EIS will be addressed in the Final EIS.

Project Consistency

Table H2-7 discusses the goals and policies of the One Tacoma Plan and how TDLE would be consistent with them.

City of Tacoma South Downtown Subarea Plan (adopted 2013; amended 2014)

The City Council adopted the South Downtown Subarea Plan as an element of the Comprehensive Plan in 2013. It was later amended with a minor map change in 2014 (City of Tacoma 2014). The Plan draws from two previous studies – The Brewery District Development Concept Study (2010) and The Tacoma Dome District Development Strategy Update (2008) – to be an innovative, area-wide long-range plan for South Downtown Tacoma. The goal is to promote economic development and create equitable transit communities in the South Downtown area by leveraging the Subarea's substantial transit investments. TDLE is related to policies and actions that fall within policy Strategy 1: Develop in relationship to transit and Strategy 3: Enhance and connect the public realm.

Project Consistency

Table H2-7 discusses the policies and actions of the South Downtown Subarea Plan and how TDLE would be consistent with them.

Tacoma Tideflats Subarea Plan

The City of Tacoma, in collaboration with the Puyallup Tribe of Indians, Port of Tacoma, City of Fife, and Pierce County is developing the Tideflats Subarea Plan that will establish a long-term vision for the area generally located between the Thea Foss Waterway, the Hylebos Waterway, State Route 509, and Commencement Bay. A Draft EIS for the subarea plan was published in April 2024 (City of Tacoma 2024). One of the topics covered in the Tideflats Subarea Plan is transportation, which includes transit, freight movement, and employee commuting.

Project Consistency

The Portland Avenue Station would be located in the proposed Tideflats area that is designated as an industrial/commercial buffer zone between the core of the industrial center and the adjacent neighborhoods. The addition of TDLE would be consistent with the general concepts of the Tideflats Subarea Plan addressing transit, freight movement, and employees commuting in the area included in all action alternatives in the Draft EIS for the subarea plan.

City of Tacoma, Tacoma 2025

Tacoma 2025 was adopted in 2015 as the City of Tacoma's 10-year strategic plan to direct efforts and resources in ways that reflect the City's evolving needs (City of Tacoma 2015). The plan identifies several community priorities and accountability measures organized under seven areas to guide the City toward its long-term goals. These community priorities were synthesized by the Tacoma 2025 Advisory Committee into five key focus areas: Livability, Economy/Workforce, Education, Civic Engagement, Equity and Accessibility. Those focus areas that are related to TDLE include Livability and Equity and Accessibility.

Project Consistency

Table H2-7 discusses the focus areas and community priorities from Tacoma 2025 that relate to TDLE.

Table H2-1 TDLE Consistency with PSRC VISION 2050

Goals and Policies	Consistency of TDLE Discussion
Puget Sound Regional Council VISION 2050	
Regional Growth Strategy	
Goal: The region accommodates growth in urban areas, focused in designated centers and near transit stations, to create healthy, equitable, vibrant communities well-served by infrastructure and services. **Policies** **MPP-RGS-4:** Accommodate the region's growth first and foremost in the urban growth area. Ensure that development in rural areas is consistent with the regional vision. **MPP-RGS-6:** Encourage efficient use of urban land by optimizing the development potential of existing urban lands and increasing density in the urban growth area in locations consistent with the Regional Growth Strategy.	TDLE would support growth within existing urban growth areas near high-capacity transit stations, where zoning is in place to accommodate this growth, including the designated Tacoma regional growth center. The Fife Station and South Federal Way stations would be located outside regional growth centers, but would provide high-capacity transit to centers throughout the region. Sound Transit's Equitable TOD policy supports the goal of concentrating growth near high-capacity transit by considering TOD outcomes throughout project development and delivery.

Table H2-1 TDLE Consistency with PSRC VISION 2050 (continued)

Goals and Policies	Consistency of TDLE Discussion
Puget Sound Regional Council VISION 2050	
MPP-RGS-8: Attract 65% of the region's residential and 75% of the region's employment growth to high-capacity transit station areas to realize the multiple public benefits of compact growth around high-capacity transit investments. As jurisdictions plan for growth targets, focus development near high-capacity transit to achieve the regional goal. **MPP-RGS-9:** Focus a significant share of population and employment growth in designated regional growth centers. **MPP-RGS-12:** Avoid increasing development capacity inconsistent with the Regional Growth Strategy in regional geographies not served by high-capacity transit.	
Environment	
Goal: The region cares for the natural environment by protecting and restoring natural systems, conserving habitat, improving water quality, and reducing air pollutants. The health of all residents and the economy is connected to the health of the environment. Planning at all levels considers the impacts of land use, development, and transportation on the ecosystem. **Policies** **MPP-En-3:** Maintain and, where possible, improve air and water quality, soils, and natural systems to ensure the health and well-being of people, animals, and plants. Reduce the impacts of transportation on air and water quality and climate change. **MPP-En-5:** Locate development in a manner that minimizes impacts to natural features. Promote the use of innovative environmentally sensitive development practices, including design, materials, construction, and on-going maintenance. **MPP-En-7:** Reduce and mitigate noise and light pollution caused by transportation, industries, public facilities, and other sources. **MPP-En-8:** Reduce impacts to vulnerable populations and areas that have been disproportionately affected by noise, air pollution, or other environmental impacts. **MPP-En-13:** Preserve and restore native vegetation and tree canopy, especially where it protects habitat and contributes to overall ecological function. **MPP-En-14:** Identify and protect wildlife corridors both inside and outside the urban growth area. **MPP-En-15:** Provide parks, trails, and open space within walking distance of urban residents. Prioritize historically underserved communities for open space improvements and investments. **MPP-En-16:** Preserve and enhance habitat to support healthy wildlife and accelerate the recovery of salmon, orca, and other threatened and endangered species. **MPP-En-18:** Reduce stormwater impacts from transportation and development through watershed planning, redevelopment and retrofit projects, and low-impact development. **MPP-En-21:** Continue efforts to reduce pollutants from transportation activities, including through the use of cleaner fuels and vehicles and increasing alternatives to driving alone, as well as design and land use. **MPP-En-22:** Meet all federal and state air quality standards and reduce emissions of air toxics and greenhouse gases.	TDLE would meet all applicable local, state, and federal regulations and standards. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects. Sound Transit considered the minimization of impacts to natural features in locating the TDLE alternatives. TDLE would include stormwater detention and treatment to address impacts related to stormwater runoff. Sound Transit's Environmental Sustainability and Management System requires that low-impact operational stormwater management techniques be investigated and considered during the project design. TDLE would reduce pollutants from transportation by increasing alternatives to driving alone. Sound Transit's noise policy is to minimize noise levels at the source. Identified noise impacts based on federal or local criteria would be mitigated through measures such as noise walls and barriers, sound insulation, and other measures, as appropriate. In addition, Sound Transit has committed to a maintenance program that includes periodic rail grinding or replacement, wheel truing or replacement, vehicle maintenance, and operator training, which would minimize light rail noise levels. TDLE would not provide parks or trails. Some open space would be provided at stations, and bike and pedestrian facility improvements are planned as part of the project.

Table H2-1 TDLE Consistency with PSRC VISION 2050 (continued)

Goals and Policies	Consistency of TDLE Discussion
Puget Sound Regional Council VISION 2050	
Climate Change	
Goal: The region substantially reduces emissions of greenhouse gases that contribute to climate change and prepares for climate change impacts. **Policies** **MPP-CC-1:** Advance the adoption and implementation of actions that substantially reduce greenhouse gas emissions in support of state, regional, and local emissions reduction goals, including targets adopted by the Puget Sound Clean Air Agency. **MPP-CC-2:** Reduce building energy use through green building and retrofit of existing buildings. **MPP-CC-3:** Reduce greenhouse gases by expanding the use of conservation and alternative energy sources, electrifying the transportation system, and reducing vehicle miles traveled by increasing alternatives to driving alone. **MPP-CC-12:** Prioritize transportation investments that support achievement of regional greenhouse gas emissions reduction goals, such as by reducing vehicle miles traveled.	TDLE would reduce dependence on SOV trips, with an associated reduction in greenhouse gas emissions. Such a reduction would be in support of state, regional, and local emissions reduction goals, including targets adopted by the Puget Sound Clean Air Agency.
Development Patterns	
Goal: The region creates walkable, compact, and equitable transit-oriented communities that maintain unique local character, while creating and preserving open space and natural areas. **Policies** **MPP-DP-1:** Develop high-quality, compact urban communities throughout the region's urban growth area that impart a sense of place, preserve local character, provide for mixed uses and choices in housing types, and encourage walking, bicycling, and transit use. **MPP-DP-3:** Enhance existing neighborhoods to provide a high degree of connectivity in the street network to accommodate walking, bicycling, and transit use, and sufficient public spaces. **MPP-DP-4:** Support the transformation of key underutilized lands, such as surplus public lands or environmentally contaminated lands, to higher-density, mixed-use areas to complement the development of centers and the enhancement of existing neighborhoods. **MPP-DP-12:** Design transportation projects and other infrastructure to achieve community development objectives and improve communities. **MPP-DP-14:** Recognize and work with linear systems that cross jurisdictional boundaries – including natural systems, continuous land use patterns, and transportation and infrastructure systems – in community planning, development, and design. **MPP-DP-15:** Design communities to provide safe and welcoming environments for walking and bicycling. **MPP-DP-17:** Promote cooperation and coordination among transportation providers, local government, and developers to ensure that joint- and mixed-use developments are designed to promote and improve physical, mental, and social health and reduce the impacts of climate change on the natural and built environments. **MPP-DP-22:** Plan for densities that maximize benefits of transit investments in high-capacity transit station areas that are expected to attract significant new population or employment growth. **MPP-DP-23:** Evaluate planning in regional growth centers and high-capacity transit station areas for their potential physical, economic, and cultural displacement of marginalized residents and businesses. Use a range of strategies to mitigate displacement impacts.	TDLE would encourage transit use and support transit-oriented development across jurisdictional boundaries. TDLE would also support more dense transit-oriented development near new transit stations in Federal Way, Fife, and Tacoma where zoning is in place to accommodate this growth. Currently only zoning in Tacoma would support this type of growth, but ongoing planning in Federal Way and Fife anticipate changes consistent with TDLE. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation. Bicycle parking would be provided at each station and road improvements, including sidewalks and bike lanes, would also improve multi-modal connectivity to existing neighborhoods. The implementation of high-capacity transit is consistent with the community development objectives of King County, Pierce County, Federal Way, Milton, Fife, and Tacoma, as discussed for each jurisdiction below. In recognition of the project as a linear transportation system that crosses jurisdictional boundaries, Sound Transit will continue to collaborate with these communities on the development of the project. Any displacement of residents and businesses, including marginalized communities, would be mitigated through a range of strategies, including just compensation and targeted outreach and communication.

Table H2-1 TDLE Consistency with PSRC VISION 2050 (continued)

Goals and Policies	Consistency of TDLE Discussion
Puget Sound Regional Council VISION 2050	
MPP-DP-25: Support the development of centers within all jurisdictions, including high-capacity transit station areas and countywide and local centers.	
Economy	
Goal: The region has a prospering and sustainable regional economy by supporting businesses and job creation, investing in all people, sustaining environmental quality, and creating great central places, diverse communities, and high quality of life. **Policies** **MPP-EC-6:** Ensure the efficient flow of people, goods, services, and information in and through the region with infrastructure investments, particularly in and connecting designated centers, to meet the needs of the regional economy. **MPP-EC-21:** Concentrate a significant amount of economic growth in designated centers and connect them to each other in order to strengthen the region's economy and communities and to promote economic opportunity.	TDLE would promote the efficient flow of people and goods through the region, concentrate economic growth in regional growth centers near transit stations in Federal Way and Tacoma, and connect those areas to strengthen the region's economy. TDLE would provide a fast, efficient, and reliable mode of transit with connections to designated centers in the project corridor and throughout the region to meet the needs of the regional economy. TDLE uses dedicated right-of-way to ensure reliability and maximize speeds, when possible.
Transportation	
Goal: The region has a sustainable, equitable, affordable, safe, and efficient multimodal transportation system, with specific emphasis on an integrated regional transit network that supports the Regional Growth Strategy and promotes vitality of the economy, environment, and health. **Policies** **MPP-T-1:** Maintain and operate transportation systems to provide safe, efficient, and reliable movement of people, goods, and services. **MPP-T-5:** Develop a transportation system that minimizes negative impacts to, and promotes, human health. **MPP-T-7:** Fund, complete, and operate the highly efficient, multimodal system in the Regional Transportation Plan to support the Regional Growth Strategy. Coordinate WSDOT, regional, and local transportation agencies, in collaboration with the state legislature, to build the multimodal system. **MPP-T-8:** Strategically expand capacity and increase efficiency of the transportation system to move goods, services, and people consistent with the Regional Growth Strategy. Focus on investments that produce the greatest net benefits to people and minimize the environmental impacts of transportation. **MPP-T-9:** Implement transportation programs and projects that provide access to opportunities while preventing or mitigating negative impacts to people of color, people with low incomes, and people with special transportation needs. **MPP-T-10:** Ensure mobility choices for people with special transportation needs, including persons with disabilities, seniors, youth, and people with low incomes. **MPP-T-11:** Design, construct, and operate a safe and convenient transportation system for all users while accommodating the movement of freight and goods, using best practices and context sensitive design strategies. **MPP-T-12:** Emphasize transportation investments that provide and encourage alternatives to single-occupancy vehicle travel and increase travel options, especially to and within centers and along corridors connecting centers. **MPP-T-13:** Increase the proportion of trips made by transportation modes that are alternatives to driving alone, especially to and within centers and along corridors connecting centers, by ensuring availability of reliable and competitive transit options.	TDLE would build on and expand the utility of the existing regional light rail system that provides safe, efficient, and reliable movement of people and reduced demand for SOV trips. TDLE would provide reliable access to transportation for a wide range of communities, including people with disabilities, seniors, youth, and people with low incomes. TDLE would be located extensively within or adjacent to existing right-of-way. TDLE would include integration with existing and future pedestrian, bicycle, transit, and other transportation modes in the study area. Signage and wayfinding designs would be developed in cooperation with affected jurisdictions. Each station would include an area for riders to transfer to or from buses either on nearby streets or dedicated bus facilities within the station area. All stations would have areas for rider pick-up and drop-off as well as bicycle parking. Sound Transit would make road improvements (such as sidewalks, bike lanes, or widening to accommodate projected traffic levels) at stations. TDLE is a transportation investment that would encourage alternatives to SOV trips and increases travel options to and within designated centers and along corridors connecting centers. TDLE is intended to operate safely and conveniently for all users while accommodating the movement of freight and goods, particularly to and from the designated Manufacturing/Industrial Center in Tacoma, which includes the Port of Tacoma. Each TDLE station, except Portland Avenue, would include added parking, which would make it easy for people to move from one mode to another. Bike and pedestrian facilities would also be included near each station to improve local street patterns for walking, bicycling, and transit use to enhance communities, connectivity, and physical activity. Also, each station would include nearby bus facilities, allowing for easy mode splitting.

Table H2-1 TDLE Consistency with PSRC VISION 2050 (continued)

Goals and Policies	Consistency of TDLE Discussion
Puget Sound Regional Council VISION 2050	
MPP-T-14: Integrate transportation systems to make it easy for people and freight to move from one mode or technology to another. **MPP-T-15:** Prioritize investments in transportation facilities and services in the urban growth area that support compact, pedestrian- and transit-oriented densities and development. **MPP-T-16:** Improve local street patterns – including their design and how they are used – for walking, bicycling, and transit use to enhance communities, connectivity, and physical activity. **MPP-T-17:** Promote and incorporate bicycle and pedestrian travel as important modes of transportation by providing facilities and reliable connections. **MPP-T-18:** Promote coordination among transportation providers and local governments to ensure that joint- and mixed-use developments are designed in a way that improves overall mobility and accessibility to and within such development. **MPP-T-19:** Design transportation programs and projects to support regional growth centers and high-capacity transit station areas. **MPP-T-23:** Make transportation investments that improve economic and living conditions so that industries and skilled workers continue to be retained and attracted to the region. **MPP-T-33:** Prepare for changes in transportation technologies and mobility patterns, to support communities with a sustainable and efficient transportation system.	TDLE is consistent with existing mobility patterns and supports communities with a sustainable and efficient transportation system.

PSRC = Puget Sound Regional Commission; SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension; TOD = transit oriented development

Table H2-2 TDLE Consistency with King County Planning Goals and Policies

Goals and Policies	Discussion
King County Comprehensive Plan	
Regional Growth Management Planning	
RP-109 King County should establish and/or participate in regional and subregional partnerships to advance the objectives of the Comprehensive Plan, such as: a. The King County Cities Climate Collaboration (the "K4C") to confront climate change, b. The Puget Sound Regional Council's Regional Transit Oriented Development Program to advance transit-oriented development around transit stations and hubs, c. The Eastside Rail Corridor Regional Advisory Council, or successor groups, to support a vision that includes dual use (recreation trail and public transportation) and multiple objectives, consistent with its federal railbanked status, and d. The Regional Code Collaboration to collaborate on development of and updates to green building codes. **RP-204** King County shall continue to promote an efficient multimodal transportation system that provides residents with a range of transportation choices that respond to community needs and reduce impacts on the natural environment.	TDLE is a regional project that would expand and promote an existing multimodal transportation system that increases transportation choices for residents and would decrease reliance on SOVs. TDLE would be generally consistent with the GMA and Comprehensive Plan.

Table H2-2 TDLE Consistency with King County Planning Goals and Policies (continued)

Goals and Policies	Discussion
King County Comprehensive Plan	
Urban Communities	
Environment	
E-201 King County should participate in and support appropriate local, regional and national efforts and organizations focused on reducing greenhouse gas emissions and preparing for climate change impacts. **E-214** King County, through its Comprehensive Plan policies and development regulations, should promote healthy community designs that enable walking, bicycling, and public transit use, thereby reducing greenhouse gas emissions and regional air pollution. **E-225** Through land use and transportation actions, King County should work to reduce air quality and climate change related health inequities and the exposure of vulnerable populations to poor air quality and extreme weather events. **E-462** Development shall occur in a manner that supports continued ecological and hydrologic functioning of water resources and should not have a significant adverse impact on water quality or water quantity, or sediment transport, and should maintain base flows, natural water level fluctuations, unpolluted groundwater recharge in Critical Aquifer Recharge Areas and fish and wildlife habitat. **E-474** Development adjacent to wetlands shall be sited such that wetland functions and values are protected, an adequate buffer around the wetlands is provided, and significant adverse impacts to wetlands are prevented. **E-483** Wetland impacts should be avoided if possible, and minimized in all cases. Where impacts cannot be avoided, they should be mitigated on site if the proposed mitigation is feasible, ecologically appropriate, and likely to continue providing equivalent or better biological functions in perpetuity. Where on-site mitigation is not possible or appropriate, King County may approve off-site mitigation. **E-484** Mitigation projects should contribute to an existing wetland system or restore an area that was historically a wetland. Mitigation should only create new wetlands after site monitoring indicates that hydrologic conditions exist to support a new wetland. Mitigation sites should be strategically located to reduce habitat fragmentation or to restore and enhance area-specific functions within a watershed. **E-485** Land used for wetland mitigation should be preserved in perpetuity. Monitoring and maintenance in conformance with King County standards should be provided or paid for by the project proponent until the success of the site is established. Long-term stewardship should occur at mitigation sites to ensure sites continue to provide desired functions and values.	TDLE is a regional transportation project that will enable public transit use and reduce greenhouse gas emissions by providing a more efficient alternative to SOV trips. TDLE would improve air quality and conserve energy. TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts on ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.

Table H2-2 TDLE Consistency with King County Planning Goals and Policies (continued)

Goals and Policies	Discussion
King County Comprehensive Plan	
Transportation	
T-201 Multimodal transportation options such as public transportation, bicycling and walking, are most effective in densely developed urban areas. As resources allow, King County's transportation investments in urban areas should emphasize public transportation and road services and facilities that support multiple modes and facilitate connections between them. **T-204** King County should support local and regional growth plans and policies by focusing transit services on centers and other areas of concentrated activity. **T-205** King County should support, encourage, and implement high-capacity transit facilities and services that are consistent with, and supportive of, the Comprehensive Plan, Metro's Strategic Plan for Public Transportation, Metro's Long Range Plan for Public Transportation and the King County Ferry District 2014 Strategic Plan, or successor plans. **T-320** Transportation improvements should be designed, built, and operated to minimize air, water and noise pollution, greenhouse gas emissions, and the disruption of natural surface water drainage in compliance with provisions and requirements of applicable federal, state and local environmental regulations. Natural and historic resource protection should also be considered. Particular care should be taken to minimize impacts where the location of such facilities could increase the pressure for development in critical areas or Rural Areas and Natural Resource Lands. **T-502** King County should promote a multi-jurisdictional, multimodal regional corridor approach to reducing congestion and improving efficiency on highways and arterial roads.	TDLE would provide a fast, efficient, and reliable transportation system that would serve as an alternative to the SOVs through multiple jurisdictions, connect urban centers, and provide linkages to other travel modes, including rail, bus, and walking. TDLE would support growth around the stations where zoning is in place to accommodate this growth. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation. Sound Transit has considered historic resources in the development of the TDLE alternatives and will continue to do so throughout project development. Potential mitigation measures will be considered, as appropriate for any impacts on historic and culturally significant resources that could not be avoided. TDLE would operate electrically-powered vehicles that would minimize emissions. Sound Transit would minimize noise pollution through periodic rail grinding or replacement, wheel truing or replacement, vehicle maintenance, and operator training, which would minimize light rail noise levels. TDLE would not increase development pressure in critical areas, Rural Areas, or Natural Resource Lands.
Economic Development	
ED-102 The focus for significant economic growth will remain within the Urban Growth Area, while within the Rural Area and Natural Resource Lands, the focus will be on sustaining and enhancing prosperous and successful rural businesses as well as encouraging new businesses that support and are compatible with the rural economic clusters. **ED-401** King County recognizes that adequate infrastructure is essential to support existing economic activity and to attract new industry and development. The county therefore supports and partners on programs and strategies to maintain existing infrastructure and construct new facilities (transportation, utilities, schools, information, communications, including an adequate supply of housing) necessary to accommodate current and future economic demand, in locations and at a size and scale that is consistent with other policies in the Comprehensive Plan.	TDLE would support increased density in urban growth areas in Tacoma and Federal Way where zoning is in place to accommodate this growth and would reduce demand in rural areas, allowing them to be preserved for their preferred values. TDLE is generally consistent with and supportive of comprehensive plans for the cities in which the project would be located.

GMA = Growth Management Act; SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension; TOD = transit oriented development

Table H2-3 TDLE Consistency with Pierce County Planning Goals and Policies

Goals and Policies	Discussion
Pierce County Comprehensive Plan	
Land Use Element	
GOAL LU-14 The County shall design transportation projects and other infrastructure to achieve community development objectives of connectivity, walkability, bikeability, and transit support.	TDLE would include integration with existing and future pedestrian, bicycle, and other transportation modes in the study area. It would also provide connections to other local and regional modes of transportation.
GOAL LU-18 The County will coordinate with local transit providers to support high interval transit service that provides access to services within the entire Center/Central Place or Transit-Oriented Corridor and access to transit facilities that access regional centers of activity.	TDLE would provide frequent, high-capacity transit and would improve access to other centers of activity throughout the region.
GOAL LU-97 Private property shall not be taken for public use without just compensation having been made.	TDLE would be located within or adjacent to existing transportation corridors where possible, but TDLE would require the acquisition of some private property. Sound Transit would comply with local, state, and federal regulations when acquiring property.
Environment Element	
ENV-3.5 Recognize the relationship between reducing vehicle trips and reducing carbon emissions.	TDLE would support the concentration of high-density uses near transit stations, where zoning allows, and reduce reliance on SOVs, which would have a positive impact on air quality and reduce carbon emissions.
Transportation Element	
GOAL T-1 Collaborate in the development of a countywide multimodal transportation system that considers the mobility needs of all residents, emphasizes safety, minimizes impacts to the natural and built environments, and facilitates goods movement.	TDLE would provide frequent, high-capacity public transportation and connections to other countywide modes of transportation, including to and within the Urban Growth Area and throughout the county.
GOAL T-6 Place particular emphasis on the development of an interconnected, multimodal transportation system within designated centers and along corridors connecting centers.	TDLE would build upon an existing regional transportation system as well as provide connections to multimodal systems within designated centers and along a transportation corridor that connects centers.
GOAL T-16 Encourage and cooperate with transit agencies to provide services that meet the needs of residents. **T-16.1** Coordinate with transit agencies to increase the number of routes and frequency, as funding becomes available, especially to underserved areas and designated centers within the unincorporated area. **T-16.5** Encourage transit agencies to add bicycle lockers and other amenities to accommodate multimodal connections.	TDLE would provide a new public transportation option to residents throughout the Puget Sound region. Sound Transit will coordinate with Pierce County regarding the location of transit centers, park-and-ride lots, stations, and bus stops, as well as bike, pedestrian, and bus connections. Sound Transit plans to include bike lockers and other amenities at each TDLE station location.
GOAL T-18 Encourage transit oriented development and prioritize facilities that help connect people to transit, such as sidewalks, trails, crosswalks, and bicycle parking.	TDLE would support growth around the stations where zoning is in place to accommodate this growth. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation. TDLE stations and facilities would be designed to standards that minimize the potential for conflicts among buses, nonmotorized users, and vehicles.

Table H2-3 TDLE Consistency with Pierce County Planning Goals and Policies (continued)

Goals and Policies	Discussion
Pierce County Comprehensive Plan	
GOAL T-29 Impacts on health and the natural and built environments shall be important considerations when designing and implementing facilities. **T-29.2** Locate and construct improvements to discourage adverse impacts on water quality and other environmental resources. **T-29.3** Design facilities to fit within the context of the built or natural environment in which they are located **T-29.8** Solicit and incorporate the concerns and comments of interested parties regarding environmental issues into the planning, design, construction, operation, and maintenance of the system.	TDLE stations and facilities would be designed to standards that minimize the potential for conflicts among buses, nonmotorized users, and vehicles.

SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension

Table H2-4 TDLE Consistency with Federal Way Planning Goals and Policies

Goals and Policies	Discussion
City of Federal Way Comprehensive Plan	
Land Use	
LUP 16 Encourage the development of transportation routes and facilities to serve single-family neighborhoods. Special attention should be given to pedestrian circulation.	Neither TDLE station in the City of Federal Way would be located in an area to serve single-family neighborhoods.
LUP 21 Support multi-family development with transportation and capital facilities improvements.	TDLE would support multi-family development with transportation improvements through TOD near stations.
Transportation	
Goal TG1 Maintain mobility through a safe, balanced, and integrated transportation system. **Policies** **TP1.1** Reduce reliance on drive alone trips by prioritizing and implementing supportive local-level transit, high occupancy vehicle (HOV), and nonmotorized improvements. **TP1.10** Coordinate with transit agencies to provide convenient nonmotorized access to transit facilities.	TDLE would build on an existing high-capacity regional transportation system. TDLE would include integration with existing and future pedestrian, bicycle, and other transportation modes in the study area. TDLE stations would include amenities and considerations for patron needs, including weather protection, pedestrian comfort, and safety designs. Signage and wayfinding designs would be developed in cooperation with affected jurisdictions.
Goal TG3 Enhance community health, livability, and transportation by providing a connected system of pedestrian, bicycle, and transit ways that are integrated into a coordinated regional network. **Policies** **TP3.1** Through subarea planning, with the cooperation of transit service providers, work to make transit part of each neighborhood through appropriate design, service types, and public involvement. This system should provide convenient connections from city neighborhood activity centers to the regional transportation system. **TP3.2** Prepare, promote, and provide for an enhanced, high-capacity, regional transit system, maintaining area residents' mobility and travel options. The regional transit system should assist in attaining air quality standards. **TP3.5** Work with transit agencies to ensure amenities such as shelters, benches, bicycle racks, lighting, and information kiosks are incorporated in the design and improvement of appropriate transit facilities. **TP3.7** Promote extension of fixed guideway facilities to the regional airport as an effective means of resolving congestion problems that affect City residents and businesses. **TP3.17** Coordinate development of the nonmotorized system with surrounding jurisdictions and regional system extensions.	TDLE would be part of a coordinated regional transportation network that would be integrated with existing light rail and bus networks. It would expand public transportation options to Seattle-Tacoma International Airport, which would help ease travel-related congestion. TDLE would include integration with existing and future pedestrian, bicycle, and other transportation modes in the study area. TDLE stations would include amenities and considerations for patron needs, comfort, and safety, including shelters and weather protection, bicycle racks, lighting, and travel information. Signage and wayfinding designs would be developed in cooperation with affected jurisdictions.

Table H2-4 TDLE Consistency with Federal Way Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Federal Way Comprehensive Plan	
TP3.18 Incorporate environmental factors into transportation decision-making, including attention to human health and safety.	
Goal TG5 Develop and implement transportation systems management strategies and programs that contribute to the overall effectiveness of the multimodal transportation system. **Policies** **TP5.1** Reduce auto dependency, especially drive-alone trips, by employing and promoting the application of programs enhance mobility and assist in achievement of the land use vision. **TP5.8** Encourage the provision of a robust transportation alternative rich environment so that all members of the community, including those with transportation disadvantages, have viable travel options or alternatives.	TDLE would promote transit use to and from Federal Way by providing frequent, accessible, and reliable high-capacity transportation to all members of the community, including those with transportation disadvantages. TDLE would reduce auto dependency, including SOV trips.
Goal TG6 Be an active partner by coordinating with a broad range of groups to help meet Federal Way's transportation goals**.** **Policies** **TP6.1** Implement federal, state, and countywide planning policies. **TP6.2** Coordinate transportation improvement programs with appropriate state, regional, and local agencies. **TP6.4** The City will continue to cooperate with regional and local transit providers to develop facilities that make transit a more attractive option. **TP6.7** Support regional transportation projects that are appropriately designed and will preserve the movement of people and goods on I-5 and state routes. **TP6.9** Coordinate with local business organizations, and provide feedback to local business organizations on international and regional transportation issues and on transport needs and opportunities related to all modes of transportation.	TDLE would promote transit use to and from Federal Way by providing frequent, reliable, high-capacity transportation to destinations throughout the region, consistent with federal, state, and countywide planning policies. TDLE would decrease reliance on SOV trips, contributing to the preservation of movement of people and goods on I-5 and other state routes. Sound Transit would coordinate with Federal Way to develop facilities that make transit a more attractive option, including convenient bus to light rail connections.
Economic Development	
Goal EDG2 Help attract, expand, and retain businesses, jobs, and investments that provide employment and enhance income opportunities for Federal Way residents. **Policies** **EDP8** Promote the redevelopment of existing underdeveloped areas as a means to sustain the economy and provide jobs.	TDLE would provide a major regional transportation improvement that would enhance mobility and access within the City, which would support goals to retain business and jobs. TDLE also supports opportunities for redevelopment of underdeveloped areas, but the extent would vary, based on the South Federal Way station site ultimately implemented, as well as underlying City zoning that may ultimately be in place.
Natural Environment	
Goal NEG1 To preserve the City's natural systems in order to protect public health, safety, and welfare, and to maintain the integrity of the natural environment. **Policies** **NEP4** The City will continue to work with internal departments, state and regional agencies, neighboring jurisdictions, and tribes to protect environmentally critical areas and the City's natural environment.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal NEG5 Protect, restore, and enhance the City's lakes and streams. **Policies** **NEP39** Public facilities and utilities may cross lakes or streams where no other feasible alternative exists. Impacts to the resources should be the minimum necessary to complete the project and compensatory mitigation should be required for unavoidable impacts.	TDLE would cross several streams and rivers, including Hylebos Creek and the Puyallup River. TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.

Table H2-4 TDLE Consistency with Federal Way Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Federal Way Comprehensive Plan	
Goal NEG7 Protect and enhance the functions and values of the City's wetlands. **Policies** **NEP46** Impacts to wetlands should be limited. All efforts should be made to use the following mitigation sequencing approach: avoid, minimize, rectify, reduce over time, compensate, and monitor.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal NEG10 Preserve, protect, and enhance fish and wildlife habitat. **Policies** **NEP70** The City should manage aquatic and riparian (stream side) habitat in a way that minimizes its alteration in order to preserve and enhance its ability to sustain fish and wildlife. **NEP71** The City should preserve and enhance native vegetation in riparian habitat wherever possible.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal NEG12 Promote land use patterns and transportation systems that minimize air pollution and greenhouse gas emissions. **Policies** **NEP788** Encourage transportation demand management and alternatives to the single occupancy vehicle in order to reduce energy consumption, air, and water pollution. **NEP90** Encourage compact growth in the City Center and other mixed-use zones that support mass transit, encourage nonmotorized modes of travel, and reduce trip lengths.	TDLE would reduce dependence on SOV trips, with an associated reduction in pollutants and greenhouse gas emissions from transportation activities. TDLE would support the utility of the light rail system south of the Federal Way City Center, where it connects to stations being built as part of the Federal Way Link Extension. It would support growth around new stations in Federal Way where mixed-use zoning is in place to accommodate this growth. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation.
City Center	
Goal CCG18 Plan for land use patterns and transportation systems that minimize air pollution and greenhouse gas emissions. **Policies** **CCP39** Continue to build a multimodal transportation system, as described in Chapter 3, "Transportation," so that people who live and work in Federal Way have a variety of convenient low-or no-emission transportation options.	TDLE would reduce dependence on SOV trips, with an associated reduction in pollutants and greenhouse gas emissions from transportation activities, as well increasing multimodal transportation options for people who live and work in Federal Way.

SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension

Table H2-5 TDLE Consistency with City of Milton Planning Goals and Policies

Goals and Policies	Discussion
City of Milton Comprehensive Plan	
Land Use Element	
Goal EV 1 Safeguard the natural environment for current and future generations. **Policies** **Pol. EV 1.4** Retain and protect wetlands, river and stream banks, ravines, and any other areas that provide essential habitat for sensitive and locally important plant or wildlife species.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal EV 2 Manage development to protect environmentally sensitive lands. **Policies** **Pol. EV 2.1** All development activities should minimize disturbance of and adverse impacts to fish and wildlife resources, including spawning, nesting, rearing and habitat areas, and migratory routes.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.

Table H2-5 TDLE Consistency with City of Milton Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Milton Comprehensive Plan	
Pol. EV 2.2 Limit the unnecessary disturbance of natural vegetation and wooded areas in new developments, in accordance with the critical areas ordinance. **Pol. EV 2.5** Identify the impacts of new development on water quality and require any appropriate mitigating measures. Impacts on fish resources should be a priority concern in such reviews.	
Goal EV 3 Take proactive steps to address climate change. **Policies** **Pol. EV 3.1** Consider a multi-pronged approach to climate change mitigation, including support for energy efficiency, vehicle trip reduction, and environmental protection.	TDLE would reduce reliance on SOV trips throughout the Puget Sound region by providing additional frequent high-capacity public transit.
Transportation	
Goal TR 2 Coordinate with regional transportation entities to ensure maximum connectivity between regional transportation systems and the City of Milton	TDLE would pass through Milton, but no stations would be located there. Sound Transit would coordinate with the City of Milton and other transit agencies regarding connectivity to TDLE stations in Federal Way and Fife.
Goal TR 3 Maintain an environmentally sustainable transportation system that preserves sensitive habitat, protects natural resources and meets air quality requirements. **Policies** **Pol. TR 3.6** Transportation facilities and services should be sited, designed, and buffered (through extensive screening and/or landscaping) to fit in harmoniously with their surroundings. When sited within or adjacent to residential areas, special attention should be given to minimizing environmental, noise, light, and glare impacts.	TDLE would provide a sustainable transportation system that would be located adjacent to I-5 or Pacific Highway through Milton and would travel along the boundaries of residential neighborhoods to avoid bisecting the neighborhoods. TDLE's location adjacent to an existing highway would increase the new facility's compatibility with its surroundings, discussed further in Section 4.5, Visual and Aesthetic Resources. TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects. Sound Transit's noise policy is to minimize noise levels at the source. In addition, Sound Transit has committed to a maintenance program that includes periodic rail grinding or replacement, wheel truing or replacement, vehicle maintenance, and operator training, which would minimize light rail noise levels.
Goal MM 1 The City shall strive to develop, maintain, and operate a balanced, flexible, safe, and efficient multi-modal transportation system to serve all persons, special needs populations and activities in the community. **Policies** **Pol. MM 1.2** The City shall encourage the implementation of measures that will relieve pressures on the existing transportation infrastructure, including: a. multi-modal transportation alternatives; b. land use coordination; c. prioritized improvements; d. park-and-ride lots. **Pol. MM 1.3** The City shall encourage the integration, coordination, and linkage of the connections and transfer points between all modes of transportation. **Pol. MM 1.4** The City shall work with local and regional transit agencies to provide transit service that links Milton with surrounding communities, regional rail transit, and major employment and commercial centers in the region. **Pol. MM 1.8** The City shall coordinate the development of its nonmotorized facilities with adjacent jurisdictions to ensure an efficient, continuous, regional network.	TDLE would implement a new public transportation option through Milton, with multimodal connections from Milton to nearby stations in Fife and Federal Way, as well as other destinations connected by the regional light rail system. Sound Transit will coordinate with the City of Milton regarding local and regional transit service that would link Milton to the regional rail system and develop connecting and complementary transit service.

Table H2-5 TDLE Consistency with City of Milton Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Milton Comprehensive Plan	
Pol. MM 1.11 The City shall support coordination with transit agencies such as Pierce Transit, Sound Transit, and King County Metro in developing connecting and complementary transit service.	

SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension; TOD = transit oriented development

Table H2-6 TDLE Consistency with City of Fife Planning Goals and Policies

Goals and Policies	Discussion
City of Fife Comprehensive Plan	
Land Use	
Goal 1 Maintain a reasonable and sustainable land use pattern as growth occurs while discouraging sprawl. **Policies** **Policy 1.2** Guide growth toward the creation of compact, efficient patterns of land use. **Policy 1.4** Encourage infill development of vacant or underutilized land within existing urbanized areas.	TDLE could provide TOD development opportunities near stations and within the City of Fife's City Center Vision area, which may include potential redevelopment plans and land use changes to support TOD.
Goal 14 Encourage the development of a downtown area as a center of commercial, civic, cultural and recreational activities. **Policies** **Policy 14.1** Create a vibrant, compact downtown area that is an inviting place to work, shop, live and socialize. **Policy 14.2** Encourage mixed-use development that balances residential, public, entertainment and business uses.	Fife's "Downtown District Center" is within the TDLE study area. TDLE would increase access to the area, which would support the development of a downtown area as envisioned by the city.
GOAL 15 Become a more sustainable community with regard to universal responsibility, interconnectedness, health, wellness of our people, our culture and our planet. **Policies** **Policy 15.3** Encourage more compact development and "complete streets" to provide options for residents and businesses to reduce the City's need for fossil fuels and provide opportunities for nonmotorized modes of transportation to improve public health and safety, and provide for multiple environmental benefits.	TDLE would contribute to long-term sustainability by reducing reliance on SOV trips, with a resulting reduction in consumption of fossil fuels. It would promote nonmotorized transportation by improving pedestrian and bicycle access connections to transit stations.
Transportation	
Goal 1 Provide for a well-connected, efficient transportation system that offers choices in travel modes, seeks to reduce traffic congestion in Fife, and reduces dependence on the single occupancy vehicle. **Policies** **Policy 1.1** Pursue opportunities to create a well-connected street and sidewalk network to give people more transportation options, reduce travel distances, encourage walking and biking, and improve traffic flow and emergency vehicle response times. **Policy 1.2** Develop a transportation system responsive to all transportation modes. **Policy 1.3** Work with transit providers to facilitate the extension of transit services and to maintain existing facilities.	TDLE is listed as a Recommended Transportation Improvement project in Roadway Projects to be Completed by Other Agencies (Table TR-11). It will provide a well-connected, efficient transportation system through Fife and help to reduce congestion and reliance on SOVs. TDLE would include access improvements near the station in Fife to reconnect the street grid and improve network connectivity.
Goal 3 Promote and encourage the use of Transportation Demand Management (TDM) strategies to reduce traffic in the City. Policies **Policy 3.2** Encourage transit-oriented development in areas served by and planned to be served by transit.	TDLE would support transit-oriented development near stations, where zoning designations allow.

Table H2-6 TDLE Consistency with City of Fife Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Fife Comprehensive Plan	
Goal 5 Maintain an environmentally sustainable transportation system, addressing sensitive habitat corridors, and air quality requirements. **Policies** Policy 5.2 Protect air quality from adverse impacts.	TDLE would comply with applicable local, state and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts to ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal 6 Use transportation planning and projects to support and implement the City's Strategic Plan. **Policies** **Policy 6.1** Review projects identified on the Six-Year Transportation Improvement Plan and long range project list for consistency with the City Strategic Plan, and give higher priority to projects that best implement and support the City's Strategic Plan.	TDLE is listed as a Recommended Transportation Improvement project in Roadway Projects to be Completed by Other Agencies (Table TR-11).
Economic Development	
Goal: Improve the local economy meeting the needs of local residents and businesses and providing for a sustainable tax base. **Policies** **Policy 3** Improve the quality of life in the community to make the city a desirable place for businesses to invest and for their employees to live.	TDLE would increase transportation options to Fife, which may increase its desirability as a place for businesses to invest and for their employees.

SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension; TOD = transit oriented development

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
Urban Form	
Goal UF-1: Guide development, growth, and infrastructure investment to support positive outcomes for all Tacomans. **Policies** **Policy UF-1.4:** Direct the majority of growth and change to centers, corridors, and transit station areas, allowing the continuation of the general scale and characteristics of Tacoma's residential areas. **Policy UF-1.5:** Strive for a built environment designed to provide a safe, healthful, and attractive environment for people of all ages and abilities. **Policy UF-1.6:** Support energy-efficient, resource-efficient, and sustainable development and transportation patterns through land use and transportation planning. **Policy UF-1.8:** Recognize the importance of the city's established street grid pattern, block sizes, and intersection density in supporting multi-modal transportation, quality urban design, and 20-minute neighborhoods. Whenever practicable, the established grid pattern should be preserved and enhanced to achieve the city's goals for urban form, and design and development.	TDLE would support growth around the stations where zoning is in place to accommodate this growth. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation. TDLE would include bike and pedestrian improvements that would support a safe, healthful, and attractive environment for people of all ages and abilities, and would support energy and resource-efficient transportation patterns by providing a new transit option. TDLE would modify the existing street grid pattern and block sizes near the station alternatives, but such modification is limited to preserve the established grid, block size, and intersection density as practicable.
Goal UF-4: Catalyze the Downtown as Tacoma's and the South Puget Sound's largest center with the highest concentrations of housing and with a diversity of housing options and services. **Policies** **Policy UF-4.1:** Strive to achieve Downtown Tacoma's regional allocation of housing and employment and continue its growth as a regional center for innovation and exchange through diverse transit-oriented housing opportunities, commerce, employment, arts, culture, entertainment, tourism, education, and government.	TDLE would support Downtown Tacoma as a regional transportation hub and optimize regional access to Downtown Tacoma by providing connections between the existing Tacoma Link rail system and the larger regional light-rail system. TDLE is anticipated to catalyze housing development, particularly in areas appropriate for TOD.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
Policy UF-4.3: Enhance the Downtown as a regional transportation hub and optimize regional access to Downtown Tacoma's destinations.	
Goal UF-9: Promote future residential and employment growth in coordination with transit infrastructure and service investments. **Policies** **Policy UF-9.1:** Encourage transit-oriented development and transit-supportive concentrations of jobs and housing, and multimodal connections, at and adjacent to high-frequency and high-capacity transit stations. **Policy UF-9.2:** Integrate transit stations into surrounding communities and enhance pedestrian and bicycle connections to provide safe access to key destinations beyond the station area. **Policy UF-9.3:** Design transit areas to improve pedestrian, bicycle, and personal safety within the station and the station area. **Policy UF-9.4:** Encourage transit stations in centers to provide high density concentrations of housing and commercial uses that maximize the ability of residents to live close to both high-quality transit and commercial services. **Policy UF-9.5:** Encourage concentrations of jobs and employment-focused land uses in and around stations in employment areas. **Policy UF-9.6:** Enhance connections between major destinations and transit facilities and strengthen the role of these stations as places of focused activity. **Policy UF-9.7:** Encourage concentrations of mixed-income residential development and supportive commercial services close to high capacity transit stations that are not located in a center.	TDLE would support growth around the stations where zoning is in place to accommodate this growth. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation.
Goal UF-10: Establish designated corridors as thriving places that support and connect Tacoma's centers. **Policies** **Policy UF-10.1:** Enhance the design and transportation function of Centers, Corridors, Transit Station Areas, and Signature Trails. **Policy UF-10.2:** Evaluate adjacent land uses to help inform street classifications in framing, shaping and activating the public space of streets. **Policy UF-10.3:** Integrate both the placemaking and transportation functions when designing and managing streets by encouraging design, development, and operation of streets to enhance opportunities for them to serve as places for community interaction, environmental function, open space, recreation, and other community purposes. **Policy UF-10.4:** Encourage the design and alignment of corridors to respond to topography and natural features, and to maintain public views of prominent landmarks and buildings that serve as visual focal points within streets or that terminate at the end of streets. **Policy UF-10.5:** Enhance Avenues as distinctive places with transit-supportive densities of housing and employment, and high-quality transit service and pedestrian and bicycle facilities that are models of ecologically-sensitive urban design. **Policy UF-10.6:** Encourage public street and sidewalk improvements along Avenues to support the vitality of business districts, create distinctive places, provide a safe and attractive pedestrian environment, and contribute to creating quality living environments for residents. **Policy UF-10.7:** Improve Avenues as key mobility corridors of citywide importance that accommodate all modes of transportation within their right-of-way or on nearby parallel routes.	TDLE would connect two of Tacoma's Mixed Use Urban Centers (Downtown and McKinney) and is located within the PSRC Downtown regional growth center. TDLE would also include bike and pedestrian improvements near stations, including a potential pedestrian bridge over I-5 near the Portland Avenue Station (while the bridge is not currently a part of the funded project, it is an option analyzed in this Draft EIS). TDLE may impact the street grid near the Tacoma Dome Station location.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
Environment + Watershed Health	
Goal EN-1: Ensure that Tacoma's built and natural environments function in complementary ways and are resilient to climate change and natural hazards. **Policies** **Policy EN-1.13:** Coordinate transportation and stormwater system planning in areas with unimproved or substandard rights of way to improve water quality, prevent localized flooding, enhance pedestrian safety and neighborhood livability. **Policy EN-1.30:** Promote community resilience through the development of climate change adaptation strategies. Strategies should be used by both the public and private sectors to help minimize the potential impacts of climate change on new and existing development and operations, include programs that encourage retrofitting of existing development and infrastructure to adapt to the effects of climate change.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. TDLE would include stormwater and drainage components coordinated with new transportation infrastructure.
Goal EN-2: Protect people, property and the environment in areas of natural hazards. **Policies** **Policy EN-2.3:** Employ special building design, construction, maintenance and operational measures and critical area regulations to minimize the risk of structural damage, fire and injury to occupants, impacts to natural resources and to prevent post-seismic collapse in areas with severe seismic hazards.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts on ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects.
Goal EN-3: Ensure that all Tacomans have access to clean air and water, can experience nature in their daily lives and benefit from development that is designed to lessen the impacts of natural hazards and environmental contamination and degradation, now and in the future. **Policies** **Policy EN-3.2:** Evaluate the potential adverse impacts of proposed development on Tacoma's environmental assets, their functions and the ecosystem services they provide. **Policy EN-3.3:** Require that developments avoid and minimize adverse impacts, to the maximum extent feasible, to existing natural resources, critical areas and shorelines through site design prior to providing mitigation to compensate for project impacts. **Policy EN–3.4** Encourage mitigation approaches when preservation is not feasible that maximize the intended ecosystem benefits. Require on-site or use of established approved mitigation banks versus off-site mitigation; unless off-site mitigation within the same watershed will improve mitigation effectiveness. **Policy EN–3.5** Discourage development on lands where such development would pose hazards to life, property or infrastructure, or where important ecological functions or environmental quality would be adversely affected: a. Floodways and 100-year floodplains b. Geologic hazard areas c. Wetlands d. Streams e. Fish and wildlife habitat conservation areas f. Aquifer recharge areas g. Shorelines Policy **Policy EN–3.6** Limit impervious surfaces within open Space Corridors, shorelines and designated critical areas to reduce impacts on hydrologic function, air and water quality, habitat connectivity and tree canopy.	The TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts on ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects. TDLE would limit impervious surfaces in shorelines and designated critical areas to reduce impacts on hydrologic function, air and water quality, habitat connectivity, and tree canopy.
Goal EN-4: Achieve the greatest possible gain in environmental health City-wide over the next 25 years through proactive planning, investment and stewardship. **Policies** **Policy EN-4.7:** Ensure that plans and investments are consistent with, and advance, efforts to improve air quality and reduce exposure to air toxics, criteria pollutants and urban heat island effects. Consider air quality related health impacts on all Tacomans. **Policy EN-4.41**: Support the reduction of Tacoma's greenhouse gas emissions consistent with the City's adopted targets.	TDLE would contribute to achieving gains in environmental health through proactive planning, investment, and stewardship. TDLE would improve air quality and reduce greenhouse gas emissions by reducing reliance on SOV trips in part by creating a safe, clean, and integrated multimodal transportation system.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
Policy EN-4.43: Reduce greenhouse gas emissions associated with single occupant vehicles and trucks hauling freight by creating a safe, clean and integrated multimodal transportation system.	
Housing	
Goal H-1 Promote access to high-quality affordable housing that accommodates Tacomans' needs, preferences, and financial capabilities in terms of different types, tenures, density, sizes, costs, and locations. **Policies** **Policy H-1.9** Apply infill housing approaches to create additional housing opportunities for low and mid-range (Missing Middle) housing types.	TDLE would support growth around the stations, including affordable housing, where zoning is in place to accommodate this growth.
Goal H-3 Promote safe, healthy housing that provides convenient access to jobs and to goods and services that meet daily needs. This housing is connected to the rest of the city and region by safe, convenient, affordable multimodal transportation. **Policies** **Policy H-3.2** Locate higher density housing, including units that are affordable and accessible, in and around designated centers to take advantage of the access to transportation, jobs, open spaces, schools, and various services and amenities. **Policy H-3.5** Improve equitable access to active transportation, jobs, open spaces, high-quality schools, and supportive services and amenities in areas with high concentrations of under-served populations and an existing supply of affordable housing. **Policy H-3.6** Locate new affordable housing in areas that are opportunity rich in terms of access to active transportation, jobs, open spaces, high-quality schools, and supportive services and amenities.	TDLE would provide convenient, affordable access from Tacoma to multiple destinations throughout the Puget Sound and would support increased growth, including housing, around stations where zoning is in place to accommodate this growth.
GOAL H-4 Support adequate supply of affordable housing units to meet the needs of residents vulnerable to increasing housing costs. **Policies** **Policy H-4.4** Facilitate the expansion of a variety of types and sizes of affordable housing units, and do so in locations that provide low-income households with greater access to convenient transit and transportation, education and training opportunities, Downtown Tacoma, manufacturing/industrial centers, and other employment areas.	TDLE would provide households of all income levels convenient transit access to education and employment opportunities in Downtown Tacoma, the manufacturing/industrial center between Tacoma and Fife, and other locations throughout the region. TDLE would provide opportunities to build affordable housing near stations in Tacoma, providing greater access to convenient transit, education and training opportunities, and other employment areas.
Economic Development	
Goal EC–4 Foster a positive business environment within the City and proactively invest in transportation, infrastructure, and utilities to grow Tacoma's economic base in target areas. **Policies** **Policy EC–4.9** Maintain and improve the transportation network as necessary to facilitate the efficient movement of goods and attract economic activity.	TDLE would improve the transportation network in Tacoma, which is anticipated to attract economic activity, discussed further in Section 4.3, Economics.
Transportation	
1. Intergovernmental Coordination and Citizen Participation **Goal:** Proactively develop partnerships to best serve all users of the regional transportation system. **Policies** **1.1 Intergovernmental Coordination** Ensure a well-planned regional transportation system that uses resources efficiently to serve all users through active coordination with federal, state, regional, local, tribal, and other interested agencies. **1.2 Citizen Participation** Include and encourage citizen participation in all transportation planning efforts through workshops, volunteer commissions, social media, and other outlets to accommodate the needs and desires of the public. Include specific outreach to traditionally underserved or vulnerable populations. Carry work done for subarea plans forward into more broad-reaching efforts.	Sound Transit has coordinated with federal, state, regional, local tribal and other interested agencies on the siting of TDLE facilities and would continue to coordinate with those agencies and citizens, including specific outreach to underserved or vulnerable populations. TDLE will be generally consistent with the planning policies of all jurisdictions and the GMA. No TOD has been specifically identified as part of TDLE. However, TDLE would support TOD, to the extent zoning would allow, by improving reliability, availability, and convenience of light rail transit.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
1.4 Partner with Transit Integrate land use and transportation planning, promote transit-oriented or transit-supportive development (TOD) and multimodal transit access, and ultimately improve the reliability, availability, and convenience of bus, streetcar, and light rail transit options for all users and modes through partnerships with public transit agencies, local and regional government, and other regional agencies to leverage resources.	
2. Community Preservation **Goal:** Protect natural, as well as neighborhood, assets to create and connect places where people can live, work, and play in a safe and healthy environment. **Policies** **2.1 Community Coordination** Assess the effect of potential transportation projects on gathering places or destinations such as schools, community centers, businesses, neighborhoods, and other community bodies by consulting with stakeholders and leaders that represent them. Mitigate these effects when possible. **2.2 Urban Design** Support the appearance and form of the City through consideration of aesthetics, beautification, and safety in designing and locating transportation facilities. The Generalized Land Use Element provides more detail on design standards. **2.4 Promote Health** Improve the health of Tacoma's residents and local ecology by implementing a transportation network that reduces auto mode share, increases the number of active travelers and transit riders of all ages and abilities, and improves safety in all neighborhoods. Work with the Tacoma-Pierce County Health Department and other agencies to promote active lifestyles through educational programs and safe and accessible routes for active travelers of all ages and abilities in all neighborhoods.	TDLE would increase Tacoma's connections to other commercial and residential areas throughout the region. TDLE would be constructed adjacent to existing highways or other transit facilities, to the extent possible. Sound Transit has adopted a community outreach plan that would facilitate the community coordination addressed by this policy. See Appendix B to the Draft EIS. Station design will require local approval, consistent with Policy 2.2. Potential visual impacts are discussed further in Section 4.5, Visual and Aesthetic Resources.
3. Multimodal System **Goal:** Prioritize the movement of people and goods via modes that have the least environmental impact and greatest contribution to livability in order to build a balanced transportation network that provides mobility options, accessibility, and economic vitality for all across all neighborhoods. **Policies** **3.3 Mode Split Target** Achieve the Climate Action Plan (CAP) goal of reducing GHGs from transportation sources by increasing the non-single occupant vehicle mode split by 2035, and continue gains thereafter. Mode split targets will be based on all trips in addition to commute trips, established for all modes, and set at lower single occupancy vehicle (SOV) levels for regional growth centers (RGCs) than the rest of the City. To the extent that data is available to track mode split in Tacoma's mixed use centers (MUCs), the MUC targets should also be set at higher non-SOV levels than citywide. **3.7 Special Needs of Transportation Users** Recognize and accommodate the special transportation needs of the elderly, children, and persons with disabilities in all aspects of transportation planning, programming, and implementation. Satisfy the community's desire for a high level of accommodation for persons with disabilities using local, state, or federal design standards. **3.8 Equity in Transportation** Support the transportation needs of traditionally underserved neighborhoods and vulnerable populations, as listed under Goal 2, through investment in equitable modes of transportation and equal spending throughout the City, in addition to potential catch-up investment for areas in need, as necessary.	TDLE would reduce reliance on SOV trips and associated greenhouse gas emissions from transportation sources. TDLE would recognize and accommodate the transportation needs of the elderly, children, and riders with disabilities by adhering to local, state, and federal design standards. TDLE would encourage transit ridership by improving pedestrian access to stations, conducting outreach to employers, and working with public transit agencies to identify strategies to improve the frequency and ridership of transit service, including traditionally underserved neighborhoods and vulnerable populations. The project would locate stations near new and existing transit hubs for the convenience of passenger transfers and to encourage operational efficiency. Specifically, each Tacoma Dome station alternative was paired with bus facility options for purposes of evaluation in the Draft EIS. See Chapter 2.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
3.12 Transit Operational Efficiency Support efficient transit operations through street and transit stop designs on transit priority streets that comply with standards and include transit-supportive elements for bus, streetcar, and light rail transit. **3.13 Encourage Transit Ridership** Encourage transit ridership by implementing pedestrian improvements near transit stops, conducting outreach to employers, and working with public transit agencies to identify strategies to improve the frequency and ridership of transit service, including bus, streetcar, and light rail, between high density residential areas and employment centers. These strategies would include locating transit stops/stations to maximize convenience of transfers between modes and/or connecting to other routes.	
4. Environmental, Fiscal Stewardship and Social Accountability **Goal:** Design an environmentally, socially, and fiscally sustainable transportation system that serves its users through strategic planning efforts, funding, and projects. **Policies** **4.1 Minimum Environmental Disruption** Minimize the disruption of natural and desirable community amenities of our environment by employing a collaborative, interdisciplinary approach that involves all stakeholders, particularly those traditionally being underserved, to develop a transportation facility that fits its physical setting and preserves scenic, historic, and environmental resources while maintaining safety and mobility. **4.2 Noise and Air Pollution** Encourage the reduction of noise and air pollution from various modes of transportation and ensure the City of Tacoma meets ambient air quality standards by promoting active modes of transportation and the use of alternative fuels for vehicles. **4.4 Congestion Management** Decrease the use of SOVs and the environmental degradation associated with their use by encouraging and improving the appeal, convenience, and time competitiveness of travel by active modes, public transit, assistive devices, and ridesharing.	TDLE would comply with applicable local, state, and federal regulations. Design of the project would minimize impacts, and mitigation would be provided where impacts occur. Sound Transit's policy on ecosystem mitigation is to avoid impacts on environmentally sensitive resources and provide adequate mitigation for unavoidable impacts on ensure no net loss of ecosystem function and acreage as a result of Sound Transit projects. Sound transit has considered historic resources in the development of the TDLE alternatives and will continue to do so throughout project development. Potential mitigation measures will be considered, as appropriate for any impacts on historic and culturally significant resources that could not be avoided.
6. Land Use and Transportation **Goal:** Build a transportation network that reinforces Tacoma's land use vision, Vision 2040 and the GMA. **Policies** **6.1 Land Use Considerations** Ensure reasonable access for all modes to places of employment, schools, libraries, parks, transit centers, civic buildings, and other attractions in Tacoma through development, expansion, or improvement of transportation facilities that are coordinated with existing and projected land use patterns and types of development. Similarly, development patterns and designs should account for their effects on the transportation system. **6.2 Land Use Patterns** Encourage land use patterns and developments, especially in MUCs, that support non-SOV travel, access to multimodal options and intermodal connectivity, opportunities to live close to work, and short trips easily made by walking or bicycling for recreation and commuting. **6.3 20-Minute Neighborhoods** Prioritize infrastructure improvements within and between 20-minute neighborhoods based around Tacoma's centers for growth and along identified corridors that connect residential areas to schools, local retail, business, and community services so residents can safely access more of the services they need close to home by active modes, public transit, and using assistive devices.	TDLE would support growth around the stations where zoning is in place to accommodate this growth and supportive of the 20-minute Neighborhood. The increased density would allow more efficient use of land, allowing for an efficient provision of services and facilities as well as promoting physical activities, including walkability, and the use of nonmotorized modes of transportation. TDLE would be generally consistent with Tacoma's land use vision, Vision 2050, and the GMA. TDLE is located in MUCs and supports non-SOV travel and access to multimodal options and intermodal connectivity and would provide additional access for residents to access services they need. Transit stations would include context-sensitive design that considers the unique needs of each neighborhood, including those for parking and public spaces. Where appropriate, Sound Transit would facilitate TOD with local jurisdictions and potential development partners in accordance with Sound Transit's Equitable Transit Oriented Development Policy (Sound Transit 2018a). Additional discussion of TOD is included in Sections 4.2.3.4 and 4.3.3.4.

Table H2-7 TDLE Consistency with City of Tacoma Planning Goals and Policies (continued)

Goals and Policies	Discussion
City of Tacoma – One Tacoma Plan	
6.4 Support Mixed-Use Centers Serve and support the existing MUCs and aid Tacoma in attracting new investments by giving high priority to those transportation facilities that serve these centers. Increase the livability of the MUCs by providing transportation choices and integrating amenities that create a safe and inviting environment for walking, bicycling, and taking public transit. Transportation facilities should include context-sensitive design that considers the unique needs of each neighborhood, such as on-street parking and public spaces. **6.8 Transit-Oriented Development** Promote TOD or transit-supportive development and provide incentives for development that includes specific TOD features. Elements of TOD generally include: • A compact mix of land uses, including mixed-use, residential, and commercial development; • Moderate to high density housing; • Affordable housing for all income groups; • Pedestrian orientation/connectivity; • Convenient access to transportation choices, including transit, bicycle, and pedestrian facilities; • Reduced size of surface parking facilities • or minimum parking requirements; and • High quality design.	
Tacoma South Downtown Subarea Plan	
Strategy 1: Develop in relationship to transit **Policies**: **Policy 1.2:** Improve safety and convenience for active transportation on access to fixed-rail transit and the Tacoma Dome Station. **Policy 1.3:** Coordinate with transit agencies to prioritize future high-frequency transit service allocations that will help catalyze redevelopment and the creation of complete communities. **Policy 1.4:** Manage parking to support transit access and promote transit ridership.	TDLE is identified as an action item in the Tacoma South Downtown Subarea Plan to maximize South Downtown's redevelopment potential.
Tacoma 2025	
Advisory Committee Key Focus Areas	
Livability, Equity and Accessibility **Indicators** Improve access and proximity by residents to diverse income levels and race/ethnicity to community facilities, services, infrastructure, and employment.	The TDLE would improve access and proximity to frequent, high-capacity transit throughout the Puget Sound region.
Tacoma 2025 Plan Focus Areas	
Built and Natural Environment **Priorities** **6A** Increase transportation options. Tacomans need to be mobile, with transportation choices including transit, bicycling, and walking. **6C** Grow and enhance the vitality of Tacoma's neighborhoods. Transit-oriented and infill development, as well as reuse of historic buildings and districts, provides housing, economic, and environmental benefits.	TDLE would increase the transportation options available to and from Tacoma and support transit-oriented development in the areas where zoning is in place to accommodate this growth.

EIS = environmental impact statement; GMA = Growth Management Act; SOV = single-occupancy vehicle; TDLE = Tacoma Dome Link Extension; TOD = transit oriented development

1.3 Shoreline Master Programs

Each of the jurisdictions where TDLE would be located have adopted local shoreline master programs to meet the requirements of the Washington State SMA. For example, the City of Tacoma Shoreline Master Program (Tacoma SMP) was most recently amended in 2019 (City of Tacoma 2019) and provides goals, policies, and regulations for shoreline use and protection, and establishes a permit system for administering the Tacoma SMP. In general, the Tacoma SMP applies to all land and water within Tacoma that falls under the jurisdiction of the SMA, including the shorelines of portions of Puget Sound, the Puyallup River, and Wapato Lake.

The City of Milton Shoreline Master Program (Milton SMP) was adopted in 2012 (City of Milton 2012) and similarly implements the SMA related to shorelines in the City of Milton. The west bank of Hylebos Creek in the vicinity of TDLE is within Urban Conservancy shoreline zone.

TDLE alternatives may also be located within the shoreline jurisdiction for any regulated water bodies within the cities of Federal Way and Fife, and King or Pierce counties, such as areas near streams, wetlands, and rivers. Specifically, the City of Federal Way Shoreline Master Program (adopted 2011) (City of Federal Way 2011), the City of Fife Shoreline Master Program (adopted 2013) (City of Fife 2013), the King County Shoreline Master Program (adopted 2013, amended 2019) (King County 2019), and the Pierce County Shoreline Master Program (adopted 2015, amended 2018) (Pierce County 2018). TDLE would comply with all applicable shoreline master programs.

H3 ECONOMICS SUPPORTING INFORMATION

This appendix provides background information that supports the economic analysis in the Draft Environmental Impact Statement Section 4.3, Economics.

H3.1 Regional Demographic and Economic Trends

As of 2020, the central Puget Sound region is home to approximately 4.3 million people and 2.3 million jobs. The region has seen considerable growth over the past decade, with King County holding the most residents (2.26 million) and jobs (1.43 million). Population growth is expected to continue, reaching nearly 6 million by 2050, driven by an anticipated addition of 1.6 million people. This expansion is also marked by the transformation of smaller cities and neighborhoods into denser urban areas, with suburban cities like Tacoma and Federal Way adding thousands of residents and jobs.

Economically, the region is characterized by a diverse array of key industries that fuel its growth and global competitiveness. The aerospace sector, anchored by Boeing, employs an estimated 121,000 workers and accounts for nearly 6 percent of all jobs in the region, a concentration three times the national average. The information and communication technology sector is the largest and fastest-growing, providing over 260,000 jobs in 2020, with a 10.6 percent annual growth rate between 2015 and 2020. Major companies like Microsoft, which employs over 58,000 workers in Washington, and Amazon, with approximately 75,000 employees in the region, are key drivers of this growth. Other critical industries such as maritime and military and defense support tens of thousands of jobs; for example, Naval Base Kitsap alone contributes $4 billion annually in economic impact and employs over 33,000 workers, including civilians and defense contractors.

Despite the region's robust economic profile, there are notable disparities in economic prosperity and access to opportunities. Median household income varies notably by county, with King County leading at $95,000, while Kitsap and Pierce counties are below $77,000. Income disparities are also evident across racial and ethnic lines: Asian households earn the highest at an average of $104,000, whereas Pacific Islander, Hispanic/Latino, and Black households earn well below the regional average of $88,000. Black households earn an average of $58,000, $30,000 below the regional median (PSRC 2021).

Table H3-1 shows population, household, and employment forecasts for the Puget Sound region and associated counties. The estimates from 2018 through 2050 are based on the Land Use Vision – Implemented Targets (LUV-it) developed by the Puget Sound Regional Council (PSRC) for 2023 growth planning. The LUV-it forecasts use data from 2018 as the starting point because they represent a base-year set of data, including parcel data and estimates of households, population, and employment conditions in King, Kitsap, Pierce, and Snohomish counties as of that year. The estimates are then projected forward to align with the VISION 2050 Regional Growth Strategy and countywide growth targets for 2044, which were developed to implement the Regional Growth Strategy. These projections are extended to 2050 to provide a long-term view of growth in the region.

The focus on 2018 through 2050 allows the forecasts to capture a meaningful period of development and policy impact, reflecting the anticipated changes in population, households, and jobs. The projections incorporate both current conditions and expected policy-driven changes, such as growth focusing in high-capacity transit areas and other regional growth centers. This timeframe helps planners and policymakers visualize the long-term impacts of growth policies and infrastructure investments.

Table H3-1 presents data on population, households, and jobs for the Puget Sound region, including projections from 2018 to 2050, along with the compound annual growth rates for each metric. Overall, the Puget Sound region is projected to experience steady growth from 2018 to 2050, with a population increase from approximately 4.1 million to 5.9 million, representing a rate of 1.11 percent. Households are expected to grow at a rate of 1.29 percent, reaching over 2.4 million by 2050. Employment is also forecasted to rise, with jobs increasing from approximately 2.3 million in 2018 to 3.4 million in 2050, reflecting a rate of 1.28 percent. This overall regional growth indicates strong economic and demographic expansion over the forecast period.

King County, the most populous county in the region, is expected to see its population grow from around 2.2 million in 2018 to over 3 million by 2050, with a rate of 1.03 percent. Households in King County will increase at a slightly higher rate of 1.18 percent, reaching over 1.2 million. The county’s job market will also expand considerably, with jobs increasing at a rate of 1.16 percent, totaling more than 2.1 million by 2050. These figures suggest that King County will continue to be a key driver of the region's economic growth.

Kitsap County, while smaller in population, shows a healthy growth trajectory with a population rate of 1.00 percent, growing from 267,104 in 2018 to 366,688 by 2050. The number of households in Kitsap County is projected to grow at a rate of 1.22 percent, while jobs will increase at a rate of 1.54 percent, indicating strong economic potential relative to its size. This growth in employment suggests a diversifying and expanding job market in the county.

Pierce and Snohomish counties also demonstrate considerable growth. Pierce County’s population is expected to rise at a rate of 1.17 percent, with the number of households and jobs increasing at 1.37 percent and 1.29 percent, respectively. Snohomish County's population growth is projected at a rate of 1.30 percent, with households growing at 1.55 percent and jobs at 1.70 percent. These growth rates indicate robust expansion in these counties, with Snohomish County, in particular, showing the highest job growth rate among all the counties, reflecting strong economic development prospects. Overall, the trends of continued growth in employment and income in the region support the forecasts of strong growth in travel demand within the region and along the Tacoma Dome Link Extension (TDLE) corridor.

Table H3-1 Population, Household, and Employment Forecasts by Region and County

Puget Sound	2018	2050	Compound Annual Growth Rate, 2018 to 2050
Population	4,134,473	5,885,483	1.11%
Households	1,605,263	2,419,603	1.29%
Jobs	2,277,775	3,417,783	1.28%
King County	**2018**	**2050**	**Compound Annual Growth Rate, 2018 to 2050**
Population	2,189,962	3,038,738	1.03%
Households	884,582	1,287,395	1.18%
Jobs	1,492,074	2,155,720	1.16%
Kitsap County	**2018**	**2050**	**Compound Annual Growth Rate, 2018 to 2050**
Population	267,104	366,688	1.00%
Households	101,858	150,061	1.22%
Jobs	102,994	167,785	1.54%
Pierce County	**2018**	**2050**	**Compound Annual Growth Rate, 2018 to 2050**
Population	872,450	1,264,812	1.17%
Households	323,902	500,322	1.37%
Jobs	367,906	554,819	1.29%
Snohomish County	**2018**	**2050**	**Compound Annual Growth Rate, 2018 to 2050**
Population	804,957	1,215,245	1.30%
Households	294,921	481,825	1.55%
Jobs	314,801	539,459	1.70%

H3.2 Demographic and Economic Trends in TDLE Segments

Demographic and economic trends in the TDLE study area were assessed by using Forecast Analysis Zone (FAZ) estimates developed by PSRC as part of their Land Use Vision (2023). Table H3-2 provides the population, household, and employment forecast trends, between 2018 and 2050, for Forecast Analysis Zones associated with each corridor segment in the Tacoma Dome Link Extension area. The four TDLE corridor segments — Federal Way, South Federal Way, Fife, and Tacoma — and the corresponding FAZs are shown in Figure H3-1. The strong growth trend seen at the regional level is reflected in each segment. Within each corridor segment, population, households, and jobs are projected to grow at positive rates between 2018 and 2050.

What is a Forecast Analysis Zone (FAZ)?

FAZs are the units of the geographic boundary system used by the PSRC to model and report its small-area forecasts of population, households, and employment. They are built up from traffic analysis zones (TAZs), with each FAZ containing between 1 to 20 TAZs. FAZ boundaries generally, with few exceptions, also line up with census tract boundaries, with each FAZ containing between 1 to 9 census tracts (PSRC 2022).

The Federal Way Segment (consisting of FAZs 3020 and 3030) is projected to experience steady growth from 2018 to 2050. The population is expected to increase from 65,464 to 92,144, with a rate of 1.07 percent. Households are forecasted to grow from 23,244 to 34,963, at a rate of 1.28 percent. The total number of jobs in this segment is projected to rise from 28,900 to 51,004, with a rate of 1.79 percent. Employment growth is expected across all sectors, with notable increases in the Education sector, which will grow from 2,022 to 4,255 jobs (rate of 2.35 percent), and the Retail sector, which will increase from 5,974 to 13,783 jobs (rate of 2.65 percent).

The South Federal Way Segment (encompassing FAZs 3010, 3020, 3030, and 1200) is projected to see growth in population, households, and employment by 2050. The population is expected to grow from 127,144 in 2018 to 170,491, with a rate of 0.92 percent. Households will increase from 45,537 to 64,371, growing at a rate of 1.09 percent annually. The total jobs in this segment are projected to nearly double, from 42,494 to 73,903, with a rate of 1.74 percent. The most substantial job growth is expected in the Retail sector, which will grow from 9,945 to 20,082 jobs (rate of 2.22 percent), and the Education sector, projected to increase from 3,722 to 6,979 jobs (rate of 1.98 percent).

The Fife Segment (FAZ 2000) is forecasted to see moderate growth from 2018 to 2050. The population is projected to increase from 11,807 to 19,026, at a rate of 1.50 percent. Households are expected to grow from 4,474 to 7,229, with a rate of 1.51 percent. Total employment in the segment is anticipated to rise from 16,168 to 21,617 jobs, reflecting a slower growth rate with a rate of 0.91 percent. Employment growth will be modest across sectors, with the Construction and Resources sector increasing from 1,338 to 1,868 jobs (rate of 1.05 percent), and the Finance, Insurance, and Real Estate sector growing from 3,794 to 5,479 jobs (rate of 1.16 percent).

The Tacoma Segment (covering FAZs 1320, 1330, 1410, 1710, 1810, 1820, and 1900) is projected to undergo substantial growth between 2018 and 2050. The population is expected to increase substantially from 93,651 to 199,916, with a high rate of 2.40 percent. Households are projected to grow from 36,636 to 87,859, reflecting a rate of 2.77 percent. The total number of jobs is anticipated to rise from 87,254 to 157,317, with a rate of 1.86 percent. The highest employment growth is expected in the Finance, Insurance, and Real Estate sector, which is projected to grow from 47,987 to 90,723 jobs (rate of 2.01 percent), and in the Education sector, which will more than double from 5,221 to 10,715 jobs (rate of 2.27 percent).

Table H3-2 Population, Household, and Employment Forecast by Forecast Analysis Zone

Description	2018	2050	Compound Annual Growth Rate, 2018 to 2050
Federal Way Segment (FAZs: 3020 and 3030)			
Population	65,464	92,144	1.07%
Households	23,244	34,963	1.28%

H3.3 Local Revenue Sources

Table H3-3 provides a breakdown of tax revenues by category for the cities of Federal Way, Milton, Fife, and Tacoma. Each city's revenue is categorized into property tax, sales tax, utility tax, business and occupation (B&O) tax, and other taxes, showing both the total revenue collected and the percentage contribution of each tax category to the city's overall tax revenue.

In Federal Way, the total tax revenue amounts to approximately $145.7 million (Adopted Biennial Budget for 2023 budget year). The largest tax contributors are property tax and sales tax, making up 8.07 percent and 13.60 percent of the total revenue, respectively. Utility tax contributes 11.93 percent, while other revenue accounts for the highest share at 66.39 percent. Milton's total tax revenue is about $5.8 million. The largest share comes from sales tax, comprising 37.54 percent of the city's total revenue. Property tax and utility tax contribute 26.95 percent and 22.34 percent, respectively, while other taxes make up 13.17 percent. Fife collects approximately $24.7 million in total revenue, with taxes making up 70.65 percent of this amount. Meanwhile, Tacoma has the largest total tax revenue among the four cities, at about $615.2 million (note: this is the biennial total). The city's revenue is predominantly sourced from property tax (22.03 percent) and sales tax (23.91 percent). Utility tax accounts for 19.60 percent, B&O tax makes up 17.58 percent, and other taxes contribute 16.88 percent.

Table H3-3 Percent of Total Revenues for Each City in the TDLE Project Area

Tax Category	City of Federal Way Total	Federal Way Percentage
Property	$11,761,639	8.07%
Sales	$19,825,000	13.60%
Utility	$17,391,000	11.93%
Other	$96,746,335	66.39%
Total	$145,723,974	100%
Tax Category	**City of Milton Total**	**Milton Percentage**
Property	$1,557,527	26.95%
Sales	$2,169,521	37.54%
Utility	$1,290,937	22.34%
Other	$760,865	13.17%
Total	$5,778,850	100%
Tax Category	**City of Fife Total**	**Fife Percentage**
Taxes	$17,455,740	70.65%
Other	$7,252,952	29.35%
Total	$24,708,692	100%
Tax Category	**City of Tacoma Total**	**Tacoma Percentage**
Property	$135,538,742	22.03%
Sales	$147,099,836	23.91%
Utility	$120,560,947	19.60%
B&O	$108,130,226	17.58%
Other	$103,845,535	16.88%
Total	$615,175,286	100%

Notes: The City of Fife provided tax figures only as a lump sum total.

H3.4 Comprehensive Plans and Regional Growth Centers

The proposed TDLE alternatives are located within the cities of Federal Way, Milton, Fife, and Tacoma, as well as King and Pierce counties. These jurisdictions have a range of comprehensive, manufacturing and industrial, and subarea plans, policies and goals. The relevant community development and economic plans for each segment within the TDLE study area are listed for each segment. The Washington Growth Management Act (GMA) requires cities and towns in Pierce and King Counties to review and update their local comprehensive plans by December 2024. The communities discussed are currently in the process of updating and adopting revised Comprehensive Plans, most draft plans are available online for reference. The project alternatives can be considered in the context of these various plans and designations. What follows is a discussion of key comprehensive land use planning factors for each corridor segment, along with a discussion of the relevant project corridor segment alternatives.

Figure H3-2, Regional Centers, Federal Way Segment, shows the Federal Way Segment alternative and design option as well as the location of the PSRC regional growth centers and adjacent municipalities. The Federal Way Segment extends south from the Federal Way Link Extension and the Federal Way Downtown Station, located in the City of Federal Way Regional Growth Center.

Figure H3-3, Regional Centers, South Federal Way Segment, shows the South Federal Way Segment alternatives as well as the location of the PSRC regional growth centers and adjacent municipalities. The South Federal Way Segment alternatives extend from S 344th Street through Milton to the Fife city limits. The station location for all alternatives is located in the vicinity of S 352nd Street within the city of Federal Way. The City of Federal Way Comprehensive Plan (2015) supports redevelopment of existing underdeveloped areas, a range of commercial land uses, increased density at proposed station locations, and encourages the development of a sustainable transportation system integrating transit access.

Figure H3-4, Regional Centers, Fife Segment, shows the Fife Segment alternatives and the location of the associated regional, manufacturing and industrial, and urban centers. The City of Fife Comprehensive Plan (2012a) includes an Economics element (added in 2015) and a City Center vision (2012b) encouraging compact infill development and regulations associated with transit-oriented development and increased transportation access to the downtown. All of the Fife Segment alternatives are fully located within the City of Fife, and the preferred Fife Station is within a future Fife City Center. The City of Fife has been pursuing a City Center planning effort that would accommodate a range of well-designed retail, service, civic, entertainment, recreation, and high-density residential uses to create a new focal point of community activity. Changes to reflect this planning effort have not been adopted at the time of writing.

FIGURE H3-4
Regional Centers
Fife Segment

Tacoma Dome Link Extension

The Port of Tacoma Manufacturing and Industrial Center (MIC) is less than 0.5 mile north of all the Fife Segment alternatives. The Port of Tacoma MIC (PSRC 2020) encompasses extensive waterfront along Tacoma's Commencement Bay and is home to Tacoma's highest concentration of industrial and manufacturing activity (such as marine terminals, cargo facilities, intermodal rail yards) and an estimated 9,250 employees. The Port estimates the value of international trade at $34.5 billion and the value of domestic trade at approximately $3 billion (PSRC 2020). The proposed TDLE project alternatives would not impact industrial land uses and would support the economic activity in the Port of Tacoma MIC by increasing high-capacity transit access for employees and increasing travel efficiency along I-5, the primary truck freight corridor.

Figure H3-5, Regional Centers, Tacoma Segment, displays the location of the Tacoma Segment alternatives and the associated regional, manufacturing and industrial, and urban centers. All the Tacoma Segment alternatives and stations are located within the City of Tacoma. The preferred Portland Avenue Station and Portland Avenue Span Station are located in the Port of Tacoma MIC. All the Tacoma Dome alternatives are within the Tacoma Downtown Urban Center, the City of Tacoma South Downtown Subarea Plan, and the Dome Business District. The One Tacoma Plan (2020a) establishes the basis for zoning and development regulations and provides guidance on land use and transportation decisions and a goal to promote the economic health of the City. The City of Tacoma South Downtown Subarea Plan (2020b) provides more detailed guidance and strategies to create equitable transit communities and vibrant mixed-use areas, foster economic development, and accommodate substantial growth (population and employment), promoting sustainable development. A more detailed discussion about planning and regulations is provided in Section 4.2 and Appendix H2, Land Use.

Draft Environmental Impact Statement

AIR QUALITY SUPPORTING INFORMATION

Appendix H4

SOUNDTRANSIT

U.S. Department of Transportation
Federal Transit Administration

H4.1 Applicable Laws, Regulations, Guidance, and Policies

H4.1 Introduction to Resource and Regulatory Requirements

The Puget Sound Clean Air Agency (PSCAA), United States Environmental Protection Agency (EPA), and Washington State Department of Ecology (Ecology) work together in regulating air quality and have jurisdiction over the ambient air quality in the Tacoma Dome Link Extension (TDLE) corridor. The following federal, state, and local laws, regulations, guidance, and policies are applicable to the air quality and greenhouse gas (GHG) analysis for this project:

- Clean Air Act (42 United States Code 7401).
- Code of Federal Regulations (CFR) Title 40, Section 50 (40 CFR 50), U.S. Environmental Protection Agency, National Primary and Secondary Air Quality Standards.
- 40 CFR 86, Control of Emissions from New and In-Use Highway Vehicles and Engines.
- 40 CFR 93, Determining Conformity of Federal Actions to State or Federal Implementation Plans.
- Washington Clean Air Act (Revised Code of Washington [RCW] 70A.15).
- Chapter 173-420 Washington Administrative Code, Conformity of Transportation Activities to Air Quality Implementation Plans.
- FHWA, Updated Interim Guidance on Mobile Source Air Toxic Analysis in National Environmental Policy Act (NEPA) Documents, 2016 (FHWA 2016).
- Federal Transit Administration (FTA), Air Quality Conformity guidance, 2016 (FTA 2016).
- FTA, Greenhouse Gas Emissions from Transit Projects. Programmatic Assessment, 2017 (FTA 2017).
- Puget Sound Clean Air Agency Regulation I, Article 9, Section 15, Fugitive Dust Control Measures.
- Puget Sound Regional Council, Regional Transportation Plan (PSRC 2022a); Appendix D, Regional Air Quality Conformity Analysis, 2018 (PSRC 2022b).
- EPA, Motor Vehicle Emission Simulator (MOVES) MOVES4 Policy Guidance, 2023 (EPA 2023).
- Washington State Department of Transportation (WSDOT) Guidance – Project Level Greenhouse Gas Evaluations under NEPA and SEPA, 2018 (WSDOT 2018).
- WSDOT, Environmental Manual, Air Quality Chapter, 2018.
- American Public Transportation Association Recommended Practice for Quantifying Greenhouse Gas Emissions from Transit, 2009 (APTA 2009).

Federal air quality standards and regulations under the Clean Air Act provide the basic approach for project-level air quality analysis under NEPA. In addition to this environmental analysis, a parallel conformity requirement under the Federal Clean Air Act also applies.

H4.1.1 Federal Clean Air Act

The Federal Clean Air Act, as amended, is the primary federal law that governs air quality. This law, and EPA's related regulations implementing the law, set standards for the concentration of pollutants in the air, known as the National Ambient Air Quality Standards (NAAQS). NAAQS have been established for six common air pollutants known as criteria pollutants carbon

monoxide; ozone; lead; nitrogen dioxide; particulate matter, which is broken down for regulatory purposes into PM_{10} (particles of 10 micrometers and smaller) and $PM_{2.5}$ (particles of 2.5 micrometers and smaller); and sulfur dioxide.

The NAAQS are set at levels that protect public health with a margin of safety and are subject to periodic review and revision. Washington State adopts current federal NAAQS in state regulations administered by Ecology. Applicable state and federal ambient air quality standards are shown in Table H4.1-1.

Based on monitoring information for criteria air pollutants collected over a period of years, Ecology and EPA designate regions as being attainment or nonattainment areas for the criteria pollutants. Once a nonattainment area achieves compliance with the NAAQS, the area is considered an air quality maintenance area and must demonstrate that the area will continue to maintain the standard for a total of 20 years after redesignation. Portions of the project within Pierce County are in a maintenance area for $PM_{2.5}$ and smaller), which is shown in Figure H4.1-1. As of May 2021, Pierce County no longer has a PM_{10} maintenance area.

Table H4.1-1 Ambient Air Quality Standards

Pollutant[1]	National		Washington State
	Primary	Secondary	
Carbon Monoxide			
8-Hour Average	9 ppm	NS	9 ppm
1-Hour Average	35 ppm	NS	35 ppm
Ozone			
8-Hour Average	0.070 ppm	0.070 ppm	0.070 ppm
Lead			
Rolling 3-Month Average	0.15 $\mu g/m^3$	0.15 $\mu g/m^3$	0.15 $\mu g/m^3$
Nitrogen Dioxide			
Annual Arithmetic Mean	0.053 ppm	0.053 ppm	53 ppb
1-Hour Average[2]	100 ppb	NS	100 ppb
Particulate Matter (PM_{10})			
24-Hour Average[3]	150 $\mu g/m^3$	150 $\mu g/m^3$	150 $\mu g/m^3$
Particulate Matter ($PM_{2.5}$)			
Annual Arithmetic Mean	12 $\mu g/m^3$	15 $\mu g/m^3$	12 $\mu g/m^3$
24-Hour Average	35 $\mu g/m^3$	35 $\mu g/m^3$	35 $\mu g/m^3$
Sulfur Dioxide			
Annual Arithmetic Mean	NS	NS	0.02 ppm
24-Hour Average	NS	NS	0.14 ppm
3-Hour Average	NS	0.5 ppm	0.5 ppm
1-Hour Average[4]	75 ppb	NS	75 ppb

Notes:
National Primary Standards: The levels of air quality necessary, with an adequate margin of safety to protect the public health.
National Secondary Standards: The levels of air quality necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.
NS = No standard established
$\mu g/m^3$ = micrograms per cubic meter
ppm = parts per million
ppb = parts per billion
(1) Annual standards never to be exceeded, short-term standards not to be exceeded more than once a year unless noted.
(2) The 3-year average of the annual 98th percentile of daily maximum 1-hour averages is not to be above this level.
(3) Not to be above this level on more than 3 days over 3 years with daily sampling.
(4) The 3-year average of the annual 99th percentile of daily maximum 1-hour averages is not to be above this level.

Data Sources: King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2023).

0 5 10 Miles

FIGURE H4-1
Central Puget Sound Region
Maintenance Areas
Tacoma Dome Link Extension

H4.1.2 Federal Transportation Conformity

The Clean Air Act Section 176(c) prohibits the U.S. Department of Transportation and other federal agencies from funding, authorizing, or approving transportation plans, programs, or projects that do not conform to the State Implementation Plan for attaining the NAAQS. Conformity requirements apply on two levels: the regional — or planning and programming — level and the project level. The project must conform at both levels to be approved.

Travel demand and emission models are used to determine whether projects are in conformity with State Implementation Plans for achieving the goals of the Clean Air Act. Otherwise, the projects in the Regional Transportation Plan and/or Federal Transportation Improvement Program must be modified until conformity is attained.

Project level conformity includes verification that the project has been evaluated as part of the regional conformity analysis and may include a hot-spot analysis to evaluate the potential for future localized pollutant concentrations if the project is in a nonattainment or maintenance area for carbon monoxide or particulate matter. In general, projects must not cause any increase in the number and severity of air quality violations. If carbon monoxide or particulate matter violations already occur in the project vicinity, the project must include measures to reduce or eliminate the existing violations as well.

H4.1.3 Washington Clean Air Act

The Washington Clean Air Act, Chapter 70A.15 RCW, sets forth the state law regarding outdoor air pollution and establishes a system of regional air pollution control authorities to implement federal and state air pollution control regulations. Air pollution control regulations cover the emission of air contaminants that are injurious to health or that unreasonably interfere with the enjoyment of life and property. In general cities and towns cannot develop their own air pollution regulations. However, they can enact local nuisance provisions and performance standards so long as they are not less stringent than those of the regional authority. Many local governments and municipalities within the project area have enacted general nuisance ordinances, which typically contain provisions aimed at such problems as illegal burning, dust, and noxious odors.

H4.1.4 Climate Change and Greenhouse Gases

Climate change refers to long-term changes in temperature, precipitation, wind patterns, and other elements of the earth's climate system. An ever-increasing body of scientific research attributes these climatological changes to greenhouse gas (GHG) emissions, particularly those generated from the production and use of fossil fuels such as carbon dioxide.

While climate change has been a concern for several decades, the establishment of the Intergovernmental Panel on Climate Change by the United Nations and World Meteorological Organization in 1988 has led to increased efforts devoted to GHG emissions reduction and climate change research and policy. These efforts are primarily concerned with the emissions of GHGs generated by human activity.

There are four primary strategies for reducing GHG emissions from transportation sources: 1) improving the transportation system and operational efficiencies, 2) reducing passenger vehicle travel activity (travel demand), 3) transitioning to lower GHG-emitting fuels, and 4) improving vehicle technologies/efficiency (EPA 2020a). To be most effective, all four strategies should be pursued cooperatively.

H4.1.5 Mobile Source Air Toxics

Controlling air toxic emissions became a national priority with the passage of the Clean Air Act Amendments of 1990, whereby Congress mandated that the EPA regulate 188 air toxics, also known as hazardous air pollutants. The EPA assessed this expansive list in its rule on the Control of Hazardous Air Pollutants from Mobile Sources (Federal Register, Vol. 72, No. 37, page 8430, February 26, 2007) and identified a group of 93 compounds emitted from mobile sources that are part of EPA's Integrated Risk Information System (EPA 2020b). In addition, the EPA identified nine compounds with significant contributions from mobile sources that are among the national and regional-scale cancer risk drivers or contributors and non-hazard contributors from the 2011 National Air Toxics Assessment (EPA 2011). These are 1,3-butadiene, acetaldehyde, acrolein, benzene, diesel particulate matter, ethylbenzene, formaldehyde, naphthalene, and polycyclic organic matter.

H4.1.6 Best Management Practices for Fugitive Dust Control

Standard best management practices (BMPs) during construction that could be used to control fugitive dust emissions include:

- Spray exposed soil with a dust-control agent, such as water or other soil stabilizers, as necessary to reduce emissions of particulate matter.
- Cover all transported loads of soil and wet materials before transport or provide adequate freeboard (i.e., space from the top of the material to the top of the truck bed) to reduce particulate matter emissions during transport.
- Provide wheel washes where necessary to reduce dust and mud that would be carried offsite by vehicles and decrease particulate matter on area roadways.
- Remove dust and mud deposited by construction vehicles or other project activities on paved public roads.
- Cover, install mulch, or plant vegetation as soon as practicable to reduce windblown particulates in the area.

H4.2 Project Level Conformity and Mobile Source Air Toxics Background Information

H4.2 Project Level Conformity

The proposed TDLE project is within a maintenance area for the federal $PM_{2.5}$ standards. Therefore, per 40 CFR Part 93, analyses are required for conformity purposes. However, the EPA does not require hot-spot analyses (an estimation of likely future localized carbon monoxide and/or $PM_{2.5}$ pollutant concentrations and a comparison of those concentrations to the NAAQS, qualitative or quantitative, for projects that are not listed in Section 93.123(b)(1) as an air quality concern. According to 40 CFR 93.123(b)(1), the following are Projects of Air Quality Concern:

i. New highway projects that have a significant number of diesel vehicles, and expanded highway projects that have a significant increase in the number of diesel vehicles;

ii. Projects affecting intersections that are at a Level of Service D, E, or F with a significant number of diesel vehicles, or those that will change to Level of Service D, E, or F because of increased traffic volumes from a significant number of diesel vehicles related to the project;

iii. New bus and rail terminals and transfer points that have a significant number of diesel vehicles congregating at a single location;

iv. Expanded bus and rail terminals and transfer points that significantly increase the number of diesel vehicles congregating at a single location; and

v. Projects in or affecting locations, areas, or categories of sites which that are identified in the $PM_{2.5}$ and PM_{10} applicable implementation plan or implementation plan submission, as appropriate, as sites of violation or possible violation.

TDLE does not qualify as a Projects of Air Quality Concern because of the following reasons:

i. The proposed project is not a new or expanded highway project. The proposed project would expand an existing light rail transit system. The Transportation Technical Report (Appendix J1 to this Draft Environmental Impact Statement) evaluated five regional screenlines to assess regional north-south and east-west travel within the three subareas of the proposed project. These screenlines provide a regional snapshot of traffic operations using the Puget Sound Regional Council regional travel demand models for passenger vehicle travel and the Sound Transit model for transit travel in the 2016 base year, including daily vehicle volumes, roadway/segment volume/capacity ratios, and vehicle mode share, which separates vehicle travel by single-occupancy vehicles, high-occupancy vehicles, and transit (PSRC 2016). The PM peak hour and daily traffic volumes and volume/capacity ratios for the five screenline locations within the study area were analyzed to understand the relative differences in travel between the No-Build and build alternatives. Screenline volumes and volume/capacity results are summarized in Table H4.2-1. In general, when light rail is extended to Tacoma, some people would change their mode of travel and use transit, thereby resulting in minor decreases in traffic volumes and congestion across all five screenlines in the TDLE corridor. In addition, the light rail vehicles are powered using an overhead catenary system. Therefore, the project would not increase the number of diesel vehicles operating in the project area.

ii. As discussed above, the proposed project would not result in a significant increase in the number of diesel vehicles in the project area. Therefore, the proposed build alternatives would not affect intersections that are at a Level of Service D, E, or F with a significant number of diesel vehicles related to the project.

iii. The proposed project does include the construction of four new light rail stations. However, as discussed above, the light rail vehicles are powered using an overhead catenary system, and there are no heavy-duty diesel vehicles associated with the project's operation outside of bus services. The number of buses accessing each station will vary by location but will have a peak hour maximum of six. Many of the current buses in service are hybrids. With evolving electric technology, it is anticipated that buses connecting to the new light rail stations will be fully electrically powered in the near future. King County Metro is working toward a zero-emissions fleet by 2035 (King County Metro 2022), and Pierce Transit is planning to have a fully electric fleet by 2042 (Pierce Transit 2024). While there could be diesel equipment required for maintenance, the daily volumes would be substantially lower than the 10,000-truck-trip criterion for a Project of Air Quality Concern.

iv. The proposed project includes the construction of four new light rail stations but no expansion of existing stations. As described above, the proposed project is not likely to substantially increase the number of diesel vehicles congregating at a single location because connecting bus service will be fully electric between 2035 and 2042, the light rail vehicles are powered using an overhead catenary system, and no diesel vehicles are associated with light rail operation. While there could be diesel equipment required for maintenance, the daily volumes would be substantially lower than the 10,000-truck-trip criterion for a Project of Air Quality Concern.

v. The proposed build alternatives are not in or affecting locations, areas, or categories of sites that are identified in the $PM_{2.5}$ and PM_{10} applicable implementation plan or implementation plan submission, as appropriate, as sites of violation or possible violation.

Therefore, the proposed project would meet the Clean Air Act requirements and 40 CFR 93.116 without any explicit hot-spot analysis. The proposed project would not create a new, or worsen an existing, $PM_{2.5}$ or PM_{10} violation.

Table H4.2-1 2042 PM Peak Hour/Daily Screenline Performance

Screenline	Direction	PM Peak Hour				Daily	
		No-Build Vehicle Volumes	No-Build Volume/ Capacity Ratio	Build Alternatives Vehicle Volumes	Build Alternatives Volume/ Capacity Ratio	No-Build Vehicle Volumes	Build Alternatives Vehicle Volumes

Mobile Source Air Toxics

FHWA released updated guidance in January 2023 (FHWA 2023) for determining when and how to address mobile source air toxics impacts in the NEPA process for transportation projects. FHWA identified three levels of analysis:

- No analysis for exempt projects or projects with no potential for meaningful mobile source air toxics effects;
- Qualitative analysis for projects with low potential mobile source air toxics effects; and
- Quantitative analysis to differentiate alternatives for projects with higher potential mobile source air toxics effects.

Projects with no impacts generally include those that a) qualify as a categorical exclusion under 23 CFR 771.117, b) qualify as exempt under the Federal Clean Air Act conformity rule under 40 CFR 93.126, and c) are not exempt but have no meaningful impacts on traffic volumes or vehicle mix.

Projects that have low potential mobile source air toxics effects are those that serve to improve highway, transit, or freight operations or movement without adding substantial new capacity or creating a facility that is likely to substantially increase emissions. The large majority of projects fall into this category.

Projects with high potential mobile source air toxics effects include those that:

- Create or significantly alter a major intermodal freight facility that has the potential to concentrate high levels of diesel particulate matter in a single location; or
- Create new or add significant capacity to urban highways, such as interstates, urban arterials, or urban collector-distributor routes, with traffic volumes where the average annual daily traffic is projected to be in the range of 140,000 to 150,000, or greater, by the design year; and
- Are proposed to be located in proximity to populated areas or in proximity to concentrations of vulnerable populations (i.e., schools, nursing homes, hospitals) in rural areas.

The TDLE build alternatives are projected to reduce the regional vehicle miles traveled (VMT) (See H4.3 Air Quality Modeling Results). Therefore, the build alternatives would have no effect on the regional mobile source air toxics emissions. Based on the FHWA's 2023 mobile source air toxics guidance, this project is considered to have low potential mobile source air toxics effects, and a quantitative analysis of mobile source air toxics emissions is not required (FHWA 2023); however, Tables H4.3-2 through H4.3-5 show the estimates for mobile source air toxics emissions.

Formula used from AP-42 Section 13.2.1 "Paved Roads"

$E=k\,(sL/2)^{0.91}\,(W/3)^{1.02}\,(1-P/4N)$

E = particulate emission factor (having units matching the units of k)

k = particle size multiplier for particle size range and units of interest, From AP-42 Table 13.2-1.1

sL = road surface silt loading (grams per square meter) (g/m2), Assume winter time condition

W = average weight (tons) of the vehicles traveling the road

Figure 13.2.1-2 estimates that days of precipitation >0.01 inch per year (P) is approximately 180; N is 365 days.

Assumed passenger cars are 2 tons. Assumed buses weigh 15 tons.

H4.4 Climate Change Background Information

H4.4 Climate Change and Global Warming Potential

GHGs vary considerably in terms of climate changes and Global Warming Potential, which is a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. Global Warming Potential is based on several factors, including the relative effectiveness of a gas to absorb infrared radiation and length of time that the gas remains in the atmosphere ("atmospheric lifetime"). Global Warming Potential is a measure of how much energy the emissions of 1 ton of a gas will absorb over a given period of time, typically a 100-year time horizon, relative to the emissions of 1 ton of carbon dioxide, which is the primary GHG emitted through human activities. Gases with a higher Global Warming Potential absorb more energy per ton emitted than gases with a lower Global Warming Potential and thus contribute more to warming Earth (EPA 2020a). GHG emissions are typically measured in terms of pounds or tons of "carbon dioxide equivalents" (CO_2e). Table H4.4-1 shows the Global Warming Potential for each type of GHG. For example, sulfur hexafluoride is 23,900 times more potent at contributing to global warming than carbon dioxide.

There are four primary strategies for reducing GHG emissions from transportation sources: 1) improving the transportation system and operational efficiency, 2) reducing passenger vehicle travel activity, 3) transitioning to lower GHG-emitting fuels, and 4) improving vehicle technologies/efficiency. TDLE is expected to reduce dependency on single-occupancy vehicles, slow growth in VMT, conserve energy, and reduce GHG emissions while helping to achieve Washington State's emissions reduction goals (RCW 70.235.020).

Table H4.4-1 Global Warming Potential of Greenhouse Gases

Gas	Atmospheric Lifetime (Years)	Global Warming Potential (100-year Time Horizon)
Carbon Dioxide (CO_2)	50–200	1
Methane (CH_4)	12	21
Nitrous Oxide (N_2O)	114	310
HFC-23	270	11,700
HFC-134a	14	1,300
HFC-152a	1.4	140
PFC: Tetrafluoromethane (CF_4)	50,000	6,500
PFC: Hexafluoroethane (C_2F_6)	10,000	9,200
Sulfur Hexafluoride (SF_6)	3,200	23,900

WSDOT PIN:

Federal Aid/FTA Grant Number(s): WA-2022-086-00

Functional Class: Not applicable (transit, enhancements, Etc.)

Improvement Type: New/Relocated Transit Alignment

Location: Link LR Extension

From: Federal Way Transit Center **To:** Tacoma Dome

Total Cost: $4,987,000,000

Regionally Significant: Yes **Environmental Status:** EIS

Year of Expenditure for Total Cost: 2023

Expected Year of Completion: 2034

MTP Status: Candidate **MTP Reference(s):** 5685

Description:

This project extends light rail 9.7 miles from the Federal Way Transit Center to Tacoma, primarily along the I-5 corridor, and includes four new stations in south Federal Way, Fife,
and two in Tacoma (one near E Portland Avenue and one near the Tacoma Dome Station). This project includes the planning of a light rail maintenance facility, OMF-South, to add storage and maintenance capacity in support of the expansion of light rail on the Federal Way to Tacoma corridor. This is a multiyear project and the funding programmed reflects the funds within the span of the TIP.

* = Asterisk by Obligation Date indicates funds for this phase obligated earlier this calendar year

H4.6 Regional Transportation Plan Listing

Sponsor: SOUND TRANSIT
Project ID: 5685
Title: Link LRT Extension from Federal Way to Tacoma

MTP Status: Candidate
Estimated Cost: $2,490,477,588

Description:
This project extends light rail south from Federal Way Station to Tacoma Dome Station, with new stations at serving South Federal Way, Fife and East Tacoma. New parking facilities are included at South Federal Way and Fife with +/- 500 spaces at each station.

Location / Facility:	From:	To:
Link LRT extension	Federal Way Station	Tacoma Dome Station

Multiple Counties (any combination)	2030	61

Sponsor: SOUND TRANSIT
Project ID: 5686
Title: Link LRT Extension from Angle Lake to Federal Way

MTP Status: Approved
Estimated Cost: $2,505,362,386

Description:
The Federal Way Link Extension project is a 7.8 mile extension of light rail from the city of SeaTac's Angle Lake Station to the Federal Way Transit Center with service to the cities of Des Moines and Kent. Operating in exclusive right-of-way, the project generally parallels I-5 on an elevated or at-grade alignment. Trains will serve three stations: Highline College in Kent/Des Moines; South 272nd in Federal Way; and the Federal Way Transit Center at 23rd Avenue South. The station will feature new parking facilities providing approximately 1,200 parking spaces.

1 INTRODUCTION

The information contained in this appendix serves as a supplement to Section 4.8 Water Resources and is not intended as a stand-alone document. Where full discussion of a topic is presented in Section 4.8, no repeat or additional discussion of that topic is included in this appendix.

2 REGULATORY REQUIREMENTS AND PERMITS

2.1 Regulations and Design Guides

The federal, state, local, and Tribal regulations that govern the protection or use of water resources in the study area are listed below. Local plans, policies, or design manuals that guide the use of water resources in the study area are also included.

2.1.1 Federal

- Coastal Zone Management Act, 16 United States Code (U.S.C.) § 1451 et seq.
- Rivers and Harbors Act:
  - Section 9 (33 U.S.C. § 401) – Construction of any structure in or over any navigable water.
  - Section 10 (33 U.S.C. § 403) – Excavation and fill within navigable waters.
  - Section 408 (33 U.S.C. § 408) – Alteration of an existing Civil Works project.
- Clean Water Act:
  - Section 401 (33 U.S.C. § 1341) – Water Quality Certification (delegated authority to the Environmental Protection Agency [EPA], Tribe, and/or state).
  - Section 402 (33 U.S.C. § 1342) – National Pollutant Discharge Elimination System (NPDES).
  - Section 404 (33 U.S.C. § 1344) – Permits for Dredge or Fill.
- Safe Drinking Water Act, 42 U.S.C. § 300f et seq., Chapter 6A.
- National Flood Insurance Act of 1968 and Flood Disaster Protection Act of 1973, 42 U.S.C. § 4001 et seq.
- National Environmental Policy Act, 42 U.S.C. § 4321.
- Floodplain Management Presidential Executive Order 11988 of May 24, 1977, and its subsequent updates (Executive Orders 13690 and 14030), which direct federal agencies to evaluate the impacts of their actions on FEMA-designated floodplains, consider options to minimize or avoid those impacts, and increase resiliency to future flood risk. These will guide the design for crossings of the Fife Ditch Tributary 1 and the Puyallup River floodplains.
- United States Department of Transportation (U.S. DOT) Order 5650.2 – Floodplain Management and Protection.
- Endangered Species Act Biological Opinion for the Implementation of the National Flood Insurance Program in the State of Washington (NMFS 2008).
- FTA Region 10 Standard Operating Procedures No. 22 Water Resources.

2.1.2 Tribal

- Amendment to the Clean Water Act for the Puyallup Tribe of Indians (TAS Status), 33 U.S.C. § 1377 et seq.
- Puyallup Tribal Code Chapter 10.08, Water Quality Standards for Surface Waters.
- Puyallup Tribal Code Chapter 15.12, Zoning Ordinance.
- Puyallup Tribal Code Chapter 15.16, Permit Applications Procedure Code.
- Puyallup Tribal grant or waiver of Clean Water Act, 33 U.S.C. § 1377.
- Puyallup Tribe of Indians Water Quality Antidegradation Implementation Procedural Review.

2.1.3 State

- Water Quality Standards for Surface Waters, Washington Administrative Code (WAC) 173-201A.
- Water Quality Standards for Groundwater, WAC 173-200.
- Flood Control Management Act, Revised Code of Washington (RCW) 86.
- Water Pollution Control Act, RCW 90.48.
- Shoreline Management Act, RCW 90.58, WAC 173-18 and 173-26.
- 2019 Stormwater Management Manual for Western Washington (Ecology Manual) (Ecology 2019b).
- Washington State Department of Transportation (WSDOT) Highway Runoff Manual (WSDOT 2019).
- WSDOT Hydraulics Manual (WSDOT 2023).
- Washington State Hydraulic Code, WAC 220-660.

2.1.4 Regional

- Sound Transit Design Criteria Manual, Revision 5 (Sound Transit 2021).
- Low Impact Development Technical Guidance Manual for Puget Sound (Puget Sound Partnership 2012).

2.1.5 Local

Pierce County

- Storm Drainage and Surface Water Management, Title 11 Pierce County Code (PCC).
- Construction and Infrastructure Regulations – Site Development and Stormwater Drainage, 26 Title 17A PCC.
- Development Regulations – Storm Drainage and Site Development, Title 17A PCC.
- Development Regulations – Critical Areas, Title 18E PCC.
- Development Policies and Regulations – Shorelines, Title 18S PCC.
- Pierce County Stormwater Management & Site Development Manual (Pierce County 2021).

City of Federal Way

- Shoreline Management, Federal Way Revised Code (FWRC) 15.05.
- Surface Water Management, Title 16 FWRC.
- Zoning and Development – Environmentally Critical Areas, FWRC 19.145.
- King County Surface Water Design Manual (King County 2021a).
- Federal Way Addendum to the King County Surface Water Design Manual (City of Federal Way 2017).
- King County Stormwater Pollution Prevention Manual (King County 2021b).

City of Milton

- Storm Drainage of Surface Water – Utility, Management, and Maintenance; Milton Municipal Code (MMC) 13.26.
- Flood Damage Prevention, MMC 15.20.
- Shoreline Master Program, MMC 18.12.
- Critical Areas, MMC 18.16.

City of Fife

- Drainage of Surface Water, Fife Municipal Code (FMC) 15.32.
- State Environmental Policy Act (SEPA) Guidelines, FMC 17.04.
- Critical Areas General Provisions, FMC 17.05.
- Aquifer Recharge Areas, FMC 17.07.
- Frequently Flooded Areas, FMC 17.09.
- Flood Damage Prevention, FMC 15.40.
- Shoreline Master Program, FMC 17.21.

City of Tacoma

- Wastewater and Surface Water Management – Regulation and Rates, Tacoma Municipal Code (TMC) 12.08.
- South Tacoma Groundwater Protection District, TMC 13.09.
- Critical Areas Preservation Ordinance TMC 13.11.
- Shoreline Master Program TMC 19.01.
- Stormwater Management Manual (City of Tacoma 2021).

2.2 Applicable Permits

The federal, state, local, and Tribal permits required for projects that affect water resources in the study area are listed below.

2.2.1 Federal

- Clean Water Act:
  - Section 401 (33 U.S.C. § 1341) – Water Quality Certification (approval issued by the state, Tribe, or EPA).
  - Section 402 (33 U.S.C. § 1342) – NPDES (implemented by state).
  - Section 404 (33 U.S.C. § 1344) – Permits for Dredge or Fill (approval issued by the United States Army Corps of Engineers [USACE]).
- Rivers and Harbors Act:
  - Section 9 (33 U.S.C. § 401) – Construction of any structure in or over any navigable water.
  - Section 10 (33 U.S.C. § 403) – Excavation and fill within navigable waters (approval issued by the USACE).
  - Section 408 (33 U.S.C. § 408) – Alteration of an existing civil works project (approval issued by the USACE).
- Federal Emergency Management Agency (FEMA) Flood Insurance Rate Mapping Conditional Letter of Map Revision Application.

2.2.2 Tribal

- Puyallup Tribal Code 15.12.390, Conditional Use Permit.
- Puyallup Tribal Code 15.12.060/15.12.070, Development Permit.
- Puyallup Tribal Code 15.12.090, Construction Permit.

2.2.3 Delegated authority for Section 401 Water Quality Certification State and County

- NPDES Construction Stormwater General Permit (Ecology 2021).
- NPDES Western Washington Phase I and Phase II Municipal Stormwater General Permits (Ecology 2019a).
- Section 401 Water Quality Certification – Washington State Department of Ecology (Ecology).
- Hydraulic Project Approval (HPA) – Washington Department of Fish and Wildlife (WDFW) (RCW 77.55).

2.2.4 Local Agencies

- Construction Permits – Cities of Federal Way, Milton, Fife, and Tacoma; Pierce County.
- Development Permits – Cities of Federal Way, Milton, Fife, and Tacoma; Pierce County.
- Critical Areas Approvals – Cities of Federal Way, Milton, Fife, and Tacoma; Pierce County.
- Floodplain Development Permits – Cities of Milton, Fife, and Tacoma; Pierce County.
- Shoreline Substantial Development Permit – Cities of Fife, Milton, and Tacoma; Pierce County.

2.2.5 Other

- Pipeline and Utility Crossing: Permits – Utility Providers.
- Utility Approvals: Easements and Use Agreements – Utility Providers.

3 AFFECTED ENVIRONMENT

3.1 Natural Water Bodies

The major natural water bodies and their associated tributaries located within the study area are described below, generally listed from north to south.

3.1.1 Federal Way Segment

The study area in the Federal Way Segment contains the following water bodies:

- East Fork Hylebos Creek Tributary 0016A: This stream originates west of Interstate 5 (I-5) near S 324th Street, and it flows southward through the study area, joining other tributaries to form East Fork of Hylebos Creek. The East Fork Hylebos Creek Tributary 0016A has no documented water quality impairments.
- West Fork Hylebos Creek Tributary 0014C: A small segment of West Fork Hylebos Creek Tributary 0014C near the stream's headwaters is present in the northern portion of the study area, where it is confined within an in-line stormwater facility near S 324th Street. West Fork Hylebos Creek Tributary 0014C is designated on Ecology's 303(d) list for pH, copper, lead, and zinc (Ecology 2018). The stream then flows south and eventually joins other tributaries to form the West Fork of Hylebos Creek before reaching the South Federal Way Segment.

3.1.2 South Federal Way Segment

The study area in the South Federal Way Segment contains the following water bodies:

- East Fork Hylebos Creek Tributary 0016A: From its headwaters described above, this stream continues flowing southward through the study area south of S 344th Street, joining other tributaries downstream near S 375th Street to form the East Fork of Hylebos Creek. The East Fork Hylebos Creek Tributary 0016A has no documented water quality impairments.
- North Fork Hylebos Creek: This stream originates in regional stormwater facilities immediately north of S 356th Street. A small segment of the stream near its headwaters flows through the study area, where it is confined in a straight, ditch-like channel. Stream reaches in the study area are on the 303(d) list, based on the benthic macroinvertebrate bioassessment parameter (Ecology 2023).
  - Federal Way Stream 2 (SFW-02): Originates on the west side of State Route (SR) 99, just south of S 359th Street and is assumed to join North Fork Hylebos Creek east of SR 99.
  - Federal Way Stream 4 (SFW-04): Emerges from beneath SR 99 in an approximately 18-inch-diameter culvert and is a tributary to North Fork Hylebos Creek. This stream may be the downstream continuation of SFW-02.
  - Federal Way Stream 3 (SFW-03): The channel originates west of SR 99, crosses under the highway, then flows approximately 200 feet east before spreading into a wetland. It is assumed that the stream is connected to North Fork Hylebos Creek outside of the study area.

- West Fork Hylebos Creek: The West Fork Hylebos Creek crosses the study area under Pacific Highway S, just south of S 364th Street. West Fork Hylebos Creek is a perennially flowing stream that originates in wetlands near S 348th Street in Federal Way and flows southward. The stream is joined by several tributaries before it crosses beneath I-5 in Milton and joins East Fork Hylebos Creek to form Hylebos Creek. West Fork Hylebos Creek is considered one of the highest quality streams in the watershed and the City of Federal Way has identified lower reaches of the stream as a top priority for conservation. Section 4.9, Ecosystems, of the Draft EIS contains additional details.
  - Milton Stream 3 (SMI-03): The stream enters the study area near 7th Street NE, then flows south along Pacific Highway, enters a piped stormwater system, then discharges to West Hylebos Creek.
  - Federal Way Stream 1 (SFW-01): Near the southern boundary of Federal Way is an ephemeral tributary (flowing only during and following rainfall) to West Fork Hylebos Creek. The stream originates on the east side of I-5, flows through a culvert beneath I-5, then flows due west to its confluence with West Fork Hylebos Creek. It has no documented water quality impairment.
  - Milton Stream 2 (SMI-02): Milton Stream 2 (SMI-02) crosses SR 99 south of the King/Pierce county line and then flows approximately 400 feet east to its confluence with West Fork Hylebos Creek. Stream flow is likely intermittent but has not been confirmed.
- Hylebos Creek Mainstem: East Fork Hylebos Creek continues along the east side of I-5, and it converges with West Fork Hylebos Creek to form the mainstem of Hylebos Creek near Porter Way. Hylebos Creek receives groundwater and stormwater inputs from areas of the cities of Federal Way, Milton, and Fife, where a large portion of the land is impervious. The creek has undergone extensive straightening, channeling, and underground piping of surface waters during historical growth and industrial development. The creek flows into the Hylebos Waterway in Commencement Bay. Hylebos Creek is designated on Ecology's 303(d) list for fecal coliform bacteria, temperature, and dissolved oxygen (Ecology 2018).
  - Milton Stream 1 (SMI-01): This stream is a roadside ditch running along the west side of I-5 that empties into Hylebos Creek. The narrow stream is contained by fill slopes and commercial developments with no documented water quality impairment.
  - Surprise Lake Creek: Surprise Lake Creek is a tributary to Hylebos Creek that joins near where SR 99 crosses the mainstem Hylebos. It is fed by Surprise Lake, with crossings directed in culverts, and it has no documented water quality impairment.

3.1.3 Fife Segment

The Fife Segment of the study area includes the following water bodies:

- Hylebos Creek Mainstem: Hylebos Creek briefly runs adjacent to the study area on the eastern edge of the Fife city limits. This is just downstream of the project crossing over Hylebos Creek at the southernmost end of the South Federal Way Segment, which is just east of the Fife city limits.
- Fife Ditch and Tributary 1: The Fife Ditch and its Tributary 1 are a channelized ditch system classified as streams that drain the low-lying areas in Fife predominantly north of I-5. The stream system consists of numerous smaller tributaries and ditches throughout the City of Fife that flow via a tide gate into the Hylebos Waterway in Commencement Bay. Fife Ditch is on the 303(d) list for dissolved oxygen and ammonia (Ecology 2018).

- Wapato Creek: Most of the flow into Wapato Creek originates north of the city of Puyallup, with a historical flow diversion from the upper reaches into the Puyallup River (WDFW 2020). Wapato Creek also receives urban runoff from Fife and Tacoma and flows into a series of culverts and pipes that empty into the Hylebos Waterway in Commencement Bay. The stream is on the 303(d) list for dissolved oxygen, fecal coliform, and low stream flows, which threaten aquatic life (Ecology 2018).
- Erdahl Ditch Tributary 1 and Tributary 2: The Erdahl Ditch drainage system conveys surface water runoff from the western portion of the Fife Segment to the Blair Waterway in Commencement Bay. Both Erdahl Ditch Tributary 1 and Erdahl Ditch Tributary 2 in the study area are largely contained in pipes. The surface-flowing reach of Erdahl Ditch Tributary 1 in the study area is maintained as a stormwater conveyance facility at the interchange between southbound I-5 and Port of Tacoma Road, and the surface-flowing reach of Erdahl Ditch Tributary 2 in the study area lies between I-5 and a commercial property. The two watercourses likely converge (within pipes) before being piped to an open channel and ultimately the Blair Waterway. Neither watercourse has a 303(d) listing (Ecology 2018).

3.1.4 Tacoma Segment

Surface water bodies in the Tacoma Segment include the following:

- Puyallup River: The Puyallup River Basin has been extensively historically modified through flood control projects, hydropower development, agriculture, and urbanization. The Puyallup River is of regionwide significance and has two major tributaries, the White and Carbon rivers. The Puyallup River flows into Commencement Bay, creating a saltwater wedge estuary that results in a tidal influence on the river. The nearby Foss waterway basin area of Commencement Bay is part of a 12-acre Superfund Site, for which cleanup was completed in 2006. Sediments containing phthalates, petroleum-based products, PCBs, phenols, metals, and pesticides were dredged from waterways and then capped with clean sediments (City of Tacoma 2020). Tidal influence from Commencement Bay on the Puyallup River extends from its mouth to approximately 2.2 miles upstream. The estuary has been extensively modified to accommodate industrial activity, losing as much as 99 percent of its historical estuarine wetland area; however, recently, a variety of restoration projects have been implemented in the estuary downstream of the study area. The river is on the 303(d) list for temperature, mercury, and low stream flows that threaten aquatic life (Ecology 2018).
  - First Creek: This tributary to the Puyallup River crosses the study area in a channelized section with culverts. It has no documented water quality impairments.
- Tacoma Gulch: The Tacoma Gulch is a spring-fed tributary that flows through the Tacoma stormwater system and outlets to the Foss waterway in Commencement Bay. In the study area, this stream is on the west side of, across the interstate from the Tacoma 26th Street Station. It has no documented water quality impairments.

3.2 Water Quality

This appendix is intended to provide supplemental information and background to support the primary discussion of potential impacts to water resources in the project study area that are discussed in Section 4.8, Water Resources, of the Draft Environmental Impact Statement (EIS).

Ecology designates waterbodies within the state with beneficial uses, such as drinking water, recreation, aquatic habitat, and industrial use, that are historically and currently impaired by pollutants on the Water Quality Assessment Clean Water Act Section 303(d) list (Ecology 2018). Summaries from Ecology's 303(d) list of impaired water bodies are included on the following pages for waters in the study area. Table H5-1 lists all of the EPA 303(d) list Impaired waterbodies in the study area, and Figure H5-1 displays them (Ecology 2018).

Table H5-1 Impaired Water Bodies – Ecology 303(d) Listings

3.3 Floodplains and Floodways

Mapped floodplains designated by FEMA, county-designated flood hazard areas, and city-designated flood hazard areas within the study area are shown on Figures H5-2 through H5-5 (FEMA 2017a, 2020). FEMA has stated that the flood hazard mapping for this area will be revised as part of the future Puyallup River levee recertification under the National Flood Insurance Program. However, levee recertification processes are complex and can take many years to complete, so Sound Transit is proceeding with the project analysis without depending on the recertification. FEMA has designated the currently effective flood hazard data based on analysis completed in 1979 for the cities of Fife and Milton and in 1981 for the City of Tacoma (FEMA 2017b). This historical data does not accurately reflect subsequent development and current topographic conditions.

Sound Transit is reviewing available floodplain data for this area, including localized mapping of flood prone areas developed for the City of Fife based on 1990 and 1996 flood events (City of Fife 2003). In 2023, the City of Fife submitted and received FEMA approval for Letters of Map Amendment (LOMAs) that removed certain parcels and structures in the study area near the Fife Ditch Tributary 1 from the designated floodplain. These LOMAs apply to the following locations:

- LOMA_23-10-0176A-530140 (January 25, 2023): Entire Parcel Number 0420063107, located at 1317 54th Avenue E.
- LOMA_23-10-0262A-530140 (March 1, 2023): Entire Parcel Number 0420063012, located at 5410 12th Street E.
- LOMA_23-10-0799A-530140 (November 29, 2023): Portion of Parcel Number 0420063110, located at 5802 12th Street E.

3.4 Groundwater

Groundwater resources, such as aquifer recharge and wellhead protection areas, are highly susceptible to groundwater contamination within the study area are shown on Figure H5-6. The wellhead protection areas are defined by protection categories that refer to the amount of time it would take contamination to reach the wellhead from the specified area within each boundary. Projection boundaries include the 1-, 5-, and 10-year time of travel boundaries. Required levels of protection and restrictions on certain activities increase for boundaries closer to the wellhead.

The DRASTIC Model was developed by EPA with the National Water Well Association. It provides a basis for evaluating the vulnerability to pollution of groundwater resources based on the hydrogeologic parameters of depth to groundwater, net recharge, aquifer media, soil media, topography, the vadose zone, and hydraulic conductivity. The DRASTIC rating for this area is 180 to 199, which is defined as highly susceptible to groundwater contamination, and covers most of the City of Fife (City of Fife 2016). These ratings safeguard groundwater resources and wellhead protection areas by requiring mitigation or precluding future discharges of contaminants from new land use activities.

King County developed a rating system to define areas highly susceptible to groundwater contamination and critical aquifer recharge areas using the Areas Susceptible to Ground Water Contamination (ASGWC) data set and shape files, which were created from the ASGWC95 data set by adding Vashon data that the county received from the University of Washington. The rating system considers the hydrologic parameters of surficial geology, soil types, and depth to groundwater, which are then combined in a matrix to determine final susceptibility. King County uses the ASGWC data set to map the areas highly susceptible to groundwater contamination and areas critical to aquifer recharge in order to protect the health and well-being of its residents who rely on groundwater for drinking, and to ensure enough groundwater replenishes streams, lakes, and wetlands to support fish and wildlife in the future.

The entire Fife Segment, from the crossing of the mainstem of Hylebos Creek to the Puyallup River levee, has high potential for contamination of groundwater. The alternatives in the Fife Segment would not cross any wellhead buffers or their respective 10-year time of travel areas. The wellhead buffer refers to the 10-year time of travel, which is the amount of time it would take contamination to reach the wellhead from the specified area surrounding a particular wellhead. There are no sole source aquifers located in the study area for the Fife Segment, as designated by the EPA.

Data Sources: EPA, King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2023).

3.5 Stormwater Runoff

The land and soil that stormwater runoff travels across influences the water quality and hydraulics in the natural waterbodies that it flows into. This section discusses factors influencing stormwater runoff in the study area.

3.5.1 Soil Type

Soils within the study area are categorized into hydrologic soil groups based on physical and runoff characteristics. These soil categories can be used along with land use and hydrologic condition considerations to determine an associated runoff curve number and ultimately estimate runoff and infiltration capacities for planning and management practices. Soil Types A and B have moderate to high infiltration potential, and moderate to low runoff potential, respectively, making them generally compatible with a variety of low-impact development approach stormwater facilities. Type C soils are not compatible with stormwater management facilities that rely on infiltration of surface waters, which includes many low-impact development approaches. (USDA NRCS 2007). Table H5-2 summarizes the hydrologic soil group for each soil type in the study area. Soil locations are shown on Figure H5-7. (USDA NCRS 2007, 2022a, 2022b, 2022c).

3.5.2 Land Uses

The study area for the proposed project is a mixture of residential, commercial, light industrial, and vegetated areas. The impervious surfaces in the study area are mix of pollution-generating roadway and parking areas and non-pollution-generating surfaces (NPGIS), including roofs, sidewalks, and stormwater ponds (considered impervious during rain events, when filled with water).

The study area in the Federal Way and South Federal Way segments is urbanized, with approximately 50 percent impervious surface cover under existing conditions. These study areas have a mix of residential, commercial, industrial, and recreational land use types. In the Fife Segment, the study area is approximately 60 percent impervious surface cover, with a mix of residential, commercial, industrial, and agricultural land use types. The study area in the Tacoma Segment has approximately 80 percent impervious surface cover in its existing condition, which is highly urbanized, with a mix of developed lands that include commercial, industrial, and Tribal uses.

The SR 167 Completion Project Phase 1 Improvements began in early 2020 and overlaps with the study area of the TDLE project within Pierce County in the cities of Fife and Milton, as well as portions of unincorporated Pierce County and Tacoma. Improvements include an approximately 2-mile highway section from SR 509 near the Port of Tacoma to I-5 and SR 167 at the interchange near 70th Avenue (FHWA 2018). These changes could be expected to reduce agricultural land use and convert them to roadway, which could be expected to increase the amount of impervious surface in the existing condition as the TDLE project progresses.

3.5.3 Stormwater Management

In the study area, most of the surface stormwater is collected by piped municipal systems along all three segments of the corridor. The systems in the study area include features such as stormwater pipes and roadside ditches, media filter drains, regional detention ponds, and vaults. Stormwater drainage systems are discussed in Section 4.15, Utilities.

Table H5-2 Study Area Soils by Hydrologic Soil Group

Map Code	Soil Description
Hydrologic Soil Group A: High Infiltration	
31A	Puyallup Fine Sandy Loam; 0 to 3 percent slopes
AgD	Alderwood Gravelly Sandy Loam 6 to 15 percent slopes
EvC	Everett Gravelly Sandy Loam: 8 to 15 percent slopes
No	Norma Sandy Loam
Hydrologic Soil Group B: Moderate Infiltration	
1C	Alderwood Gravelly Sandy Loam: 6 to 15 percent slopes
6A	Briscot Loam; 0-2 percent slopes
AgB	Alderwood Gravelly Sandy Loam; 6 to 15 percent slopes
AgC	Alderwood Gravelly Sandy Loam; 6 to 15 percent slopes
AmB	Arrents Alderwood Material; 0 to 6 percent slopes
AmC	Arrents Alderwood; 6 to 15 percent slopes
EwC	Everett Alderwood Gravelly Sandy Loam; 6 to 15 percent slopes
Hydrologic Soil Group C: Low Infiltration	
20B	Kitsap Silt Loam; 2 to 8 percent slopes
20C	Kitsap Silt Loam; 8 to 15 percent slopes
20D	Kitsap Silt Loam; 15 to 30 percent slopes
30A	Puget Silty Clay Loam; less than 2 percent slopes
42A	Sultan Silt Loam; less than 2 percent slopes
43A	Tacoma Silt Loam; 0 to 1 percent slopes
Bh	Bellingham Silt Loam
KpB	Kitsap Silt Loam; Kitsap Silt Loam; 2 to 8 percent slopes
KpD	Kitsap Silt Loam; 15 to 30 percent slopes
Hydrologic Soil Group D: Wet Soils	
6A	Briscot Loam; 0-2 percent slopes
37A	Semiahmoo Muck; 0 to 1 percent slopes
45A	Tisch Silt; 0 to 1 percent slopes
Sm	Shalcar Muck
Other	
48A	Xerorthents, fill area, artificial or industrial in nature.
Ur	Urban Land

3.6 Sea Level Rise

Relative sea level rise elevations have been based on work from the University of Washington Climate Impacts Group in support of the Washington Coastal Hazards Resilience Network (WCHRN). The 2018 WCHRN study provides a range of relative sea level rise for the Tacoma area (WCHRN 2018). The City of Fife is also evaluating climate change and sea level rise within its jurisdiction and has plans to conduct a climate change vulnerability assessment to guide the city's update of the comprehensive plan and shoreline regulations. Sound Transit is also developing a Climate Change Vulnerability Assessment to further evaluate risks to the project from sea level rise.

Using the WCHRN tools developed as part of the 2018 work (Figure H5-8; WCHRN 2024), relative sea level in the study area is forecasted to rise by approximately 3 to 4 feet higher than current elevations, based on average estimates available at the time of preparing this Draft EIS. Based on the current project schedule and a design horizon of approximately 100 years for the major structural components, a projection year of 2140 is used. The estimate of 3 to 4 feet of relative sea level rise is based on the low to high (greenhouse gas) representative concentration pathway for the 50 percent exceedance. This information helps inform the Draft EIS, though Sound Transit will identify final data to include as part of the future design process.

Note: RSLR is relative sea level rise; RCP is representative concentration pathway (a projection of greenhouse gas emissions); WRIA is Water Resource Inventory Area. (Data source: Washington Coastal Hazards Resilience Network 2024)

Figure H5-8 Sea Level Rise Background Data

4 LONG-TERM IMPACTS ANALYSIS

This appendix is intended to provide supplemental information and background to support the primary discussion of the potential impacts to water resources in the project study area that are discussed in Section 4.8, Water Resources, of the Draft EIS.

4.1 Comparison of Alternatives

The following tables display the geographic information system analyses that were performed to serve as the basis for qualitative and quantitative reviews of alternative impacts to water resources. Tables H5-3 and H5-4 analyze the potential impacts of each segment related to the amount of at-grade versus elevated structures. Table H5-5 analyzes the potential impacts of each segment related to the project area footprint of each stream crossing. Figures H5-9 through H5-12 display the study area surface water features of each segment to aid the impacts analysis.

- Use of at-grade versus elevated structures: At-grade sections are considered to have a greater impact than elevated sections of the guideway structures because they tend to have a slightly wider footprint, result in more impervious surface, have greater potential to directly conflict with municipal stormwater management facilities, and require more alteration of surface grade areas and flow paths.
- Stream crossings: All stream and buffer crossings would be elevated, but construction in and around stream buffers would reduce buffer quality through the removal of trees and other native vegetation. The impacts have been rated in relation to the area of the permanent environmental footprint for all areas that cross into the stream buffers, which includes delineated stream buffers. A larger project footprint in the stream buffer could indicate a greater potential for stream and riparian impacts. The footprint area scale is small (0 to 1 acre), moderate (1 to 2 acres), and large (greater than 2 acres) and then indicated as smallest or largest among the segment alternatives for comparison where relevant.

Table H5-3 At-Grade vs Elevated Structure Analysis for Each Alternative

Alternative	At-Grade Mileage[1]	At-Grade[1] %	Elevated Mileage	Elevated %	Total Mileage
Federal Way Segment					
FW Enchanted Parkway[2] with or without FW Design Option	0.59	39.1%	0.92	60.9%	1.51
South Federal Way Segment					
SF Enchanted Parkway	0.53	13.3%	3.47	86.7%	4.00
SF I-5	0.39	10.0%	3.47	90.0%	3.86
SF 99-West	0.00	0.0%	4.09	100.0%	4.09
SF 99-West with Porter Way Design Option	0.00	0.0%	4.10	100.0%	4.10
SF 99-East	0.00	0.0%	4.06	100.0%	4.06
SF 99-East with Porter Way Design Option	0.00	0.0%	4.08	100.0%	4.08
Fife Segment					
Fife Pacific Highway	0.00	0.0%	2.89	100.0%	2.89
Fife Pacific Highway with 54th Avenue or 54th Span Design Option	0.00	0.0%	2.90	100.0%	2.89
Fife Median	0.00	0.0%	2.89	100.0%	2.89
Fife Median with 54th Avenue or 54th Span Design Option	0.00	0.0%	2.89	100.0%	2.89
Fife I-5	0.00	0.0%	2.94	100.0%	2.94
Fife I-5 with 54th Avenue or 54th Span Design Option	0.00	0.0%	2.94	100.0%	2.94
Tacoma Segment					
Preferred Tacoma 25th Street-West	0.00	0.0%	1.40	100.0%	1.40
Tacoma 25th Street-East	0.00	0.0%	1.30	100.0%	1.30
Tacoma Close to Sounder	0.31	22.3%	1.08	77.7%	1.39
Tacoma 26th Street	0.29	19.2%	1.24	80.8%	1.53

Notes:
(1) At-Grade mileage includes retained cut/fill mileage. Retained cut/fill mileage was not noted separately in previous versions.
(2) The FW Enchanted Parkway Alternative is expected to have similar levels of impact with or without the FW Design Option. The FW Design Option is less than 0.05 mile shorter than FW Enchanted Parkway Alternative. Also, the elevated mileage for FW Design Option adds approximately 0.1 mile to FW Enchanted Parkway Alternative.

Notes:

(1) All combinations include the FW Enchanted Parkway Alternative, which is expected to have similar levels of impact with or without the FW Design Option. The FW Design Option is less than 0.05 mile shorter than FW Enchanted Parkway Alternative. Also, the elevated mileage for FW Design Option adds approximately 0.1 mile to FW Enchanted Parkway Alternative.

(2) For the SF 99-West or SF 99-East alternatives, the mileage uses the average of both alignments and the design option. Difference in mileage between these alignments are +/- 0.015 mile.

(3) Fife Pacific Highway or Median alternative, mileage is the average of both alignments and design options. Difference in mileage between these combinations are +/- 0.003 mile.

(4) Fife I-5 Alternative mileage is the average of the alignment and design options. Difference in mileage between these combinations are +/- 0.01 mile.

(5) All Tacoma Alternatives include the Portland Avenue Station in their calculations.

Notes:
(1) The stream crossing footprint areas are calculated using permanent footprint for each alternative, including overwater structure and extent of the defined stream buffers. All values are presented in square feet, rounded up to the nearest 100
(2) The values in parentheses indicate the portion of the stream crossing area that is overwater structure. All values are presented in square feet.
(3) The Fife Segment includes elements up to the northeast levee bank of the Puyallup River. Impacts from the Puyallup River crossing have been attributed to the Tacoma Segment.

Assumptions:
- Ordinary High Water Mark (OHWM) for open channel streams and ditches were generally developed through field delineation/estimation. Where no OHWM delineation existed, the values were extrapolated from streams or ditches with similar characteristics within the relevant jurisdiction.
- Stream buffer crossing footprints exclude the areas which overlap with existing impervious surfaces.
- To evaluate the potential impacts of the alternatives on riparian areas, the stream buffer widths indicated per Federal Way Municipal Code 19.145.270 (Revised October 15, 2019), Milton Municipal Code 18.16.640(D), Tacoma Municipal Code 13.11.420, Fife Municipal Code 17.15.050, and/or Pierce County Code 18E.40.60 were assumed as designated by the applicable local jurisdictions. Per Fife Municipal Code 17.15.050, the widths of buffers on streams are to be determined by the community development director on a case-by-case basis. To evaluate the potential impacts, these buffer widths were based on the corresponding stream types in the Milton Municipal Code. The Puyallup Tribe of Indians has jurisdiction over the Puyallup River as well. (See Table J4.3-1 in the Ecosystems Technical Report for additional stream classification details).
- Pier-supported bridge option analyzed separately. Overall, the highest impacts could be expected from placement of in-water piers.

4.2 Impervious Surface Changes

A quantitative estimate of proposed impervious surface was calculated within the permanent impact footprint along each alternative alignment and the proposed light rail stations (see Figures H5-13 through H5-26). Previous versions included all land cover in 200-ft study area around project elements. NPGIS as defined for this analysis includes light rail tracks, guideways,[1] stations, sidewalks, rooftops, and stormwater ponds (considered impervious during rain events, when filled with water), while pollution-generating impervious surface (PGIS) includes parking, bus areas, and roads. These surfaces are associated with an increase in runoff volumes, which may increase flooding and flow frequencies. Impervious surfaces subject to pollution-generating activities have the potential to accumulate contaminants that can be transported by stormwater runoff into receiving water bodies. The increased flow volumes and water quality impairments can contribute to stream erosion and aquatic habitat degradation. Table H5-6 compares the amount of new impervious surface created by the project for each alternative in the Federal Way, Fife, and Tacoma segments with existing conditions.

For all alternatives, an optional Portland Avenue bike and pedestrian bridge is also being considered that would connect the Portland Avenue Station or the Portland Avenue Span Station Option to the neighborhoods and Puyallup Tribe of Indians facilities on the south side of I-5 (Figures H5-27 and H5-28). It would be an impervious surface but built above existing impervious surfaces, such as roadways, sidewalks, and developed areas. It would also be non-pollution generating. Therefore, this optional bridge is not expected to result in changes in runoff and has not been included in the impervious surface calculations for the alternatives.

[1] Sound Transit and the Washington State Department of Ecology entered into a Memorandum of Understanding dated December 9, 2019, in which Sound Transit agreed to conduct a study to characterize the quality of the stormwater discharged from light rail guideway. The data and analysis from the study will be used to inform the design of light rail projects that are scheduled in the Sound Transit 3 Plan to be completed between 2030 and 2041, and, as necessary, Sound Transit will identify all known, available, and reasonable methods of prevention, control, and treatment (abbreviated as AKART) to define light-rail specific best management practices.

Table H5-6 Existing and Proposed Impervious Surfaces[1]

Alternative	Existing Conditions (Acres)				Proposed Conditions (Acres)				Change (Acres)

Sources: Existing land cover: TDLE corridor survey lines (project data, 2018); aerial imagery (project data, 2017 and 2019 where available); impervious surface raster data (King County 2015). Proposed land cover: TDLE CAD design lines (June 2020); station plans (Nov 2019).

Notes:

(1) Previous version included all land cover in 200-ft study area around project elements; similar to OMFS analysis, analysis for this version only covers permanent impact footprint.

(2) Non-pollution-generating impervious surface as defined for this analysis includes light rail tracks, guideways, and stations, sidewalks, and rooftops.

(3) Pollution-generating impervious surface includes parking, bus areas, and roads. Sound Transit and the Washington State Department of Ecology entered into a Memorandum of Understanding dated December 9, 2019, in which Sound Transit agreed to conduct a study to characterize the quality of the stormwater discharged from light rail guideway. The data and analysis from the study will be used to inform the design of light rail projects that are scheduled in the Sound Transit 3 Plan to be completed between 2030 and 2041, and, as necessary, Sound Transit will identify all known, available, and reasonable methods of prevention, control, and treatment (abbreviated as AKART) to define light-rail specific best management practices.

(4) Stormwater ponds were included in previous versions as NPGIS, but are removed from this analysis (assumed to be PGIS).

4.3 Floodplain Impacts in the Fife Segment

For discussion of floodplain impacts in other project segments, see the Draft EIS Section 4.8 Water Resources.

4.3.1 Impacts Analysis

The Fife Segment would cross FEMA Special Flood Hazard Areas (100-year floodplains) in the study area that are associated with Hylebos Creek, the Fife Ditch, the Fife Ditch Tributary 1, and Wapato Creek (Figure H5-4). The preferred Fife Station would be located within the Fife Ditch Tributary 1 regulatory 100-year floodplain boundary (FEMA 2017). The Fife 54th Avenue Station Option and the Fife 54th Span Station Option would each be located outside of and to the west of the mapped floodplain boundary. However, as previously noted, the FEMA floodplain boundary is based on 1979 historical mapping and does not reflect subsequent development and current topographic conditions. Because the elevations of the Fife 54th Avenue Station Option and the Fife 54th Span Station Option are similar to the preferred Fife Station, the future flood risk is likely similar for the preferred Fife Station and station options.

The Fife Ditch and Tributary 1 mapped 100-year floodplain is a Zone A designation, meaning a horizontal floodplain boundary has been delineated, but a vertical base flood elevation has not yet been determined through detailed measurements or hydraulic analysis. Figure H5-29 shows the general location of fill in the floodplain necessary to raise the Preferred Fife Station above flood elevation. The approximate locations of the City of Fife LOMAs are also shown. The LOMAs, which were approved by FEMA in 2023, designate portions of the land inside of the floodplain boundary as being above the base flood elevation and, therefore, outside of the mapped floodplain. Sound Transit is working with the City of Fife to determine the extent of the floodplain-excluded areas and understand both the regulatory requirements for floodplain development and flood risks. Base flood elevations, fill volumes, and potential loss of flood storage would be determined during future phases of the project as additional information is collected and the station design progresses.

FEMA Floodplain Boundary

Approximate areas receiving fill (February 2020 Preliminary Design)

Areas associated with Letters of Map Amendment (LOMAs)

NOTES:

Potential sea level rise could increase flood elevations and is being included in further design considerations for the station and bus transit area shown in yellow.

City of Fife LOMAs designate portions of the land inside of the floodplain boundary as being above the base flood elevation.

LOMA parcel boundaries are approximate and are for discussion purposes only.

4.3.2 Fife Segment Alternatives – Screening

Background

Executive Order 11988 of May 24, 1977, and its subsequent updates (Executive Orders 13690 and 14030), regulate how federal agencies may conduct, allow, or support actions in a floodplain and include climate change considerations when developing in the floodplain. If the proposed project is located within a floodplain, U.S. DOT Order 5650.2 requires a detailed analysis that discusses floodplain impacts, whether the action would result in a significant encroachment, and potential mitigation measures.

Significant Encroachment

Based on U.S. DOT Order 5650.2 and FTA Standard Operating Procedure No. 22, FTA and Sound Transit are reviewing available floodplain data to discern whether the fill associated with the preferred Fife Station alternative meets any of the criteria of a significant encroachment on the floodplain. According to U.S. DOT Order 5650.2, a floodplain encroachment is significant if it results in one or more of the following flood-related impacts:

1. A considerable probability of loss of human life;
2. Likely future damage associated with the encroachment that could be substantial in cost or extent, including interruption of service on or loss of a vital transportation facility; and
3. A notable adverse impact on natural and beneficial floodplain values.

In reviewing the above considerations, FTA and Sound Transit have determined that the station would be constructed based on standard best practices to support the safety of human life, and the station location would not result in a high probability of the loss of human life. Further, the station platform and guideway would be elevated above the floodplain. During major flood events, some parking areas and/or adjacent local roads could be underwater, which would limit or interrupt access to or from the station area; however, light rail services would be able to continue to travel across the floodplain without stopping at the station in Fife. Construction of the project would not cause loss of any existing vital transportation facilities. The primary natural and beneficial value of the Fife floodplain (as defined by U.S. DOT Order 5650.2) is natural moderation of floods. The project design would include compensatory flood storage to avoid notable adverse impacts. As part of this effort, Sound Transit is currently reviewing available floodplain data to estimate the base flood elevation. Based upon the information above, FTA has made a preliminary determination that the project would not result in a significant encroachment on the floodplain as defined by U.S. DOT Order 5650.2.

Only Practicable Alternative

If the proposed project involves significant encroachment on the floodplain, the Final EIS must include FTA's finding that the proposed action is the only practicable alternative. The documentation must include a discussion of reasonable alternatives, why they were not practicable, and how the project conforms with applicable local/state regulations. Sound Transit conducted an alternative evaluation process (see Appendix I, Alternatives Development Supporting Documents) as part of the standard project development.

Consideration of Other Alternatives

Station and alignment concepts were developed as part of the alternatives evaluation process, which included comments from Tribes, agencies, and the public. Concepts that were determined to be inconsistent with the project purpose and need or the Sound Transit 3 Plan that included circuitous routing, that would add travel time to the high-capacity transit service, or that were determined to be infeasible based on other environmental constraints, were not evaluated beyond this prescreening phase. Alternatives were then evaluated in the increasingly detailed Level 1 and Level 2 alternatives evaluation phases; these alternatives are presented in Table H5-7. The locations of the other alternatives previously considered are shown in Figure H5-30.

The results of the Level 1 Evaluation were reviewed by the Elected Leadership Group, Interagency Group, the Stakeholder Group, and the public in September 2018. These groups provided input on the Level 1 evaluation and findings, and the Elected Leadership Group made a recommendation to advance Fife 1, Fife 3A, Fife 3B, Fife 4A, and Fife 4B alternatives for Level 2 analysis. After Level 2 analysis and findings were presented in spring 2019, the Elected Leadership Group recommended advancing the Fife 3B alternative for environmental review to the Sound Transit Board, which was approved in July 2019. In March 2023, the Sound Transit Board identified the need to analyze additional station options in Fife and added the Fife 54th Avenue Station Option and the Fife 54th Span Station Option.

Detailed descriptions of the alternatives are included in Chapter 2, Alternatives Considered in the Draft EIS. Detailed information on the alternatives evaluation criteria and process, including the screening for the Fife station options is presented in Appendix I, Alternatives Development Supporting Documents.

Table H5-7 Fife Segment: Level 1 and Level 2 Alternatives Considered

Practicable Considerations U.S. DOT Order 5650.2(9)	No-Build Alternative	Fife 1* I-5 West to 12th Street	Fife 2A and 2B Pacific Highway West	Fife 3A* and 3B** 15th Street	Fife 4A*, 4B*, and 4C Pacific Highway East	Fife 5A, 5B, and 5C Pacific Highway South	Fife 6 I-5 West (Representative)	Fife 7 I-5 East	Fife 8 I-5 Median	Fife 9A and 9B I-5 South
Potential Environmental Impacts	N/A	Would conflict with WSDOT's extensive Riparian Restoration and Hylebos Creek realignment project.	N/A	N/A	Would place columns in WSDOT's proposed realigned Hylebos Creek stream buffer.	Would place columns in WSDOT's proposed realigned Hylebos Creek stream buffer.	High impacts to Hylebos Creek.	High impacts to Hylebos Creek.	Higher potential environmental impacts due to the need for major I-5 widening/modifications.	Would result in disturbance through farmlands, wetlands, and floodplains.
Potential Social or Economic Impacts	Would not meet projected travel demand; it would not connect the Fife community and the Puyallup Tribe of Indians to regional centers and destinations on the regional high-capacity transit system; it would not expand mobility for the corridor and region's residents, including transit-dependent, low-income, and minority populations; and it would not encourage transit (TOD).	Would not support desired travel speeds and level of service to the community. Would be located outside of the Fife City Center and away from Pacific Highway E (SR 99) and I-5; inconsistent with adopted regional plans and Sound Transit's Regional Transit Long-Range Plan. Limited development opportunities north of station. Would cause community disruption outside of Fife City Center, including noise and visual impacts.	Would impact northern portion of St. Paul Chong Hasang Church property and could disrupt its campus, including low-income senior apartments, Rainier View Apartments. Station located outside of the planned Fife City Center area. Higher impacts to properties and potentially to property owned by the Puyallup Tribe of Indians near station. May impact Section 4(f) property.	Would impact northern portion of St. Paul Chong Hasang Church property and could disrupt its campus, including low-income senior apartments, Rainier View Apartments. Higher level of property impacts. May impact Section 4(f) property. Location in proximity to the new Fife City Center Vision, supported by the City of Fife.	High impact to low-income senior housing complex (Rainier View Apartments). High level of property impacts, including crossing property owned by the Puyallup Tribe of Indians. High potential impacts to freight movement. Potential conflicts with SR 167 Improvement Project and future WSDOT connections.	High impact to low-income senior housing complex (Rainier View Apartments). High level of property impacts, including crossing property owned by the Puyallup Tribe of Indians. Lower performing stations based on congestion, multimodal access, and TOD measures. Not preferred by City of Fife. High potential impacts to freight movement. Potential conflicts with SR 167 Improvement Project and future WSDOT connections.	High impacts to Puyallup Tribe of Indians property and the Emerald Queen Casino Fife. Station would be far from the planned Fife City Center area, lower performance for multimodal access, congestion, and TOD measures, largely as a result of the constraints to access and development posed by I-5 and the 54th Avenue East Interchange directly adjacent. Conflicts with SR 167 Improvement Project and future WSDOT connections.	High impacts to Puyallup Tribe of Indians property and the Emerald Queen Casino Fife. Station would be far from the planned Fife City Center area, lower performance for multimodal access, congestion, and TOD measures, mainly due to the constraints posed by I-5 and the 54th Avenue East Interchange directly adjacent. Conflicts with SR 167 Improvement Project and future WSDOT connections.	Would not support desired travel speeds and level of service to the community. Additional road closures and major traffic congestion impacts during work on or near I-5. Lower station accessibility and lack of multimodal access.	Would not support desired travel speeds and level of service to the community. Would have higher property impacts. The station served by this alignment was lower performing on multimodal access and TOD measures and is well outside the Fife City Center area. Would be located adjacent to park properties, which could result in a *de minimis* Section 4(f) use.
Potential Engineering, Design, or Cost Impacts	Would fail to provide high-quality, rapid, reliable, and efficient light rail transit to communities in the project corridor, inconsistent with the Sound Transit 3 Plan.	Would increase travel time, reduce ridership, and lacks opportunity for transit-oriented development. High cost.	N/A	N/A	Would have major construction conflicts due to the WSDOT SR 167 Improvement Project and future proposed WSDOT direct connections at this interchange. High cost.	Would have major construction conflicts with the WSDOT SR 167 Improvement Project and future WSDOT connections.	Major impact to future WSDOT proposed direct connections at the SR 167 interchange; the alignment would likely need to be extremely tall to leave space for future ramps, resulting in higher cost and design challenges. Requires complex coordination with SR 167 and 54th Street Interchange projects.	Major impact to future WSDOT proposed direct connections at the SR 167 interchange; the alignment would likely need to be extremely tall to leave space for future ramps, resulting in higher cost and design challenges. Requires complex coordination with SR 167 and 54th Street Interchange projects. Station access constraints due to location between I-5 and SR 99.	Requires widening and modification to I-5, resulting in construction safety issues and higher construction impacts. High utility conflicts. Restricted by Federal Highway Administration (FHWA) limitations on I-5 right-of-way use, including severe space constraints and conflicts with anticipated future WSDOT projects to maintain safe and effective operations on I-5. Not supported by FHWA or WSDOT.	Requires an additional crossing of I-5 to the north or south, which significantly increases costs. High construction impacts, including additional closures of I-5 and other major roadways and associated traffic impacts. Major construction conflicts with WSDOT SR 167 Improvement Project and future proposed WSDOT direct connections at this interchange.

Notes: The alternative names in this table follow the Level I Alternatives Evaluation Report and Level 2 Alternatives Evaluation Report (see Appendix I – Alternatives Development Supporting Documents).
*Alternative advanced into Level 2 Alternatives Evaluation (see Appendix I – Alternatives Development Supporting Documents).
**Alternative advanced into Level 2 Alternatives Evaluation and modified for analysis in the Draft Environmental Impact Statement.

Data Sources: King and Pierce County, Cities of Federal Way, Fife, Milton, Tacoma (2023).

Note: In 2023, the City of Fife submitted and received FEMA approval for Letters of Map Amendment that removed certain parcels and structures in the study area near the Fife Ditch Tributary 1 from the designated floodplain.

Tacoma Dome Link Extension

5 AVOIDANCE AND MINIMIZATION OF IMPACTS

This appendix is intended to provide supplemental information and background to support the primary discussion of practices to avoid and minimize or mitigate potential impacts to water resources in the project study area that are discussed in Section 4.8, Water Resources, of the Draft EIS.

5.1 Best Management Practices

Sound Transit seeks to prevent or minimize potential impacts on water resources by continued project design and development measures that follow local stormwater management regulations, use required best management practices (BMPs), encourage sustainable low-impact development approaches where feasible, and prepare for climate-related uncertainties where practicable. This section discusses BMPs that would be included in the project design regardless of the findings of this water resources impact analysis. Therefore, they are not considered mitigation measures and are instead part of the proposed alternatives.

Sound Transit's Design Criteria Manual (Sound Transit 2021) requires project-related stormwater management to conform to the requirements of the local jurisdictions. These measures include minimizing impervious footprints, avoiding placement of design-related structural elements in or near water resources and their associated buffers when possible, and installing or upgrading water quality treatment and flow control facilities when required. The Tacoma Dome Link Extension would comply with the WSDOT Highway Runoff Manual (WSDOT 2019), the King County Surface Water Design Manual (King County 2021a), the Federal Way Addendum to the King County Surface Water Design Manual (City of Federal Way 2017), the King County Stormwater Pollution Prevention Manual (King County 2021b), the Pierce County Stormwater Management & Site Development Manual (Pierce County 2021), the Stormwater Management Manual (City of Tacoma 2021), and the 2019 Ecology Stormwater Management Manual for Western Washington (Ecology 2019b).

In addition, based on Sound Transit directives (Sound Transit 2021) and Ecology requirements (Ecology 2019b), stormwater management facilities would be designed using sustainable low-impact development approaches where feasible. However, due to a predominant presence of till-type soils with low infiltration and high runoff potential in the study area, the use of infiltration-based low-impact development approaches may not be well suited and other stormwater management approaches may be necessary. Stormwater flow control techniques may include detention ponds, infiltration ponds, vaults, and dispersion. Water quality treatment techniques may include bioretention, ecology embankments, and media filter vaults. Treatment to remove metals, and oil and grease would be provided at parking lots and roadway areas where required.[2]

Initial design planning efforts recognize climate-related uncertainties, such as increased precipitation and sea-level rise, and potential impacts to water resources. Climate-related hydrologic changes could include increases in flow rates and velocities, which could result in increased flood elevations and scour. Once a Preferred Alternative has been confirmed or modified for the project, Sound Transit would include consideration of climate change data,

[2] Sound Transit and the Washington State Department of Ecology entered into a Memorandum of Understanding dated December 9, 2019, in which Sound Transit agreed to conduct a study to characterize the quality of the stormwater discharged from light rail guideway. The data and analysis from the study will be used to inform the design of light rail projects that are scheduled in the Sound Transit 3 Plan to be completed between 2030 and 2041, and, as necessary, Sound Transit will identify all known, available, and reasonable methods of prevention, control, and treatment (abbreviated as AKART) to define light-rail specific best management practices.

which predicts the effects of the buildup of greenhouse gases, based on current understanding of atmospheric physics and chemistry. Strategies to minimize these impacts may include:

- Estimation of anticipated sea level rise and risk of future flooding.
- Estimation of potential floodplain increases.
- Design freeboard (the distance between the waterline and the lowest point of a structure) that is above the current or projected base flood elevation.
- Channel stabilization and armoring around structural elements to resist scour.

Currently, there are streets that are impassable during major floods in the Fife area, which is where the preferred Fife Station, the Fife 54th Avenue Station Option, and the Fife 54th Span Station Option would be located. If and when flooding occurs in the future, the ground level parking and access roads to the station could be temporarily under water, along with the surrounding area. During these events light rail patrons may be unable to access the station by car or bus. However, the light rail would still operate across the floodplain without stopping at the station in Fife. Once the water recedes, normal bus and car operation could resume.

To address uncertainties associated with climate change, the following strategies would be considered as the design proceeds:

- Consideration of use of piers, pilings, or other structures to elevate the preferred Fife Station above flood risk and minimize fill footprint in floodplain.
- Increase stormwater storage volume by a certain percentage, where flow control is required to account for potential increases in rainfall depths.
- Increase treatment flow rates by a similar percentage, where water quality treatment is required to account for potential higher increases in future precipitation.

The Puyallup Tribe of Indians has also established certain areas where the Tribal government has identified resources or land that is of Tribal importance for economic, social, cultural, and ceremonial reasons, and the project would avoid those areas for placement of stormwater management BMPs or other mitigation.

5.1.1 Long-Term Operations

5.1.1.1 Surface Water

The concept design for stormwater facilities for the Draft EIS considered conservative flow control strategies and redevelopment requirements that provide enhanced treatment for all post-project PGIS. Proposed BMPs include detention ponds, detention vaults, guideway dispersion, bioretention, and infiltration facilities. Water quality would be treated to Enhanced Treatment standards (intended to provide a higher rate of removal of dissolved metals than Basic Treatment), and flows would be controlled based on a target of forested land use conditions. More detailed information will be provided in the Conceptual Stormwater Design Report as the design progresses.

Outlets from stormwater management facilities would generally connect to existing systems where such systems exist and may necessitate the addition of new discharge points where there is not an existing connection.

5.1.1.2 Groundwater

The project would consult the state and applicable local wellhead protection plans to avoid and minimize to the greatest extent feasible any impacts on any of the associated aquifer recharge or wellhead capture zones. The project design would also follow the EPA review criteria for preventing aquifer contamination to ensure compliance with regulations of the Sole Source Aquifer Program (EPA 2019). By taking guidance from Washington's Wellhead Protection Program, which emphasizes a progressive management concept, and using a combination of BMPs and local land use protection and design standards, the proposed project would not be expected to impact groundwater resources (WA DOH 2017).

Avoidance and minimization measures that could include:

- Evaluating the use of closed or open-ended steel pipe piles, which have been found to prevent or minimize migration of contaminants (Shanon & Wilson 2014).
- Avoiding the use of H-piles and driven concrete piles due to their potential to create pathways for contamination migration.
- Avoiding the use of timber piles, which can facilitate wicking and chemical leaching.
- Designing and constructing pile tips to prevent overcutting the ground around the piles as they are driven. This would decrease the chances of forming pathways for contamination along the exterior boundaries of the structural elements.
- Specifying the outside diameter of the driving mechanism tool to match or be smaller than the outside diameter of the pile itself. This would reduce the potential for gaps to form between the exterior element boundary and the surrounding soils, creating pathways.

5.1.1.3 Shorelines

To minimize impacts on water resources, the alternatives would avoid placement of piers or columns within the ordinary high water mark of rivers and streams and associated stream buffers to the greatest extent possible. To meet the standards of the statewide and city shoreline master plans, the project design would (wherever possible) include elements that preclude the need for shoreline armoring (adding large rock or other hard structure to protect the banks from scouring), flood control works, vegetation removal, and other shoreline modifications. Where modification or stabilization measures cannot be avoided, BMPs and low-impact development techniques for surface water management would be implemented to minimize adverse impacts on existing shoreline ecological functions.

5.1.2 Construction

The risk of construction-related impacts to water resources would be controlled by complying with the NPDES Construction Stormwater General Permit process and the Highway Runoff Manual, the King County Stormwater Pollution Prevention Manual, the Pierce County Stormwater Management & Site Development Manual, and Ecology Manual standards and BMPs, as appropriate. Through compliance with these requirements, an approved Construction Stormwater Pollution Prevention Plan (CSWPPP) would be developed and implemented for the proposed Project. The CSWPPP would serve as the overall construction stormwater avoidance and minimization plan by describing overall procedural and structural pollution-prevention and flow control BMPs, including location, size, maintenance requirements, and monitoring. An Ecology-certified erosion and sediment control lead would be employed to conduct the

inspections, and deficiencies would be promptly corrected. In addition, the CSWPPP would include each of the following plans:

- Temporary Erosion and Sediment Control Plan – This plan would outline the design and construction specifications for BMPs to be used to identify, reduce, eliminate, or prevent sediment and erosion problems.
- Spill Prevention, Control, and Countermeasures Plan – This plan would outline requirements for and implementation of spill prevention, inspection protocols, equipment, material containment measures, and spill response procedures.
- Concrete Containment and Disposal Plan – This plan would outline the management, containment, and disposal of concrete debris, slurry, and dust and discuss BMPs that would be used to reduce high pH.
- Dewatering Plan – This plan would outline procedures for pumping groundwater away from the construction area, and storing (as necessary), testing, treating (as necessary), and discharging or disposing of the dewatering water.
- Fugitive Dust Plan – This plan would outline measures to prevent the generation of fugitive dust from exposed soil, construction traffic, and material stockpiles.

Specific BMPs would be designed based on the manuals previously mentioned. BMPs could potentially include:

- Phasing the work to minimize the amount of disturbed area at any one time.
- Developing construction plans for sensitive areas (such as stream crossings) that minimize the need for haul roads using fill material, such as building temporary bridges or platforms with small piles (i.e., pin piles).
- Marking/fencing of construction limits.
- Minimizing the amount of cleared and cut pavement areas at any one time to the extent feasible.
- Stabilizing construction entrances and haul roads using quarry spalls (crushed basalt).
- Washing truck tires at construction entrances, as necessary.
- Cleaning construction site track-out from public roads, as necessary.
- Constructing silt fences downslope from exposed soil.
- Protecting catch basins from sediment.
- Containing and controlling concrete and hazardous materials on site.
- Installing temporary ditches or asphalt berms to route runoff around or through construction sites, with periodic check dams to slow and settle runoff.
- Providing temporary plastic or mulch to cover soil stockpiles and exposed soil.
- Using temporary erosion control blankets or mulch on exposed steep slopes to minimize erosion before vegetation is established.
- Constructing temporary sedimentation ponds or cells to remove solids from concentrated runoff and dewatering before being discharged.
- Conducting vehicle fueling and maintenance activities no closer than 100 feet from waters of the state.

- Providing secondary containment for all potential sources of leaks and spills.
- Implementing stream protection measures, as necessary, including diverting stream flow around the construction area and limiting the construction period to the required "work window," a period of the year identified by the timeframe when potential effects to fish are minimized.

The Tribe's Antidegradation Implementation Procedures, which apply to any discharges on the Puyallup Tribe of Indians Reservation, would include:

- Benchmark monitoring for turbidity (or transparency) and, in the event of a large amount of concrete work or engineered soils, pH monitoring as well.
- Tribal notification prior to conducting inspections at construction sites generating stormwater discharged to Tribal waters.
- Treatment of dewatering discharges to minimize the discharge of pollutants to groundwater or surface waters from stormwater that is removed from excavations, trenches, foundations, vaults, or other storage areas.
- To provide and maintain natural buffers to the maximum extent possible (and/or equivalent erosion and sediment controls) when Tribal waters are located within 100 feet of the site's earth disturbances. Equivalent erosion and sediment controls would achieve the sediment load reduction equivalent to a 100-foot undisturbed natural buffer.
- Construction of the bridge crossing the Puyallup River and portions of the Tacoma Segment would cross lands under the jurisdiction of the Puyallup Tribe of Indians Reservation. The Puyallup Tribal Code (Section 15.12 et seq.) establishes district classifications, in substantial compliance with the Puyallup Tribe of Indians Comprehensive Land Use Plan, for all lands within the boundaries of the Puyallup Reservation. The locations and boundaries of the zoning districts can be located on the Tribe's official zoning map, which is kept on file in the Tribe's Land Use Office and is available for inspection by Tribal members. Certain activities on Tribal trust lands may be undertaken only after development permits and construction permits have been issued by the Tribe. These activities include the construction of buildings or structures within 200 feet of shorelines and dredging or filling of watercourses (including pile driving).

Through compliance with applicable construction permits and BMPs that the permits would incorporate, the light rail alternatives are not expected to adversely affect water resources during construction.

If discharge of treated construction or process water to a sanitary sewer is proposed, approval must be obtained from either the King County Industrial Waste Division or the Pierce County Industrial Pretreatment Program and any other applicable local jurisdiction. For construction within and over streams or other state-regulated water bodies, an HPA would be required. The HPA would be obtained from WDFW before work begins. The project would comply with the HPA's stream protection measures, including diverting stream flow around the construction area and limiting the construction period to the required "work window," a period of the year identified in the HPA when potential effects to fish would be minimized.

5.2 Floodplains

FMC 15.40 requires development permitted in a flood hazard area to be designed to a zero-rise standard, which Sound Transit would comply with by providing compensatory storage to offset proposed floodplain fill. Sound Transit will confirm the needed amount of compensatory flood storage, pending determination of the base flood elevation for Zone A floodplains. Additional survey work or hydraulic analysis may be required to determine appropriate volumes and locations for compensatory storage.

Table

Table H6-1 Geologic Hazards....H6-1

Table H6-1 Geologic Hazards

Alternative	Erosion	Steep Slope	Landslide Hazard	Seismic – Liquefaction	Seismic – Tsunami	Volcanic – Lahar	Soil – Corrosivity	Soils – Hydric
Federal Way Segment								
Preferred FW Enchanted Parkway[1]	Present	Present	None	Low	Unlikely	Present	Present	None
South Federal Way Segment								
SF Enchanted Parkway	Present	Present	None	Low	Unlikely	Present	Present	None
SF I-5	Present	Present	None	Low	Unlikely	Present	Present	None
SF 99-West[2]	Present	Present	Present	Low	Unlikely	Present	Present	Present
SF 99-East[2]	Present	Present	Present	Low	Unlikely	Present	Present	Present
Fife Segment								
Fife Pacific Highway[3]	None	Present	Present	High	Present	Present	Present	Present
Fife Median[3]	None	Present	Present	High	Present	Present	Present	Present
Fife I-5[3]	None	Present	Present	High	Present	Present	Present	Present
Tacoma Segment								
Preferred Tacoma 25th Street-West	None	Present	None	High	Present	Present	None	None
Tacoma 25th Street-East	None	Present	None	High	Present	Present	None	None
Tacoma Close to Sounder	None	Present	None	High	Present	Present	None	None
Tacoma 26th Street	None	Present	None	High	Present	Present	None	None

Notes:
1) The geologic hazards would be the same with FW Design Option.
2) The geologic hazards would be the same with the Porter Way Design Option for the SF 99-West and SF 99-East alternatives.
3) For all Fife alternatives, the 54th Avenue and Fife 54th Span design options have the same geologic hazards.

1 INTRODUCTION

This technical appendix details the specific ranking methodology of hazardous materials database sites, the databases themselves, and the complete results of the analysis. The analysis was developed to comply with the National Environmental Policy Act (NEPA) and federal, state, and local policies, standards, and regulations. This appendix does not address the methodology or results of other parts of the Tacoma Dome Link Extension (TDLE) Draft Environmental Impact Statement Hazardous Materials Analysis (historical review, including fire insurance maps, historical aerial photographs, and site reconnaissance).

1.1 Introduction to Resources and Regulatory Requirements

- A hazardous material is any substance that – because of its quantity, concentration, or physical or chemical properties – may pose a hazard to human health and the environment either by itself or through interaction with other factors. Hazardous materials in various forms can cause death, serious injury, long-lasting health effects, and damage to buildings, homes, and other property. Hazards to human health and the environment can occur during production, storage, transportation, use, or disposal of these materials.
- Hazardous materials or substances, hazardous wastes, petroleum products and wastes, and contaminated environmental media (including soils, sediments, surface water, and groundwater) are present within the study area and could potentially result in impacts on human health and the environment during construction activities or long-term operation activities.
- The hazardous materials analysis identified properties in proximity to the Tacoma Dome Link Extension (TDLE) build alternatives that are recognized to have hazardous materials issues associated with current or historical site activities or that have a documented release to the environment. Types and locations of sites were identified to evaluate potential impacts on construction, property ownership, and general public health and safety.

1.2 Study Area

For the analysis of hazardous materials, the study area includes the area within 0.25 mile (1,320 feet) of either side of the project footprint and area used for construction, since potential impacts would likely be restricted to the immediate corridor of the build alternatives. The Environmental Data Resources Inc. (EDR) search distance was set to 1 mile of either side of the project footprint. Because of the large project footprint, only sites listed in priority databases indicating an impact on groundwater or a substantial hazardous material release were reviewed past 0.25 mile outside of the project footprint. The hazardous material sites for each TDLE alternative are shown on Figures H7-1 through H7-10. A map showing the location of the Tacoma smelter plume is shown on Figure H7-11.

1.3 Summary of Key Findings

During this analysis, 12 high-risk hazardous materials sites were identified. The impacts of these sites to the TDLE build alternatives are discussed in Section 4.12 of the TDLE Draft EIS. Table H7-1 identifies high impact sites that may be affected by each build alternative. Table H7-2 identifies the low-and medium-risk sites that may be affected by each build alternative. There are no high-risk sites in the Federal Way Segment.

2 METHODOLOGY

The study area for the hazardous materials analysis includes the build alternative and the area within a 0.25-mile radius of each build alternative footprint. The footprint includes the construction limits, parcels proposed for full or partial acquisitions, and temporary construction easements (TCEs). Because of the large project footprint, only sites listed in priority databases indicating an impact on groundwater or a substantial hazardous material release were reviewed past 0.25 mile of either side of the project footprint.

2.1 Guiding Regulations, Plans, and Policies

Applicable laws and regulations regarding hazardous materials include the following:

Federal

- Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 United States Code [U.S.C.] § 103).
- Clean Water Act (CWA) (33 U.S.C. §§ 1251 et seq.).
- Federal Resource Conservation and Recovery Act (RCRA) (42 U.S.C. §§ 6901 et seq.).
- Federal Highway Administration (FHWA) Technical Advisory T6640.8A, 1987 (FHWA 1987).
- Superfund Amendments and Reauthorization Act (SARA).
- Toxic Substances Control Act (TSCA) (15 USC §§ 2601–2629).
- Department of Transportation Hazardous Materials Regulations (49 Code of Federal Regulations [CFR] 100–185).
- Spill Prevention Control and Countermeasure Plans (40 CFR 112.7).

State

- Dangerous Waste Regulations (Washington Administrative Code [WAC] 173–303).
- Model Toxics Control Act (MTCA) and its implementing regulations (Revised Code of Washington [RCW] 70A.305 and WAC 173-340).
- Underground Storage Tank Statute and its implementing regulations (RCW 70A.355 and WAC 173-360A).
- Sediment Management Standards (WAC 173–204).

2.2 Regulatory Database Evaluation

The hazardous materials analysis was developed primarily from conducting an environmental database search via the EDR Radius Map™ Report with GeoCheck® EDR database. The database search report meets the government records search requirements of American Society for Testing and Materials (ASTM) standard E1527-13, Standard Practice for Environmental Site Assessments (ESAs). The EDR reports summarize database information for the areas located within a 0.25-mile radius of each build alternative. This information – along with the Washington State Department of Ecology (Ecology) Cleanup Site Search database – was used to evaluate the alignment alternatives. The current status of regulatory and cleanup actions was also considered. The evaluation reflects the nature and extent of contamination and the media contaminated and then applies professional judgment to assess the level of concern that contamination may pose for a potential acquisition property, including the level of cost and difficulty in cleanup or remediation (addressed in Phase I ESAs of high-risk sites, Attachments A through G). The potential that contamination may have migrated or could still migrate to other properties, such as through groundwater, was also evaluated.

The regulatory database records search included, but was not limited to, reviewing the following federal, state, and local databases:

- Federal National Priorities List (NPL).
- Federal Proposed NPL.
- Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS).
- Federal CERCLIS No Further Remedial Action Planned (NFRAP).
- Federal Corrective Action Sites (CORRACTS).
- Federal Emergency Response Notification System (ERNS).
- Ecology Leaking Underground Storage Tank (LUST) Incident Report.
- Ecology Underground Storage Tank (UST) Database.
- Ecology ALLSITES Database.
- Ecology Confirmed and Suspected Contaminated Sites List (CSCSL).
- Ecology Confirmed and Suspected Contaminated Sites – No Further Action (CSCSL-NFA).
- Ecology Voluntary Cleanup Program (VCP).

2.3 Historical Land Use

The objective of the historical use information review was to develop a history of the previous uses of properties within the study area and surrounding area that helped to identify the likelihood of past uses having led to environmental conditions that could potentially affect the environment or the project's construction. The historical land use of the study area and adjacent properties was researched to determine whether activities at the sites may have involved the use or handling of hazardous materials or petroleum products. Historical records reviewed included aerial photographs, Sanborn Fire Insurance maps, and local street directories.

2.4 Windshield Survey

A visual windshield survey of properties within the study area and the surrounding area was conducted to identify properties where hazardous materials may be present. The site examination consisted of observing the areas immediately surrounding the project construction locations, visiting representative areas of the projects, and visually assessing the areas within the study area for evidence of hazardous materials. The survey identified visual evidence of past or current practices that could lead to soil impacts, groundwater contamination, or both. The site reconnaissance was conducted by driving and walking throughout the project study area and visually identifying evidence of chemical containers or drums, large spills and leaks, distressed vegetation, and USTs or other hazardous material storage containers, as appropriate. All observations were conducted from public areas or rights-of-way.

Appendix H8 Utilities Background Materials

1 INTRODUCTION

This background material supports the analysis of the short-term construction and long-term operations impacts of Tacoma Dome Link Extension (TDLE) on utility providers and systems that currently serve, or are planned to serve, the project area.

2 METHODOLOGY

The study area for utilities is 100 feet around the project alternatives footprint, construction areas, and stations. Information on relocated or protected utility lines was compiled from several sources, including Sound Transit geographic information system (GIS) data, GIS data available on City of Federal Way, City of Milton, City of Fife, and City of Tacoma websites, utility maps, and in some cases, as-built drawings obtained from private and public utility companies, along with civil engineering plans depicting alternative alignments. Sound Transit identified major utility conflicts for each alternative by determining where underground or overhead utilities were within the project limits of each alternative. The goals of identifying the conflicts are as follows:

- Plan for relocating the utilities during construction and, therefore, remove conflicts with construction.
- Keep the project elements (i.e., buildings, tall structures) clear of the minimum required distance of overhead utilities.
- Account for relocation costs.

Major utilities are defined as utilities of larger size, such as:

- Water mains of 16-inch diameter or greater.
- Stormwater drains and sanitary sewers of 36-inch diameter or greater.
- Sanitary sewer force mains of 24-inch diameter or greater.
- 115-kilovolt (kV) and greater electrical transmission lines.
- High-pressure gas mains of any diameter.
- Intermediate-pressure gas lines with an 8-inch diameter or greater.
- Telephone and fiber-optic duct banks with three or more conduits.
- Petroleum product pipelines.

3 EXISTING UTILITY PROVIDERS

Table H8-1, Summary of Existing Utility Providers, summarizes the utility providers in each jurisdiction.

Table H8-1 Summary of Existing Utility Providers

Utility	Federal Way	Milton	Unincorporated Pierce County	Fife	Tacoma
Natural Gas	PSE	PSE	PSE	PSE	PSE
Electricity	PSE Bonneville Power Administration	City of Milton Public Works	City of Milton Public Works[1] Tacoma Public Utilities – Power[2]	Tacoma Public Utilities – Power	Tacoma Public Utilities – Power

Notes:
PSE: Puget Sound Energy
(1) City of Milton provides power for area east of I-5.
(2) Tacoma Public Utilities – Power provides power for area west of I-5.
(3) City of Milton provides stormwater collection for area east of I-5.
(4) City of Fife provides stormwater collection for area west of I-5.

4 SUMMARY OF MAJOR UTILITY CONFLICTS

Table H8-2 summarizes the major utility conflicts, expected length of relocation, and number of crossings where the length has not yet been determined. Actual relocation lengths of crossings would be determined during final design. Many underground intersecting utilities would require only a split casing. Utility Impact Figures (Figures H8-1, H8-2, H8-3, and H8-4) in each corresponding segment section below provide a basic visual representation of the key impacts and their locations within the project[1] The Draft EIS Appendix F, Conceptual Design Drawings, provides further information and more focused views of the conflicts to utilities and their surrounding area.

[1] Utility relocations that will be completed by outside parties or contractors are noted as “(by Others)” on Figures H8-1, H8-2, H8-3, and H8-4.

Tacoma Dome Link Extension

4.1 Long-term Impacts Common to All Build Alternatives

Operating TDLE would increase electricity usage in the study area through:

- Operation of trains with up to four cars using direct-current power taken from 12.5 kV electric distribution facilities, including traction power substations and signal bungalows.
- Increased demand at station locations due to station operational requirements (such as functional circulation, HVAC systems, mechanical piping, intelligent transportation systems, and visual message boards), including supplemental parking features.
- General safety lighting along the alignments, in parking areas (garage or surface), and at stations and other light rail facilities.

Long-term impacts are similar for all build alternatives as described in the TDLE Draft EIS Section 4.15.3.

4.2 Federal Way Segment

4.2.1 Preferred FW Enchanted Parkway Alternative and FW Design Option

The Preferred Federal Way (FW) Enchanted Parkway Alternative with or without the FW Design Option would impact both underground and overhead utilities located throughout the corridor. Project components such as column foundations, guideway, stations, and associated facilities would conflict with multiple underground and overhead utilities.

Just south of the Federal Way Transit Center, a 16-inch water main and nearby 30-inch sewer main at the east end of The Commons mall in Federal Way would be impacted by the Preferred FW Enchanted Parkway Alternative. Sound Transit would coordinate with Lakehaven Water and Sewer District to relocate the existing water main, maintaining system integrity and level of service for the area, and resolve any issues with the sewer main. For the Preferred FW Enchanted Parkway Alternative with the FW Design Option, major utilities near The Commons mall would be impacted and addressed in the same way, just at slightly different locations.

Near S 324th Street, BPA determined that new towers would have to be built to raise the transmission lines to allow space for the aerial guideway to cross underneath. BPA would replace the old towers with new ones prior to construction of the TDLE project, and the new tower locations would be adjacent to their existing location (BPA 2020). The BPA transmission lines would have to be raised for the Preferred FW Enchanted Parkway Alternative with or without the FW Design Option. Depending on the Operations and Maintenance Facility (OMF) South location selected, the BPA lines would potentially be raised as part of that project prior to TDLE.

For the FW Enchanted Parkway Alternative with or without the FW Design Option, the aerial guideway would be located close to the existing cell tower near I-5 and Oakland Hills Boulevard and could block or interfere with cell tower transmission waves. The tower would likely be relocated to available open property in the vicinity rather than adjacent to the interstate. The relocated tower may be located in private views. Access would be needed for periodic maintenance or improvement work, which could cause temporary noise impacts.

Along I-5 near 24th Avenue S, the at-grade track alignment would prompt the realignment of the existing roadway to make room for the TDLE guideway. This realignment of the road would cause the existing overhead electrical distribution and telecom lines, along with their support

poles, to be relocated. Due to the length of this relocation, the overhead lines would likely require a conversion to an underground system in accordance with Federal Way's municipal code requirements. The act of relocation combined with possible underground conversion would be a large impact during construction. There is also an existing Lumen four-line duct in the street that may be in conflict and constitute an additional large impact to a major utility. Sound Transit would coordinate with both PSE and the private franchise telecom providers to relocate these facilities and maintain level of service. A split casing would also likely be installed on an existing 30-inch sewer main that crosses I-5 near the sound end of 24th Avenue S. The split casing implementation would minimize impacts caused by TDLE.

At S 336th Street, a column foundation would impact an existing four-duct Lumen system; the infrastructure would be relocated to the south to be clear of construction for the TDLE column. Near the east end of S 344th Street, the aerial guideway and columns would cause a conflict with the existing overhead distribution electrical and telecom lines at this location. In coordination with PSE and Comcast, the lines would have to be relocated or raised to accommodate TDLE. Additionally, there is a large nine-line Lumen duct crossing I-5 at the end of S 344th Street that would need to be protected in place (if possible) during construction. The subsurface impacts could potentially be reduced to preserve the large duct by coordinating closely with Lumen.

4.3 South Federal Way Segment

The construction impacts caused by the TDLE aerial guideway would be the same for the SF Enchanted Parkway, SF 99-West, and SF 99-East alternatives between S 344th Street and the respective station area and would be the same for all alternatives from Porter Way through the corner of the City of Milton to the Fife city limit near 70th Avenue E.

Common to SF Enchanted Parkway, SF 99-West, and SF 99-East Alternatives

As TDLE travels south from the segment boundary toward Enchanted Parkway, the aerial design crosses both the 115 kV overhead transmission lines along with distribution electrical and telecom lines at the intersection of SR 18 and Enchanted Parkway. This would create a vertical conflict with the transmission electrical lines. The overhead transmission lines would have to be raised for clearance and the distribution and telecom lines would likely require underground conversion at this location based upon impact length. Sound Transit would review these conflicts with PSE and Comcast.

Common to All Alternatives

The TDLE guideway would come into close range with an existing cell tower near Porter Way. The guideway could block or interfere with cell tower transmission waves. The cell tower owner would likely be required to remove the tower or relocate it to available open property in the vicinity rather than adjacent to the interstate. The relocated tower may be located in private views. Access would be needed for periodic maintenance or improvement work.

At Porter Way, the aerial guideway would conflict with existing overhead distribution electrical and telecom lines spanning I-5 and would require Sound Transit to coordinate resolution of that conflict with the City of Milton for electrical needs, along with Comcast for telecom, which owns these lines.

As it reaches 70th Avenue E and crosses Pacific Highway, the guideway would generate several conflicts with utilities near this intersection, including with Tacoma Power overhead

distribution electrical lines, which would need to be relocated. Similar to impacts in Federal Way, the length of conflict for this impact would likely trigger a Fife city code, which could require an underground conversion. In addition to the power conflict, TDLE would also impact existing Lumen infrastructure located at the intersection; both aerial lines and a large 13- to 18-line duct would conflict with the project. Due to the multiple impacts, combined with the possible underground conversion at this location, construction work here would have a large effect on the project and should be noted. Sound Transit would coordinate with Tacoma Power, Lumen, and any other private franchise telecom providers that may also be attached to the poles to relocate these facilities and maintain level of service.

Utility conflicts created by construction of TDLE that are dependent on the selected alternative alignment are described in further detail in the following sections.

4.3.1 SF Enchanted Parkway Alternative

Near the SF Enchanted Parkway Station, there is also a potential impact to an existing five-line Lumen duct that would require relocation due to column foundations that would otherwise strike the telecom system. Similar to the impacts near the station, the construction of column foundations to support the aerial guideway through the South Federal Way Segment would also conflict with a nine-line Lumen duct at the 16th Avenue S and S 356th Street intersection. Compared with the SF Enchanted Parkway Station, the SF 352nd Span Station Option would be shifted slightly to the south and would have the same conflict with an existing five-line Lumen duct near the station location, as well as a nine-line Lumen duct at the 16th Avenue S and S 356th Street intersection. Both potential conflicts would require relocation and communication between Sound Transit and Lumen to resolve the issues.

Directly southeast of this location, the aerial guideway would also conflict with overhead distribution electrical lines at both S 359th and S 360th Street, with an additional vertical telecom conflict at the second location, which would require the lines to be relocated to gain the required vertical separation. As this change covers a short horizontal distance, underground conversion would likely not be required. Sound Transit, PSE, and Comcast would partner to complete this work.

A 24-inch sewer main crosses I-5 near the Todd Beamer High School roundabout in 16th Avenue S. The manhole access points to this main conflict with the alignment of the SF Enchanted Parkway Alternative. In addition, record drawings indicate the main crosses under I-5 at an approximate depth of 35 feet below ground and is inside a 51-inch steel casing, which would make it challenging to uncover the main and modify the existing alignment to provide continued access through a relocated manhole. Sound Transit would work with Lakehaven Water and Sewer District to develop a strategy for doing this work.

Approaching the corner of 12th Avenue S and S 372nd Way, the aerial guideway would impact overhead distribution power lines and three aerial telecom lines owned by Lumen. The overhead lines and poles would be moved to be clear of the project by Sound Transit working with PSE and Lumen to complete the relocation. The elevation of the guideway alongside I-5 at S 375th Street would conflict with the existing overhead distribution electrical lines spanning the freeway at this location. The lines would need to be relocated and raised in this location, in coordination with PSE.

In the South Federal Way Segment, the SF Enchanted Parkway Alternative and the SF I-5 Alternative would have the same utility impacts at S 372nd Way and S 375th Street. Sewer

impacts near Todd Beamer High School would be greater with the SF Enchanted Parkway Alternative than the protect-in-place measures that would be required for the SF I-5 Alternative.

4.3.2 SF I-5 Alternative

The SF I-5 Alternative south of S 344th Street would cause some different impacts on major utilities for the project than the other alternatives. After leaving the SF I-5 Station, the aerial guideway would cross over Enchanted Parkway S. At this location, the existing 115 kV overhead transmission electrical lines that span over I-5 on the existing bridge would have to be raised, with the additional challenge of re-spanning I-5. Sound Transit would coordinate with PSE to address this vertical conflict. Since this alternative is closer to I-5, it eliminates some of the distribution vertical conflicts caused by the other alternatives along Enchanted Parkway and SR 99.

The SF I-5 Alternative would place column foundations very close to the 24-inch sewer that crosses I-5 near the Todd Beamer High School roundabout on 16th Avenue S but does not directly conflict with it. As the guideway is aerial, this does not restrict access to existing manholes, so both the existing sewer main and the casing should be able to be protected in place during construction by Sound Transit working with Lakehaven Water and Sewer District. Due to the close proximity of the main and foundation, both parties would have to monitor progress very closely to ensure that no conflict arises that could cause a service interruption.

South of Todd Beamer High School, the SF I-5 Alternative would have the same impacts as the SF Enchanted Parkway Alternative, including the overhead distribution power and telecom lines as at S 372nd and S 375th Streets.

4.3.3 SF 99-West Alternative

The SF 99-West Alternative has the same construction impacts at the beginning of the segment as the SF Enchanted Parkway Alternative from S 344th Street to the station area. After the aerial guideway leaves the station and continues southwest toward Pacific Highway E, it approaches the intersection with S 356th Street and crosses over to the west side of the highway. This crossing creates a vertical impact to the PSE 115kV overhead transmission electrical lines at this intersection, and they would have to be raised. Additionally, depending on exact column placement and refined alignment, PSE's overhead electrical distribution lines in this area may also be in conflict along with some shorter runs of Lakehaven water and sewer mains. As the guideway continues south along the west side of Pacific Highway E toward the county line, it would impact several overhead electrical power services to properties on the west side of the highway. Those conflicts are not major in designation, but due to the high volume of them and their ability to create service interruptions for property owners, they should be noted as critical.

Beginning near the King/Pierce County Line and continuing south until the alignment crosses east back over Pacific Highway E to reach I-5 near Porter Way, the placement of supporting column foundations for the SF 99-West Alternative would impact City of Milton water mains and Pierce County sewer mains, and Sound Transit would have to work with those agencies to relocate those lines out of conflict. The TDLE guideway crossing east toward I-5, from the SF 99-West Alternative just past Birch Street, would again create a vertical intersection with the existing overhead electrical distribution and telecom lines. The electrical lines are owned by the City of Milton at this location, and the telecom lines are owned by Comcast. Sound Transit would coordinate with those impacted providers to resolve the clash with the TDLE alignment. This section of the alternative also creates several conflicts with overhead electrical service lines to properties along the west side of Pacific Highway E that would also require resolution.

4.3.4 SF 99-East Alternative

The SF 99-East Alternative has the same construction impacts at the beginning of the segment as the SF Enchanted Parkway and SF 99-West Alternatives from S 344th Street to the station area. After the aerial guideway leaves the station and continues southwest toward Pacific Highway E, it nears the intersection with S 356th Street and crosses S 356th Street to stay on the east side of the highway. As the SF 99-East Alternative does not cross Pacific Highway E, it avoids impacting the PSE 115kV overhead transmission electrical lines that occurs with the SF 99-West Alternative. The column placements for this alternative would likely have underground conflicts with the Lakehaven water and sewer mains in this area similarly to the SF 99-West Alternative, which would require Sound Transit to work with the District on relocation solutions.

South of the S 356th Street intersection, as the alignment continues tracking the east side of Pacific Highway E, the TDLE guideway comes into direct vertical conflict with the existing overhead electrical distribution and telecom lines that follow the same route south along the highway. As this impact is continuous from S 356th Street down to the alignment, directing back east toward I-5, past Birch Street, it would trigger the City of Federal Way's municipal code requirements, and both overhead systems would be required to be converted to underground. The act of relocation combined with possible underground conversion would be substantial, especially given that this underground conversion would have to be done for approximately 2 miles in length. Sound Transit would coordinate with PSE, Comcast, Lumen, and any other private franchise telecom providers that may also be attached to the poles to underground these facilities and maintain level of service. As described in the SF 99-West Alternative, this conflict and/or undergrounding would also create several impacts to the overhead electrical service lines to properties along the west side of Pacific Highway E; these service lines would also require resolution.

The SF 99-East Alternative avoids the City of Milton water main and Pierce County sewer main impacts created by the SF 99-West Alternative near the King/Pierce County line and down through Milton.

4.4 Fife Segment

In the Fife Segment, all alternatives would be on an aerial guideway. All impacts in this segment are related to conflicts with support column foundations or vertical conflicts at overhead intersection locations. All the alternatives in the Fife Segment have the same alignment from the east City of Fife jurisdictional boundary line to the preferred Fife Station.

Coming into the City of Fife, the TDLE alignment would be on an aerial guideway as it moves past the new roundabout at Pacific Highway E and Wapato Way E. Construction impacts and/or relocations to the existing overhead Tacoma Power electrical lines and overhead telecom lines, as well as conflicts with the large, underground Lumen duct that begins at the end of the South Federal Way Segment, may continue into the beginning of the Fife Segment area and would be coordinated with Tacoma Power, Lumen, and other utility providers, as necessary.

Approaching the Fife Station area, the aerial guideway would intersect with existing overhead distribution electrical and telecom lines at 62nd Avenue E and 59th Avenue Court E, requiring the relocation of those wires to eliminate the vertical conflict. TDLE would also cross existing 115 kV overhead transmission electrical lines just west of 59th Avenue Court E at the Fife Station; the lines would have to be raised to accommodate not only the project guideway but also the

proposed station. Tacoma Power would be doing the relocation work for the three conflicts by the station, working closely with Sound Transit.

West of the Fife Station, all alternative conflicts with overhead electrical distribution and telecom lines as it crosses 54th Avenue E and at 52nd Avenue E. Both sets of lines would need to be raised in order to meet vertical separation requirements. Sound Transit would work with Tacoma Power and the private franchise telecom providers on this construction work.

On the west side of 54th Avenue E, a column foundation would impact a Lumen serving area interface station that would need to be relocated. A serving area interface station is a connecting hub for several fiber optic and copper wire connections that, unlike typical vaults, also connects directly back to and interfaces with the primary data center/switch/main frame in the area. For this reason, relocation of a serving area interface is more difficult and costly than a typical vault connection and would require coordination between Sound Transit and Lumen.

The 54th Avenue and 54th Span Design Options would have similar utility impacts to the Fife Segment alternatives with the preferred Fife Station, but at slightly different locations due to the variance in both guideway alignment and station location for each option.

Impacts to major utilities between Wapato Way E and the intersection of 52nd Avenue E and Pacific Highway would be the same for all of the alternatives in the Fife Segment. Near Pacific Highway, the alternatives would diverge and create separate utility impacts. More utilities (major and minor impacts) are located within Pacific Highway than along I-5, so the Fife Pacific Highway and Fife Median alternatives would generate more utility conflicts. Overall, the quantity impacts to major utilities would largely be the same for all three of the alternatives in the Fife Segment, since the same utilities cross all alignments but at different geographical locations.

4.4.1 Fife Pacific Highway Alternative

As the Fife Pacific Highway Alternative crosses Pacific Highway between Willow Road E and 51st Avenue E, two column foundations conflict with an existing seven-line Lumen duct bank. The duct would need to be relocated to maintain level of service for the area, which would be done in collaboration with Lumen and Sound Transit. Continuing west, the Fife Pacific Highway Alternative would have a vertical impact with overhead distribution electrical and telecom lines at the Pacific Highway and Alexander Avenue E intersection. Again, both sets of lines would be relocated to taller poles in order to remove the conflict with the guideway, by working with the appropriate utility owners. Next, there is a vertical conflict that occurs just east of the Pacific Highway and Port of Tacoma Road intersection. The guideway conflicts with the vertical location of Tacoma Power's 115 kV overhead transmission electrical lines. Tacoma Power would need to raise the lines in order to provide the required separation from TDLE. These impacts along Pacific Highway would not occur with the Fife I-5 Alternative.

An existing petroleum pipeline crosses the alignment at the end of the I-5 southbound on-ramp from Port of Tacoma Road. This pipeline supplies jet fuel to Joint Base Lewis-McChord located south of the project and would be protected in place by TDLE construction. Due to the challenging nature of fuel pipelines and the critical importance to service of the base, it is likely the project would not be allowed to impact this pipeline. Additional information about the pipeline and its hazards can be found in the Puyallup Tribe All Hazard Mitigation Plan, Pipeline Hazards Report located online as referenced. Sound Transit would work to design TDLE to avoid impacts on the pipeline as a result of TDLE column foundations and would work closely with Joint Base Lewis-McChord during construction to ensure the pipeline is protected and not disturbed.

The aerial guideway would have a vertical conflict with existing 115 kV overhead transmission electrical lines, as the alignment intersects with the lines just west of the Port of Tacoma I-5 interchange on/off-ramps. This would require the wires to be raised onto taller poles in order to gain the vertical clearance required by the project. Tacoma Power would be the party responsible for relocating the lines, in collaboration with Sound Transit. Both the jet fuel pipeline and 115kV Port of Tacoma lines would impact all three of the alternatives in the Fife Segment at the same location.

4.4.2 Fife Median Alternative

All large impacts on utilities for the Fife Median Alternative would be the same as the conflicts discussed for the Fife Pacific Highway Alternative. The actual impact position to the utilities would be approximately 70 feet north of the Fife Pacific Highway Alternative.

4.4.3 Fife I-5 Alternative

Once the Fife I-5 Alternative crosses Pacific Highway, it continues in a southwest trajectory until it reaches I-5, where it turns west to parallel the freeway. Running alongside I-5, the guideway would conflict with overhead distribution electrical and telecom lines as it intersects with Alexander Avenue E. Both sets of lines would be relocated to taller poles in order to remove the conflict with the guideway by working with the appropriate utility owners. Next a vertical conflict would occur just east of the I-5 and Port of Tacoma Road interchange. The guideway would conflict with the vertical location of Tacoma Power's 115 kV overhead transmission electrical lines. Tacoma Power would have to raise the lines in order to provide the required separation from TDLE.

The Fife I-5 Alternative would cross the same petroleum pipeline and 115 kV transmission power lines as the Fife Pacific Highway and Fife Median alternatives, with the same intent to avoid impacts.

4.5 Tacoma Segment

All alternatives for the Tacoma Segment would have three key impacts on existing major utility infrastructure. First is the impact to the existing British Petroleum (BP) Olympic pipeline located near the east bank of the Puyallup River. Based on BP system records, the 8-inch petroleum pipeline runs a few feet offset from the northern side of N Levee Road E in the location where TDLE would cross the pipeline. Sound Transit would avoid the pipeline if possible. Relocating this pipeline would be hazardous and a large effort for the project. Additional information about the pipeline and its hazards can be found in the Puyallup Tribe All Hazard Mitigation Plan, Pipeline Hazards Report located online as referenced. If relocation is necessary, Sound Transit would work closely with BP to find a strategy that would make the work as safe and efficient as possible.

The second conflict common to all alternatives is the impact to an existing 16-inch high-pressure gas main in E Bay Street. Column foundations to support the aerial guideway are anticipated to impact the existing main, which would require it to be relocated around the columns. Survey information for this main would be gathered in later phases of design to determine an exact location of the line. Once a location is confirmed, the engineering team would try to adjust the location of the columns to avoid the main, if possible. If the impacts on the existing main are unavoidable, Sound Transit would work with PSE to relocate the main, as required.

The last impact common to all alternatives in the Tacoma Segment would be a vertical conflict between the aerial guideway and overhead distribution electrical and telecom lines at the

Portland Avenue E and E 26th Street intersection. Sound Transit would work with Tacoma Power and Telecom providers to raise all the existing wires to resolve this issue.

All utilities associated with the TDLE guideway and the overhead catenary system are located outside the flight path to Joint Base Lewis McChord (FAA 2020).

4.5.1 Preferred Tacoma 25th Street-West Alternative

Entering the Dome District, the Preferred Tacoma 25th Street-West Alternative turns to align with E 25th Street and the future station area at the East L Street intersection. Aligning the guideway with E 25th Street creates several impacts on existing utilities located throughout the roadway corridor. This alternative would create the most impacts to utilities within the Tacoma Segment. The remaining impacts discussed in this section are unique to the Preferred Tacoma 25th Street-West.

At the East L Street intersection, the guideway would conflict with both the 115 kV overhead transmission electrical lines and the overhead distribution electrical and telecom lines. The 115 kV transmission lines that run parallel to E 25th Street would have to be relocated to another parallel street that is a few blocks north or south of the project. There would not be enough physical space to support the poles and wires of the transmission line in E 25th Street with the addition of TDLE. The 115 kV lines that run perpendicular to the project in East L Street would be raised to eliminate the conflict with the project.

The distribution power and telecom system also impacted on the transmission poles would likely be addressed by conversion to underground infrastructure due to city codes dictated by conflict length and remain in the roadway, provided there is enough space to accommodate it. Before advancing down the alignment, the guideway would have a final impact to an existing PSE gas facility on the northeast corner of the E 25th Street and East L Street intersection due to column placement. This column foundation would impact a looped gas main facility and would need to be relocated to maintain the system integrity for PSE in this area. Sound Transit would have to work directly with PSE to determine the exact impacts of this conflict and how best to mitigate them.

Continuing west along the alignment toward the Tacoma 25th Street-West Station, the project column placement would create a conflict with an existing 12-inch high-pressure gas main that would need to be relocated during construction. This existing gas main connects to the PSE facility previously identified, so any relocation work would have to be located to avoid both conflicts. As the project approaches the proposed Tacoma 25th Street-West Station, the column foundations are planned to be farther away from the gas main, which could allow for some of the existing main to be protected in place.

Lastly, three existing telecom ducts, owned by Lumen, Zayo, and AT&T, are present in the street and would be in conflict with column foundation construction. The ducts are all larger in size: two run along the south side of the road, and one along the north. The ducts would have to be consolidated and relocated into the center of the road to avoid both TDLE and Tacoma Link infrastructure if possible. Sound Transit would coordinate with all the identified private franchise telecom owners to plan this relocation work.

4.5.2 Tacoma 25th Street-East Alternative

Impacts to major utilities for this alternative are the same impacts identified for the Preferred Tacoma 25th Street-West Alternative. The difference is a shorter impact length, as the alignment does not extend as far to the west.

One variation for a bus layover space on E 26th Street and East G Street that is paired with the Tacoma 25th Street-East Alternative has the potential to impact the existing Tacoma Power substation. This configuration is not preferred and is one of the six bus transit options under consideration for TDLE.

4.5.3 Tacoma Close to Sounder Alternative

Entering the Dome District, the Tacoma Close to Sounder Alternative would turn to align with the existing Sounder tracks just west of Portland Avenue. This alternative would have few utility impacts adjacent to the Sounder tracks and the overall alternative creates minimal utility impacts due to the corridor being largely clear of existing utilities because of property ownership and prior relocations to accommodate Sounder. The Close to Sounder Alternative produces the fewest number of impacts to utilities within the Tacoma Segment and the following identified impacts are unique to this alignment based on its specific geographical location.

Once this alternative reaches the intersection of E 25th Street and East G Street, the column foundations that support the aerial guideway would begin to conflict with the two large telecom ducts along the south side of road, similar to what was described for the Preferred Tacoma 25th Street-West Alternative. Sound Transit would work with both Lumen and Zayo to relocate the ducts and resolve the impact to their systems.

The Close to Sounder Alternative route also runs close to an existing Tacoma Power substation that is located on the northeast leg of the E 26th Street and East G Street intersection. While columns for the alignment would be close to the substation, no impacts are anticipated to be caused by the project; the substation is referenced so it can be protected in place during construction activities in the area.

4.5.4 Tacoma 26th Street Alternative

Similar to the Tacoma Close to Sounder Alternative, the Tacoma 26th Street Alternative would also have fewer impacts than either the Preferred Tacoma 25th Street-West or Tacoma 25th Street-East alternatives because it would run adjacent to the Sounder tracks. However, the Tacoma 26th Street Alternative would generate more impacts than the Tacoma Close to Sounder Alternative due to the impacts it would have on E 26th Street.

When the alignment straightens onto E 26th Street just east of the intersection with East G Street, the Tacoma 26th Street Alternative would also avoid the Tacoma Power substation, which would be protected in place during construction. Beginning at this intersection, the column foundations would also create subsurface impacts on an existing 42-inch water main that is located in E 26th Street. This large transmission water main would be a lengthy and intensive relocation due to its size, combined with it continuing onto E 26th Street and traveling through the remaining length of the project. Sound Transit would coordinate with Tacoma Public Utilities Water Division to address this impact.

As the alignment approaches E 26th Street at the East F Street intersection, the aerial guideway would conflict with the 115 kV overhead transmission electrical lines and telecom wires also located on the transmission poles. As is the case for the 115 kV relocation on E 25th Street, this parallel run of transmission lines would be relocated to a completely different street in the nearby area. There would not be enough physical space to support the poles and wires of the transmission line in this street with the addition of TDLE. The existing overhead telecom lines would likely be converted to an underground system to meet City of Tacoma codes. Sound Transit would work with both Tacoma Power and the private franchise telecom owners to solve this construction conflict.

Finally, near the end of the project at the E 26th Street and East D Street intersection, both overhead distribution electrical and telecom lines would have to be raised to remedy a vertical impact caused by construction of TDLE. The majority of utility impacts associated with the Tacoma 26th Street Alternative are unique to that alternative and would not occur with the other alternatives in the Tacoma Segment.

EXECUTIVE SUMMARY

Parametrix conducted a Phase I Environmental Site Assessment (ESA) for the Tacoma Dome Link Extension (TDLE) project in conformance with the scope and limitations of American Society for Testing and Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as Tacoma Dome (TD) properties TD 3244, TD 3245, TD 3246, and TD 3247. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report. The subject property is located on Pierce County Tax Lots 0420057006, 0420057007, 0420057008, and 0420053075 and is currently occupied by a commercial business for canopy sales and a vacant parcel. Parcel TD 3247 (0420053075) was sold to the Washington Department of Transportation (WSDOT) in February 2021. The subject property encompasses an area of approximately 1.9 acres, is zoned for light industrial and has two temporary structures constructed in 1992 and 2000.

The first known development of the site was in the 1960s with a structure on the second southernmost parcel. By 1980, excavation or filling of the southernmost parcel was underway. By 2006, the subject property appears much as it does today.

No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property during site reconnaissance. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. However, a number of drums with non-hazardous investigative derived waste (IDW) and a monitoring well were noted on the property, which are indicative of ongoing investigation and cleanup efforts.

Based on available hydrogeologic information for the site and vicinity, the direction of groundwater flow at the subject property is to the south and east toward and along Hylebos Creek (adjacent east).

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property except for the following:

Recognized Environmental Conditions

The subject property is listed in the Washington State Department of Ecology (Ecology) Confirmed and Suspected Contaminated Sites List (CSCSL) database. Twenty-thousand tons of arsenic-contaminated fill material was placed on the site by USG Interiors prior to 1985. The material was waste material from the production of rock wool produced from slag from the Asarco copper smelter in Tacoma. Arsenic was confirmed in soil, sediment, and groundwater above state cleanup levels. An Agreed Order with Ecology established remedial actions, including soil hotspot solidification, in situ chemical oxidation to address groundwater hotpots, Hylebos Creek sediment excavation, and confirmational groundwater monitoring. Site cleanup is currently underway. The past use of the property for fill material placement and existing contamination represents a REC for the subject property.

Data Gaps

An on-site reconnaissance and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

1. INTRODUCTION

Parametrix was retained by Sound Transit to conduct a Phase I Environmental Site Assessment (ESA) on the site located at 7110 Pacific Highway E in Milton, Washington (herein referred to as the subject property; see Figure 1), as part of the Tacoma Dome Light Rail Extension (TDLE) project. The subject property includes Pierce County parcels 0420057006, 0420057007, 0420057008, and 0420053075 (TDLE parcel IDs TD 3244, TD 3245, TD 3246, and TD 3247, respectively). The subject property, known as USG Highway 99, is currently occupied by a commercial business for canopy sales and a vacant parcel. Parcel TD 3247 (0420053075) was sold to the Washington Department of Transportation (WSDOT) in February 2021. The Phase I ESA was conducted to support environmental due diligence related to potential acquisition of the property associated with the TDLE project.

The subject property encompasses approximately 1.9 acres and includes two structures (temporary mobile offices) that house a number of commercial businesses, including canopy, RV, and trailer sales. The structures were constructed in 1992 and 2000 and have no listed square footage. The boundaries of the subject property are shown in Figure 2.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available) and (2) a site examination. Conclusions and recommendations in this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with American Society for Testing and Materials (ASTM) Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study. The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (known as CERCLA) and, as such, constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined by 42 United States Code (USC) §9601 (35)(B).

The purpose of this Phase I ESA is to identify Recognized Environmental Conditions (RECs) on or near the subject property. The term Recognized Environmental Condition is defined in ASTM Standard E1527-13 as:

> "…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a threat of a future *release* to the environment. *De minimis conditions* are not *recognized environmental conditions*."

In accordance with ASTM Standard E1527-13, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls." (ASTM 2013)

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property on foot. Unless otherwise stated, no exceptions to the guidelines presented in ASTM E1527-13 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site but were not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff
- Contacts and discussions with regulatory agencies and others
- Review of available hazardous substance or solid waste lists
- Opinions and judgments of Parametrix based on the information available

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property is located at 7100-7110 Pacific Highway E in Milton, Washington. It is a 1.9 acre property bounded by Pacific Highway E to the west, Interstate 5 (I-5) to the east, and additional commercial properties to the north and south. According to the Pierce County Assessment Office, WSDOT is the current owner of parcel 0420053075 (TDLE parcel ID TD 3247). Freeway Sales LLC is the current owner of 0420057006, 0420057007, and 0420057008 (TDLE parcel IDs TD 3244, TD 3245, and TD 3246, respectively). The site location is shown on Figure 1. The boundaries of the subject property and project construction footprint are shown on Figure 2.

2.2 Site and Vicinity Characteristics

The subject property has been primarily used as parking lots for RVs, truck canopies, and trailer sales. There are two temporary structures (offices) on the subject property for which square footage are not listed (constructed in 1992 and 2000). After the recent purchase of TD 3247 by WSDOT, Freeway Trailer Sales, Inc. relocated in February 2021. The northern three lots (TD 3244, TD 3245, and TD 3246) continue to be used for truck canopy sales.

The vicinity of the subject property is developed for commercial uses. Properties on the west side of Pacific Highway E are generally developed as residential. The properties immediately to the north and south of the subject property are associated with the businesses on the subject property. Pacific Highway E and I-5 are immediately adjacent to the subject property to the west and east respectively. Hylebos Creek runs along the eastern margin of the subject property (Figure 2).

2.3 Physical Setting

The subject property is at an elevation of approximately 22 feet above mean sea level. The topography of the site gently slopes east toward Hylebos Creek (USGS 2020). Prior to fill being introduced to the site, the slope toward the creek was greater. Soils in the area of the subject property are mapped as Tisch Silt by the U.S. Department of Agriculture (USDA 2020). These are described as poorly drained soils.

The surface geology of the subject property is mapped as Quaternary alluvium. This unit is highly variable depending on the location, ranging from clays to gravels, from high to low hydraulic conductivity.

The site is underlain by artificial fill. Groundwater at the site is found at a depth of approximately 5 to 15 feet below ground surface. The groundwater flow direction below the subject property is primarily to the east toward Hylebos Creek and south parallel to the creek (CDMSmith 2013).

The nearest surface water body is Hylebos Creek which runs along the eastern boundary of the subject property between the subject property and I-5. The creek flows southwest before turning west and discharging into the Hylebos Waterway in Commencement Bay. Prior to the development of the area

and the construction of I-5 in the 1960s, Hylebos Creek flowed generally to the south along the current I-5 alignment. During the development of I-5, the creek was diverted to the west side of I-5 and channelized into the current alignment. Hylebos Creek rejoins its natural channel at the south end of the Freeway Trailer property (adjacent south of the subject property). The creek flows south, crosses under Pacific Highway E, then bends to the northwest, eventually flowing into the Hylebos Waterway and enters Commencement Bay (CDMSmith 2013).

2.4 Current Use of the Property

The subject property has housed commercial businesses, which include sales of RVs, trailers, and truck canopies. Access to the subject property is from Pacific Highway E. Zoning for all four parcels of the subject property is listed as Light Manufacturing District (M-1). WSDOT purchased the southern parcel TD 3247 in February 2021 and plans to restore the Hylebos Creek channel through this parcel. The other three parcels TD 3244, TD 3245, and TD 3246 continue to be used by a commercial business for truck canopy sales.

2.5 Descriptions of Improvements on the Subject Property

Based on Pierce County property assessment records, the subject property includes approximately 1.9 acres with two temporary structures built in 1992 and 2000. The remainder of the subject property is primarily paved, with Hylebos Creek running along the eastern border of the subject property. Local records indicate that electricity, water, and sanitary sewer are provided by local utilities.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. Parametrix reviewed the Pierce County Recorders database for liens against the current owner. No environmental liens were identified within the recorded documents filed for the current owner of the subject property. Parametrix reviewed the Washington State Department of Ecology's environmental covenant database (Ecology 2021), and no environmental (restrictive) covenants were found for the subject property (although the Agreed Order for the subject property lists a restrictive covenant as part of the work to be performed).

A Property History Guarantee title report was supplied by Sound Transit for the subject property (attached in Appendix A). There are no records in the title summary report indicating activity or use limitations or environmental liens affecting the property. No evidence of current activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine whether past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by Environmental Data Resources (EDR). The EDR report is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix B. Historical information is based on review of historical Sanborn Fire Insurance Maps (Appendix C) and aerial photographs (Appendix D).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Any data gaps identified during the document review were addressed by interviewing Tacoma-Pierce County Health Department personnel, by making observations during the site examination, or by additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from database records maintained by the U.S. Environmental Protection Agency (EPA) and Ecology. The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR report (Appendix B). Only standard and key additional databases are listed below. Parametrix reviewed the information in the EDR report to screen properties in the vicinity of the subject property for sites with potential to impact the subject property. The screening process involved reviewing the types of listings, types of contaminants, proximity and position relative to the subject property, topography, and groundwater gradient. Listings for sites found in the standard environmental records sources that could not be screened to verify potential impacts to the subject property were further evaluated by file reviews (Section 4 below).

3.1.1 Review of Washington State Department of Ecology Databases

The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List

- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)
- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database.

Information contained in the EDR report indicates that the subject property is not listed as a UST site. One UST site was identified within 0.25 mile of the subject property

- The H&H Diesel Service site (407 Porter Way) is located approximately 1,150 feet northeast of the subject property. The site is reported to have had three tanks installed at the site. This site is discussed further in Section 3.1.1.3.

Unless otherwise noted, the mere presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST, including the age of the facility, proximity to the subject property, and known releases or spills. UST sites that have had known releases are discussed in Section 3.1.1.2 and 3.1.1.3 below.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

No LUST sites were identified within 0.5 mile of the subject property.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (the state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

The subject property is identified as a CSCSL site (though only listed in the FINDS database in the EDR report). The USG Interiors Inc 99 Site (Cleanup Site ID 3618) is reported to have arsenic in soil and groundwater confirmed above cleanup levels. Cleanup has been initiated at the site. The site is further discussed in Section 4.1.

Sixteen additional CSCSL sites were identified within one mile of the subject property. Of the sixteen sites, three are located within 0.25 mile of the subject property:

- The 6924 Pacific Highway E/ US GYPSUM CO HYLEBOS CR DUMP SITE (6924 Pacific Highway E) is located approximately 820 feet south-southwest of the subject property. The site is reported to have petroleum, pesticides, polycyclic aromatic hydrocarbons (PAHs), and phenolic compounds in groundwater above cleanup levels. The site is part of the Commencement Bay Nearshore Tideflats National Priorities List (NPL) site. Shallow groundwater at this site is assumed to flow west toward Hylebos Creek and downgradient from the subject property as the site lies on the other side of the creek. Based on the distance from the subject property and the direction of flow of Hylebos Creek, the contaminants at this site have a low potential to have impacted groundwater at the subject property and do not appear to be a REC to the subject property.
- The H&H Diesel Service Inc 407 site (407 Porter Way) is located approximately 1,150 northeast of the subject property. The site is also listed in the RCRA Non-Generator/No Longer Required database (Section 3.1.2.4). The site is reported to have petroleum and metals in soil and petroleum and arsenic in groundwater. Extensive investigation and cleanup have been completed at this site, and Ecology issued a No Further Action (NFA) determination in 2019 contingent upon institutional controls limiting groundwater use at the site and engineering controls including a sub-surface permeable membrane and an asphalt cap. Semiannual inspection and maintenance of these controls are required as well. Based on the distance and location of the site on the other side of Hylebos Creek and the institutional controls in place at the site to prevent migration of contaminants, this site does not represent a REC for the subject property.
- The WSDOT property site (6722 Pacific Highway E) is located approximately 1,300 feet southwest of the subject property. This site is reported to have benzene above cleanup levels in soil and arsenic above cleanup levels in groundwater. The site is awaiting cleanup, according to Ecology's database. Based on understood elevated arsenic levels in the area and distance from the subject property, this site does not represent a REC for the subject property.

A subset of the CSCSL is the CSCSL NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when clean-up activities are completed. Instead, an NFA code is entered based upon the type of NFA determination the site received.

- The WSDOT I-5 Flood Mitigation Pond site (6717 Pacific Highway E) is located approximately 1,200 feet southwest of the subject property. Arsenic was detected in groundwater at the site above cleanup levels. An NFA was issued for the site based on the elevated arsenic levels in groundwater in the general area and with the understanding that groundwater in the vicinity is not utilized for consumption. Based on the distance from the subject property and regulatory status, the site does not appear to be a REC.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed in the SPILLS database.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program. The subject property is not listed as a VCP site.

No VCP sites are reported within approximately 0.25 mile of the subject property.

3.1.1.6 Independent Cleanup Report

These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. One ICR site is reported within approximately 0.25 mile of the subject property. The H&H Diesel Service site is discussed in Section 3.1.1.3 above.

3.1.1.7 Solid Waste Facilities/Landfill

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. Two Solid Waste Facilities/Landfill sites were reported within 0.5 mile of the subject property. Neither of these sites are located within 0.125 mile of the subject property, and neither is considered a REC.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination." The subject property is not listed as a State Brownfields site. No State Brownfields sites were reported within 0.5 mile of the subject property.

3.1.2 EPA Database Review

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases:

- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS) database
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 National Priorities List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. One NPL site is listed within one mile of the subject property, and there is one NPL site which impacts the vicinity of the subject property:

- The 6924 Pacific Highway E/ US GYPSUM CO HYLEBOS CR DUMP SITE (6924 Pacific Highway E) is located approximately 820 feet south-southwest of the subject property. The site is reported to have petroleum, pesticides, PAHs, and phenolic compounds in groundwater above cleanup levels. The site is part of the Commencement Bay Nearshore Tideflats NPL site. The site is discussed in detail in Section 3.1.1.3 above.
- The Asarco Tacoma Smelter Plume is a part of the Commencement Bay Nearshore Tideflats NPL site and includes large portions of Pierce, King, Kitsap, and Thurston Counties related to windblown contamination of arsenic and lead deposited from operation of the Asarco Smelter in Ruston, Washington, for a period of nearly 100 years (Ecology 2020). The area of the subject property is mapped within an area of impact from arsenic of less than 20 parts per million. Based on the mapped concentrations, this represents *de minimis* conditions at concentrations less than Model Toxics Control Act Method A cleanup levels and is not considered a REC for the subject property.

3.1.2.2 SEMS Database

The EPA's Superfund Enterprise Management System (SEMS) database identifies sites that may potentially pose a threat to the environment or the health of the public.

Information contained in the EDR report indicates that the subject property is not listed as a SEMS site. Two SEMS sites were identified within 0.5 mile of the subject property:

- The 6924 Pacific Highway E/ US GYPSUM CO HYLEBOS CR DUMP SITE (6924 Pacific Highway E) is located approximately 820 feet south-southwest of the subject property. This site is discussed above in Section 3.1.2.1.
- The B & L Woodwaste Fill site (Porter Way T20N R4E S5) is located approximately 2,400 feet to the east-northeast of the subject property. The SEMS listing states that this site is part of the Commencement Bay Nearshore Tideflats NPL site. This site is not considered a REC for the subject property due to the distance and gradient from the subject property and no known impacts to the subject property.

The EPA also publishes the SEMS-ARCHIVE list, which identifies SEMS sites that have been designated "no further remedial action planned" and that have been removed from the SEMS List. Information contained in the EDR report indicates that the subject property is not listed as a SEMS-ARCHIVE site. No SEMS-ARCHIVE sites were identified within 0.5 mile of the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicated that the subject property is not listed as a CORRACTS site. No CORRACTS sites are listed within one mile of the subject property.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Very small quantity generators generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators do not currently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA generator database.

Two RCRA Non-generators are listed within 0.25 mile of the subject property but are either discussed in other sections or are at sufficient distances to not represent RECs for the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal (TSD) facilities. Information contained in the EDR report indicates the subject property is not listed as a TSD site. No TSD sites are identified within 0.5 mile of the subject property.

3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed near the subject property.

3.1.2.6 US Brownfields List

The EPA's US Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a US Brownfields site. No US Brownfields sites are listed within 0.5 mile of the subject property.

3.1.3 Other Databases

The following subsections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may pose a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Because of the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to, gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are no EDR Historical Auto Stations sites within 0.125 mile of the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The byproducts from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No manufactured gas sites are listed within one mile of the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there are no EDR Historical Dry Cleaner sites within 0.125 mile of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for the orphan sites, none appear to represent a potential REC for the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-13 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine whether vapor migration has, or has the potential to have, occurred at the site from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site.

Groundwater and soil contamination on site are limited primarily to arsenic, which does not typically cause vapor intrusion issues.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the Certified Sanborn Maps and the historical aerial photos.

3.2.1 Certified Sanborn Maps

A copy of the Certified Sanborn Map Report for the TDLE project area is included in Appendix C (EDR 2019). Maps were not available for the USG Highway 99 site.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were examined for the years 1941, 1957, 1968, 1980, 1990, 2006, and 2013. Copies of the aerial photographs are included in Appendix D. Observations are discussed below.

1941	The subject property appears partially developed for agricultural purposes. Hylebos Creek runs through the northern three parcels of the subject property. A road appears to run east-west between the southernmost two subject property parcels and intersects Pacific Highway E, which is apparent to the west. The parcel immediately to the north appears to be developed with a structure.
1957	The subject property appears much as it did in the 1941 photo. Residential development has occurred across Pacific Highway E to the west.
1968	I-5 has been developed to the east of the subject property and Hylebos Creek has been rerouted along the east side of the subject property to accommodate the highway. The second parcel from the south appears to be developed with a structure.
1980	The subject property parcels appear undeveloped with the exception of the southernmost parcel which appears to be actively excavated or filled.
1990	The subject property appears much as it does today absent current structures. Residential development has increased to the west of the subject property.
2006–2013	The subject property and adjacent properties appear as they do today.

Based on the historical document review, the subject property first appeared developed (aside from agricultural use) in the 1968 aerial photo, with a structure on the second southernmost parcel. The 1980 photo shows the southernmost parcel being actively excavated or filled. By 2006 the subject property appears much as it does today. No evidence of RECs was identified on the subject property or in the vicinity during the historical document review.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following subsections.

3.2.3.1 City of Milton

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks) was completed. No permits of environmental significance were available online from the City of Milton.

3.2.3.2 Pierce County

Based on information from the Pierce County Property Assessor-Treasurer Information Portal (2020), the subject property is located on parcels 0420057006, 0420057007, 0420057008, and 0420053075. Rendell Herbert & Anita LLC is the current owner of parcel 0420053075 (TDLE parcel ID TD 3247), and Freeway Sales LLC is the current owner of 0420057006, 0420057007, and 0420057008 (TDLE parcel IDs TD 3244, TD 3245, and TD 3246, respectively). Pierce County records indicate that two temporary structures constructed in 1992 and 2000 are located on the subject property.

3.2.4 Additional Environmental Information

The following subsections provide a summary of additional environmental information obtained for the site.

3.2.4.1 Asbestos

The manufacture of most asbestos-containing materials was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the temporary structures (constructed 1992 and 2000), there is low potential for asbestos-containing materials to have been used in the construction of the buildings. An HBMS has not been conducted on the subject property.

3.2.4.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the temporary structures (constructed 1992 and 2000), there is low potential for LBP to have been used in the construction of the building. An HBMS has not been conducted on the subject property.

3.2.4.3 Polychlorinated Biphenyls (PCBs)

Transformers can potentially contain PCBs. There are no transformers located on the subject property. Based on the age of the temporary structures (constructed 1992 and 2000), there is low potential for PCBs to have been used in the construction of the building (PCBs are primarily used in lighting and electrical equipment). An HBMS has not been conducted on the subject property.

3.2.4.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors, such as the concentration of the gas, and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Pierce County ZIP code 98354 is located in Federal EPA Radon Zone 3. The Zone 3 indoor average radon level is less than 2 pCi/L (pico Curies per Liter). Based on this limited information, radon likely does not represent an environmental concern at the property. In addition, based on lack of a basement and the occupational nature of the site (limited working hours), radon is not expected to be a potential REC for the subject property.

4. FILE REVIEW

In accordance with ASTM Standard E1527-13, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on the subject property's listing in Ecology's CSCSL database, Parametrix requested available site records from the agency. The subject property is listed as the USG Interiors Inc 99 site (CS 3618). Contamination at this site originated prior to 1985 from the depositing of 20,000 tons of waste from the manufacturing of rock wool by USG in Tacoma. USG used slag (as a raw material for the rock wool) from the Asarco copper smelter in Tacoma, which contained arsenic. USG removed a portion of the waste from the site between 1984 and 1986 (Ecology 2015).

Based on subsequent subsurface investigations (including the Remedial Investigation), soil, sediment (in Hylebos Creek), and groundwater at the site were determined to be contaminated with arsenic (CDMSmith 2016). Soil and groundwater samples collected confirmed that state cleanup levels were exceeded for both media. Primary soil and groundwater hotspots on the subject property are located on parcels TD 3245 and TD 3246 (CDMSmith 2013). The site Agreed Order (Ecology 2016) established that remedial actions at the site include:

- In situ soil arsenic hotspot solidification with a cement/bentonite/iron reagent to isolate and reduce leachability of the arsenic
- Construction of a permeable pavement cap
- Hylebos Creek sediment cleanup through excavation (and subsequent restoration)
- Confirmation groundwater monitoring

Site cleanup is currently underway. The ongoing cleanup efforts and existing arsenic contamination in soil, creek sediment, and groundwater represents an REC for the subject property.

The Agreed Order (Ecology 2016) also establishes that land use restrictions should be recorded in a Restrictive Covenant for each property affected. Parametrix found no record of Restrictive Covenants for the affected parcels.

4.2 Adjacent Properties File Review

Several nearby properties were listed on environmental databases, as described in Section 3. In general, sufficient site-specific information was available through review of the EDR report as well as online Ecology files to develop an opinion on the potential for these properties to have affected the subject property.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on November 20, 2020. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site examination are included in Appendix E.

5.1 Subject Property

The subject property is developed with paved and fenced lots, as well as two temporary office structures. The lots are in use as storage for businesses involved in RV, trailer, and truck canopy sales. The western boundary of the subject property fronts Pacific Highway E. The western edge of the property runs along the Hylebos Creek drainage and was not accessible during the site examination. Drums of non-hazardous investigation derived waste and a monitoring well were noted on the subject property, presumably associated with the ongoing investigation and cleanup efforts described in Section 4.1.

No evidence of aboveground storage tanks or other indications of environmental significance were observed on the exterior portions of the property. In addition, no evidence of significant storage or spills of hazardous substances and/or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property.

5.2 Adjacent Properties

The vicinity of the subject property is developed primarily with commercial and residential properties. Adjacent properties were examined from public areas for the presence of environmental conditions that have the potential to impact the subject property.

The subject property is bounded by Pacific Highway E to the west, I-5 to the east, and additional commercial lots associated with businesses on the subject property to the north and south. Residences occupy parcels across Pacific Highway E. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials was identified on visible areas of adjacent properties.

6. INTERVIEWS

An interview was not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-13.

A user questionnaire was submitted to Sound Transit to assist in identifying potential RECs affecting the site and identification of background information on the subject property. No RECs were identified through the review of the user questionnaire. A copy of the user questionnaire completed by Sound Transit is attached in Appendix A.

Parametrix completed an interview with Rob Olsen, Environmental Health Specialist of the Tacoma-Pierce County Health Department Environmental Health – Contaminated Properties division, on February 4, 2021 (TPCHD 2021). Mr. Olsen indicated that TPCHD had no records for the subject property.

7. CONCLUSIONS

Parametrix conducted a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 (2013) on the subject property identified as TD 3244, TD 3245, TD 3246, and TD 3247. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report. The subject property is located on Pierce County Tax Lots 0420057006, 0420057007, 0420057008, and 0420053075 and is currently occupied by a commercial business for canopy sales and a vacant WSDOT parcel. The subject property encompasses an area of approximately 1.9 acres, is zoned for light industrial, and has two temporary structures constructed in 1992 and 2000.

The first known development of the site was in the 1960s, with a structure on the second southernmost parcel. By 1980, excavation or filling of the southernmost parcel was underway. By 2006, the subject property appears much as it does today.

No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property during site reconnaissance. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. However, a number of drums with non-hazardous investigative derived waste (IDW) and a monitoring well were noted on the property, which are indicative of ongoing investigation and cleanup efforts.

Based on available hydrogeologic information for the site and vicinity, the direction of groundwater flow at the subject property is to the south and east toward and along Hylebos Creek (adjacent east).

This assessment has revealed no evidence of RECs in connection with the subject property, except for the following:

Recognized Environmental Conditions

The subject property is listed in the Washington State Department of Ecology (Ecology) CSCSL database. Twenty-thousand tons of arsenic-contaminated fill material was placed on the site by USG Interiors prior to 1985. The material was waste material from the production of rock wool produced from slag from the Asarco copper smelter in Tacoma. Arsenic was confirmed in soil, sediment, and groundwater above state cleanup levels. An Agreed Order with Ecology established remedial actions, including soil hotspot solidification, in situ chemical oxidation to address groundwater hotpots, Hylebos Creek sediment excavation, and confirmational groundwater monitoring. Site cleanup is currently underway. The past use of the property for fill material placement and existing contamination represents a REC for the subject property.

Data Gaps

An on-site reconnaissance and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

EXHIBIT "A"

Legal Description

PARCEL A:

Lots 2, 3 and 4 of Pierce County Short Plat No. 9011070432, recorded November 7, 1990, in Pierce County, Washington.

PARCEL B:

That portion of the following described tract lying Westerly of Primary State Highway No. 1 (Interstate 5) and Easterly of Pacific Highway South (Old Highway 99) in the Southwest quarter of Section 5, Township 20 North, Range 4 East, W.M., in Pierce County, Washington described as follows:

Beginning at the intersection point of the Easterly margin of Pacific Highway South with the North margin line of 12th Street East (A.K.A Barth Road), said point having a back tangent bearing of North 19°35'01" East;
thence Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.86 feet, a central angle of 8°41'40", an arc distance of 301.19 feet;
thence South 61°52'10" East a distance of 168 feet, more or less to the Westerly margin line of Primary State Highway No. 1 (Interstate 5);
thence Northeasterly along said Westerly margin line to the intersect point of said North margin line of 12th Street East;
thence South 88°15'39" West along said North margin line a distance of 130 feet more or less to the point of beginning;

(Also known as Revised Parcel A of City of Milton Lot Line Adjustment recorded November 27, 1991 under Recording No. 9111270607, records of Pierce County, Washington.)

Except that portion conveyed to the State of Washington, acting by and through its Department of Transportation, by instrument recorded February 21, 2021 under Recording No. 202102110085, records of Pierce County, Washington.

This map/plat is being furnished as an aid in locating the herein described land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

PARTNERS FINANCIAL CORPORATE SEAL WASHINGTON WA-25

NOTARY PUBLIC STATE OF WASHINGTON

EXHIBIT "A"

This Exhibit "A" is to be attached to and made a part of that certain Statutory Warranty Deed dated July 28, 1982 wherein PARTNERS FINANCIAL, INCORPORATED, a Washington corporation appears as the Grantor and UNITED STATES GYPSUM COMPANY appears as the Grantee.

LEGAL DESCRIPTION:

That portion of the Northwest quarter of the Southwest quarter of Section 5 Township 20 North, Range 4 East of the Willamette Meridian lying West of the Westerly line of Primary State Highway #1 (Tacoma to King County line) and Easterly of the East line of State Road #1 (Pacific Highway), in Pierce County, Washington.

EXCEPT the South 30 feet thereof for Barth County Road.

ALSO EXCEPT that portion thereof within the strips of land conveyed to the State of Washington by deeds recorded under Auditor's No. 963185, 963186 and 957146 for State Road No. 1.

ALSO EXCEPT that portion thereof lying North of the following described line: Beginning on the Easterly line of the right of way of State Road No. 1 known as the Pacific Highway, at a point 349.8 feet Southerly from its intersection with the North line of the Southwest quarter of Section 5, Township 20 North, Range 4 East of the Willamette Meridian; thence Easterly 1658 feet, more or less, to the East line of the West half of the Northeast quarter of the Southwest quarter of said Section 5, at a point 330 feet South of the Northeast corner of said subdivision.

EXCEPTIONS AND CONDITIONS:

1. SUBJECT TO Condemnation of access to State Highway No. 1 and of light, view and air
Decree to State of Washington
Entered: March 18, 1960
Pierce County Superior Court Cause No. 141980.

2. SUBJECT TO Relinquishment of access to State Highway No. 1 and of light view and air by Deed of State of Washington
Recorded: December 4, 1959
Auditor's No.: 1874357
(as to a portion of said real property)

3. SUBJECT TO Permit to Construct Channel Change and the terms and conditions thereof:
Grantee: State of Washington
Recorded: December 4, 1959
Auditor's No.: 1874358
Purpose: relocation of channel
Area Affected: located of Hylebos Creek

4. SUBJECT TO Relinquishment of access to State Highway No. 1 and of light, view and air by Deed to State of Washington.

LPB No. 10

Attached to and made part of that certain Statutory Warranty Deed dated June 2, 1986 between UNITED STATES GYPSUM COMPANY, as Grantor and HERBERT A. RENDEL and ANITA M. RENDEL, husband and wife, as Grantees.

SUBJECT TO:

Condemnation by the State of Washington of right of access to State Highway and of light, view and air, by decree entered March 18, 1960, case no. 141980.

Relinquishment of right of access to State Highway and of light, view and air, under terms of deed to the State of Washington recorded December 4, 1959 under Auditor's No. 1874357.

Permit to construct channel change and the terms and conditions thereof; Grantee: State of Washington, recorded: December 4, 1959, under Auditor's No. 1874358, purpose: relocation of channel. (affects a portion of said premises.)

Relinquishment of right of access to State Highway and of light, view and air, under terms of deed to the State of Washington recorded December 4, 1959 under Auditor's No. 1874360. (affects a portion of said premises.)

Right, privilege and permit to waste, place and deposit earth materials of all types and quantities upon the existing channel of Hylebos Creek, as it flows over and across the herein described lands, granted to the State of Washirgton by instrument recorded under Auditor's No. 1895985, together with the right of ingress and egress for a haul road of sufficient width to conveniently transport said earth materials. (affects a portion of said premises.)

Record of survey affecting subject property as recorded April 28, 1982 under Auditor's No. 8204280234.

Any claim that the premises lie within the lands reserved, or the usual and accustomed grounds and stations secured for the right of taking fish, as set forth in the treaty of December 26, 1854 of the United States of America with the Nisqually, Puyallup and other bands of indians, commonly called the treaty of Medicine Creek.

Said lands lie within the Puyallup Indian Reservation. The policy to be issued by Commonwealth Title Insurance Company with recordation of this document does not insure against any governmental authority or jurisdiction which may be claimed or asserted by the Puyallup tribe, including the power to tax, since said authority or jurisdiction is excluded from coverage by the provisions of paragraph 1 of the schedule of exclusions from coverage contained in said policy of title insurance.

Local Improvement assessments as levied by Pierce County under District No. 82-1 which the undersigned Grantees agree to assume and pay according to its own terms and conditions in connection with all the property described herein, which total unpaid principal amount of said assessments is presently $64,437.31.

THE FOREGOING TERMS, CONDITIONS AND ASSUMPTION OF ULID 82-1 TOGETHER WITH APPROVAL OF THE SUBJECT TO'S CONTAINED HEREIN ARE APPROVED BY THE UNDERSIGNED:

Herbert A. Rendel
HERBERT A. RENDEL

Anita M. Rendel
ANITA M. RENDEL

EXHIBIT "B"

Attached to and made part of that certain Statutory Warranty Deed dated June 2, 1986 between UNITED STATES GYPSUM COMPANY, as Grantor and HERBERT A. RENDEL and ANITA M. RENDEL, husband and wife, as Grantee.

SUBJECT TO THE FOLLOWING ADDITIONAL NOTICES, TERMS AND CONDITIONS:

Grantor has heretofore notified Grantee and Grantee acknowledges that they understand that the real estate (described herein) has been classified as "contaminated" by waste deposits from Grantor's plant. Said waste deposits have since been removed and clean fill soils have been placed on the real estate. However, Grantor is still responsible for containment and monitering the Southern parcels (which are to be defined by a metes and bounds survey provided to the Grantee by the Grantor, at his expense) of the real estate. Two (2) test wells have been installed on the southern parcels and must be available for future testing by government agencies and Grantor's representatives.

Grantees agree and understand that no restrictions shall be placed on Grantor or said agencies for future "testing" of said Southern parcels. Grantees shall not cause, allow, the construction of any improvements on the Southern parcels of the real estate until such time that the property shall be declared "Environmentally Safe" by the State of Washington in writing. Grantee shall allow and Grantor reserves to itself, its agents and any interested government agencies full and free right to enter upon the Southern parcels as may be required from time to time for the purpose of inspection of test wells, drilling additional test wells, excavation of the Southern parcels or otherwise testing and exploring the Southern parcels.

SUBJECT TO Washington Dangerous Waste Regulations, WAC 173-303-610 Closure and Post Closure, Section (10) which provides as follows:

(10) Notice in deed to property.

(a) The owner of the property on which a disposal facility is located must record, in accordance with state law, a notation on the deed to the facility property, or on some other instrument which is normally examined during title search, that will in perpetuity notify and potential purchaser of the property that:

(i) The land has been used to manage dangerous wastes;

(ii) Its use is restricted under subsection (7) (d) of this section; and

(iii) The survey plat and record of the type, location, and quantity of dangerous wastes disposed of within each cell or area of the facility required in subsection (9) of this section have been filed with the local zoning authority, or the authority with jurisdiction over local land use, and with the department.

(b) If at any time the owner or operator or any subsequent owner of the land upon which a dangerous waste facility was located removes the waste and waste residues, the liner, if any, and all contaminated underlying and surrounding soil, he may remove the notation on the deed to the facility property or other instrument normally examined during title search, or he may add a notation to the deed or instrument indicating the removal of the waste.

SUBJECT TO THE REPURCHASE OPTION DESCRIBED AS FOLLOWS:

Grantor reserves to itself an exclusive option to repurchase the herein described property by written notice to Grantee given at any time prior to five (5) years after the date hereof (on or before June 6, 1991) at the price and on the terms contained in that certain Real Estate Sale Contract between the parties dated March 27, 1986.

THE FOREGOING ADDITIONAL NOTICES, TERMS AND CONDITIONS AND REPURCHASE OPTION ACCEPTED BY THE UNDERSIGNED GRANTEES:

Herbert A. Rendel
HERBERT A. RENDEL

Anita M. Rendel

ANY OPTIONAL PROVISION NOT INITIALED BY ALL PERSONS SIGNING THIS CONTRACT - - WHETHER INDIVIDUALLY OR AS AN OFFICER OR AGENT - - IS NOT A PART OF THIS CONTRACT.

REAL ESTATE CONTRACT
(RESIDENTIAL SHORT FORM)

1. PARTIES AND DATE. This Contract is entered into on August 17, 1988

between HERBERT A. RENDEL and ANITA M. RENDEL, husband and wife

as "Seller" and

LEONARD G. BOSCARINE and LINDA M. PLEIN, husband and wife

as "Buyer."

2. SALE AND LEGAL DESCRIPTION. Seller agrees to sell to Buyer and Buyer agrees to purchase from Seller the following described real estate in Pierce County, State of Washington:

SEE LEGAL DESCRIPTION ATTACHED AND MADE A PART HERETO.

EXCISE TAX PAID $ 3098.80
Re. No. 710319 Date 8-24-88
Pierce County

By [signature] Auth. Sig

3. PERSONAL PROPERTY. Personal property, if any, included in the sale is as follows:
NONE

No part of the purchase price is attributed to personal property.

4. (a) PRICE. Buyer agrees to pay:
$ 132,000.00 Total Price
Less ($) Down Payment
Less ($) Assumed Obligation (s)
Results in $ 132,000.00 Amount Financed by Seller.

(b) ASSUMED OBLIGATIONS. Buyer agrees to pay the above Assumed Obligation(s) by assuming and agreeing to pay that certain (Mortgage, Deed of Trust Contract) dated recorded as AF# . Seller warrants the unpaid balance of said obligation is $ which is payable $ on or before the day of , 19 interest at the rate of % per annum on the declining balance thereof; and a like amount on or before the day of each and every (month, year) thereafter until paid in full.
Note: Fill in the date in the following two lines only if there is an early cash out date.
NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN , 19 .
ANY ADDITIONAL ASSUMED OBLIGATIONS ARE INCLUDED IN ADDENDUM.

10

8808240285

(c) PAYMENT OF AMOUNT FINANCED BY SELLER.
Buyer agrees to pay the sum of $ 132,000.00 as follows: $ 2,150.00 or more at buyer's option on or before the 20th day of September, 19 88, (including principal) interest from August 20, 1988 at the rate of 11.00 % per annum on the declining balance thereof; and a like amount or more on or before the _____ day of each and every month (month/year) thereafter until ~~paid in full~~ **

Note: Fill in the date in the following two lines only if there is an early cash out date.
NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN August 20 19 92.

Payments are applied first to interest and then to principal. Payments shall be made at P. O. Box 3461, Federal Way, Wa. 98063 or such other place as the Seller may hereafter indicate in writing.

5. FAILURE TO MAKE PAYMENTS ON ASSUMED OBLIGATIONS. If Buyer fails to make any payments on assumed obligation(s), Seller may give written notice to Buyer that unless Buyer makes the delinquent payment(s) within fifteen (15) days, Seller will make the payment(s), together with any late charge, additional interest, penalties, and costs assessed by the Holder of the assumed obligation(s). The 15-day period may be shortened to avoid the exercise of any remedy by the holder of the assumed obligation. Buyer shall immediately after such payment by Seller reimburse Seller for the amount of such payment plus a late charge equal to five percent (5%) of the amount so paid plus all costs and attorneys' fees incurred by Seller in connection with making such payment.

6. (a) OBLIGATIONS TO BE PAID BY SELLER. The Seller agrees to continue to pay from payments received hereunder the following obligation, which obligation must be paid in full when Buyer pays the purchase price in full:
That certain Deed of Trust (Mortgage Deed of Trust Contract) dated June 10, 1986, recorded as AF # 8606110302.

ANY ADDITIONAL OBLIGATIONS TO BE PAID BY SELLER ARE INCLUDED IN ADDENDUM.

(b) EQUITY OF SELLER PAID IN FULL. If the balance owed the Seller on the purchase price herein becomes equal to the balances owed on prior encumbrances being paid by Seller, Buyer will be deemed to have assumed said encumbrances as of that date. Buyer shall thereafter make payments direct to the holders of said encumbrances and make no further payments to Seller. Seller shall at that time deliver to Buyer a fulfillment deed in accordance with the provisions of Paragraph 8.

(c) FAILURE OF SELLER TO MAKE PAYMENTS ON PRIOR ENCUMBRANCES. If Seller fails to make any payments on any prior encumbrance, Buyer may give written notice to Seller that unless Seller makes the delinquent payments within 15 days, Buyer will make the payments together with any late charge, additional interest, penalties, and costs assessed by the holder of the prior encumbrance. The 15-day period may be shortened to avoid the exercise of any remedy by the holder of the prior encumbrance. Buyer may deduct the amounts so paid plus a late charge of 5% of the amount so paid and any attorneys' fees and costs incurred by Buyer in connection with the delinquency from payments next becoming due Seller on the purchase price. In the event Buyer makes such delinquent payments on three occasions, Buyer shall have the right to make all payments due thereafter direct to the holder of such prior encumbrance and deduct the then balance owing on such prior encumbrance from the then balance owing on the purchase price and reduce periodic payments on the balance due Seller by the payments called for in such prior encumbrance as such payments become due.

7. OTHER ENCUMBRANCES AGAINST THE PROPERTY. The property is subject to encumbrances including the following listed tenancies, easements, restrictions and reservations in addition to the obligations assumed by Buyer and the obligations being paid by Seller: last half 1988 taxes and drainage assessment and all future assessments and assignments, ULID 82-1 Assessment No. 0420053073, Covenants recorded June 11, 1986 under Auditor's No. 8606110301, Condemnation of access to State of Wash. entered March 18, 1960 PC. Cause No. 141980, Relinquishment recorded Dec. 4, 1959 under Auditor's No. 1874357, Permit to Construct Channel change to State of Wash. recorded Dec. 4, 1959 under Auditor's No. 1874358, Relinquishment to State of Wash. recorded Dec. 4, 1959 under Auditor's No. 1874360, Right, privilege and permit of waste under Auditor's No. 1895985, Rights of Puyallup Tribe of Indians, Deed dated June 2, 1986 and recorded June 11, 1986 under Auditor's No. 8606110301. All contained in report Nos. 9 thru 20.
**September 20, 1989 and then monthly payments will be increased to $2,350.00 per month, or more at purchasers option including interest at the rate of eleven per cent (11.00%) per annum, with the entire balance due on or before August 20, 1992.

ANY ADDITIONAL NON-MONETARY ENCUMBRANCES ARE INCLUDED IN ADDENDUM.

8. FULFILLMENT DEED. Upon payment of all amounts due Seller, Seller agrees to deliver to Buyer a Statutory Warranty Deed in fulfillment of this Contract. The covenants of warranty in said deed shall not apply to any encumbrances assumed by Buyer or to defects in title arising subsequent to the date of this Contract by, through or under persons other than the Seller herein. Any personal property included in the sale shall be included in the fulfillment deed.

9. LATE CHARGES. If any payment on the purchase price is not made within ten (10) days after the date it is due, Buyer agrees to pay a late charge equal to 5% of the amount of such payment. Such late payment charge shall be in addition to all other remedies available to Seller and the first amounts received from Buyer after such late charges are due shall be applied to the late charges.

10. NO ADVERSE EFFECT ON PRIOR ENCUMBRANCES. Seller warrants that entry into this Contract will not cause in any prior encumbrance (a) a breach, (b) accelerated payments, or (c) an increased interest rate; unless (a), (b) or (c) has been consented to by Buyer in writing.

11. POSSESSION. Buyer is entitled to possession of the property from and after the date of this Contract, or at closing, 19, whichever is later, subject to any tenancies described in Paragraph 7.

12. TAXES, ASSESSMENTS AND UTILITY LIENS. Buyer agrees to pay by the date due all taxes and assessments becoming a lien against the property after the date of this Contract. Buyer may in good faith contest any such taxes or assessments so long as no forfeiture or sale of the property is threatened as the result of such contest. Buyer agrees to pay when due any utility charges which may become liens superior to Seller's interest under this Contract. If real estate taxes and penalties are assessed against the property subsequent to date of this Contract because of a change in use prior to the date of this Contract for Open Space, Farm, Agricultural or Timber classifications approved by the County or because of a Senior Citizen's Declaration to Defer Property Taxes filed prior to the date of this Contract, Buyer may demand in writing payment of such taxes and penalties within 30 days. If payment is not made, Buyer may pay and deduct the amount thereof plus 5% penalty from the payments next becoming due Seller under the Contract.

13. INSURANCE. Buyer agrees to keep all buildings now or hereafter erected on the property described herein continuously insured under fire and extended coverage policies in an amount not less than the balances owed on obligations assumed by Buyer plus the balance due Seller, or full insurable value, whichever is lower. All policies shall be held by the Seller and be in such companies as the Seller may approve and have loss payable first to any holders of underlying encumbrances, then to Seller as their interests may appear and then to Buyer. Buyer may within 30 days after loss negotiate a contract to substanially restore the premises to their condition before the loss. If the insurance proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the resortation contract, the property shall be restored unless the underlying encumbrances provide otherwise. Otherwise the amount collected under any insurance policy shall be applied upon any amounts due hereunder in such order as the Seller shall determine. In the event of forfeiture, all rights of Buyer in insurance policies then in force shall pass to Seller.

14. NONPAYMENT OF TAXES, INSURANCE AND UTILITIES CONSTITUTING LIENS. If Buyer fails to pay taxes or assessments, insurance premiums or utility charges constituting liens prior to Seller's interest under this Contract, Seller may pay such items and Buyer shall forthwith pay Seller the amount thereof plus a late charge of 5% of the amount thereof plus any costs and attorney's fees incurred in connection with making such payment.

15. CONDITION OF PROPERTY. Buyer accepts the property in its present condition and acknowledges that Seller, his agents and subagents have made no representation or warranty concerning the physical condition of the property or the uses to which it may be put other than as set forth herein. Buyer agrees to maintain the property in such condition as complies with all applicable laws.

16 RISK OF LOSS. Buyer shall bear the risk of loss for destruction or condemnation of the property. Any such loss shall not relieve Buyer from any of Buyer's obligations pursuant to this Contract.

17. WASTE. Buyer shall keep the property in good repair and shall not commit or suffer waste or willful damage to or destruction of the property. Buyer shall not remove commercial timber without the written consent of Seller.

18. AGRICULTURAL USE. If this property is to be used principally for agricultural purposes, Buyer agrees to conduct farm and livestock operations in accordance with good husbandry practices. In the event a forfeiture action is instituted, Buyer consents to Seller's entry on the premises to take any reasonable action to conserve soil, crops, trees and livestock.

19. CONDEMNATION. Seller and buyer may each appear as owners of an interest in the property in any action concerning condemnation of any part of the property. Buyer may within 30 days after condemnation and removal of improvements, negotiate a contract to substantially restore the premises to their condition before the removal. If the condemnation proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the restoration contract, the property shall be restored unless underlying encumbrances provide otherwise. Otherwise, proceeds of the award shall be applied in payment of the balance due on the purchase price, as Seller may direct.

20. DEFAULT. If the Buyer fails to observe or perform any term, covenant or condition of this Contract, Seller may:

(a) **Suit for Installments.** Sue for any delinquent periodic payment; or

(b) **Specific Performance.** Sue for specific performance of any of Buyer's obligations pursuant to this Contract; or

(c) **Forfeit Buyer's Interest.** Forfeit this Contract pursuant to Ch. 61.30, RCW, as it is presently enacted and may hereafter be amended. The effect of such forfeiture includes: (i) all right, title and interest in the property of the Buyer and all persons claiming through the Buyer shall be terminated; (ii) the Buyer's rights under the Contract shall be cancelled; (iii) all sums previously paid under the Contract shall belong to and be retained by the Seller or other person to whom paid and entitled thereto; (iv) all improvements made to and unharvested crops on the property shall belong to the Seller; and (v) Buyer shall be required to surrender possession of the property, improvements, and unharvested crops to the Seller 10 days after the forfeiture.

(d) **Acceleration of Balance Due.** Give Buyer written notice demanding payment of said delinquencies and payment of a late charge of 5% of the amount of such delinquent payments and payment of Seller's reasonable attorney's fees and costs incurred for services in preparing and sending such Notice and stating that if payment pursuant to said Notice is not received within thirty (30) days after the date said Notice is either deposited in the mail addressed to the Buyer or personally delivered to the Buyer, the entire balance owing, including interest, will become immediately due and payable. Seller may thereupon institute suit for payment of such balance, interest, late charge and reasonable attorneys' fees and costs.

21. RECEIVER. If Seller has instituted any proceedings specified in Paragraph 20 and Buyer is receiving rental or other income from the property, Buyer agrees that the appointment of a receiver for the property is necessary to protect Seller's interest.

22. BUYER'S REMEDY FOR SELLER'S DEFAULT. If Seller fails to observe or perform any term, covenant or condition of this Contract, Buyer may, after 30 days' written notice to Seller, institute suit for damages or specific performance unless the breaches designated in said notice are cured.

23. NON-WAIVER. Failure of either party to insist upon strict performance of the other party's obligations hereunder shall not be construed as a waiver of strict performance thereafter of all of the other party's obligations hereunder and shall not prejudice any remedies as provided herein.

24. ATTORNEYS' FEES AND COSTS. In the event of any breach of this Contract, the party responsible for the breach agrees to pay reasonable attorneys' fees and costs, including costs of service of notices and title searches, incurred by the other party. The prevailing party in any suit instituted arising out of this Contract and in any forfeiture proceedings arising out of this Contract shall be entitled to receive reasonable attorneys' fees and costs incurred in such suit or proceedings.

25. NOTICES. Notices shall be either personally served or shall be sent certified mail, return receipt requested and by regular first class mail to Buyer at 15714 15th Pl. S. W. Seattle, Wa. 98166, and to Seller at P. O. Box 3461, Federal Way, Wa. 98063

or such other addresses as either party may specify in writing to the other party. Notices shall be deemed given when served or mailed. Notice to Seller shall also be sent to any institution receiving payments on the Contract.

26. TIME FOR PERFORMANCE. Time is of the essence in performance of any obligations pursuant to this Contract.

27. SUCCESSORS AND ASSIGNS. Subject to any restrictions against assignment, the provisions of this Contract shall be binding on the heirs, successors and assigns of the Seller and the Buyer.

28. OPTIONAL PROVISION - - SUBSTITUTION AND SECURITY ON PERSONAL PROPERTY. Buyer may substitute for any personal property specified in Paragraph 3 herein other personal property of like nature which Buyer owns free and clear of any encumbrances. Buyer hereby grants Seller a security interest in all personal property specified in Paragraph 3 and future substitutions for such property and agrees to execute a financing statement under the Uniform Commercial Code reflecting such security interest.

SELLER	INITIALS:	BUYER
N/A		N/A

29. OPTIONAL PROVISION - - ALTERATIONS. Buyer shall not make any substantial alteration to the improvements on the property without the prior written consent of Seller, which consent will not be unreasonably withheld.

SELLER	INITIALS:	BUYER
N/A		N/A

30. OPTIONAL PROVISION - - DUE ON SALE. If Buyer, without written consent of Seller, (a) conveys, (b) sells, (c) leases, (d) assigns, (e) contracts to convey, sell, lease or assign, (f) grants an option to buy the property, (g) permits a forfeiture or foreclosure or trustee or sheriff's sale of any of the Buyer's interest in the property or this Contract, Seller may at any time thereafter either raise the interest rate on the balance of the purchase price or declare the entire balance of the purchase price due and payable. If one or more of the entities comprising the Buyer is a corporation, any transfer or successive transfers in the nature of items (a) through (g) above of 49% or more of the outstanding capital stock shall enable Seller to take the above action. A lease of less than 3 years (including options for renewals), a transfer to a spouse or child of Buyer, a transfer incident to a marriage dissolution or condemnation, and a transfer by inheritance will not enable Seller to take any action pursuant to this Paragraph; provided the transferee other than a condemnor agrees in writing that the provisions of this paragraph apply to any subsequent transaction involving the property entered into by the transferee.

SELLER	INITIALS:	BUYER
N/A		N/A

31. OPTIONAL PROVISION - - PRE-PAYMENT PENALTIES ON PRIOR ENCUMBRANCES. If Buyer elects to make payments in excess of the minimum required payments on the purchase price herein, and Seller, because of such prepayments, incurs prepayment penalties on prior encumbrances, Buyer agrees to forthwith pay Seller the amount of such penalties in addition to payments on the purchase price.

SELLER	INITIALS:	BUYER
N/A		N/A

8808240285

32. OPTIONAL PROVISION -- PERIODIC PAYMENTS ON TAXES AND INSURANCE. In addition to the periodic payments on the purchase price, Buyer agrees to pay Seller such portion of the real estate taxes and assessments and fire insurance premium as will approximately total the amount due during the current year based on Seller's reasonable estimate.

The payments during the current year shall be $ _____ per _____. Such "reserve" payments from Buyer shall not accrue interest. Seller shall pay when due all real estate taxes and insurance premiums, if any, and debit the amounts so paid to the reserve account. Buyer and Seller shall adjust the reserve account in April of each year to reflect excess or deficit balances and changed costs. Buyer agrees to bring the reserve account balance to a minimum of $10 at the time of adjustment.

SELLER	INITIALS:	BUYER
N/A		N/A

33. ADDENDA. Any addenda attached hereto are a part of this Contract.

34. ENTIRE AGREEMENT. This Contract constitutes the entire agreement of the parties and supercedes all prior agreements and understandings, written or oral. This Contract may be amended only in writing executed by Seller and Buyer.

IN WITNESS WHEREOF the parties have signed and sealed this Contract the day and year first above written.

AGREEMENT TO AMEND REAL ESTATE CONTRACT

5 F.A.T. 52608 NOV 19 1990

This agreement made and entered in to this 16th day of November, 1990, between Linda Plein, hereinafter called the Purchaser, and Herbert A. & Anita Rendel, hereinafter called the Seller.

Whereas the parties executed a real estate contract dated August 20, 1987, Pierce County Auditor's No. 8808240285 recorded September 09, 1987 of the following described real estate for the purchase price of $ 132,000.00 situated in Pierce County, State of Washington. To wit:

Parcel # R-0420053072

Parcel "B" of DBLR 87-05-15-0325, Described as follows com S/W corner of NW of SW the N568.31 feet and 371.28 ft. to a point on East line O/D Hwy 99 R/W which S 10 Deg 8 min 15 sec. W 185.26 ft th S 10 Deg 8 min 15 sec. A complete legal is attached hereto as Exhibit "A".

Whereas said contract calls for payment in full of the entire remaining principal balance on or before August 20, 1993, and purchaser is desirous of amending the terms of indebtment, and rewriting Real Estate Contract for Parcel "A", to reflect a new balance and payment schedule, to facilitate purchaser receiving deed release of Parcel "B", hereto referred to as Parcel R-0420053073.

Therefore, in consideration of the foregoing, the parties agree to amend the Real Estate Contract entered into between them.

To Wit:

1. The remaining principal balance of $ 100,150.00 (dated Nov. 20, 1990) shall be amended to read $ 187,454.89 as of November 20 1990 calling for an increase in payments to $ 4,000.00, or more at Purchaser's option, including interest at a rate of eleven percent per annum, payments shall be made on the 20th day of each succeeding month, contract shall be paid off five years notwithstanding the above, the entire balance of principal is due in full not later than November 20, 1995.

2. This is the entirety of this contract, and modification, deletion or change by either party hereto, must be acknowledged by all parties to this contract. Any breach of this agreement to amend, the party responsible for the breach agrees to pay reasonable attorneys or agent fees and cost. Including cost of service of notices and title searches, incurred by the other party, including the cost associated with any non-judicial forfeiture proceeding as set forth in RCW 60.30 et seq. the injured party to any forfeiture shall be entitled to receive reasonable attorneys fees and cost incurred in such suit or proceedings.

3. All other conditions of Real Estate MP45 shall remain in effect., EXCEPT DEED RELEASE PROVISIONS ARE ATTACHED AND MADE A PART HERETO AS EXHIBIT B.

In Witness whereof: the parties hereto have executed this Instrument as of the date first written above.

ANY OPTIONAL PROVISION NOT INITIALED BY ALL PERSONS SIGNING THIS CONTRACT -- WHETHER INDIVIDUALLY OR AS AN OFFICER OR AGENT -- IS NOT A PART OF THIS CONTRACT.

REAL ESTATE CONTRACT
(RESIDENTIAL SHORT FORM)

1. PARTIES AND DATE. This Contract is entered into on MAY 5, 2005 between BATROB LLC, A WASHINGTON LIMITED LIABILITY COMPANY,

as "Seller" and
FREEWAY SALES LLC, A WASHINGTON LIMITED LIABILITY COMPANY,

as "Buyer".

2. SALE AND LEGAL DESCRIPTION. Seller agrees to sell to Buyer and Buyer agrees to purchase from Seller the following described real estate in PIERCE County, State of Washington:

LOTS 1, 2, 3, AND 4 OF PIERCE COUNTY SHORT PLAT NO. 9011070432, RECORDED NOVEMBER 7, 1990, RECORDS OF PIERCE COUNTY AUDITOR;

SITUATE IN THE COUNTY OF PIERCE, STATE OF WASHINGTON.

Assessor's Property Tax Parcel/Account Number: 04-20-05-7-005 THRU7-008

3. PERSONAL PROPERTY. Personal property, if any, included in the sale is as follows:

No part of the purchase price is attributed to personal property.

4. (a) PRICE. Buyer agrees to pay: $1,242,322.00 Total Price
Less ($25,000.00) Down Payment
Less ($0.00) Assumed Obligation(s)
Results in **$1,217,322.00** Amount Financed by Seller.

(b) ASSUMED OBLIGATIONS. Buyer agrees to pay the above Assumed Obligation(s) by assuming and agreeing to pay that certain 1217322.00 dated recorded as A F #
Seller warrants the unpaid balance of said obligation is $ 0.00 which is payable on or before the day of , , including interest at the rate of per annum on the declining balance thereof; and a like amount on or before the day of each and every thereafter until paid in full.

Note: Fill in the date in the following two lines only if there is an early cash out date.

NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN
ANY ADDITIONAL ASSUMED OBLIGATIONS ARE INCLUDED IN ADDENDUM REC2000A/RDA/1200

(c) PAYMENT OF AMOUNT FINANCED BY SELLER.

Buyer agrees to pay the sum of $1,217,322.00 as follows: $6,911.82 or more at Buyer's option on or before the 15th day of JUNE 2005, , INCLUDING interest from MAY 6, 2006 at the rate of 5.500% per annum on the declining balance thereof; and a like amount or more on or before the 15TH day of each and every MONTH thereafter until paid in full.

NOTE: Fill in the date in the following two lines only if there is an early cash out date.

NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN THIRTY (30) YEARS FROM THE DATE OF CLOSING

Payments are applied first to interest and then to principal. Payments shall be made at BATROB LLC 1600 SW 156TH ST. BURIEN WA 98166-2768 or such other place as the Seller may hereafter indicate in writing.

5. FAILURE TO MAKE PAYMENTS ON ASSUMED OBLIGATIONS. If Buyer fails to make any payments on assumed obligation(s), Seller may give written notice to Buyer that unless Buyer makes the delinquent payment(s) within 15 days, Seller will make the payment(s), together with any late charge, additional interest, penalties, and costs assessed by the Holder of the assumed obligation(s). The 15-day period may be shortened to avoid the excercise of any remedy by the holder of the assumed obligation(s). Buyer shall immediately after such payment by Seller reimburse Seller for the amount of such payment plus a late charge equal to five percent (5%) of the amount so paid plus all costs and attorney fees incurred by Seller in connection with making such payment.

6. (a) OBLIGATIONS TO BE PAID BY SELLER. The seller agrees to continue to pay from payments received hereunder the following obligation, which obligation must be paid in full when Buyer pays the purchase price in full: That certain
dated recorded as A F # 0

ANY ADDITIONAL OBLIGATIONS TO BE PAID BY SELLER ARE INCLUDED IN ADDENDUM.

(b) EQUITY OF SELLER PAID IN FULL. If the balance owed the Seller on the purchase price herein becomes equal to the balance owed on prior encumbrances being paid by Seller, Buyer will be deemed to have assumed said encumbrances as of that date. Buyer shall thereafter make payments directly to the holders of said encumbrances and make no further payments to Seller. Seller shall at that time deliver to Buyer a fulfillment deed in accordance with the provisions of paragraph 8.

(c) FAILURE OF SELLER TO MAKE PAYMENTS ON PRIOR ENCUMBRANCES. If Seller fails to make any payments on any prior encumbrance, Buyer may give written notice to Seller that unless Seller makes the delinquent payments within 15 days, Buyer will make the payments together with any late charge, additional interest, penalties, and costs assessed by the holder of the prior encumbrance. The 15-day period may be shortened to avoid the exercise of any remedy by the holder of the prior encumbrance. Buyer may deduct the amounts so paid plus a late charge of 5% of the amount so paid and any attorneys' fees and costs incurred by Buyer in connection with the delinquency from payments next becoming due Seller on the purchase price. In the event Buyer makes such delinquent payments on three occasions, Buyer shall have the right to make all payments due thereafter directly to the holder of such prior encumbrance and deduct the then balance owing on such prior encumbrance from the then balance owing on the purchase price and reduce periodic payments on the balance due Seller by the payments called for in such prior encumbrance as such payments become due.

OTHER ENCUMBRANCES AGAINST THE PROPERTY. The property is subject to encumbrances including the following listed tenancies, easements, restrictions, and reservations in addition to the obligations assumed by Buyer and the obligations being paid by Seller.

SEE EXHIBIT "A" ATTACHED HERETO AND BY REFERENCE MADE A PART HEREOF

8. FULLFILLMENT DEED. Upon payment of all amounts due Seller, Seller agrees to deliver to Buyer a Statutory Warranty Deed in fulfillment of this Contract. The covenants of warranty in said deed shall not apply to any encumbrances assumed by Buyer or to defects in Title arising subsequent to the date of this Contract by, through, or under persons other than the Seller herein. Any personal property included in the sale shall be included in the fulfillment deed.

9. LATE CHARGES. If any payment on the purchase price is not made within ten (10) days after the date it is due, Buyer agrees to pay a late charge equal to 5% of the amount of such payment. Such late payment charge shall be in addition to all other remedies available to Seller and the first amounts received from Buyer after such late charges are due shall be applied to the late charges.

10. NO ADVERSE EFFECT ON PRIOR ENCUMBRANCES. Seller warrants that entry into this Contract will not cause in any prior encumbrance (a) a breach, (b) accelerated payments, or (c) an increased interest rate; unless (a), (b), or (c) has been consented to by Buyer in writing.

11. POSSESSION. Buyer is entitled to possession of the property from and after the date of this Contract or , whichever is later, subject to any tenancies described in paragraph 7.

12. TAXES, ASSESSMENTS, AND UTILITY LIENS. Buyer agrees to pay by the date due all taxes and assessments becoming a lien against the property after the date of this Contract. Buyer may in good faith contest any such taxes or assessments so long as no forfeiture or sale of the property is threatened as a result of such contest. Buyer agrees to pay when due any utility charges which may become liens superior to Seller's interest under this Contract. If real estate taxes and penalties are assessed against the property subsequent to date of this Contract because of a change in use prior to the date of this Contract for Open Space, Farm, Agricultural, or Timber classifications approved by the County or because of a Senior Citizen's Declaration to Defer Property Taxes filed prior to the date of this Contract, Buyer may demand in writing payment of such taxes and penalties within 30 days. If payment is not made, Buyer may pay and deduct the amount thereof plus 5% penalty from the payments next becoming due Seller under the Contract.

13. INSURANCE. Buyer agrees to keep all buildings now or hereafter erected on the property described herein continuously insured under fire and extended coverage policies in an amount not less than the balances owed on obligations assumed by Buyer plus the balance due Seller, or full insurable value, whichever is lower. All policies shall be held by the Seller and be in such companies as the Seller may approve and have loss payable first to any holders of underlying encumbrances, then to Seller as their interests may appear and then to Buyer. Buyer may within 30 days after loss negotiate a contract to substantially restore the premises to their condition before the loss. If insurance proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the restoration contract, the property shall be restored unless the underlying encumbrances provide otherwise. Otherwise the amount collected under any insurance policy shall be applied upon any amounts due hereunder in such order as Seller shall determine. In the event of forfeiture, all rights of Buyer in insurance policies then in force shall pass to Seller.

14. NONPAYMENT OF TAXES, INSURANCE, AND UTILITIES CONSTITUTING LIENS. If Buyer fails to pay taxes or assessments, insurance premiums, or utility charges constituting liens prior to Seller's interest under this Contract, Seller may pay such items and Buyer shall forthwith pay Seller the amount thereof plus a late charge of 5% of the amount thereof plus any costs and attorney's fees incurred in connection with making such payment.

15. CONDITION OF PROPERTY. Buyer accepts the property in its present condition and acknowledges that Seller, his agents, and subagents have made no representation or warranty concerning the physical condition of the property or the uses to which it may be put other than as set forth herein. Buyer agrees to maintain the property in such condition as complies with all applicable laws.

16. RISK OF LOSS. Buyer shall bear the risk of loss for destruction or condemnation of the property. Any such loss shall not relieve Buyer from any of Buyer's obligations pursuant to this Contract.

17. WASTE. Buyer shall keep the property in good repair and shall not commit or suffer waste or willful damage to or destruction of the property. Buyer shall not remove commercial timber without the written consent of Seller.

18. AGRICULTURAL USE. If this property is to be used principally for agricultural purposes, Buyer agrees to conduct farm and livestock operations in accordance with good husbandry practices. In the event a forfeiture action is instituted, Buyer consents to Seller's entry on the premises to take any reasonable action to conserve soil, crops, trees, and livestock.

19. CONDEMNATION. Seller and Buyer may each appear as owners of an interest in the property in any action concerning condemnation of any part of the property. Buyer may within 30 days after condemnation and removal of improvements, negotiate a contract to substantially restore the premises to their condition before the removal. If the condemnation proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the restoration contract, the property shall be restored unless the underlying encumbrances provide otherwise. Otherwise, proceeds of the award shall be applied in payment of the balance due on the purchase price, as Seller may direct.

20. DEFAULT. If the Buyer fails to observe or perform any term, covenant, or condition of this Contract, Seller may:
(a) Suit for Installments. Sue for any delinquent periodic payment; or
(b) Specific Performance. Sue for specific performance of any of Buyer's obligations pursuant to this Contract; or
(c) Forfeit Buyer's Interest. Forfeit this Contract pursuant to Ch.61.30, RCW, as it is presently enacted and may hereafter be amended. The effect of such forfeiture includes: (i) all right, title, and interest in the property of the Buyer and all persons claiming through the Buyer shall be terminated; (ii)the Buyer's rights under the Contract shall be cancelled; (iii) all sums previously paid under the Contract shall belong to and be retained by the Seller or other person to whom paid and entitled thereto; (iv) all improvements made to and unharvested crops on the property shall belong to the Seller; and (v) Buyer shall be required to surrender possession of the property, imporvements, and unharvested crops to the Seller 10 days after the forfeiture.
(d) Acceleration of Balance Due. Give Buyer written notice demanding payment of said delinquencies and payment of a late charge of 5% of the amount of such delinquent payments and payment of Seller's reasonable attorney's fees and costs incurred for services in preparing and sending such Notice and stating that if payment pursuant to said Notice is not received within 30 days after the date said Notice is either deposited in the mail addressed to the Buyer or personally delivered to the Buyer, The entire balance owing, including interest, will become immediately due and payable. Seller may thereupon institute suit for payment of such balance, interest, late charge, and reasonable attorney's fees and costs.
(e) Judicial Foreclosure. Sue to foreclose this Contract as a mortgage, in which event Buyer may be liable for a deficentcy.

21. RECEIVER. If Seller has instituted any proceedings specified in Paragraph 20 and Buyer is receiving rental or other income from the property, Buyer agrees that the appointment of a receiver is neccsary to protect Seller's interest.

22. BUYER'S REMEDY FOR SELLER'S DEFAULT. If Seller fails to observe or perform any term, covenant, or condition of this Contract, Buyer may, after 30 days' written notice to Seller, institute suit for damages or specific performance unless the breaches designated in said notice are cured.

23. NON-WAIVER. Failure of either party to insist upon strict performance of the other party's obligations hereunder shall not be construed as a waiver of strict performance thereafter of all of the other party's obligations hereunder and shall not prejudice any remedies as provided herein.

24. ATTORNEYS' FEES AND COSTS. In the event of any breach of this Contract, the party responsible for the breach agrees to pay reasonable attorney's fees and costs, including costs of service of notices and title searches, incurred by the other party. The prevailing party in any suit instituted arising out of this Contract and in any forfeiture proceedings arising out of this Contract shall be entitled to receive reasonable attorney's fees and costs incurred in such suit or proceedings.

25. NOTICES. Notices shall be either personally served or shall be sent certified mail, return receipt requested and by regular first class mail to Buyer at
and to the Seller at
, or such other address as either party may specify in writing to the other party. Notices shall be deemed given when served or mailed. Notice to Seller shall also be sent to any institution receiving payments on the Contract.

26. TIME FOR PERFORMANCE. Time is of the essence in performance of any obligations pursuant to this Contract.

27. SUCCESSORS AND ASSIGNS. Subject to any restrictions against assignment, the provisions of this Contract shall be binding on the heirs, successors, and assigns of the Seller and Buyer.

28. OPTIONAL PROVISION -- SUBSTITUTION AND SECURITY ON PERSONAL PROPERTY. Buyer may substitute for any personal property specified in Paragraph 3 herein other personal property of like nature which Buyer owns free and clear of any encumbrances. Buyer hereby grants Seller a security interest in all personal property specified in paragraph 3 and future substitutions for such property and agrees to execute a financing statement under the Uniform Commercial Code reflecting such security interest.

SELLER	INITIALS:	BUYER
_____	_____	_____
_____	_____	_____

29. OPTIONAL PROVISION - ALTERATIONS. Buyer shall not make any substantial alteration to the improvements on the property without the prior written consent of Seller, which consent will not be unreasonably withheld.

SELLER	INITIALS:	BUYER

30. OPTIONAL PROVISION - DUE ON SALE. If Buyer, without written consent of Seller, (a) conveys, (b) sells, (c) leases, (d) assigns, (e) contracts to convey, sell, lease, or assign, (f) grants an option to buy the property, (g) permits a forfeiture of forclosure or trustee or sheriff's sale of any of the Buyer's interest in the property of this Contract, Seller may at any time thereafter either raise the interest rate on the balance of the purchase price or declare the entire balance of the purchase price due and payable. If one or more of the entities comprising the Buyer is a corporation, any transfer of or successive transfers in the nature of items (a) through (g) above of 40% or more of the capital stock shall enable Seller to take the above action. A lease of less than 3 years (including options for renewals), a transfer to a spouse or child of Buyer, a transfer incident to a marriage dissolution or condemnation, and a transfer by inheritance will not enable Seller to take any action pursuant to this Paragraph; provided the transferee other than a condemnor agrees in writing that the provisions of this paragraph apply to any subsequent transaction involving the property entered into by the transferee.

SELLER	INITIALS:	BUYER

31. OPTIONAL PROVISION - PREPAYMENT PENALTIES ON PRIOR ENCUMBRANCES. If Buyer elects to make payments in excess of the minimum required payments on the purchase price herein, and Seller, because of such prepayments, incurs penalties on prior encumbrances, Buyer agrees to forthwith pay seller the amount of such penalties in addition to payments on the purchase price.

SELLER	INITIALS:	BUYER

32. OPTIONAL PROVISION - PERIODIC PAYMENTS ON TAXES AND INSURANCE. In addition to the periodic payments on the purchase price, Buyer agrees to pay seller such portion of the real estate taxes and assessments and fire insurance premium as will approximately total the amount due during the current year based on Sellers reasonable estimate.

The payments during the current year shall be per . Such "reserve" payments from Buyer shall not accrue interest. Seller shall pay when due all real estate taxes and insurance premiums, if any, and debit the amounts so paid to the reserve account. Buyer and Seller shall adjust the reserve account in April of each year to reflect excess or deficit balances and changed costs. Buyer agrees to bring the reserve account to a minimum of $10 at the time of adjustment.

SELLER	INITIALS:	BUYER

33. ADDENDA. Any addenda attached hereto are a part of this Contract.
34. ENTIRE AGREEMENT. This Contract constitutes the entire agreement of the parties and supercedes all prior agreements and understandings, written or oral. This Contract may be amended only in writing executed by Seller and Buyer.

IN WITNESS WHEREOF the parties have signed and sealed this Contract the day and year first above written.

THIS INDENTURE, Made this 23rd day of November A.D., 19 73

between Maurice Raymond, as Treasurer of Pierce County, State of Washington, party of the first part, and Chris Palzer

the part Y of the second part:

WITNESSETH, That whereas, at a public sale of real estate held on the 23rd day of November A.D. 1973, pursuant to a real estate tax judgment entered in the Superior Court of the County of Pierce, on the 5th day of November A.D. 1973, in proceedings to foreclose tax liens upon real estate and an order of sale duly issued by said court,

Chris Palzer

duly purchased, in compliance with the laws of the State of Washington, the following described real estate situate in Pierce County, Washington, to-wit:

Diagram 3/018 Beginning at intersection of Southeasterly line State Highway and East line Benson County Road in Section 05, Township 20 North, Range 04 East of W.M. thence South along East line said road 50 feet thence East at Right Angles 70 feet thence North parallel to said County Road 122 feet thence Northwesterly 48 feet more or less to point on Southeasterly line State Highway thence Southwesterly along said highway 100 feet to beginning
(Subject to all local and special assessments)

and that said Chris Palzer

has complied with the laws of the State of Washington necessary to entitle Him to a deed for said real estate.

NOW, THEREFORE, Know ye, that I, Maurice Raymond County Treasurer of said Pierce County, State of Washington, in consideration of the premises, and by virtue of the statutes of the State of Washington in such cases provided, do hereby grant and convey unto

Chris Palzer

his heirs and assigns forever, the said real estate hereinbefore described.

Given under my hand and seal of office this 23rd day of November A.D. 1973

Maurice Raymond
Treasurer of Pierce County, Washington.

WARRANTY FULFILLMENT DEED

THE GRANTOR, ALBERT J. WARLICK, as trustee of North Western Mortgage Investors Corporation, a Washington corporation in reorganization under Chapter X of the Bankruptcy Act, for and in consideration of One Dollar ($1.00) and other valuable consideration, in hand paid, conveys and warrants to CHARLES E. JACKSON and KATHE H. JACKSON, his wife, the following described real estate, situated in the County of Pierce, State of Washington:

That portion of the following described property lying Westerly of Primary State Highway No. 1 (Interstate Highway No. 5):
Beginning on the North line of the Southwest Quarter of the Southwest Quarter of Section 5, Township 20 North, Range 4 East of the W.M., in Pierce County, Washington, at a point 761 feet East of the Northeast corner of said subdivision; thence South parallel with the East line of said Southwest quarter of the Southwest quarter of the Northerly line of the Puget Sound Electric Railway Company's right of way; thence Westerly along the Northerly line of said right of way to the East line of Ardena County Road, also known as Brazeau Road, said East line being 30 feet East of the West line of said Section 5; thence North along the East line of said road to the South line of property conveyed to Andrew J. Shilling, et al, by Deed recorded December 23, 1946 under Auditor's File No. 1435667; thence East on the South line of said property 60 feet to the Southeast corner thereof; thence on the East line of said property, North 122 feet; thence Northwesterly on the Northeasterly line of said property 48 feet to the Southeasterly line of Pacific Highway No. 1; thence Northeasterly on the Southeasterly line of said Highway to the North line of the Southwest Quarter of the Southwest Quarter of said Section 5; thence East on said North line to the point of Beginning.
EXCEPT Ardena County Road.
EXCEPT that portion thereof conveyed to the State of Washington by instruments recorded under Auditor's File Nos. 957144 and 1572829, records of said County.
EXCEPT a parcel of land located in the Southwest Quarter of Section 5, Township 20 North, Range 4 East of the W.M., in Pierce County, Washington, the boundary of which is described as follows:
Beginning at the Southwest corner of said Section 5, said point being marked by a four-inch by four-inch hub on the old center line of the Ardena County Road; thence North 0°00'15" West 986.93 feet along said center line to the Southeasterly right of way line of Primary State Highway No. 1; thence North 57°42'00" West 52.00 feet along said right of way line to the intersection with East line of said County Road, the true point of beginning; thence South 0°00'15" East 50.00 feet along the old East line of Ardena County Road; thence North 89°59'45" East 70.00 feet; thence North 52°52'00" East 86.00 feet; thence North 22°56'00" East 134.21 feet; thence North 61°52'18" East 88.00 feet to the Southeasterly right of way line of said Pacific Highway; thence South 28°43'00" East 125.15 feet along said right of way line; thence North 57°42'00" West 25.00 feet along State right of way line; thence South 53°19'05" West 71.78 feet, more or less, along said Southeasterly right of way line of Primary State Highway No. 1 to the true point of beginning.
EXCEPT the following described tract:
Commencing at a point where the Pacific Highway No. 1 intersects on its Southeasterly side with the East side of the County Road known as the Brazeau Road, as the same existed prior to June 19, 1937, being in the Southwest Quarter of the Southwest Quarter of Section 5, Township 2. North, Range 4 East of the W.M., in Pierce County, Washington; thence South along East side of said County Road, 50 feet; thence East at right angles with said County Road, 70 feet; thence North parallel with said County Road 122 feet; thence Northwesterly 48 feet, more or less, to a point on the Southeasterly side of said Pacific Highway No. 99, 100 feet Northeasterly (along said Pacific Highway) from the point of beginning; thence Southwesterly along the Southeast side of said Pacific Highway 100 feet to the point of beginning.

This deed is given in fulfillment of that certain real estate contract between the parties hereto, dated December 29, 1964, and conditioned for the conveyance of the above described property, and the covenants of warranty herein contained shall not apply to any title, interest or encumbrance arising by, through or under the purchaser in said contract, and shall not apply to any taxes, assessments or other charges levied, assessed or becoming due subsequent to the date of said contract.

Excise tax receipt No. 189414, dated January 15, 1965.

ANY OPTIONAL PROVISION NOT INITIALED BY ALL PERSONS SIGNING THIS CONTRACT - - WHETHER INDIVIDUALLY OR AS AN OFFICER OR AGENT - - IS NOT A PART OF THIS CONTRACT.

REAL ESTATE CONTRACT
(RESIDENTIAL SHORT FORM)

1. PARTIES AND DATE. This Contract is entered into on March 09, 1988

between CHARLES E. JACKSON and KATHE H. JACKSON, husband and wife

as "Seller" and

H. A. RENDEL and ANITA RENDEL, husband and wife and MICHAEL RENDEL and KAREN RENDEL,

husband and wife as "Buyer."

2. SALE AND LEGAL DESCRIPTION. Seller agrees to sell to Buyer and Buyer agrees to purchase from Seller the following described real estate in Pierce County, State of Washington:

SEE LEGAL DESCRIPTION ATTACHED AND MADE A PART HERETO.

EXCISE TAX PAID $ 4531.50
Receipt No. 698686 Date 3-11-88
Pierce County
By ____ Auth. Sig

3. PERSONAL PROPERTY. Personal property, if any, included in the sale is as follows:

No part of the purchase price is attributed to personal property.

4. (a) PRICE. Buyer agrees to pay:

	$ 285,000.00	Total Price
Less	($ 70,000.00)	Down Payment
Less	($)	Assumed Obligation (s)
Results in	$ 215,000.00	Amount Financed by Seller.

(b) ASSUMED OBLIGATIONS. Buyer agrees to pay the above Assumed Obligation(s) by assuming and agreeing to pay that certain N/A (Mortgage, Deed of Trust, Contract) dated ____ recorded as AF# ____. Seller warrants the unpaid balance of said obligation is $____ which is payable$ ____ on or before the ____ day of ____, 19____, ____ (including/not) interest at the rate of ____% per annum on the declining balance thereof, and a like amount on or before the ____ day of each and every ____ (month, year) thereafter until paid in full.

N/A

Note: Fill in the date in the following two lines only if there is an early cash out date.

NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN March 11, 19 2028

ANY ADDITIONAL ASSUMED OBLIGATIONS ARE INCLUDED IN ADDENDUM.

8803110353

10

CEJ 3-8-88

HAR KLR

(c) PAYMENT OF AMOUNT FINANCED BY SELLER.

Buyer agrees to pay the sum of $ 215,000.00 as follows: $ 2,000.00 or more at buyer's option on or before the 11th day of April, 19 88 (including/plus) interest from March 11, 1988 at the rate of 11.00 % per annum on the declining balance thereof; and a like amount or more on or before the 11th day of each and every month (month/year) thereafter until paid in full.

Note: Fill in the date in the following two lines only if there is an early cash out date.

NOTWITHSTANDING THE ABOVE, THE ENTIRE BALANCE OF PRINCIPAL AND INTEREST IS DUE IN FULL NOT LATER THAN March 11 19 2028.

Payments are applied first to interest and then to principal. Payments shall be made at 763 Tule Lake Road, Tacoma, Wa. 98444 or such other place as the Seller may hereafter indicate in writing.

5. FAILURE TO MAKE PAYMENTS ON ASSUMED OBLIGATIONS. If Buyer fails to make any payments on assumed obligation(s), Seller may give written notice to Buyer that unless Buyer makes the delinquent payment(s) within fifteen (15) days, Seller will make the payment(s), together with any late charge, additional interest, penalties, and costs assessed by the Holder of the assumed obligation(s). The 15-day period may be shortened to avoid the exercise of any remedy by the holder of the assumed obligation. Buyer shall immediately after such payment by Seller reimburse Seller for the amount of such payment plus a late charge equal to five percent (5%) of the amount so paid plus all costs and attorneys' fees incurred by Seller in connection with making such payment. N/A

6. (a) OBLIGATIONS TO BE PAID BY SELLER. The Seller agrees to continue to pay from payments received hereunder the following obligation, which obligation must be paid in full when Buyer pays the purchase price in full: N/A

That certain N/A (Mortgage, Deed of Trust, Contract) dated _____, recorded as AF # _____.

ANY ADDITIONAL OBLIGATIONS TO BE PAID BY SELLER ARE INCLUDED IN ADDENDUM.

(b) EQUITY OF SELLER PAID IN FULL. If the balance owed the Seller on the purchase price herein becomes equal to the balances owed on prior encumbrances being paid by Seller, Buyer will be deemed to have assumed said encumbrances as of that date. Buyer shall thereafter make payments direct to the holders of said encumbrances and make no further payments to Seller. Seller shall at that time deliver to Buyer a fulfillment deed in accordance with the provisions of Paragraph 8.

(c) FAILURE OF SELLER TO MAKE PAYMENTS ON PRIOR ENCUMBRANCES. If Seller fails to make any payments on any prior encumbrance, Buyer may give written notice to Seller that unless Seller makes the delinquent payments within 15 days, Buyer will make the payments together with any late charge, additional interest, penalties, and costs assessed by the holder of the prior encumbrance. The 15-day period may be shortened to avoid the exercise of any remedy by the holder of the prior encumbrance. Buyer may deduct the amounts so paid plus a late charge of 5% of the amount so paid and any attorneys' fees and costs incurred by Buyer in connection with the delinquency from payments next becoming due Seller on the purchase price. In the event Buyer makes such delinquent payments on three occasions, Buyer shall have the right to make all payments due thereafter direct to the holder of such prior encumbrance and deduct the then balance owing on such prior encumbrance from the then balance owing on the purchase price and reduce periodic payments on the balance due Seller by the payments called for in such prior encumbrance as such payments become due.

7. OTHER ENCUMBRANCES AGAINST THE PROPERTY. The property is subject to encumbrances including the following listed tenancies, easements, restrictions and reservations in addition to the obligations assumed by Buyer and the obligations being paid by Seller:

SEE EXHIBIT "B" ATTACHED AND MADE A PART HERETO.

ANY ADDITIONAL NON-MONETARY ENCUMBRANCES ARE INCLUDED IN ADDENDUM.

8. FULFILLMENT DEED. Upon payment of all amounts due Seller, Seller agrees to deliver to Buyer a Statutory Warranty Deed in fulfillment of this Contract. The covenants of warranty in said deed shall not apply to any encumbrances assumed by Buyer or to defects in title arising subsequent to the date of this Contract by, through or under persons other than the Seller herein. Any personal property included in the sale shall be included in the fulfillment deed.

~~9. LATE CHARGES. If any payment on the purchase price is not made within ten (10) days after the date it is due, Buyer agrees to pay a late charge equal to 5% of the amount of such payment. Such late payment charge shall be in addition to all other remedies available to Seller and the first amounts received from Buyer after such late charges are due shall be applied to the late charges.~~ N/A

10. NO ADVERSE EFFECT ON PRIOR ENCUMBRANCES. Seller warrants that entry into this Contract will not cause in any prior encumbrance (a) a breach, (b) accelerated payments, or (c) an increased interest rate; unless (a), (b) or (c) has been consented to by Buyer in writing.

11. POSSESSION. Buyer is entitled to possession of the property from and after the date of this Contract, or at closing or as agreed, 19____, whichever is later, subject to any tenancies described in Paragraph 7.

8803110353

12. TAXES, ASSESSMENTS AND UTILITY LIENS. Buyer agrees to pay by the date due all taxes and assessments becoming a lien against the property after the date of this Contract. Buyer may in good faith contest any such taxes or assessments so long as no forfeiture or sale of the property is threatened as the result of such contest. Buyer agrees to pay when due any utility charges which may become liens superior to Seller's interest under this Contract. If real estate taxes and penalties are assessed against the property subsequent to date of this Contract because of a change in use prior to the date of this Contract for Open Space, Farm, Agricultural or Timber classifications approved by the County or because of a Senior Citizen's Declaration to Defer Property Taxes filed prior to the date of this Contract, Buyer may demand in writing payment of such taxes and penalties within 30 days. If payment is not made, Buyer may pay and deduct the amount thereof plus 5% penalty from the payments next becoming due Seller under the Contract.

13. INSURANCE. Buyer agrees to keep all buildings now or hereafter erected on the property described herein continuously insured under fire and extended coverage policies in an amount not less than the balances owed on obligations assumed by Buyer plus the balance due Seller, or full insurable value, whichever is lower. All policies shall be held by the Seller and be in such companies as the Seller may approve and have loss payable first to any holders of underlying encumbrances, then to Seller as their interests may appear and then to Buyer. Buyer may within 30 days after loss negotiate a contract to substanially restore the premises to their condition before the loss. If the insurance proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the resortation contract, the property shall be restored unless the underlying encumbrances provide otherwise. Otherwise the amount collected under any insurance policy shall be applied upon any amounts due hereunder in such order as the Seller shall determine. In the event of forfeiture, all rights of Buyer in insurance policies then in force shall pass to Seller.

14. NONPAYMENT OF TAXES, INSURANCE AND UTILITIES CONSTITUTING LIENS. If Buyer fails to pay taxes or assessments, insurance premiums or utility charges constituting liens prior to Seller's interest under this Contract, Seller may pay such items and Buyer shall forthwith pay Seller the amount thereof plus a late charge of 5% of the amount thereof plus any costs and attorney's fees incurred in connection with making such payment.

15. CONDITION OF PROPERTY. Buyer accepts the property in its present condition and acknowledges that Seller, his agents and subagents have made no representation or warranty concerning the physical condition of the property or the uses to which it may be put other than as set forth herein. Buyer agrees to maintain the property in such condition as complies with all applicable laws.

16 RISK OF LOSS. Buyer shall bear the risk of loss for destruction or condemnation of the property. Any such loss shall not relieve Buyer from any of Buyer's obligations pursuant to this Contract.

17. WASTE. Buyer shall keep the property in good repair and shall not commit or suffer waste or willful damage to or destruction of the property. Buyer shall not remove commercial timber without the written consent of Seller.

18. AGRICULTURAL USE. If this property is to be used principally for agricultural purposes, Buyer agrees to conduct farm and livestock operations in accordance with good husbandry practices. In the event a forfeiture action is instituted, Buyer consents to Seller's entry on the premises to take any reasonable action to conserve soil, crops, trees and livestock.

19. CONDEMNATION. Seller and buyer may each appear as owners of an interest in the property in any action concerning condemnation of any part of the property. Buyer may within 30 days after condemnation and removal of improvements, negotiate a contract to substantially restore the premises to their condition before the removal. If the condemnation proceeds are sufficient to pay the contract price for restoration or if the Buyer deposits in escrow any deficiency with instructions to apply the funds on the restoration contract, the property shall be restored unless underlying encumbrances provide otherwise. Otherwise, proceeds of the award shall be applied in payment of the balance due on the purchase price, as Seller may direct.

20. DEFAULT. If the Buyer fails to observe or perform any term, covenant or condition of this Contract, Seller may:

(a) **Suit for Installments.** Sue for any delinquent periodic payment; or

(b) **Specific Performance.** Sue for specific performance of any of Buyer's obligations pursuant to this Contract; or

(c) **Forfeit Buyer's Interest.** Forfeit this Contract pursuant to Ch. 61.30, RCW, as it is presently enacted and may hereafter be amended. The effect of such forfeiture includes: (i) all right, title and interest in the property of the Buyer and all persons claiming through the Buyer shall be terminated; (ii) the Buyer's rights under the Contract shall be cancelled; (iii) all sums previously paid under the Contract shall belong to and be retained by the Seller or other person to whom paid and entitled thereto; (iv) all improvements made to and unharvested crops on the property shall belong to the Seller; and (v) Buyer shall be required to surrender possession of the property, improvements, and unharvested crops to the Seller 10 days after the forfeiture.

(d) **Acceleration of Balance Due.** Give Buyer written notice demanding payment of said delinquencies and payment of a late charge of 5% of the amount of such delinquent payments and payment of Seller's reasonable attorney's fees and costs incurred for services in preparing and sending such Notice and stating that if payment pursuant to said Notice is not received within thirty (30) days after the date said Notice is either deposited in the mail addressed to the Buyer or personally delivered to the Buyer, the entire balance owing, including interest, will become immediately due and payable. Seller may thereupon institute suit for payment of such balance, interest, late charge and reasonable attorneys' fees and costs.

21. RECEIVER. If Seller has instituted any proceedings specified in Paragraph 20 and Buyer is receiving rental or other income from the property, Buyer agrees that the appointment of a receiver for the property is necessary to protect Seller's interest.

8803110353

22. BUYER'S REMEDY FOR SELLER'S DEFAULT. If Seller fails to observe or perform any term, covenant or condition of this Contract, Buyer may, after 30 days' written notice to Seller, institute suit for damages or specific performance unless the breaches designated in said notice are cured.

23. NON-WAIVER. Failure of either party to insist upon strict performance of the other party's obligations hereunder shall not be construed as a waiver of strict performance thereafter of all of the other party's obligations hereunder and shall not prejudice any remedies as provided herein.

24. ATTORNEYS' FEES AND COSTS. In the event of any breach of this Contract, the party responsible for the breach agrees to pay reasonable attorneys' fees and costs, including costs of service of notices and title searches, incurred by the other party. The prevailing party in any suit instituted arising out of this Contract and in any forfeiture proceedings arising out of this Contract shall be entitled to receive reasonable attorneys' fees and costs incurred in such suit or proceedings.

25. NOTICES. Notices shall be either personally served or shall be sent certified mail, return receipt requested and by regular first class mail to Buyer at 7200 Pacific Highway E., Tacoma, Wa. 98424 _____, and to Seller at 763 Tule Lake Road, Tacoma, Wa. 98444 _____, or such other addresses as either party may specify in writing to the other party. Notices shall be deemed given when served or mailed. Notice to Seller shall also be sent to any institution receiving payments on the Contract.

26. TIME FOR PERFORMANCE. Time is of the essence in performance of any obligations pursuant to this Contract.

27. SUCCESSORS AND ASSIGNS. Subject to any restrictions against assignment, the provisions of this Contract shall be binding on the heirs, successors and assigns of the Seller and the Buyer.

28. OPTIONAL PROVISION - - SUBSTITUTION AND SECURITY ON PERSONAL PROPERTY. Buyer may substitute for any personal property specified in Paragraph 3 herein other personal property of like nature which Buyer owns free and clear of any encumbrances. Buyer hereby grants Seller a security interest in all personal property specified in Paragraph 3 and future substitutions for such property and agrees to execute a financing statement under the Uniform Commercial Code reflecting such security interest.

SELLER	INITIALS:	BUYER
N/A		N/A

29. OPTIONAL PROVISION - - ALTERATIONS. Buyer shall not make any substantial alteration to the improvements on the property without the prior written consent of Seller, which consent will not be unreasonably withheld.

SELLER	INITIALS:	BUYER
N/A		N/A

30. OPTIONAL PROVISION - - DUE ON SALE. If Buyer, without written consent of Seller, (a) conveys, (b) sells, (c) leases, (d) assigns, (e) contracts to convey, sell, lease or assign, (f) grants an option to buy the property, (g) permits a forfeiture or foreclosure or trustee or sheriff's sale of any of the Buyer's interest in the property or this Contract, Seller may at any time thereafter either raise the interest rate on the balance of the purchase price or declare the entire balance of the purchase price due and payable. If one or more of the entities comprising the Buyer is a corporation, any transfer or successive transfers in the nature of items (a) through (g) above of 49% or more of the outstanding capital stock shall enable Seller to take the above action. A lease of less than 3 years (including options for renewals), a transfer to a spouse or child of Buyer, a transfer incident to a marriage dissolution or condemnation, and a transfer by inheritance will not enable Seller to take any action pursuant to this Paragraph; provided the transferee other than a condemnor agrees in writing that the provisions of this paragraph apply to any subsequent transaction involving the property entered into by the transferee.

SELLER	INITIALS:	BUYER
N/A		N/A

31. OPTIONAL PROVISION - - PRE-PAYMENT PENALTIES ON PRIOR ENCUMBRANCES. If Buyer elects to make payments in excess of the minimum required payments on the purchase price herein, and Seller, because of such prepayments, incurs prepayment penalties on prior encumbrances, Buyer agrees to forthwith pay Seller the amount of such penalties in addition to payments on the purchase price.

SELLER	INITIALS:	BUYER
N/A		N/A

8803110353

32. OPTIONAL PROVISION -- PERIODIC PAYMENTS ON TAXES AND INSURANCE. In addition to the periodic payments on the purchase price, Buyer agrees to pay Seller such portion of the real estate taxes and assessments and fire insurance premium as will approximately total the amount due during the current year based on Seller's reasonable estimate.

The payments during the current year shall be $ _____ per _____. Such "reserve" payments from Buyer shall not accrue interest. Seller shall pay when due all real estate taxes and insurance premiums, if any, and debit the amounts so paid to the reserve account. Buyer and Seller shall adjust the reserve account in April of each year to reflect excess or deficit balances and changed costs. Buyer agrees to bring the reserve account balance to a minimum of $10 at the time of adjustment.

SELLER	INITIALS:	BUYER
N/A		N/A

33. ADDENDA. Any addenda attached hereto are a part of this Contract.

34. ENTIRE AGREEMENT. This Contract constitutes the entire agreement of the parties and supercedes all prior agreements and understandings, written or oral. This Contract may be amended only in writing executed by Seller and Buyer.

IN WITNESS WHEREOF the parties have signed and sealed this Contract the day and year first above written.

PURCHASER'S ASSIGNMENT OF CONTRACT AND DEED

The Grantors, H. A. Rendel and Anita Rendel, husband and wife, and Michael Rendel and Karen Rendel, husband and wife, to correct the contract, convey and quit claim to H. A. Rendel and Anita Rendel, husband and wife, and Michael Rendel and Karen Rendel, husband and wife, as joint tenants with right of survivorship, the Grantees, the following described real estate, situated in the County of Pierce, State of Washington, together with all after-acquired title of the Grantors therein:

SEE EXHIBIT A

and do hereby assign, transfer and set over to the Grantees that certain real estate contract dated March 9, 1988 between Charles E. Jackson and Kathe H. Jackson, husband and wife, as seller, and H. A. Rendel and Anita Rendel, husband and wife, and Michael Rendel and Karen Rendel, husband and wife, as purchaser, for the sale and purchase of the above-described real estate. The Grantees hereby assume and agree to fulfill the conditions of the real estate contract.

The parties hereto intend that the survivorship provisions of the joint tenancy shall apply to the married couples as a unit and that, upon the death of both husband and wife in either of the married couples, with the husband and wife in the other married couple surviving, the joint tenancy with right of survivorship shall cease, and the surviving married couple shall hold the property as community property and not as joint tenants with right of survivorship.

STATUTORY WARRANTY DEED

THE GRANTOR, KATHE H. JACKSON, whose spouse is CHARLES E. JACKSON, as her separate property,

for and in consideration of fulfillment of Real Estate Contract recorded March 11, 1988, under Pierce County Auditor's Fee No. 8803110353,

in hand paid, conveys and warrants to H. A. RENDEL and ANITA RENDEL, husband and wife; and MICHAEL RENDEL and KAREN RENDEL, husband and wife,

the following described real estate, situated in the County of Pierce, State of Washington:

See legal description attached hereto as Exhibit "A".

This deed is given in fulfillment of that certain real estate contract between the parties hereto, dated March 9, 1988, and conditioned for the conveyance of the above-described property, and the covenants of warranty herein contained shall not apply to any title, interest or encumbrance arising by, through or under the purchaser in said contract, and shall not apply to any taxes, assessments or other charges levied, assessed or becoming due subsequent to the date of said contract. (Charles E. Jackson's seller's interest in the above contract was assigned to Kathe H. Jackson October 8, 1991, Recording No. 9111040254.)

Real Estate Sales Tax was paid on this sale on March 11, 1988, Rec. No. ~~488931~~. 698686

Dated this 10 June 92 day of June, 1992.

EXHIBIT "A"

That portion of the following described property lying between Primary State Highway No. 1 (Interstate 5) and Pacific Highway South (Old Highway 99) in the Southwest quarter of Section 5, Township 20 North, Range 4 East of the Willamette Meridian, in Pierce County, Washington.

Beginning on the North line of the Southwest quarter of the Southwest quarter of said Section 5, at a point 761 feet West of the Northeast corner thereof; thence South parallel with the East line of said Southwest quarter of the Southwest quarter to the Northerly line of Puget Sound Electric Railway Co. right of way; thence Westerly along the Northerly line of said right of way to the East line of Ardena County Road, also known as Benson Road, said East line being 30 feet East of the West line of said Section 5; thence North on said East line of road to the South line of that certain property conveyed to Andrew J. Schilling et al, by deed recorded December 23, 1946 under Auditor's No. 1435837; thence East on the South line of said property 60 feet to the Southeast corner thereof; thence North 52°32'37" East a distance of 82.08 feet; thence North 29°58'27" East a distance of 134.21 feet; thence North 61°52'10" West a distance of 88.00 feet to the Southeasterly right of way line of Pacific Highway South (Old Highway 99); thence on said Southeasterly line Northeasterly to the North line of the Southwest quarter of the Southwest quarter of Section 5, Township 20 North, Range 4 East of the Willamette Meridian; thence East on said North line to the point of beginning.

EXCEPT all that portion conveyed to the State of Washington for Interstate Highway 5 by deed recorded November 14, 1959 under Auditor's No. 1872829.

ALSO EXCEPT those portions conveyed to the State of Washington for additional right of way for Pacific Highway South (Old Highway 99) by instrument recorded under Auditor's No. 957144.

Assessment:
U.L.I.D. No.: 82-1
Assessment No.: 0420055057
For: sanitary sewers

Waiver of all claims for damages to adjacent property by reason of the construction and establishment of Adrena County Road as granted by instrument recorded May 2, 1947 under Auditor's No. 1448266.

Right of way for drainage ditch over and across the herein described property, as disclosed by Pierce County Superior Court Case No. 83639.

Easement to construct a channel change over and across the herein described property, together with the right of ingress and egress over and across this and other lands as granted to the State of Washington by instrument recorded under Auditor's No. 1872830.

Permit to waste, place and deposit earth materials upon the channel of Hylebos Creek as it flows over and across the herein described property, together with the rights of ingress and egress over this and other lands as granted to the State of Washington by instrument recorded November 17, 1959 under Auditor's No. 1872831.

Relinquishment of access to State Highway No. 1 and of light, view and air by Deed to State of Washington
Recorded: November 17, 1959
Auditor's No.: 1872829

Easement, and the Terms & Conditions thereof:
Grantee: Pierce County
Recorded: March 9, 1984
Auditor's No.: 8403090222
Purpose: construction, improvement, maintenance and repair of a sanitary sewer pipeline, manholes, and other appurtenant sewer structures
Area affected: a portion of the herein described property

II. GENERAL TERMS

1. **AGREEMENT OF SALE.** The Seller agrees to sell and the Purchaser agrees to purchase all that certain Real Property and Personal Property (collectively the "Property") described in this contract, subject to the Title Exceptions listed in the Specific Terms hereof, to any of the Prior Encumbrances so listed which are not required to be discharged by the Seller prior to or at the time of the delivery of the Seller's deed to the Purchaser, and to any rights, titles, estates, leases, encumbrances and other interests suffered or created by the Purchaser, all for the considerations and subject to the terms, covenants and conditions herein contained.

2. **PURCHASE PRICE.** The Purchaser agrees to pay the Purchase Price to the order of the Seller in the manner set forth in the Specific Terms. The deferred portion of the Purchase Price which the Purchaser is to pay the Seller shall be paid in the Installment Amounts, commencing on the First Installment Date and continuing on the same day of each Installment Period thereafter until the Final Payment Date, at which time all outstanding principal, together with accrued and unpaid interest thereon, shall be due and payable. Each payment of the Installment Amounts shall be first applied against the costs, expenses and late charges for which the Purchaser is then liable hereunder, secondly against interest, and thirdly against the principal then due to the Seller. Interest shall continue to accrue until the Seller receives all of the principal, and any sums not paid within fifteen (15) days after their respective due dates shall bear the Late Charge set forth in the Specific Terms. At any time during the term of this contract, the Seller or the Purchaser shall have the right to require that all subsequent payments of Installment Amounts and sums for any tax or insurance reserve accounts be made through an escrow or collection account, the costs of which shall be borne by the requesting party unless otherwise agreed.

3. **PRIOR ENCUMBRANCES.** If this contract is being executed subject to any Prior Encumbrance, the Purchase Price is partially comprised of the principal due under the Prior Encumbrances as of the date hereof. The Seller hereby represents to the Purchaser that no Prior Encumbrance provides that it will become in default or accelerated or the interest rate thereon adjusted above the interest rate stated therefor in the Specific Terms hereof because of the execution, delivery and recordation of this contract. The Purchaser agrees with the Seller to comply with all of the terms of the Prior Encumbrances, including such obligations as may be in addition to those contained in or which may otherwise limit its rights under this contract, and the Purchaser hereby agrees to defend and indemnify the Seller from and against all losses, claims, demands and allegations arising as a result of the Purchaser's failure to comply with the Prior Encumbrances. In the event either of the parties hereto gives or receives a written notice to or from the holder of a Prior Encumbrance it will promplty transmit a copy of such notice to the other. The Specific Terms of this contract indicate the person responsible for tendering the amounts due to the holders of the Prior Encumbrances, and the two subparagraphs "(a)" and "(b)" immediately following this paragraph apply to said payments to be made by the Purchaser or the Seller, respectively.

(a) **Purchaser Pays Directly.** If it is indicated in the Specific Terms of this contract that the Purchaser is to pay any Prior Encumbrances directly to the holder thereof, the Purchaser hereby assumes and covenants and agrees with the Seller to make such payments on their respective due dates and any failure of the Purchaser to do so shall constitute a default under this contract. Said payments shall be in addition to the Installment Amounts. The Purchaser shall be solely responsible for paying any reserve amounts for taxes, insurance premiums or other purposes to which the holder of any Prior Encumbrance is entitled.

(b) **Seller Pays if Purchaser is Not In Default.** If it is indicated in the Specific Terms of this contract that the Seller is to continue to pay any Prior Encumbrances, the Installment Amounts include amounts to be used to make payments on said Prior Encumbrances (the "Wrapped Encumbrances"). The Purchaser, in addition to the installments of principal and interest hereinabove provided for, and to the extent required from time to time by the holders of the Wrapped Encumbrances, shall pay to the Seller with and in addition to each of the Installment Amounts hereunder an amount sufficient to satisfy all tax, insurance and other reserve deposits to which such holder is entitled and which are payable prior to the next due date of said installments. So long as the Purchaser is in no manner in default hereunder, the Seller shall make or cause to be made all of the payments of principal, interest and any reserve deposits required under the Wrapped Encumbrances as they become due and in accordance with their respective payment terms. The Purchaser shall not attempt to make any payment directly to the holder of any Wrapped Encumbrance or to in any way modify the terms thereof prior to the satisfaction of that portion of the indebtedness evidenced hereby which is to be retained by the Seller; provided, however, if the Seller fails to make any payment when due under any Wrapped Encumbrance the Purchaser may, upon first giving the Seller fifteen (15) days' written notice of its intent to do so and if such failure is not rectified within that period, pay the delinquent installment, and any penalties, late charges or additional interest due thereon and such other costs that are required by the holder of such Wrapped Encumbrance to cure such default, directly to the holder of the Wrapped Encumbrance in default and deduct from the Installment Amounts next due under this contract the amounts so expended, together with interest thereon at the Default Rate from the date of such payment to the date the Purchaser is reimbursed or the due date of the sum against which such offset is taken. Said notice period may be reduced if necessary to avoid the exercise of any remedy by the holder of such Wrapped Encumbrance. In the event the Seller fails to make such payments on three or more occasions, the Purchaser shall have the right to make all ensuing payments due under any of the Wrapped Encumbrances directly to the holder thereof and to deduct the same from the next Installment Amounts due under this contract by the amounts so paid. The Seller agrees to indemnify the Purchaser from and against all costs and expenses, including attorneys' fees, which are reasonably incurred by the Purchaser as a result of any failure of the Seller to perform its obligations under this subparagraph. The Seller shall promptly reimburse the Purchaser for any credit or reimbursement which the Seller receives from the holder of any Wrapped Encumbrance which results from any excess payment by the Purchaser into a tax, insurance or other reserve account.

After the Purchaser has paid the Seller all amounts due under this contract, excepting only the nondelinquent principal balances due under the Prior Encumbrances to be paid directly by the Purchaser, the Purchaser shall make all remaining payments due under said Prior Encumbrances to the holders thereof and shall indemnify and hold the Seller harmless from any failure or alleged failure on the part of the Purchaser to comply with any of the terms, covenants or conditions thereof, and the Seller shall be subrogated to the rights of the holders of said Prior Encumbrances to the extent the Seller makes any further payments thereon as a result of the Purchaser's default. The covenants in this paragraph shall survive the delivery of the Seller's deed and bill of sale to the Purchaser.

9003190281

4. **PREPAYMENTS.** If prepayment is permitted by all Prior Encumbrances, or if the holders of all of the Prior Encumbrances consent thereto, the Purchaser may prepay the entire amount remaining due hereunder when that portion of the prepayment which is due to the Seller is accompanied by all interest then due to the Seller and any Purchase Price Prepayment Premium. If any prepayment to the holder of any Prior Encumbrance also requires a prepayment premium, the Purchaser shall pay the same if it is imposed as a result of the Purchaser's prepayment or default. If any Prior Encumbrance does not permit prepayment and the holder thereof does not consent thereto, and if the Purchaser desires to prepay that portion of the Purchase Price which is not encompassed by the principal balance then due under said Prior Encumbrance, the Purchaser may prepay to the Seller the balance of that portion of the Purchase Price which is not then due to the holder of said Prior Encumbrance; provided, however, said partial prepayment need not be accepted by the Seller unless the Purchaser expressly assumes and agrees in writing to pay and perform the then remaining obligations secured by said Prior Encumbrance. If this contract is so partially prepaid, the Purchase Price Prepayment Premium, if otherwise calculated on the entire purchase price, shall be reduced to correspond to the ratio of the amount being prepaid to the Seller to the total amount of the then outstanding principal balance of the Purchase Price. The Seller shall not be required to accept any prepayments which do not conform to the requirements of this paragraph unless and to the extent prepayment is otherwise provided for in the Specific Terms of this contract. Except when otherwise stated herein, any Prepayment Premium provided for in this contract shall apply to any sums received by the Seller in advance of their original due date, whether voluntarily made by the Purchaser or as a result of the exercise of any remedy by the Seller; provided, however, the Prepayment Premium shall not be required for any voluntary prepayment made within thirty (30) days of the Final Payment Date if preceded by not less than ten (10) days written notice.

5. **RETENTION OF TITLE AND SECURITY.** Except as otherwise provided herein, the Seller's title to the Property and any substitutions thereof shall remain in the Seller until the Purchaser receives delivery of the Seller's deed. In addition thereto, the Purchaser hereby grants to the Seller a security interest in all condemnation awards and insurance proceeds relating to the Property and all of the rights, titles and interests in the Personal Property conveyed by this contract and subsequently acquired by Purchaser in substitution thereof as security for the performance of the Purchaser's obligations herein, and the Purchaser hereby assigns to the Seller all rents and security deposits derived from or relating to the Property and, except for the initial partial month's and last month's rent, covenants not to collect any rents which are attributable to more than one month of the unexpired lease term. The Purchaser agrees to deliver to the Seller such further assurances and UCC financing statements and statements of continuation which the Seller requests to further evidence, perfect or confirm its rights under this contract. The Purchaser agrees with the Seller that it shall comply with the terms of all leases of the Property, and shall, upon written request, promptly notify the Seller of any alleged defaults therein by the Purchaser or any tenant. After all sums evidenced by this contract due to the Seller have been paid, the Seller shall deliver its fulfillment deed and bill of sale to the Purchaser in the form and subject to the exceptions herein agreed to. In the event any escrow account is established for this contract, said deed and bill of sale shall be executed and placed with the escrow agent promptly following the opening of said account with instructions to deliver them to the Purchaser when entitled thereto.

6. **POSSESSION.** From and after the date of this contract, and subject to the rights of tenants under the leases identified as Title Exceptions, the Purchaser may enter upon and take possession of the Property and, irrespective of the assignments and security interests granted in this contract, enjoy the use, rents (to the extent permitted to be collected herein), issues and profits thereof so long as such rights have not been affected by the exercise of any remedy of the Seller.

7. **TAXES AND ASSESSMENTS.** In addition to the payments hereinabove provided for, and except as otherwise discharged through any reserve account, the Purchaser shall pay before delinquency all real and personal property taxes, all general and special assessments and all other charges of whatsoever kind or nature levied or assessed by any lawful authority upon or against the Property or the use thereof to the extent the same or any installments thereof are attributable to the period following the date of this contract. The prorated portion of said taxes, assessments and charges which are attributable to any period prior to the date of this contract, excluding taxes for such period assessed because of the reclassification of the use of the Property by the Purchaser or any successor of the Purchaser, shall be paid before delinquency by the Seller. Said periods shall be determined by reference to the year in which the taxes, assessments and charges are required to be paid. If the Purchaser fails to so pay real property taxes or assessments and such failure is not rectified within fifteen (15) days following Seller's written demand to do so, and if such failure occurs two (2) or more times during the term of this contract, the Seller may, for the remaining term of this contract, require the Purchaser to deposit with each Installment Amount an amount reasonably estimated by the Seller to be necessary to discharge the real property taxes and assessments next due, said estimates to be adjusted by the Seller to reflect the actual amount of such liabilities each time the Real Property is reassessed and a copy of such reassessment is given to the Seller. The amounts so paid which have not been applied against such liabilitites shall be returned to the Purchaser with the delivery of the Seller's deed to the Purchaser. The Seller shall not be liable for interest on said deposits. If not retained in an escrow or collection account said funds shall be maintained by the Seller in a segregated account and expended for no other purpose, with interest earned thereon, if any, being added to the sums so held; provided, however, this account may be commingled with any insurance reserve account under this contract. The provisions of this paragraph to the contrary notwithstanding, either party shall have the right to contest in good faith any tax or assessment which may have been or is hereafter levied against the Property or any portion thereof so long as no portion of the Property is threatened with any tax forfeiture or sale as the result of such contest. So long as such contest is pursued in good faith, the nonpayment of the amounts in dispute shall not constitute a default under this contract or afford the Seller the right to require tax reserve payments.

8. **INDEMNIFICATION AND INSURANCE.** The Purchaser shall and hereby covenants and agrees to indemnify and hold the Seller harmless for any losses, damages, costs, claims and liabilities, including attorneys' fees, caused by any negligent, reckless or intentional act of or negligent or reckless failure to act by the Purchaser or any of its agents, servants, employees, independent contractors, invitees or licensees on, about or with respect to the Property, and for any breach of this contract by the Purchaser or any of such persons, and this covenant of indemnification shall survive the delivery of the Seller's deed to the Purchaser.

9003190281

The Purchaser shall, at its own cost and expense, keep the improvements on the Property insured against loss or damage by fire, windstorm, and all other casualties covered by "all risk" endorsements available in the State of Washington and with such additional coverages or endorsements as the Seller may reasonably require from time to time. Said insurance shall be in an amount not less than the greater of (a) the amount of coverage necessary to avoid the insured being treated as a co-insurer, or (b) one hundred twenty percent(120%) of the then unpaid principal balance of the Purchase Price for the Property, or (c) such higher amount as may be required by the terms of any Prior Encumbrance, and shall be placed with an insurance company authorized to do business in the State of Washington. All insurance policies shall expressly include the Seller as a named insured, shall contain a waiver of subrogation clause (to the extent reasonably obtainable), and shall include provisions to the effect that they cannot be materially modified or cancelled prior to Seller receiving not less than twenty (20) days' advance written notice, and accurate and complete copies thereof shall be deposited with the Seller upon written request.

In the event of loss or damage to the Property which is required to be insured hereunder, and except as otherwise required by any Prior Encumbrance and the then holder thereof, the insurance proceeds shall, at the option of the Purchaser, be used to repair, rebuild, or replace all improvements and personal property which may have been destroyed or damaged to the extent necessary to restore and replace them to substantially the same condition which existed immediately prior to the casualty, subject to such modifications as may then be required by law or to which the Seller agrees in writing. Immedialtely upon receipt, all insurance proceeds, together with any other sums required to complete the repairs and restorations, shall be placed in a construction disbursement account with an escrow agent or other person jointly designated by the Seller and the Purchaser and shall be disbursed periodically in amounts corresponding to the percentage of completion of repairs; provided, however, in the event this contract is forfeited, any portion of such proceeds remaining after the payment of properly incurred repair and replacement costs due as of the date of such forfeiture shall be immediately paid to the Seller. No construction may be commenced until all sums required to pay the cost thereof have been deposited in the disbursement account. The expenses of said disbursement account and in obtaining percentage completion certificates shall be paid by the Purchaser, and the Purchaser shall be responsible for depositing in the disbursement account the amounts necessary to pay all costs of repairs, reconstruction and replacements which are not covered by the insurance proceeds. In the event the Purchaser desires to construct improvements which are materially different from those so damaged or destroyed, it shall first obtain the Seller's written consent. All repairs and replacements shall be commenced within sixty (60) days following the date the Purchaser elects to reconstruct and shall be continuously pursued with due diligence. Subject to the terms of any Prior Encumbrances, any casualty insurance proceeds which are not used to pay for repairs or replacements permitted by the terms of this paragraph shall be paid to the Seller and applied against the principal balance last due hereunder, and the Seller shall accept the same notwithstanding any prepayment restriction in this contract. The Prepayment Premium shall not be added to any payments required by this paragraph.

If (i) a Prior Encumbrance and the then holder thereof does not permit the use of casualty insurance proceeds for repairs, or (ii) the Purchaser does not elect to repair the damage, or (iii) the Seller's consent to materially different improvements is not waived or given, or (iv) the Purchaser does not deposit into the disbursement account all sums in excess of available insurance proceeds required for reconstruction by the date construction is required to commence, or (v) construction is not commenced when required or not continuously pursued (subject to delays beyond the reasonable control of the Purchaser), the Seller may require that all casualty insurance proceeds be immediately paid to the Seller (without addition of the Prepayment Premium) or to the holder of a Prior Encumbrance having a valid claim thereto which is prior to the Seller's. The Purchaser shall make the elections provided for in this paragraph within sixty (60) days following the date of casualty, and the Seller shall respond in writing to a written request to construct materially different improvements within twenty (20) days after said request. Any failure of the Purchaser to timely make any such election shall enable the Seller to apply the insurance proceeds against the principal last due under this contract, and any failure of the Seller to timely respond to any such request shall be deemed an approval thereof.

Damage to or destruction of the Property or any portion thereof shall not constitute a failure of consideration or provide a basis for the rescission of this contract, nor shall such circumstances relieve the Purchaser of its obligation to pay the remaining Installment Amounts when due. In the event of any failure of the Purchaser to obtain or timely pay any premiums for any insurance required by this paragraph, and if such failure is not rectified within any required notice period for remedial advances under this contract, the Seller may require the Purchaser to deposit with each Installment Amount an amount reasonably estimated by the Seller to be necessary to discharge the next ensuing premiums for said policies, said estimates to be adjusted by the Seller upon receipt of the premium invoices to reflect the actual amount of such liabilities. The payments so made which have not been applied against such liabilities shall be returned to the Purchaser with the delivery of the Seller's deed to the Purchaser. The Seller shall not be liable for interest on said deposits. If not retained in an escrow or collection account, said funds shall be maintained by the Seller in a segregated account and expended for no other purpose, with interest thereon, if any, being added to the sums so held; provided, however, this account may be commingled with any tax reserve account under this contract.

9. **UTILITIES.** The Purchaser shall pay for the cost of all electric, power, gas, sewer, water, telephone, cable television, refuse disposal service, and any and all other utilities furnished to or used or consumed in, on, or about the Property by the Purchaser or by any person following the date of this contract, and Purchaser shall contract for the same solely in its own name. Any such services used prior to the date hereof by any person other than the Purchaser shall be the responsibility of the Seller.

10. **CONDITION OF PROPERTY.** Except as may be otherwise provided in any written agreement between the parties hereto which is intended to survive the execution of this contract, the Purchaser hereby accepts the Property in the condition existing on the date of this contract and confirms that neither the Seller nor any agent or representative of the Seller has given or made any warranty or representation whatsoever concerning the physical condition thereof or the uses or purposes to which the same may now or hereafter be placed.

9003190281

11. **RISK OF LOSS.** The Purchaser shall bear the risk of loss for the complete or partial destruction or condemnation of the Property after the date of this contract. No loss, damage or destruction of all or part of the Property shall constitute a failure of consideration or a basis for the rescission of this contract or relieve the Purchaser from its obligation to observe and perform all of the terms, covenants and conditions hereof. Each of the parties hereto releases the other from all liability for damage caused by any act or neglect of the other party, its agents, servants and employees, to any property which is the result of fire or other casualty covered by insurance carried at the time of such casualty; provided, however, the releases herein contained shall not apply to loss or damage resulting from the willful or premeditated acts of either of the parties hereto, their agents, servants or employees; and provided further, nothing in this paragraph shall be interpreted or have the effect of relieving or modifying any obligation of any insurance company, and to the extent any such obligation is so relieved or impaired this provision shall be ineffective.

12. **MAINTENANCE AND INSPECTION.** The Purchaser shall keep and maintain the Property in good repair, and shall not commit or suffer to be committed any waste or other willful damage to or destruction of the Property or any portion thereof. No logging or commercial timber removal may be undertaken by the Purchaser without the Seller's prior written consent. The Purchaser shall not, without the prior written consent of the Seller, remove any Personal Property from the Real Property, and will keep and maintain the same in good order, repair and condition; provided, however, the Purchaser shall have the right to promptly replace Personal Property with items of comparable worth and utility. The Purchaser shall replace any item of Personal Property or any substitutions thereof which may become lost, broken or beyond repair, and such after-acquired item shall be subject to all of the provisions hereof. No replacements or substitutions permitted or required in this paragraph may be subject to a security interest or conditional sales contract which would have priority over the Seller's security interest. The Seller shall have the right, at all reasonable times and hours, to inspect the Property to ascertain whether the Purchaser is complying with all of the terms, covenants and conditions of this contract.

13. **ALTERATIONS AND LIENS.** Except as otherwise permitted in this contract for construction following an insured casualty or condemnation, or except for any maintenance or repairs required by this contract, the Purchaser shall not, without the prior written consent of the Seller, make or permit any alterations, additions, or improvements to or of the Property or to any portion thereof nor permit any demolition or removal of any such improvements. The Seller may not unreasonably withhold its consent if the action proposed will not materially affect the value of the Property or violate any applicable laws or ordinances or the terms of this contract or of any Prior Encumbrances. The Purchaser shall not cause, authorize or permit any mechanics' or materialmen's liens to be placed upon the Property. The Purchaser shall indemnify and defend the Seller against all liens levied against the Property or any part thereof caused by or through the Purchaser. The Purchaser shall have the right to contest said liens so long as a foreclosure thereof is prevented, and if such contest is pursued in good faith the filing of the lien and withholding payment of the lien amount so disputed shall not constitute a default under this contract. No lien of any agent, contractor, subcontractor, or independent contractor of the Purchaser shall encumber any interest of the Seller in the Property. In the event the Purchaser shall alter, repair or improve the Real Property or erect or construct any new or additional buildings or improvements on the Real Property or any part thereof (whether acting with or without Seller's consent), all such alterations, repairs, improvements, replacements and additions, including any new buildings and improvements, shall immediately be and become the property of the Seller and subject to all of the terms, covenants and conditions of this contract.

14. **COMPLIANCE WITH LAWS AND RESTRICTIONS.** The Purchaser shall faithfully observe, perform and comply with all laws, ordinances rules and regulations of every governmental authority affecting the Property; all easements, reservations, restrictions, covenants and conditions of record affecting or pertaining to the Property; and any condominium, planned unit development, or cooperative declarations, articles, bylaws, rules, regulations and other documents which have been or are hereafter adopted with respect to the Property. The Purchaser shall not use or permit any person to use the Property for or in connection with any unlawful purpose or in any manner which causes a nuisance.

15. **AGRICULTURAL PROVISIONS.** If, in the Specific Terms of this contract, the parties have indicated that the Property is to be used principally for agricultural or farming purposes, the Purchaser shall continuously pursue good and prudent farming operations upon the Property in accordance with the practices of good husbandry, soil conservation, tree and plant pruning, harvesting, and the customary manner in which agricultural property is properly and productively farmed and managed in the county in which the Property is situated. The Purchaser will take such precautions as are necessary to prevent undue depletion of the soil from erosion by wind or water and shall use reasonable efforts to keep the Property free from plants, insects and animals which may have a deleterious effect upon the Property, crops, or livestock. The Purchaser will keep the Property properly irrigated and properly employ such herbicides, pesticides and fertilizers as may be reasonably necessary to comply with the provision of this paragraph and all applicable legal requirements. The Purchaser shall not remove or destroy any existing fruit trees or plants, improvements, irrigation fixtures or equipment, fences, storage houses or sheds, barns, silos, or, except as otherwise permitted in this contract for Personal Property, any tools, equipment or machinery which may be employed in connection with the agricultural use of the Property, without the prior written consent of the Seller, and the Purchaser shall make such improvements to the Property as are reasonably necessary to properly irrigate, drain and farm the Property in accordance with the provisions hereof.

16. **CONDEMNATION.** If the Property or any part thereof is condemned or taken by power of eminent domain by any public or quasi-public authority, the Seller or the Purchaser or both may appear and defend or prosecute in any such proceeding. All compensation or awards received from the condemning authority by either the Seller or the Purchaser shall, subject to the requirements of any Prior Encumbrances, be applied first to the payment of the expenses of litigation, next to the acquisition and installation costs of any replacements or restorations of condemned property requested by the Purchaser in writing not later than fifteen (15) days following the date possession is required to be surrendered by the condemning authority, next to the reduction of the unpaid balance of this contract in the inverse order of its maturity, next to any other sums then due to the Seller (including accrued and unpaid interest and reimbursable advances and expenses), and the surplus, if any, shall be paid to the Purchaser. The Prepayment Premium shall not be added to any payments required by this paragraph. All of the replacements and restorations shall have the same purpose and function as the condemned property, and, except as otherwise consented to by the Seller in writing and except to the extent necessitated by the condemnation or then applicable law, none of the replacements or restorations may be materially different from the condemned property. Any condemnation awards

used to restore or replace any of the Property shall be deposited in a disbursement account and disbursed in the manner specified herein for insurance proceeds following an insured casualty. No total or partial taking of the Property by condemnation shall constitute a failure of consideration or provide a basis for the rescission of this contract.

17. **TRANSFER OF PURCHASER'S INTEREST.** If the Purchaser's title to the Property or any portion thereof is conveyed to any person, the Seller may, at its option: (a) following any required notice, declare the entire remaining balance of the Purchase Price and all accrued and unpaid interest thereon immediately due and payble, or (b) adjust the interest rate on this contract, effective as of the date of the transfer. The Seller may elect one of the said options by written notice to the Purchaser within fifteen (15) days after being advised in writing of the sale and the transferee, and if such election is not made within that period the above rights for the transaction so described shall be deemed waived. If the Seller elects to adjust the interest rate, and subject to any restrictions and prepayment requirements contained in any Prior Encumbrance, the entire outstanding balance of this contract may be prepaid at the closing of such conveyance with the Prepayment Premium. For the purposes of this contract, a "conveyance" of the "Purchaser's title" shall include a transfer by real estate contract, vendee's assignment, deed, forfeiture, foreclosure, sheriff's sale, trustee's sale, deed in lieu of any such involuntary sale, lease with purchase option or for a term in excess of three (3) years (including extension options), and, if the Purchaser is a corporation or partnership, a voluntary or involuntary transfer or series of transfers of any shares or partnership interests which results in a change of fifty percent (50%) or more of the voting control of such entity (from the composition thereof as of the date of this contract). A "conveyance" of the "Purchaser's title" shall not include (i) a lease or other transfer of possession of the Property for three (3) years or less without options to purchase the Property or any interest therein; (ii) a transfer to the Purchaser's spouse or children; (iii) a transfer by devise, descent, or operation of law resulting from the death of any person comprising the Purchaser; (iv) a transfer into an inter vivos trust in which the Purchaser is and remains a beneficiary and which does not relate to a transfer of rights of occupancy in the Property; or (v) a transfer resulting from a decree of dissolution of marriage, legal separation agreement, or property settlement agreement in which a spouse of any person comprising the Purchaser retains or acquires the Property. No transfer of the Property or any portion thereof shall release the transferring person from liability on this contract unless such release is expressly acknowledged by the Seller in writing.

18. **PURCHASER'S DEFAULT.** The Purchaser shall be in default under this contract if it (a) fails to observe or perform any term, covenant or condition herein set forth or those of any Prior Encumbrances, or (b) fails or neglects to make any payment of principal or interest or any other amount required to be discharged by the Purchaser precisely when obligated to do so, or (c) becomes or is declared insolvent or makes an assignment for the benefit of creditors, or files any debtor's petition or any petition is filed against it under any bankruptcy, wage earner's, reorganization or similar act, or (d) permits the Property or any part thereof or its interest therein to be attached or in any manner restrained or impounded by process of any court, or (e) abandons the Property for more than thirty (30) consecutive days (unless the Property is otherwise occupied), or (f) conveys the Property or a portion thereof without any prior written consent required herein of the Seller.

19. **SELLER'S REMEDIES.** In the event the Purchaser defaults under this contract the Seller may, at its election, take the following courses of action:

(a) **Suit for Delinquencies.** The Seller may institute suit for any Installment Amounts or other sums due and payble under this contract as of the date of the judgment and any sums which have been advanced by Seller as of said date pursuant to the provisions of this contract, together with interest on all of said amounts at the Default Rate from the date each such amount was advanced or due, as the case may be, to and including the date of collection;

(b) **Acceleration.** Upon giving the Purchaser not less than fifteen (15) days' written notice of its intent to do so (within which time any monetary default may be cured without regard to the acceleration), and if the default is in the nature of a failure to timely pay any principal, interest, insurance premium, tax, or other sum of money required to be paid herein or any failure to obtain any consent of the Seller herein required for a conveyance of the Purchaser's title to the Property, or if the Purchaser commits waste on the Property, the Seller may declare the entire unpaid balance of the Purchase Price and all interest then due thereon and the Prepayment Premium to be immediately due and payble and institute suit to collect such amounts, together with any sums advanced by the Seller pursuant to the provisions of this contract, and together with interest on all of said sums at the Default Rate from the due date or date of each such advance to and including the date of collection;

(c) **Forfeiture and Repossession.** The Seller may cancel and render void all rights, titles and interests of the Purchaser and its successors in this contract and in the Property (including all of Purchaser's then existing rights, interests and estates therein and timber, crops and improvements thereon) by giving a Notice of Intent to Forfeit pursuant to RCW 61.30.040-070, and said cancellation and forfeiture shall become effective if the default therein specified has not been fully cured within ninety (90) days thereafter and the Seller records a Declaration of Forfeiture pursuant to RCW 61.30.040-070. Upon the forfeiture of this contract the Seller may retain all payments made hereunder by the Purchaser and may take possession of the Property ten (10) days following the date this contract is forfeited and summarily eject the Purchaser and any person or persons having possession of the Property by, through or under the Purchaser who were properly given the Notice of Intent to Forfeit and the Declaration of Forfeiture. If the Purchaser or any person or persons claiming by, through or under the Purchaser who were properly given the Notice of Intent to Forfeit and the Declaration of Forfeiture remain in possession of the Property more than ten (10) days after such forfeiture, the Purchaser, or such person or persons, shall be deemed tenants at will of the Seller and the Seller shall be entitled to institute an action for summary possession of the Property, and may recover from the Purchaser or such person or persons in any such proceedings the fair rental value of the Property for the use thereof from and after the date of forfeiture, plus costs, including the Seller's reasonable attorneys' fees;

(d) **Specific Performance.** The Seller may institute suit to specifically enforce any of the Purchaser's covenants hereunder, and the same may include redress by mandatory or prohibitive injunction;

9003190281

(e) **Entry Upon Agricultural Property.** In the event the parties hereto have indicated in the Specific Terms of this contract that the Property is to be used principally for agricultural or farming purposes, the Seller shall have the right, following three (3) days' prior written notice to the Purchaser, to enter upon the Real Property from time to time to perform any one or more of the functions required of but not performed by the Purchaser in the agricultural provisions of this contract and to tend and care for any livestock and harvest, transport, store and sell any of the crops which may be grown on the Property in such manner as the Seller shall elect, and for the purposes of this paragraph, the Purchaser grants to the Seller a security interest in all of its seeds and crops, and the products and proceeds thereof, which may now or at any time hereafter be located upon or in the Property or be harvested therefrom. The exercise of this right shall not affect the liabilities of the Purchaser; provided, however, should the Seller receive any sums as a result of its actions hereunder it shall apply the same to discharge the costs and expenses, including attorneys' fees, reasonably incurred in taking said action, together with interest thereon at the Default Rate from the date of expenditure to and including the date said proceeds are received, and the balance of such proceeds shall be applied against the Purchase Price principal last due and owing hereunder, including any Prepayment Premium applicable thereto. In the absence of receiving any such proceeds, or if and to the extent the same are insufficient to reimburse the Seller for such amounts and interest, the Purchaser shall reimburse the Seller for such amounts and interest on demand, with said interest being calculated to and including the date of payment;

(f) **Remedies under the Uniform Commercial Code.** The Seller shall have and the Purchaser hereby grants to the Seller all of the rights and remedies contained in the Uniform Commercial Code in effect in the State of Washington as of the date of the Purchaser's default and to the extent such remedies may be applicable to the type of collateral affected thereby;

(g) **Receivership.** The parties hereto recognize and agree that in the event of default by the Purchaser in making any payments or in the performance of any of the other terms and conditions of this contract, the period of time involved in repossessing the Property, forfeiting this contract, or in obtaining possession of the Property by judicial process could cause irreparable damage to the Seller and to the Property or the possible acceleration of the debts secured by the Prior Encumbrances. Therefore, the Purchaser hereby expressly agrees that in the event of any default under this contract which is not cured the Seller shall have the right to apply to the Superior Court of the county in which the Real Property is situated for the appointment of a receiver under Chapter 7.60 of the Revised Code of Washington (or any chapter supplemental thereto) to take charge of and maintain control of, manage, farm, or operate the Property, to evict tenants therefrom who are not then in compliance with their leases, to lease any portion or all of the Property in the name of the Purchaser on such terms as the receiver may deem advisable, to make such alterations, repairs and improvements to the Property as the receiver may deem advisable, and to receive all rents and income therefrom and issue receipts therefor, and out of the amounts that are so received to pay all of the debts and obligations for which the Purchaser is liable hereunder prior to or during the period of the receivership, including, without limitation, payments on or for this contract, Prior Encumbrances, taxes, assessments, insurance premiums, utility bills and cost of operating, maintaining, repairing and managing the Property. Any sums received by the receiver in excess of said amounts shall be retained by the receiver to discharge all remaining liabilities of the Purchaser under this contract until the entirety of such obligations have been satisfied, at which point any remaining excess shall be paid to the Purchaser without interest; and

(h) **Property Rental.** If this contract is forfeited as herein provided, or in any other manner permitted by law, or by mutual agreement of the Purchaser and the Seller, and the Purchaser shall thereafter remain in possession of the Property beyond any period otherwise permitted by law, the Purchaser agrees that it will occupy the Property as a tenant at will, and the Purchaser shall be obligated to pay, and hereby promises to pay, during the period of such tenancy at will, a fair market rental in the amount then agreed to by the parties or, in the absence of such agreement or until such agreement is reached, an amount equal to two (2) times the Installment Amounts as and when provided for in the Specific Terms hereof, and the Seller shall have, in addition to all other remedies for the collection of rentals and the recovery of possession that are available to landlords under the laws of the State of Washington, the right to institute and maintain an action for summary possession of the Property as provided by law.

20. **PURCHASER'S REMEDIES.** In the event the Seller defaults under this contract and such default continues for fifteen (15) days after the Purchaser gives the Seller written notice specifying the nature thereof and the acts required to cure the same, the Purchaser shall have the right to specifically enforce this contract, institute suit for its damages caused by such default or pursue any other remedy which may be available to the Purchaser at law or in equity.

21. **REMEDIAL ADVANCES.** If either party to this contract shall fail to timely pay and discharge any payments or sums for which it has agreed to be responsible herein and said failure constitutes a default under this contract, or shall by any other act or neglect violate the terms and any conditions of this contract or of any Prior Encumbrance, the other party hereto may pay, effect or discharge such sums as are necessary to cure such default upon giving the party required to make such payments not less than fifteen (15) days' prior written notice (except in any instance in which the Purchaser fails to obtain or maintain any insurance required herein or when immediate payment is required to avoid immediate hazards to persons or property or any foreclosure of or a similar action against or affecting any portion of the Property, in which cases such notice may be given concurrently with or immediately following such payment). The party making such payment may recover from the defaulting party, upon demand, or through offsetting the same against existing or future debts, the full cost and expense of so doing, including its reasonable attorney's fees and together with interest on said expenditures and fees at the Default Rate from the date of expenditure to and including the date of collection or the due date of any sum against which such offset is effected.

9003190281

22. **CUMULATIVE REMEDIES; WAIVERS.** The remedies stated herein are cumulative and not mutually exclusive and the Seller or the Purchaser may pursue any other or further remedies to enforce their respective rights under this contract; provided, however, except as provided in this contract with respect to the Purchaser's transfer of the Property, the Seller shall not have the right to accelerate the remaining balance of the Purchase Price in the event the Seller elects to forfeit the Purchaser's interest in the Property and such forfeiture is being enforced or is completed. In any action or proceeding to recover any sum or to enforce any remedy provided for herein, no defense of adequacy of security or that resort must first be taken against any particular security or any other person shall be asserted, and the Purchaser hereby expressly waives any legal or equitable rights that the Purchaser may have with respect to marshaling of assets. The Seller shall not be required to tender its deed or bill of sale as a condition precedent to the enforcement of any remedy hereunder. In the event any check is tendered which is not honored upon first presentation because of any stop payment directive or insufficient funds, the payee's rights shall be reinstated as if such check had not been delivered. No waiver of any rights of either party under this contract shall be effective unless specifically evidenced in a written agreement executed by the waiving party. Any forbearance, including, without limitation, a party's acceptance of any payment after the due date or any extension thereof, shall not be considered a waiver of such party's right to pursue any remedy hereunder for any other existing or subsequent defaults of the same or a different nature or for breach of any other term, covenant or condition hereof.

23. **COSTS AND ATTORNEYS' FEES.** If either party shall be in default under this contract, the nondefaulting party shall have the right, at the defaulting party's expense, to retain an attorney or collection agency to make any demand, enforce any remedy, or otherwise protect or enforce its rights under this contract. The defaulting party hereby promises to pay all costs and expenses so incurred by the nondefaulting party, including without limitation, arbitration and court costs, collection agency charges, notice expenses, title search expenses, and reasonable attorneys' fees (with or without arbitration or litigation), and the failure of the defaulting party to promptly pay the same shall in itself constitute a further and additional default. In the event either party hereto institutes any action (including arbitration) to enforce the provisions of this contract, the prevailing party in such action shall be entitled to reimbursement by the losing party for its court costs and reasonable attorneys' fees, including such costs and fees that are incurred on appeal. All reimbursements required by this paragraph shall be due and payable on demand, may be offset against any sum owed to the party so liable in order of maturity and shall bear interest at the Default Rate from the date of demand to and including the date of collection or the due date of any sum against which the same is offset.

24. **NOTICES.** Subject to the requirements of any applicable statute, any notices required or permitted by law or under this contract shall be in writing and shall be personally delivered or sent by first class certified or registered mail, return receipt requested, with postage prepaid, to the parties' addresses set forth in the Specific Terms of this contract. Either party may change such address for notice and, if payments are not made to an escrow or collection account, the Seller may change the address for payments, by designating the same to the other party hereto in the manner hereinabove set forth and by causing a copy of such change to be properly recorded. All notices which are so addressed and paid for shall be deemed effective when personally delivered or, if mailed, on the date of the deposit thereof in the U.S. mail and irrespective of actual receipt of such notice by the addressee.

25. **TIME OF PERFORMANCE.** Time is specifically declared to be of the essence of this contract and of all acts required to be done and performed by the parties hereto, including, but not limited to, the proper tender of each of the sums required by the terms hereof to be paid.

26. **PARAGRAPH HEADINGS.** The boldface word or words appearing at the commencement of paragraphs and subparagraphs of this contract are included only as a guide to the contents thereof and are not to be considered as controlling, enlarging or restricting the language or meaning of those paragraphs or subparagraphs.

27. **GENDER AND NUMBER.** The use of any gender or neutral term shall include all genders, and the use of any number shall be construed as singular or plural, as the case may require. The terms "Purchaser" and "Seller" refer to either the singular or the plural, as the case may be.

28. **DEFINITIONS.** As used herein the term "Property" means all of the estate, right, title and interest currently held and hereafter acquired by the Seller in and to the Real Property and Personal Property described herein and the rights, easements, privileges and appurtenances thereunto belonging or appertaining or held and enjoyed therewith, together with all timber and crops thereon and any repairs, improvements, replacements and additions thereto whether made, erected or constructed by the Seller or the Purchaser prior to or subsequent to the date hereof. All capitalized terms in this contract shall have the meanings ascribed herein or set forth opposite the same in the Specific Terms of this contract. References to the Seller's deed or fulfillment deed herein shall include assignments of a vendee's interest under a prior real estate contract; provided, however, any form of conveyance shall contain the warranties to which the Purchaser is entitled under this contract or other agreement with the Seller.

29. **INVALIDITY.** In the event any portion of this contract should be held to be invalid by any court of competent jurisdiction, Such holding shall not affect the remaining provisions hereof unless the court's ruling includes a determination that the principal purpose and intent of this contract are thereby defeated. The intention of the Seller is to charge the Purchaser a lawful rate of interest, and in the event it is determined by any court of competent jurisdiction that any rate herein provided for exceeds the maximum permitted by law for a transaction of the character evidenced by these presents, the amounts so determined to be above the legal rate shall be applied against the last installments of principal due hereunder or, if such principal has been paid, or otherwise at the discretion of the then holder of this contract, said excess shall be refunded to the Purchaser on demand without interest, and the interest rates specified hereunder shall be reduced to the maximum rate then permitted by law for the type of transaction to which this contract pertains. The intention of the parties hereto is to assess a legal rate of interest on default, and if the Default Rate is determined by any court of competent jurisdiction to exceed the maximum rate of interest permitted by law for such purposes, the Default Rate shall be reduced to the highest rate so permitted, with any excess theretofore paid being applied against any debt of the defaulting party in inverse order of maturity, or if in excess of such debt, being refunded upon demand without interest.

9003190281

30. **LEGAL RELATIONSHIPS.** The parties to this contract execute the same solely as a seller and a buyer. No partnership, joint venture or joint undertaking shall be construed from these presents, and except as herein specifically provided, neither party shall have the right to make any representation for, act on behalf of, or be liable for the debts of the other. All terms, covenants and conditions to be observed and performed by either of the parties hereto shall be joint and several if entered into by more than one person on behalf of such party, and a default by any one or more of such persons shall be deemed a default on the part of the party with whom said person or persons are identified. No third party is intended to be benefitted by this contract. Any married person executing this contract hereby pledges his or her separate property and such person's and his or her spouse's marital communities in satisfaction hereof.

31. **SUCCESSORS.** Subject to the restrictions contained herein, the rights and obligations of the Seller and the Purchaser shall inure to the benefit of and be binding upon their respective estates, heirs, executors, administrators, successors, successors in trust and assigns; provided, however, no person to whom this contract is pledged or assigned for security purposes by either party hereto shall, in the absence of an express, written assumption by such party, be liable for the performance of any covenant herein. Any assignee of any interest in this contract, or any holder of any interest in the Property, shall have the right to cure any default in the manner permitted and between the time periods required of the defaulting party, but except as otherwise required by law, no notices in addition to those provided for in this contract need be given.

32. **APPLICABLE LAW.** This contract shall be governed and interpreted in accordance with the laws of the State of Washington and the venue of any action brought to interpret or enforce any provision of this contract shall be laid in the county in which the Real Property is situated. All sums herein referred to shall be calculated by and payble in the lawful currency of the United States.

33. **ENTIRE AGREEMENT.** This contract contains the entire agreement of the parties hereto and, except for any agreements or warranties otherwise stated in writing to survive the execution and delivery of this contract, supersedes all of their previous understandings and agreements, written and oral, with respect to this transaction. Neither the Seller nor the Purchaser shall be liable to the other for any representations made by any person concerning the Property or regarding the terms of this contract, except to the extent that the same are expressed in this instrument. This contract may be amended only by written instrument executed by the Seller and the Purchaser subsequent to the date hereof.

EXHIBIT "B"

Assessment:
U.L.I.D. No.: 82-1
Assessment No.: 0420053018
For: sanitary sewers
Levied by: Pierce County
Principal Amount Now Owing: $3,795.66, according to the Pierce County Assessor/Treasurer's Rolls.
(as to the remaining portion of the herein described property)

Assessment:
U.L.I.D. No.: 82-1
Assessment No.: 0420053054
For: sanitary sewers
Levied by: Pierce County
Principal Amount Now Owing: $8,607.00, according to the Pierce County Assessor/Treasurer's Rolls.
(as to a portion of the herein described property)

Fence encroachment as delineated on Survey recorded September 5, 1984 under Auditor's No. 8409050458.
(affects the Southerly portion of the herein described property)

Waiver of all claims for damages to adjacent property by reason of the construction of a county road to be known as Ardena Road, as granted by Ida Benson, et al, to County of Pierce, State of Washington dated_____, 1934 and recorded May 2, 1947 under Auditor's No. 1448266.

Relinquishment of access to State Highway No. 1 and of light, view and air by Deed to State of Washington
Recorded: November 17, 1959
Auditor's No.: 1872829

Right of way for drainage ditch as disclosed in Pierce County Superior Court Case No. 83639, and easement to construct a channel change together with the right, privilege and permit to enter abutting lands to construct said channel change over the herein described property, as granted to the State of Washington by instrument recorded under Auditor's No. 1872830.

Permit to waste, place and deposit earth materials upon the existing channel to Hylebos Creek as it flows over and across the herein described property, together with the right of ingress and egress over and across other lands owned by the grantor, Tom Yururu Kondo and Jessie Miyuko Kondo and Motoe Kondo and Koma Kondo, granted to the State of Washington by instrument dated October 19, 1959 and recorded November 17, 1959 under Auditor's No. 1872831.
Said easement also recorded under Auditor's No. 1872825.

Any right or asserted right of the Puyallup Tribe of Indians to regulate the real property described in Schedule C including, but not limited to, the tribes exercise of police power, zoning, taxation or any other exercise of governmental regulation over the land or the uses occupying said land.
The above paragraph is included in Schedule B to clarify the application of Paragraph 1 (a) of the Schedule of Exclusions from coverage of the policy.

RELEASE OF LEASE

EXHIBIT A

Parcel A:

That portion of the following described tract lying Westerly of Primary State Highway No. 1 (Interstate 5) and Easterly of Pacific Highway South (Old Highway 99) in the Southwest quarter of Section 5, Township 20 North, Range 4 East, W.M., Pierce County, Washington, described as follows:

Beginning at the intersection point of the Easterly margin of Pacific Highway South with the North margin of 12th Street East (a.k.a. Barth Road), said point having a back tangent bearing of North 19°35'01" East; thence Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.86 feet, a central angle of 8°41'40", an arc distance of 301.19 feet; thence South 61°52'10" East a distance of 168 feet, more or less to the Westerly margin line of Primary State Highway No. 1 (Interstate 5); thence Northeasterly along said Westerly margin line to the intersect point of said North margin line of 12th Street East; thence South 88°15'39" West along said North margin line a distance of 130 feet, more or less to the point of beginning.

(Also known as Revised Parcel A of Lot Line Adjustment recorded November 27, 1991 under Recording No. 9111270607)

Parcel B:

That portion of the following described tract lying Westerly of Primary State Highway No. 1 (Interstate 5) and Easterly of Pacific Highway South (Old Highway 99) in the Southwest quarter of Section 5, Township 20 North, Range 4 East, W.M., Pierce County, Washington described as follows:

Commencing at the intersection point of the Easterly margin line of Pacific Highway South with the North margin line of 12th Street East (a.k.a. Barth Road) said point having a back tangent bearing of North 19°35'01" East; thence Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.96 feet, a central angle of 8°41'40", an arc distance of 301.19 feet to the "true point of beginning"; thence continuing Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.86 feet, a central angle of 3°42'05", an arc distance of 128.22 feet; thence continuing along said Easterly margin line radially North 58°01'14" West a distance of 25.00 feet; thence continuing along said Easterly margin line through a curve to the right having a radius of 1959.86 feet, a central angle of 2°05'42", an arc distance of 71.66 feet to intersect with the East margin line of 70th Avenue East (a.k.a. Ardena Road); thence South 00°00'15" East along said margin line a distance of 160.98 feet to a point East (as measured by right angles) of W.S.H.D. Station 5+00 AL27 line; thence North 78°00'15" East a distance of 23.70 feet;

RELEASE OF LEASE

thence South 11°59'45" East parallel with said W.S.H.D. AL27 line a distance of 200 feet, more or less to the Westerly margin line of Primary State Highway No. 1 (Interstate 5);
thence Northeasterly along said Westerly margin line to intersect a line bearing South 61°52'10" from the "true point of beginning"; thence North 61°52'10" West to the "true point of beginning".

(Also known as Revised Parcel B of Lot Line Adjustment recorded November 27, 1991 under Recording No. 9111270607)

This is a Memorandum of that certain unrecorded Lease effective **JUNE 10, 1992**, by and between **HERBERT A. RENDEL** and **ANITA M. RENDEL**, as Lessor, whose interest was assigned to **THE HERBERT AND ANITA RENDEL FAMILY LIMITED PARTNERSHIP** by instrument recorded November _____, 1997, under Pierce County Auditor's File No. _____, and **FREEWAY TRAILER SALES, INC.**, a Washington corporation, as Lessee concerning property situated in **PIERCE** County, State of Washington described as

PARCEL "A"

That portion of the following described tract lying Westerly of Primary State Highway No. 1 (Interstate 5) and Easterly of Pacific Highway South (Old Highway 99) in the Southwest quarter of SECTION 5, TOWNSHIP 20 NORTH, RANGE 4 EAST of the W.M., in Pierce County, Washington, described as follows:

Beginning at the intersection point of the Easterly margin of Pacific Highway South with the North margin line of 12th Street East (a.k.a. Barth Road), said point having a back tangent bearing of North 19 degrees 35 minutes 01 seconds East; Thence Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.86 feet, a central angle of 8 degrees 41 minutes 40 seconds, an arc distance of 301.19 feet, Thence South 61 degrees 52 minutes 10 seconds East a distance of 168 feet, more or less, to the Westerly margin line of Primary State Highway No. 1 (Interstate 5); Thence Northeasterly along said Westerly margin line to the intersect point on said North margin line of 12th Street East; Thence South 88 degrees 15 minutes 39 seconds West along said North margin line a distance of 130 feet, more or less, to the point of beginning.

PARCEL "B"

That portion of the following described tract, lying Westerly of Primary State Highway No. 1 (Interstate 5) and Easterly of Pacific Highway South (Old Highway 99) in the Southwest corner of SECTION 5, TOWNSHIP 20 NORTH, RANGE 4 EAST of the W.M., in Pierce County, Washington, described as follows:

Commencing at the intersection point of the Easterly margin line of Pacific Highway South with the North margin line of 12th Street East (a.k.a. Barth Road) said point having a back tangent bearing North 19 degrees 35 minutes 01 seconds East; Thence Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.96 feet, a central angle of 8 degrees 41 minutes 40 seconds, an arc distance of 301.19 feet to the "true point of beginning"; Thence continuing Southwesterly along said Easterly margin line through a curve to the right having a radius of 1984.86 feet, a central angle of 3 degrees 42 minutes 05 seconds, an arc distance of 128.22 feet; Thence continuing along said Easterly margin line radially North 58 degrees 01 minutes 14 seconds West a distance of 25.00 feet; Thence continuing along said Easterly margin line through a curve to the right having a radius of 1959.86 feet, a central angle of 2 degrees 05 minutes 42 seconds, an arc distance of 71.66 feet to intersect with the East margin line of 70th Avenue East (a.k.a. Ardena Road); Thence South 00 degrees 00 minutes 15 seconds East along said margin line a distance of 160.98 feet to a point East (as measured at right angles) of W.S.H.D. Station 5+00 AL27 line; Thence North 78 degrees 00 minutes 15 secondr East a distance of 23.70 feet; Thence South 11 degrees

NOTICE: IF THE DOCUMENT ... IT IS DUE TO THE QUALITY OF THE DOCUMENT

PARCEL "B" continued

59 minutes 45 seconds East parallel with said W.S.H.D. AL27 line a distance of 200 feet, more or less, to the Westerly margin line of Primary State Highway No. 1 (Interstate 5); Thence Northeasterly along said Westerly margin line to intersect point of beginning; Thence North 61 degrees 52 minutes 10 seconds West to the "true point of beginning".

COMMONLY KNOWN AS: 1319 70th Avenue and 7100 Pacific Hwy. East
Milton, WA 98354

Parcel #04-20-05-3-057; 04-20-05-3-054; 04-20-05-3-018

For good and valuable consideration, Lessor leased the premises to Lessee, all upon the terms and conditions set forth in said unrecorded Lease.

In addition, said unrecorded Lease was in turn assigned by the Lessor on November 10, 1997, to **Sterling Savings Association**.

Provisions in this Memorandum shall not be used in interpreting the Lease and in the event of a conflict between this Memorandum and the unrecorded Lease, the unrecorded Lease shall control, as this Memorandum is not a complete summary of the Lease.

ASTM 1527-13 USER QUESTIONS

ASTM 1527-13 includes a user questionnaire that must be completed by the user in order to qualify for Landowner Liability Protections (LLPs) under CERCLA. The following questions are to be completed by the user or representatives of the user.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   __No_____
2. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?
   __ No _____
3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties?
   __ No _____
4. For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
   __ No _____
5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
   __ I am not aware of the purchase price._____
6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?
   __ No _____

   For example, as user,

   (a) do you know the past uses of the property? _ No _____
   (b) do you know of specific chemicals that are present or once were present at the property? _ No ____
   (c) do you know of spills or other chemical releases that have taken place at the property? _ No _____
   (d) do you know of any environmental cleanups that have taken place at the property? _ No _____

7. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property? _ No
   _____

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 07/29/2020 has revealed that there are 2

SEMS sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
US GYPSUM CO HYLEBOS Site ID: 1000870 EPA Id: WAD980639140	ST RTE 99	SSW 1/8 - 1/4 (0.159 mi.)	B10	13

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/26/2020 has revealed that there is 1 HSL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
B & L WOODWASTE LAND Facility Type: Hazardous Sites List FSID Number: 1203 Facility Status: CC-Perf. Monitoring	***FIFE WAY & PUGET POW***	***SE 1/4 - 1/2 (0.427 mi.)***	***I33***	***185***

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 14 CSCSL sites within approximately 1 mile of the target property.

Contaminant Name: Halogenated Organics
Contaminant Name: Petroleum Products-Unspecified

EXECUTIVE SUMMARY

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
B & L WOODWASTE	2201 6T AVE	SE 1/4 - 1/2 (0.427 mi.)	I32	185
Database: SWF/LF, Date of Government Version: 06/05/2020 Facility Type: Historic Landfill (non-regulated) Facility ID: 736 Permit Status: Permit Not Required

Database: SWF/LF, Date of Government Version: 06/05/2020 Facility Type: Historic Landfill (non-regulated) Facility ID: 3202 Permit Status: Permit Not Required				

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 05/12/2020 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

INST CONTROL: Sites that have institutional controls.

A review of the INST CONTROL list, as provided by EDR, and dated 07/13/2020 has revealed that there are 2 INST CONTROL sites within approximately 0.5 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Sites that have entered either the Voluntary Cleanup Program or its predecessor Independent Remedial Action Program.

A review of the VCP list, as provided by EDR, and dated 07/13/2020 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ICR: These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

A review of the ICR list, as provided by EDR, and dated 12/01/2002 has revealed that there is 1 ICR site within approximately 0.5 miles of the target property.

PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the PTAP list, as provided by EDR, and dated 05/12/2020 has revealed that there is 1 PTAP

site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

ALLSITES: Information on facilities and sites of interest to the Department of Ecology.

A review of the ALLSITES list, as provided by EDR, and dated 04/17/2020 has revealed that there are 32 ALLSITES sites within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 07/13/2020 has revealed that there are 3 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

INDIAN RESERV: This map layer portrays Indian administered lands of the United States that have any area equal to or greater than 640 acres.

A review of the INDIAN RESERV list, as provided by EDR, and dated 12/31/2014 has revealed that there is 1 INDIAN RESERV site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
PUYALLUP RESERVATION		0 - 1/8 (0.000 mi.)	0	9

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 02/03/2020 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting

WESTERN SUPERIOR STRUCTURALS (Continued) **1011932073**

requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/29/2020
Date Data Arrived at EDR: 08/03/2020

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/15/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2020
Date Data Arrived at EDR: 06/22/2020

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/15/2020

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 07/13/2020

PTAP: PTAP Site Listing
A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

EDR Inquiry # 5773462.1	Contact: Adam Romey

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below (selected maps only*). The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # B2C5-4CC5-A27B

PO # TDLE - 5541800030-5.4.5.12

Project TDLE - 5541800030-5.4.5.12

* Environmental Data Resources, Inc. has been instructed by Parametrix, Inc. to print ONLY the Sanborn Maps for the years listed below:

1963 (6)
1950 (6)
1912 (6)
1896 (4)
1888 (2)

Total Maps: 24

Sanborn® Library search results

Certification #: B2C5-4CC5-A27B

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Parametrix, Inc. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Cleanup Plans Available for Public Comment

Ecology Wants Your Comments!

The Washington State Department of Ecology (Ecology) invites you to comment on draft cleanup plans for the USG Highway 99 cleanup site. The site is at 7110 Pacific Highway East in Milton.

Ecology will accept comments from **July 9 through August 11, 2015** on these draft documents**:**

- **Agreed Order —** a legal agreement that requires USG Interiors, formerly US Gypsum, to clean up the site.
- **Remedial Investigation/Feasibility Study (RI/FS)** — describes the contamination and compares cleanup options.
- **Draft Cleanup Action Plan (CAP) —** outlines the recommended cleanup.
- **Updated Public Participation Plan** — describes the tools we will use to inform the public and gather feedback.
- **State Environmental Policy Act (SEPA) review —** describes the potential environmental impacts of the cleanup work.

The box to the right shows where to find site documents and how to submit comments.

Site Background

Before 1985, USG used the site to dispose of waste from their rock wool (see page 2) manufacturing plant in Tacoma. USG used slag, a waste from the Asarco copper smelter in Tacoma, as raw material for the rock wool. The slag contained arsenic—a toxic metal.

The waste USG buried at the site included 20,000 tons of "bag house dust" and "shot." Both wastes contained arsenic.

USG removed waste from the site between 1984—1986 and disposed of it in a licensed landfill. However, not all the waste was removed.

Additional soil and groundwater studies showed arsenic in soil, groundwater, and sediment that exceeds the state cleanup standard. Ecology and USG are now proposing a draft cleanup plan.

Areas of Contamination

Site studies found arsenic in:

- **Soil** — in a broad area called the core remediation area (see page 3). Arsenic reaches up to 16 feet below ground.
- A **soil "hot spot"** — a small area with the highest levels of arsenic, located on the west side of the core remediation area. Here, arsenic in soil is in contact with groundwater.
- **Groundwater** — mostly in the core remediation area, and also extending east of Hylebos Creek. A groundwater hot spot is next to the soil hotspot.

  Groundwater is water that collects, fills, and flows through open spaces between soil and sediment particles, and through cracks in rock.

  This contaminated groundwater is not a threat to the drinking water supply. Water for the area is supplied by deep wells.
- **Sediment** — samples collected on the bank of the Hylebos Creek had arsenic above cleanup levels for freshwater.

Why Cleanup Matters

The USG Highway 99 site is located on Hylebos Creek, which connects to Puget Sound through the Hylebos Waterway. Cleaning up the land around the creek is an important step in making this waterway safer and healthier for humans and wildlife.

What is Rock Wool?

Rock wool is an insulating and fire-proofing material. It is made by heating rock until it is molten and blowing or spinning it into fine fibers.

Arsenic is a toxic metal. It can occur naturally in the soil or come from industrial processes. Arsenic can be harmful to human health. For more information visit: www.atsdr.cdc.gov/toxfaqs/tf.asp?id=19&tid=3

Cleanup Plan

Under the draft cleanup plan, USG will:

- Study the soil hot spot to better define the area.
- Solidify or chemically stabilize the arsenic within the soil hot spot using a cement-based mixture. This may begin with a pilot test.
- Treat site groundwater (including hot spot) using in-situ chemical oxidation (see page 3). USG will use injection wells or trenches. They will do a pilot test.
- Replace part of existing pavement with permeable pavement. This allows precipitation, like rainwater, to infiltrate soil and groundwater. This will help oxidize groundwater and minimize arsenic movement.
- Monitor groundwater to ensure arsenic levels are naturally declining (called natural attenuation).
- Remove polluted sediment from Hylebos Creek. USG will restore the area with clean sand.
- Apply land use controls or groundwater use restrictions. The property owners will need to record an environmental covenant (EC) for their properties.

  An EC is a legal document that is attached to the property deed. It prohibits activities that may result in impacts to human health and the environment due to exposure to hazardous substances left at the site.
- Submit a monitoring plan that describes how they will monitor sediment, soil, and groundwater after cleanup to make sure cleanup levels are reached.

What Happens Next?

1. After the comment period ends, Ecology will respond to comments we received.
2. We will finalize the cleanup plans and sign the agreed order.
3. USG will do the cleanup work.

Site Map

Approximate site boundary

Core Remediation Area

Soil hot spot

Groundwater hot spot

Impacted sediment

In-Situ Chemical Oxidation (ISCO)

The cleanup plan proposes treating groundwater with ISCO. This will help speed up the natural attenuation of arsenic. Natural attenuation relies on natural physical, chemical, or biological processes to lower contamination over time.

In ISCO, a chemical called an “oxidant” is injected into groundwater, usually through wells. Then a chemical reaction happens between naturally occurring iron, oxygen, and the arsenic. This changes the arsenic to a less mobile form. Oxidants that can be used include potassium, sodium persulfate, ozone, or hydrogen peroxide.

The benefit of ISCO is it’s “in-situ”, meaning it can be done in place without excavating soil or pumping and treating groundwater. For this site, it may also reduce the ability of arsenic in the soil hot spot to leach into groundwater.

EXHIBIT A Site Diagrams

I. INTRODUCTION

The mutual objective of the State of Washington, Department of Ecology (Ecology) and USG Interiors, LLC (USG) under this Agreed Order (Order) is to provide for remedial action at a facility where there has been a release or threatened release of hazardous substances. This Order requires USG to implement the cleanup action plan (CAP) developed under Agreed Order No. DE 6333, dated October 19, 2009. Ecology believes the actions required by this Order are in the public interest.

II. JURISDICTION

This Agreed Order is issued pursuant to the Model Toxics Control Act (MTCA), RCW 70.105D.050(1).

III. PARTIES BOUND

This Agreed Order shall apply to and be binding upon the Parties to this Order, their successors and assigns. The undersigned representative of each party hereby certifies that he or she is fully authorized to enter into this Order and to execute and legally bind such party to comply with this Order. USG agrees to undertake all actions required by the terms and conditions of this Order. No change in ownership or corporate status shall alter USG's responsibility under this Order. USG shall provide a copy of this Order to all agents, contractors, and subcontractors retained to perform work required by this Order, and shall ensure that all work undertaken by such agents, contractors, and subcontractors complies with this Order.

IV. DEFINITIONS

Unless otherwise specified herein, the definitions set forth in Chapter 70.105D RCW and Chapter 173-340 WAC shall control the meanings of the terms in this Order.

A. Site: The Site is referred to as USG Highway 99 Site (the Site) and is generally located at 7110 Pacific Highway East in Milton, Washington. The Site is defined by the extent of contamination caused by the release of hazardous substances at the Site. The Site is more particularly described in the Site Diagrams (Exhibit A). The Site constitutes a facility under RCW 70.105D.020(8).

B. Parties: Refers to the State of Washington, Department of Ecology and USG.

C. Potentially Liable Person (PLP): Refers to USG; Site Owner/Operators, Ms. Jennifer Walker and Mr. Donald Miniken Jr for Freeway Sales LLC d/b/a Kanopy Kingdom; Owner/Operator Mr. Michael Rendell for Freeway Trailer Sales; Owner/Operator Mr. Eric Thompson for East Fork Corporation d/b/a General Trailer Parts LLC; Owner/Operator Ms. Linda Plein for Batrob LLC.

D. Agreed Order or Order: Refers to this Order and each of the exhibits to this Order. All exhibits are integral and enforceable parts of this Order. The terms "Agreed Order" or "Order" shall include all exhibits to this Order.

V. FINDINGS OF FACT

Ecology makes the following findings of fact, without any express or implied admissions of such facts by USG:

A. Prior to 1985, USG (formerly US Gypsum Company) disposed of several waste products in pits dug at the Site. The waste products buried at the Site included 20,000 tons of "bag house dust" and "shot" from their Tacoma rock wool manufacturing plant. Both bag house dust and shot contain elevated levels of arsenic.

B. Ecology issued Order DE 84-506 on August 17, 1984, requiring USG to submit a post-cleanup monitoring plan. This plan, as approved by Ecology, included installation of two monitoring wells.

C. From October 1984 through January 1985, USG voluntarily excavated shot, bag house dust, and soil exceeding the site specific soil clean-up level from the Site, and disposed of this material at a hazardous waste landfill.

D. Soil clean-up levels specified in Order DE 84-506 were achieved.

E. Agreed Order DE 87-506, issued in 1987, provided for monthly groundwater monitoring to verify the effectiveness of the 1984/1985 clean-up action. Monthly groundwater sampling continued until April 2005.

F. In 2006 Ecology required USG to conduct a soil and groundwater assessment for arsenic in the vicinity of monitoring well 99-1.

G. On February 2, 2007, Ecology received a report from USG entitled "Soil and Groundwater Quality Assessment / Source Evaluation Report, USG – Fife Site, 7110 Pacific Highway East, Milton, Washington (the report)" dated January 31, 2007. This report provides the results of nine push-probe borings taken from the Site. The report indicated that of the nine soil borings sampled, eight exceeded the current 20 milligram per kilogram (mg/kg) MTCA Method A residential soil cleanup level for arsenic. The highest soil arsenic concentration discovered by this sampling was 1,400 mg/kg. Of the nine groundwater samples extracted by the push-probes, all nine exceeded the current 5 microgram per liter (ug/l) MTCA Method A groundwater cleanup level for arsenic. The highest groundwater arsenic concentration measured was 30,000 ug/l.

H. The Site is located directly adjacent to, and on the banks of, Hylebos Creek. Site groundwater is in direct hydrologic connection with the creek, and likely discharges directly to the creek. Therefore, the arsenic contained in the Site soils and groundwater, and likely also in the creek bank sediments, is likely being continuously released into the creek. The Site is located on the banks of the creek close to the point of the creek's discharge into the Hylebos Waterway of Puget Sound. The arsenic presents a threat or potential threat to the environment of Hylebos Creek and of Puget Sound.

I. Based on this report, Ecology issued to USG a letter on March 30, 2007 proposing that USG is a Potentially Liable Person (PLP) for the USG Highway 99 Site, as defined in MTCA.

J. On May 2, 2007, USG provided Ecology with a letter waiving its right to a 30-day public comment period, and accepting its status as a PLP.

K. On November 6, 2008, Ecology issued letters of PLP Determination to the current Owner/Operators of the Site: Ms. Jennifer Walker and Mr. Donald Miniken Jr. for Freeway Sales LLC d/b/a Kanopy Kingdom, located at 7110 Pacific Highway E, Milton, Washington 98354; and also to Mr. Michael Rendell for Freeway Trailer Sales, located at 7100 Pacific Highway E, Milton, Washington 98354 (See Exhibit A – Site Diagrams for parcel locations).

L. Under Agreed Order No. DE 6333, USG performed a remedial investigation/feasibility study and prepared a draft CAP. The selected remedy is documented in the draft CAP. Arsenic impacted soil and groundwater can be treated by solidification/chemical stabilization techniques for the soil and in-situ chemical oxidation (ISCO) for the groundwater. Monitored Natural Attenuation (MNA) will be used to ensure that arsenic concentrations decline over time and that geochemical conditions promote the stability of the iron-arsenic oxyhydroxide co-precipitates formed during ISCO treatment. Also as part of the CAP, the contaminated sediments in the Hylebos Creek will be excavated.

M. On March 27, 2015, Ecology issued a letter of PLP Determination to the current Owner/Operator of the Site: Ms. Linda Plein for Batrob LLC, located at 7220 Pacific Highway E, Milton, Washington 98354; and on March 30, 2015, Ecology issued a letter of PLP Determination to the current Owner/Operator of the Site: Mr. Eric Thompson for East Fork Corporation d/b/a General Trailer Parts LLC, located at 7200 Pacific Highway E, Milton, Washington 98354.

VI. ECOLOGY DETERMINATIONS

Ecology makes the following determinations, without any express or implied admissions of such determinations (and underlying facts) by USG.

A. USG is an "owner or operator" as defined in RCW 70.105D.020(22) of a "facility" as defined in RCW 70.105D.020(8) based on its prior ownership of the Site, and its disposal of waste at the Site.

B. Based upon all factors known to Ecology, a "release" or "threatened release" of "hazardous substance(s)" as defined in RCW 70.105D.020(32) and (13), respectively, has occurred at the Site.

C. Based upon credible evidence, Ecology issued a PLP status letter to USG dated March 30, 2007, pursuant to RCW 70.105D.040, .020(21), and WAC 173-340-500. By letter dated May 2, 2007, USG voluntarily waived its rights to notice and comment and accepted Ecology's determination that USG is a PLP under RCW 70.105D.040.

D. Pursuant to RCW 70.105D.030(1) and .050(1), Ecology may require PLPs to investigate or conduct other remedial actions with respect to any release or threatened release of hazardous substances, whenever it believes such action to be in the public interest. Based on the foregoing facts, Ecology believes the remedial actions required by this Order are in the public interest.

VII. WORK TO BE PERFORMED

Based on the Findings of Fact and Ecology Determinations, it is hereby ordered that USG take the following remedial actions at the Site and that these actions be conducted in accordance with Chapter 173-340 WAC unless otherwise specifically provided for herein:

A. The Scope of Work required by this Order consists of the following tasks and is to be consistent with the finalized Corrective Action Plan for the Site:

1. Prepare an Inadvertent and Unanticipated Discovery Plan in the event of a discovery of archeological resources during remedial activities at the site.
2. Conduct a subsurface investigation to further delineate the fill/soil hot spot.
3. Conduct a bench-scale study to select the optimal solidification/stabilization mix design to treat the fill/soil hot spot.
4. Conduct a bench-scale study to assess soil oxidant demand, select the most effective oxidant, and determine whether metered or batch delivery of the oxidant will work best to treat dissolved arsenic in groundwater.
5. Solidify the fill/soil hot spot by injecting a cement-based reagent and auger mixing.
6. Conduct a pilot test of the ISCO treatment of groundwater, including performance monitoring.
7. Treat the groundwater arsenic hot spot by ISCO. Chemical oxidant would be injected into several injection wells installed at the site around well 99-1.
8. Treat the arsenic groundwater plume in the core remediation area by ISCO. Chemical oxidant would be injected into the subsurface using injection trenches situated at the

hydraulically upgradient sides of the site using either batch or metering methods as determined by the bench-scale test.

9. Replace a portion of pavement in the core remediation area with permeable pavement to allow precipitation to infiltrate, promoting oxidizing groundwater conditions and minimizing arsenic mobility.
10. Monitor natural attenuation by collecting groundwater samples to ensure that arsenic concentrations decline over time and geochemical conditions promote the stability of the iron-arsenic oxyhydroxide co-precipitates throughout the arsenic plume.
11. Construct coffer dams at both ends of the planned sediment cleanup area in Hylebos Creek and then excavate impacted sediment for off-site disposal. Restore the creek channel using clean sand and remove the coffer dams.
12. Record environmental (restrictive) covenants with Pierce County for all affected properties. Each environmental covenant shall describe the contamination left at the site, including the contaminant(s) remaining, the specific location of remaining contamination, and the land use controls that will be in place to physically protect the integrity of the pavement cap and groundwater use restrictions.

Schedule for performance and/or deliverables.

Task	Schedule
Inadvertent and Unanticipated Discovery Plan	30 days from the effective date of Agreed Order
Draft Bench-Scale Testing Sampling and Analysis Plan	60 days from the effective date of Agreed Order
Begin Hot Spot Delineation Fieldwork	45 days after receiving Ecology approval of the Bench-Scale Testing Work Plan
Begin Bench-Scale Testing	60 days after receiving Ecology approval of the Bench-Scale Testing Work Plan
Draft Bench-Scale Testing Report	270 days after receiving Ecology approval of the Bench-Scale Testing Work Plan

Draft Engineering Design Report and Compliance Monitoring Plan	120 days after receiving Ecology approval for the Bench-Scale Testing Report
Draft Construction Plans and Specifications – Soil/Fill Hot-Spot Solidification	90 days after receiving Ecology approval of the Engineering Design Report and Compliance Monitoring Plan
Begin Contractor Procurement	30 days after receiving Ecology approval of Construction Plans and Specifications
Begin Cleanup Action - Soil/Fill Hot-Spot Solidification	180 days after receiving Ecology approval of Construction Plans and Specifications
Begin Pilot Test of *In Situ* Chemical Oxidation (ISCO) of Groundwater (includes 1 year of performance groundwater monitoring)	30 days after completion of Soil/Fill Hot-Spot Solidification fieldwork
Draft ISCO Pilot Test Report	420 days after commencement of ISCO Pilot Test
Draft Construction Plans and Specifications, Draft Operations and Maintenance Plan – Groundwater ISCO	90 days after receiving Ecology approval of ISCO Pilot Test Report
Begin Cleanup Action - Groundwater ISCO (includes hot-spot treatment, construction of ISCO trenches, operations and maintenance, and performance monitoring)	90 days after receiving Ecology approval of Construction Plans and Specification, and Operations and Maintenance Plan – Groundwater ISCO
Begin Permeable Pavement Construction	To be determined by results of Groundwater ISCO Performance Monitoring
Begin Cleanup Action - Hylebos Creek Sediment	To be determined by results of Groundwater ISCO Performance Monitoring, but no later than 720 days after beginning Groundwater ISCO Cleanup Action. Construction will depend on in-water work period.
Confirmational Groundwater Monitoring	To be determined by results of Groundwater ISCO Performance Monitoring

B. A sampling and analysis plan (SAP) will be prepared to implement a subsurface investigation to further delineate arsenic concentrations in fill and soil. The SAP will include a

bench-scale treatability and pilot study work plan to determine the optimal solidification/stabilization reagent mix design and select an oxidant to treat arsenic in groundwater. The draft SAP will be submitted to Ecology 60 days from the effective date of this Agreed Order. A final SAP will be submitted to Ecology 15 days after receipt of Ecology comments on the draft SAP.

C. An Engineering Design Report (EDR), construction plans and specifications and a Compliance Monitoring Plan will be prepared to implement and monitor the CAP. The draft EDR will be submitted to Ecology 120 days after receiving Ecology approval of the Bench-Scale Testing Report. A final EDR will be submitted to Ecology 30 days after receipt of Ecology comments on the draft EDR.

VIII. TERMS AND CONDITIONS

A. Remedial Action Costs

USG shall pay to Ecology costs incurred by Ecology pursuant to this Order and consistent with WAC 173-340-550(2) subject to the Resolution and Disputes section of this Order. These costs shall include work performed by Ecology or its contractors for, or on, the Site under Chapter 70.105D RCW, including remedial actions and Order preparation, negotiation, oversight, and administration. These costs shall include work performed both prior to and subsequent to the issuance of this Order. Ecology's costs shall include costs of direct activities and support costs of direct activities as defined in WAC 173-340-550(2). Ecology has accumulated $427.32 in remedial action costs related to this Site as of March 31, 2015. Payment for this amount shall be submitted within thirty (30) days of the effective date of this Order. For all costs incurred subsequent to March 31, 2015, USG shall pay the required amount within thirty (30) days of receiving from Ecology an itemized statement of costs that includes a summary of costs incurred, an identification of involved staff, and the amount of time spent by involved staff members on the project. A general statement of work performed will be provided upon request. Itemized statements shall be prepared quarterly. Pursuant to WAC 173-340-550(4), failure to pay Ecology's

costs within ninety (90) days of receipt of the itemized statement of costs will result in interest charges at the rate of twelve percent (12%) per annum, compounded monthly.

In addition to other available relief, pursuant to RCW 19.16.500, Ecology may utilize a collection agency and/or, pursuant to RCW 70.105D.055, file a lien against real property subject to the remedial actions to recover unreimbursed remedial action costs.

B. Implementation of Remedial Action

If Ecology determines that USG has failed without good cause to implement the remedial action, in whole or in part, Ecology may, after notice to USG, perform any or all portions of the remedial action that remain incomplete. If Ecology performs all or portions of the remedial action because of USG's failure to comply with its obligations under this Order, USG shall reimburse Ecology for the costs of doing such work in accordance with Section VIII.A (Remedial Action Costs), provided that USG is not obligated under this section to reimburse Ecology for costs incurred for work inconsistent with or beyond the scope of this Order.

Except where necessary to abate an emergency situation, USG shall not perform any remedial actions at the Site outside those remedial actions required by this Order, unless Ecology concurs, in writing, with such additional remedial actions.

C. Designated Project Coordinators

The project coordinator for Ecology is:

Jason Landskron, P.E., Cleanup Project Manager
Washington State Dept. of Ecology
Southwest Regional Office
300 Desmond Drive
Lacey, WA 98503
Telephone: 360-407-6388

The project coordinator for USG is:

Mr. Gregory D. Kinser
Director, Environmental
USG Interiors, LLC
550 West Adams Street
Chicago, IL 60661-3676
Telephone: 312-436-4134

Each project coordinator shall be responsible for overseeing the implementation of this Order. Ecology's project coordinator will be Ecology's designated representative for the Site. To the maximum extent possible, communications between Ecology and USG, and all documents, including reports, approvals, and other correspondence concerning the activities performed pursuant to the terms and conditions of this Order shall be directed through the project coordinators. The project coordinators may designate, in writing, working level staff contacts for all or portions of the implementation of the work to be performed required by this Order.

Any party may change its respective project coordinator. Written notification shall be given to the other party at least ten (10) calendar days prior to the change.

D. Performance

All geologic and hydrogeologic work performed pursuant to this Order shall be under the supervision and direction of a geologist or hydrogeologist licensed by the State of Washington or under the direct supervision of an engineer registered by the State of Washington, except as otherwise provided for by Chapters 18.220 and 18.43 RCW.

All engineering work performed pursuant to this Order shall be under the direct supervision of a professional engineer registered by the State of Washington, except as otherwise provided for by RCW 18.43.130.

All construction work performed pursuant to this Order shall be under the direct supervision of a professional engineer or a qualified technician under the direct supervision of a professional engineer. The professional engineer must be registered by the State of Washington, except as otherwise provided for by RCW 18.43.130.

Any documents submitted containing geologic, hydrologic, or engineering work shall be under the seal of an appropriately licensed professional as required by Chapters 18.220 and 18.43 RCW.

USG shall notify Ecology in writing of the identity of any engineer(s) and geologist(s), contractor(s) and subcontractor(s), and others to be used in carrying out the terms of this Order, in advance of their involvement at the Site.

E. Access

Ecology or any Ecology authorized representative shall have access to enter and freely move about all property at the Site that USG has access rights to at all reasonable times for the purposes of, *inter alia*: inspecting records, operation logs, and contracts related to the work being performed pursuant to this Order; reviewing USG's progress in carrying out the terms of this Order; conducting such tests or collecting such samples as Ecology may deem necessary; using a camera, sound recording, or other documentary type equipment to record work done pursuant to this Order; and verifying the data submitted to Ecology by USG. USG shall make all reasonable efforts to secure access rights for those properties within the Site not owned or controlled by USG where remedial activities or investigations will be performed pursuant to this Order. Ecology or any Ecology authorized representative shall give reasonable notice before entering any Site property where USG has access unless an emergency prevents such notice. All persons who access the Site pursuant to this section shall comply with any applicable health and safety plan(s). Ecology employees and their representatives shall not be required to sign any liability release or waiver as a condition of Site property access.

F. Sampling, Data Submittal, and Availability

With respect to the implementation of this Order, USG shall make the results of all sampling, laboratory reports, and/or test results generated by it or on its behalf available to Ecology. Pursuant to WAC 173-340-840(5), all sampling data shall be submitted to Ecology in both printed and electronic formats in accordance with Section VII (Work to be Performed), Ecology's Toxics Cleanup Program Policy 840 (Data Submittal Requirements), and/or any subsequent procedures specified by Ecology for data submittal.

If requested by Ecology, USG shall allow Ecology and/or its authorized representative to take split or duplicate samples of any samples collected by USG pursuant to implementation of

this Order. USG shall notify Ecology seven (7) days in advance of any sample collection or work activity at the Site. Ecology shall, upon request, allow USG and/or its authorized representative to take split or duplicate samples of any samples collected by Ecology pursuant to the implementation of this Order, provided that doing so does not interfere with Ecology's sampling. Without limitation on Ecology's rights under Section VIII.E (Access), Ecology shall notify USG prior to any sample collection activity unless an emergency prevents such notice.

In accordance with WAC 173-340-830(2)(a), all hazardous substance analyses shall be conducted by a laboratory accredited under Chapter 173-50 WAC for the specific analyses to be conducted, unless otherwise approved by Ecology.

G. Public Participation

A Public Participation Plan is required for this Site. Ecology shall review any existing Public Participation Plan to determine its continued appropriateness and whether it requires amendment, or if no plan exists, Ecology shall develop a Public Participation Plan alone or in conjunction with USG.

Ecology shall maintain the responsibility for public participation at the Site. However, USG shall cooperate with Ecology, and shall:

1. If agreed to by Ecology, develop appropriate mailing lists and prepare drafts of public notices and fact sheets at important stages of the remedial action, such as the submission of work plans, remedial investigation/feasibility study reports, cleanup action plans, and engineering design reports. As appropriate, Ecology will edit, finalize, and distribute such fact sheets and prepare and distribute public notices of Ecology's presentations and meetings.

2. Notify Ecology's project coordinator prior to the preparation of all press releases and fact sheets, and before major meetings with the interested public and local governments. Likewise, Ecology shall notify USG prior to the issuance of all press releases and fact sheets, and before major meetings with the interested public and local governments. For all press releases, fact sheets, meetings, and other outreach efforts by

USG that do not receive prior Ecology approval, USG shall clearly indicate to its audience that the press release, fact sheet, meeting, or other outreach effort was not sponsored or endorsed by Ecology.

3. When requested by Ecology, participate in public presentations on the progress of the remedial action at the Site. Participation may be through attendance at public meetings to assist in answering questions or as a presenter.

4. When requested by Ecology, arrange and/or continue information repositories to be located at the following locations:

a. Pierce County Library
1000 Laurel Street
Milton, WA98354
(253) 922-2870

b. Tacoma Main Library
1102 Tacoma Ave. South
Tacoma, WA 98402
(253) 591-5666

c. Citizens for a Healthy Bay
917 Pacific Ave., Suite 100
Tacoma, WA 98402
(253) 383-2429

d. WA State Department of Ecology
Southwest Regional Office
Toxics Cleanup Program
300 Desmond Drive
Lacey, WA 98503
(360) 407-6365

At a minimum, copies of all public notices, fact sheets, and documents relating to public comment periods shall be promptly placed in these repositories. A copy of all documents related to this Site shall be maintained in the repository at Ecology's Southwest Regional Office in Lacey, Washington.

H. Retention of Records

During the pendency of this Order, and for ten (10) years from the date of completion of work performed pursuant to this Order, USG shall preserve all records, reports, documents, and underlying data in its possession relevant to the implementation of this Order and shall insert a similar record retention requirement into all contracts with project contractors and subcontractors. Upon request of Ecology, USG shall make all records available to Ecology and allow access for review within a reasonable time.

Nothing in this Order is intended to waive any right USG may have under applicable law to limit disclosure of documents protected by the attorney work-product privilege and/or the attorney-client privilege. If USG withholds any requested records based on an assertion of privilege, USG shall provide Ecology with a privilege log specifying the records withheld and the applicable privilege. No Site-related data collected pursuant to this Order shall be considered privileged.

I. Resolution of Disputes

1. In the event that USG elects to invoke dispute resolution USG must utilize the procedure set forth below. Failure to timely abide by Ecology's directive or invoke dispute resolution may result in Ecology's determination that insufficient progress is being made in preparation of a deliverable and completion of the deliverable by Ecology under Section VII.E (Work to be Performed) or Enforcement under Section X (Enforcement).

   a. Upon the triggering event (receipt of Ecology's project coordinator's written decision or an itemized billing statement), USG has fourteen (14) calendar days within which to notify Ecology's project coordinator in writing of its dispute ("Informal Dispute Notice").

b. The Parties' project coordinators shall then confer in an effort to resolve the dispute informally. The parties shall informally confer for up to fourteen (14) calendar days from receipt of the Informal Dispute Notice. If the project coordinators cannot resolve the dispute within those 14 calendar days, then within seven (7) calendar days Ecology's project coordinator shall issue a written decision ("Informal Dispute Decision") stating: the nature of the dispute; USG's position with regards to the dispute; Ecology's position with regards to the dispute; and the extent of resolution reached by informal discussion.

c. USG may then request regional management review of the dispute. This request ("Formal Dispute Notice") must be submitted in writing to the Southwest Region Toxics Cleanup Section Manager within seven (7) calendar days of receipt of Ecology's Informal Dispute Decision. The Formal Dispute Notice shall include a written statement of dispute setting forth: the nature of the dispute; the disputing Party's position with respect to the dispute; and the information relied upon to support its position.

d. The Section Manager shall conduct a review of the dispute and shall endeavor to issue a written decision regarding the dispute ("Decision on Dispute") within thirty (30) calendar days of receipt of the Formal Dispute Notice. The Decision on Dispute shall be Ecology's final decision on the disputed matter.

2. The Parties agree to only utilize the dispute resolution process in good faith and agree to expedite, to the extent possible, the dispute resolution process whenever it is used.

3. Implementation of these dispute resolution procedures shall not provide a basis for delay of any activities required in this Order, unless Ecology agrees in writing to a schedule extension.

J. Extension of Schedule

1. An extension of schedule shall be granted only when a request for an extension is submitted in a timely fashion, generally at least thirty (30) days prior to expiration of the deadline for which the extension is requested, and good cause exists for granting the extension. All extensions shall be requested in writing. The request shall specify:

a. The deadline that is sought to be extended;

b. The length of the extension sought;

c. The reason(s) for the extension; and

d. Any related deadline or schedule that would be affected if the extension were granted.

2. The burden shall be on USG to demonstrate to the satisfaction of Ecology that the request for such extension has been submitted in a timely fashion and that good cause exists for granting the extension. Good cause may include, but may not be limited to:

a. Circumstances beyond the reasonable control and despite the due diligence of USG including delays caused by unrelated third parties or Ecology, such as (but not limited to) delays by Ecology in reviewing, approving, or modifying documents submitted by USG;

b. Acts of God, including fire, flood, blizzard, extreme temperatures, storm, or other unavoidable casualty; or

c. Endangerment as described in Section VIII.L (Endangerment).

However, neither increased costs of performance of the terms of this Order nor changed economic circumstances shall be considered circumstances beyond the reasonable control of USG.

3. Ecology shall act upon any written request for extension in a timely fashion. Ecology shall give USG written notification of any extensions granted pursuant to this Order. A

requested extension shall not be effective until approved by Ecology. Unless the extension is a substantial change, it shall not be necessary to amend this Order pursuant to Section VIII.K (Amendment of Order) when a schedule extension is granted.

4. An extension shall only be granted for such period of time as Ecology determines is reasonable under the circumstances. Ecology may grant schedule extensions exceeding ninety (90) days only as a result of:

a. Delays in the issuance of a necessary permit which was applied for in a timely manner;

b. Other circumstances deemed exceptional or extraordinary by Ecology; or

c. Endangerment as described in Section VIII.L (Endangerment).

K. Amendment of Order

The project coordinators may verbally agree to minor changes to the work to be performed without formally amending this Order. Minor changes will be documented in writing by Ecology within seven (7) days of verbal agreement.

Except as provided in Section VIII.M (Reservation of Rights), substantial changes to the work to be performed shall require formal amendment of this Order. This Order may only be formally amended by the written consent of both Ecology and USG. USG shall submit a written request for amendment to Ecology for approval. Ecology shall indicate its approval or disapproval in writing and in a timely manner after the written request for amendment is received. If the amendment to this Order represents a substantial change, Ecology will provide public notice and opportunity to comment. Reasons for the disapproval of a proposed amendment to this Order shall be stated in writing. If Ecology does not agree to a proposed amendment, the disagreement may be addressed through the dispute resolution procedures described in Section VIII.I (Resolution of Disputes).

L. Endangerment

In the event Ecology determines that any activity being performed at the Site under this Order is creating or has the potential to create a danger to human health or the environment on or

surrounding the Site, Ecology may direct USG to cease such activities for such period of time as it deems necessary to abate the danger. USG shall immediately comply with such direction.

In the event USG determines that any activity being performed at the Site under this Order is creating or has the potential to create a danger to human health or the environment, USG may cease such activities. USG shall notify Ecology's project coordinator as soon as possible, but no later than twenty-four (24) hours after making such determination or ceasing such activities. Upon Ecology's direction, USG shall provide Ecology with documentation of the basis for the determination or cessation of such activities. If Ecology disagrees with USG's cessation of activities, it may direct USG to resume such activities.

If Ecology concurs with or orders a work stoppage pursuant to this section, USG's obligations with respect to the ceased activities shall be suspended until Ecology determines the danger is abated, and the time for performance of such activities, as well as the time for any other work dependent upon such activities, shall be extended in accordance with Section VIII.J (Extension of Schedule) for such period of time as Ecology determines is reasonable under the circumstances.

Nothing in this Order shall limit the authority of Ecology, its employees, agents, or contractors to take or require appropriate action in the event of an emergency.

M. Reservation of Rights

This Order is not a settlement under Chapter 70.105D RCW. Ecology's signature on this Order in no way constitutes a covenant not to sue or a compromise of any of Ecology's rights or authority. Ecology will not, however, bring an action against USG to recover remedial action costs paid to and received by Ecology under this Order. In addition, Ecology will not take additional enforcement actions against USG regarding remedial actions required by this Order, provided USG complies with this Order.

Ecology nevertheless reserves its rights under Chapter 70.105D RCW, including the right to require additional or different remedial actions at the Site should it deem such actions necessary to protect human health and the environment, and to issue orders requiring such remedial actions.

Ecology also reserves all rights regarding the injury to, destruction of, or loss of natural resources resulting from the release or threatened release of hazardous substances at the Site.

By entering into this Order, USG does not admit to any liability for the Site. Although USG is committing to conducting the work required by this Order under the terms of this Order, USG expressly reserves all rights available under law, including but not limited to the right to seek cost recovery or contribution against third parties, and the right to assert any defenses to liability in the event of enforcement.

N. Transfer of Interest in Property

No voluntary conveyance or relinquishment of title, easement, leasehold, or other interest in any portion of the Site shall be consummated by USG without provision for continued implementation of all requirements of this Order and implementation of any remedial actions found to be necessary as a result of this Order.

Prior to USG's transfer of any interest in all or any portion of the Site, and during the effective period of this Order, USG shall provide a copy of this Order to any prospective purchaser, lessee, transferee, assignee, or other successor in said interest; and, at least thirty (30) days prior to any transfer, USG shall notify Ecology of said transfer. Upon transfer of any interest, USG shall notify all transferees of the restrictions on the activities and uses of the property under this Order and incorporate any such use restrictions into the transfer documents.

O. Compliance with Applicable Laws

1. All actions carried out by USG pursuant to this Order shall be done in accordance with all applicable federal, state, and local requirements, including requirements to obtain necessary permits, except as provided in RCW 70.105D.090. At this time, no federal, state, or local requirements have been identified as being applicable to the actions required by this Order;

2. Pursuant to RCW 70.105D.090(1), USG is exempt from the procedural requirements of Chapters 70.94, 70.95, 70.105, 77.55, 90.48, and 90.58 RCW and of any laws requiring or authorizing local government permits or approvals. However, USG shall comply with

the substantive requirements of such permits or approvals. At this time, no state or local permits or approvals have been identified as being applicable but procedurally exempt under this section.

USG has a continuing obligation to determine whether additional permits or approvals addressed in RCW 70.105D.090(1) would otherwise be required for the remedial action under this Order. In the event either Ecology or USG determines that additional permits or approvals addressed in RCW 70.105D.090(1) would otherwise be required for the remedial action under this Order, it shall promptly notify the other party of its determination. Ecology shall determine whether Ecology or USG shall be responsible to contact the appropriate state and/or local agencies. If Ecology so requires, USG shall promptly consult with the appropriate state and/or local agencies and provide Ecology with written documentation from those agencies of the substantive requirements those agencies believe are applicable to the remedial action. Ecology shall make the final determination on the additional substantive requirements that must be met by USG and on how USG must meet those requirements. Ecology shall inform USG in writing of these requirements. Once established by Ecology, the additional requirements shall be enforceable requirements of this Order. USG shall not begin or continue the remedial action potentially subject to the additional requirements until Ecology makes its final determination.

3. Pursuant to RCW 70.105D.090(2), in the event Ecology determines that the exemption from complying with the procedural requirements of the laws referenced in RCW 70.105D.090(1) would result in the loss of approval from a federal agency that is necessary for the state to administer any federal law, the exemption shall not apply and USG shall comply with both the procedural and substantive requirements of the laws referenced in RCW 70.105D.090(1), including any requirements to obtain permits.

P. Land Use Restrictions

In consultation with USG and the relevant current Owner/Operator for the Site, Ecology will prepare the Environmental (Restrictive) Covenant consistent with WAC 173-340-440 and RCW 64.70. After approval by Ecology, the current Owner/Operator shall record the Environmental (Restrictive) Covenant with the office of the Pierce County Auditor within ten (10)

days of completion of field activities identified in this CAP. The Environmental (Restrictive) Covenants shall restrict future activities and uses of the Site as agreed to by Ecology, USG, and the current Owner/Operator for the Site. The current Owner/Operator shall provide Ecology with the original recorded Environmental (Restrictive) Covenant within thirty (30) days of the recording date.

Q. Financial Assurances

Pursuant to WAC 173-340-440(11), USG shall maintain sufficient and adequate financial assurance mechanisms to cover all costs associated with the operation and maintenance of the remedial action at the Site, including institutional controls, compliance monitoring, and corrective measures.

Within sixty (60) days of the effective date of this Order, USG shall submit to Ecology for review and approval an estimate of the costs that it will incur in carrying out the terms of this Order, including operation and maintenance, and compliance monitoring. Within sixty (60) days after Ecology approves the aforementioned cost estimate, USG shall provide proof of financial assurances sufficient to cover all such costs in a form acceptable to Ecology.

USG shall adjust the financial assurance coverage and provide Ecology's project coordinator with documentation of the updated financial assurance for:

1. Inflation, annually, within thirty (30) days of the anniversary date of the entry of this Order; or if applicable, the modified anniversary date established in accordance with this section, or if applicable, ninety (90) days after the close of USG's fiscal year if the financial test or corporate guarantee is used.

2. Changes in cost estimates, within thirty (30) days of issuance of Ecology's approval of a modification or revision to the cleanup action plan (CAP) that result in increases to the cost or expected duration of remedial actions. Any adjustments for inflation since the most recent preceding anniversary date shall be made concurrent with adjustments for changes in cost estimates. The issuance of Ecology's approval of a revised or modified CAP will revise the

anniversary date established under this section to become the date of issuance of such revised or modified CAP.

R. Periodic Review

As remedial action, including groundwater monitoring, continues at the Site, the Parties agree to review the progress of remedial action at the Site, and to review the data accumulated as a result of monitoring the Site as often as is necessary and appropriate under the circumstances. At least every five (5) years after the initiation of cleanup action at the Site the Parties shall meet to discuss the status of the Site and the need, if any, for further remedial action at the Site. At least ninety (90) days prior to each periodic review, USG shall submit a report to Ecology that documents whether human health and the environment are being protected based on the factors set forth in WAC 173-340-420(4). Ecology reserves the right to require further remedial action at the Site under appropriate circumstances. This provision shall remain in effect for the duration of this Order.

S. Indemnification

USG agrees to indemnify and save and hold the State of Washington, its employees, and agents harmless from any and all claims or causes of action (1) for death or injuries to persons, or (2) for loss or damage to property, to the extent arising from or on account of acts or omissions of USG, its officers, employees, agents, or contractors in entering into and implementing this Order. However, USG shall not indemnify the State of Washington nor save nor hold its employees and agents harmless from any claims or causes of action to the extent arising out of the negligent acts or omissions of the State of Washington, or the employees or agents of the State, in entering into or implementing this Order.

T. Precedence of this Order

This Order shall supersede any previous Agreed Orders between Ecology and USG relating to the Highway 99 site.

IX. SATISFACTION OF ORDER

The provisions of this Order shall be deemed satisfied upon USG's receipt of written notification from Ecology that USG has completed the remedial activity required by this Order, as amended by any modifications, and that USG has complied with all other provisions of this Agreed Order.

X. ENFORCEMENT

Pursuant to RCW 70.105D.050, this Order may be enforced as follows:

A. The Attorney General may bring an action to enforce this Order in a state or federal court.

B. The Attorney General may seek, by filing an action, if necessary, to recover amounts spent by Ecology for investigative and remedial actions and orders related to the Site.

C. A liable party who refuses, without sufficient cause, to comply with any term of this Order will be liable for:

1. Up to three (3) times the amount of any costs incurred by the State of Washington as a result of its refusal to comply.

2. Civil penalties of up to twenty-five thousand dollars ($25,000) per day for each day it refuses to comply.

D. This Order is not appealable to the Washington Pollution Control Hearings Board. This Order may be reviewed only as provided under RCW 70.105D.060.

Effective date of this Order: 6/24/16

anniversary date established under this section to become the date of issuance of such revised or modified CAP.

R. Periodic Review

As remedial action, including groundwater monitoring, continues at the Site, the Parties agree to review the progress of remedial action at the Site, and to review the data accumulated as a result of monitoring the Site as often as is necessary and appropriate under the circumstances. At least every five (5) years after the initiation of cleanup action at the Site the Parties shall meet to discuss the status of the Site and the need, if any, for further remedial action at the Site. At least ninety (90) days prior to each periodic review, USG shall submit a report to Ecology that documents whether human health and the environment are being protected based on the factors set forth in WAC 173-340-420(4). Ecology reserves the right to require further remedial action at the Site under appropriate circumstances. This provision shall remain in effect for the duration of this Order.

S. Indemnification

USG agrees to indemnify and save and hold the State of Washington, its employees, and agents harmless from any and all claims or causes of action (1) for death or injuries to persons, or (2) for loss or damage to property, to the extent arising from or on account of acts or omissions of USG, its officers, employees, agents, or contractors in entering into and implementing this Order. However, USG shall not indemnify the State of Washington nor save nor hold its employees and agents harmless from any claims or causes of action to the extent arising out of the negligent acts or omissions of the State of Washington, or the employees or agents of the State, in entering into or implementing this Order.

T. Precedence of this Order

This Order shall supersede any previous Agreed Orders between Ecology and USG relating to the Highway 99 site.

EXECUTIVE SUMMARY

Parametrix conducted a Phase I Environmental Site Assessment (ESA) for the Tacoma Dome Link Extension (TDLE) project in conformance with the scope and limitations of American Society of Testing Materials (ASTM) Standard Practice E 1527-13 (2013) on the subject property identified as Tacoma Dome (TD) properties TD 3947 and TD 3933. Any exceptions to, or deletions from, the Standard Practice are described in Section 4.1 of this report.

The subject property is located on Pierce County Tax Lots 320013136 and 320013141 (Figure 1) and is currently occupied by a gasoline service station and convenience store. The subject property encompasses an area of approximately 1.6 acres and is zoned for commercial use. The convenience store on the subject property is 4,050-square-feet in size.

The first known development of the site was in the 1950s with two structures. Prior to the development, the subject property was undeveloped agricultural land. The subject property appeared developed as a gas station, similar to current conditions by1990. There have been no significant changes to the subject property between 1990 and the present. Surrounding land use has remained commercial and industrial. According to City records, the convenience store structure was built in 1992.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the subject property except for the following:

Recognized Environmental Conditions

The subject property is listed on multiple databases on the Environmental Data Resources (EDR) report, including the Confirmed and Suspected Contaminated Site List (CSCSL)and Petroleum Technical Assistance Program (PTAP) databases. Contamination originating from a Leaking Underground Storage Tank (LUST) and associated fuel lines resulted in soil and groundwater impacts at the subject property. Cleanup levels were exceeded for diesel and gasoline-range hydrocarbons in soil and groundwater as well as associated benzene, toluene, ethylbenzene, and xylenes. Remedial actions, including the removal of the tank, soil excavation, and injection of an oxidizing agent, have been completed at the site, and groundwater monitoring is ongoing. Additional remedial actions are ongoing, including quarterly groundwater monitoring to determine whether contamination is stable or declining. A remedial investigation (RI) report is tentatively approved with the requirement that the data gaps are addressed, including stormwater drainage issues. The presence of soil and groundwater contamination at the subject property represents a REC.

According to the RI, the feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated.

The storage of petroleum products, two UST fields, was noted on the subject property during site reconnaissance (from public rights-of-way). Monitoring wells were also noted throughout the subject property indicating cleanup activities. The storage of petroleum products and the observed monitoring wells are a REC to the subject property.

Data Gaps

An on-site reconnaissance (within subject property boundaries) and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13 (2013). However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

1. INTRODUCTION

Parametrix was retained by Sound Transit to conduct a Phase I Environmental Site Assessment (ESA) on the site located at 4310 Pacific Highway E in Fife, Washington (herein referred to as the subject property; see Figure 1), as part of the Tacoma Dome Light Rail Extension (TDLE) project. The subject property includes Pierce County parcels 320013136 and 320013141 (TDLE parcel IDs TD 3947 and TD 3933, respectively). The subject property, known as Gull Station, is an operating gasoline service station and convenience store. The Phase I ESA was conducted to support environmental due diligence related to potential acquisition of the property associated with the TDLE project.

The subject property encompasses approximately 1.6 acres and includes a single structure that consists of a convenience store and two covered pump areas, one for larger trucks and one for commercial passenger vehicles. The structure was constructed in 1992 and is 4,050 square feet in size. The boundaries of the subject property are shown in Figure 2.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: 1) a review of documents and of oral information (if available) and 2) a site examination. Conclusions and recommendations in this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2013). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and, as such, constitutes “all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice” as defined by 42 United States Code §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term Recognized Environmental Condition is defined in ASTM Standard E1527-13 as:

> “…the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any *release* to the *environment*; (2) under conditions indicative of a *release* to the environment; or (3) under conditions that pose a threat of a future *release* to the environment. *De minimis conditions* are not *recognized environmental conditions*.”

In accordance with ASTM Standard E1527-13, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

Tacoma Dome Link Extension

DRAFT: For internal discussion only. Not reviewed or approved on behalf of any party.

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls." (ASTM 2013)

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property on foot. Unless otherwise stated, no exceptions to the guidelines presented in ASTM E1527-13 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site but were not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff
- Contacts and discussions with regulatory agencies and others
- Review of available hazardous substance or solid waste lists
- Opinions and judgments of Parametrix based on the information available

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property is located at 4310 Pacific Highway E in Fife, Washington. It is a 1.6-acre property bounded by Pacific Highway E to the north, by commercial properties to the east and west, and by 16th Street East to the south, followed by commercial properties. According to the Pierce County Assessment Office, Thorp Properties, Inc is the current owner of the subject property. The subject property includes Pierce County parcels 320013136 and 320013141 (TDLE parcel IDs TD 3947 and TD 3933, respectively). The site location is shown on Figure 1. The boundaries of the subject property and project construction footprint are shown on Figure 2.

2.2 Site and Vicinity Characteristics

The subject property includes Gull Station, a gasoline service station with two pump islands and a convenience store (4,050 square feet, built in 1992).

The vicinity of the subject property is developed for industrial and commercial uses. Properties in the direct vicinity include restaurants and commercial businesses to the east and west, a car dealership and service center to the south, and parking lots and a tobacco shop to the north (Figure 2).

2.3 Physical Setting

The subject property is at an elevation of approximately 55 feet above mean sea level. The topography of the site gently slopes to the north towards the Puyallup River and Puyallup basin (USGS 2020). Soils in the area of the subject property are mapped as Sultan silt loam by the U.S. Department of Agriculture (USDA 1955). These are described as moderately well drained. Made land is mapped to the north of the subject property. The made land is dredged material that was deposited artificially over marshy tideflats for grading.

The surface geology of the subject property is mapped as Quaternary Vashon recessional outwash ice contact deposits and Quaternary pre-Fraser age coarse-grained deposits. These are described as sand and gravel to silty sand and gravel with some clay portions. These deposits generally have a high porosity and permeability.

The site is underlain by artificial fill. Groundwater at the site is found at a depth of approximately 3 to 10 feet below ground surface. The groundwater flow direction below the subject property is primarily to the north.

The nearest surface waterbody is the Blair Waterway, located 4,500 feet northwest of the subject property. The Puyallup River is located 4,500 feet southwest of the subject property.

2.4 Current Use of the Property

The subject property is currently a gasoline service station (Gull Station) with two pump islands and a convenience store. Access to the gas station is from Pacific Highway E to the north. Zoning for both parcels of the subject property is listed as Commercial.

2.5 Descriptions of Improvements on the Subject Property

Based on Pierce County property assessment records, the subject property includes 1.6 acres with a single structure (convenience store) constructed in 1992 and 4,050 square feet in size. Two gasoline/diesel pump islands with canopies are also located on the property, one to the north of the structure and one to the east of the structure. The exterior of the building is finished with asphalt parking and other hardscaping. Local records indicate that electricity, gas, water, and sanitary sewer are provided by local utilities.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. Parametrix reviewed the Pierce County Recorders database for liens against the current owner. No environmental liens were identified within the recorded documents filed for the current owner of the subject property. Additionally, Parametrix reviewed the Washington State Department of Ecology's environmental covenant database. No environmental (restrictive) covenants were filed for the subject property. Therefore, no evidence of activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

A Property History Guarantee title report was supplied by Sound Transit for the subject property (attached in Appendix A). There are no records in the title summary report indicating activity or use limitations or environmental liens affecting the property. No evidence of activity or use limitations or environmental liens against the subject property were identified during the course of this Phase I ESA.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: 1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and 2) a compilation of historical uses of the subject property and site vicinity properties to determine whether past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by EDR. The EDR report is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix B. Historical information is based on review of historical Sanborn Fire Insurance Maps and aerial photographs (Appendices C and D).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Any data gaps identified during the document review were addressed by interviewing Tacoma-Pierce County Health Department personnel, by making observations during the site examination, or by additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from database records maintained by the U.S. Environmental Protection Agency (EPA) and Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR report (Appendix B). Only standard and key additional databases are listed below. Parametrix reviewed the information in the EDR report to screen properties in the vicinity of the subject property for sites with potential to impact the subject property. The screening process involved reviewing the type of listings, types of contaminants, proximity, and position relative to the subject property, the topography, and groundwater gradient. Listings for sites found in the standard environmental records sources that could not be screened to verify potential impacts to the subject property were further evaluated by file reviews (see Section 4).

3.1.1 Review of Washington State Department of Ecology Databases

The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Ecology Hazardous Site List (HSL)
- Ecology Confirmed and Suspected Contaminated Site List (CSCSL)

- Ecology CSCSL No Further Action (CSCSL NFA) List
- Ecology Leaking Underground Storage Tank (LUST) List
- Ecology Underground Storage Tank (UST) List
- Ecology Aboveground Storage Tank (AST) List
- Ecology Institutional Controls (INST CONTROL) List
- Ecology Voluntary Cleanup Program (VCP) List
- Ecology Independent Cleanup Report (ICR) List
- Ecology and Pollution Liability Insurance Agency Petroleum Technical Assistance Program (PTAP) List
- Ecology Brownfields List
- Ecology Reported Spills (SPILLS) List
- Ecology Drycleaners List

3.1.1.1 Ecology HSL, CSCSL, and CSCSL NFA Databases

The Ecology CSCSL database contains sites in Washington State that have been confirmed or have been suspected of contaminant releases and is the state equivalent to the federal Comprehensive Environmental Response, Compensation and Liability Information System (known as CERCLIS). The HSL is a subset of the CSCSL database for sites that have been formally ranked using the Washington Ranking Method. The CSCSL NFA database is former CSCSL sites that have achieved an NFA determination from Ecology.

The subject property was found on the CSCSL database:

- Pacific Xpress (currently operating as Gull Station) at 4310 Pacific Highway E is listed on the CSCSL database related to an ongoing release of petroleum hydrocarbons. This represents a REC to the subject property. Further information is provided in Section 4.

Forty-five sites within one mile of the subject property were reported on the CSCSL database, three sites within one mile were reported on the HSL database, and ten sites within 0.5 mile were reported on the CSCSL NFA database. One CSCSL NFA site was reported within 0.125mile from the subject property:

- The Susan Kaelin Property at 1409 Alexander Avenue East (470 feet northwest and down-gradient) is listed on the CSCSL NFA database. Petroleum hydrocarbons were remediated below cleanup levels in soil and suspected in groundwater. The site achieved a NFA status from Ecology in 2001. The site was evaluated in the Remedial Investigation (RI) Report (Maul Foster & Alongi, Inc. 2020) conducted for the subject property in April 2020 and is not expected to impact the subject property based on the gradient of groundwater flow determined at the subject property (up-gradient from the Susan Kaelin Property). Based on the downgradient location and NFA status, this site is not considered a REC to the subject property.

The remaining HSL, CSCSL, and CSCSL NFA sites identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.1.2 Ecology UST and AST Databases

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database. The Ecology UST database contains registered commercial USTs. Residential heating oil USTs are not included in the Ecology UST database. USTs are regulated under Subtitle I of the RCRA. Unless otherwise noted, the presence of USTs near the site does not, in itself, constitute a REC.

The Ecology AST database is a listing of aboveground storage tank locations regulated by the Department of Ecology's Spill Prevention, Preparedness and Response Program. Unless otherwise noted, the presence of ASTs near the site does not, in itself, constitute a REC.

The subject property is listed on the UST database:

- Petrocard Inc. (subject property) is on the UST database related to having three USTs removed in 1996, one UST removed in 2018, and four operational USTs installed in 1990. Based on the listings indicating a REC for the subject property, a file review was conducted and is further discussed in Section 4.

Five sites were reported on the UST database within 0.25 mile of the subject property, and no AST sites were reported within 0.25 mile of the subject property. Two of these sites were reported within 0.125 mile from the subject property:

- B & J Bingo located at 4401 15th Street East (575 feet north-northeast of the subject property) is listed on the UST databases. The site lists one UST that was closed and removed in 1991. Based on the distance and gradient from the subject property and the lack of reported releases, this site is not considered a REC to the subject property.
- TT2 APR Forwarders Inc located at 4503 15th Street East (600 feet northeast of the subject property) is listed on the UST databases. The site lists one UST that was removed in 1996. Based on the distance and gradient from the subject property and the lack of reported releases, this site is not considered a REC to the subject property.

3.1.1.3 Ecology LUST Database

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed in the LUST database; however, there has been a LUST onsite. Further details can be found in Section 4.

Eight sites were reported on the LUST database within 0.5 mile of the subject property. No LUST sites were listed withing 0.125 mile of the subject property. The remaining listed sites on the UST and LUST databases identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.1.4 Ecology VCP, PTAP, ICR

The Voluntary Cleanup Program (VCP) database is a list of sites that have been entered into the Ecology VCP and are undergoing cleanup. The PTAP database is a list of petroleum release sites that have been entered into the Pollution Liability Insurance Agency (PLIA) PTAP program and are undergoing cleanup.

The ICR database is a subset of the VCP or former VCP sites that have reported interim cleanup actions to Ecology.

The subject property was reported on the PTAP database:

- Pacific Xpress (currently operating as Gull Station) at 4310 Pacific Highway E is listed on the PTAP database related to an ongoing cleanup of a former release of petroleum hydrocarbons. This represents a REC to the subject property. As noted above, based on the listings for the subject property, a file review was conducted and summarized in Section 4.

Fourteen sites within 0.5 mile of the subject property were reported on the VCP database. One of these sites was reported within 0.125 mile from the subject property:

- The Susan Kaelin Property at 1409 Alexander Avenue East (470 feet northwest) is listed on the VCP database. Petroleum hydrocarbons were remediated below cleanup levels in soil and suspected in groundwater. The site achieved a NFA status from Ecology in 2001. The site was evaluated in the RI Report (Maul Foster & Alongi, Inc. 2020) conducted for the subject property in April 2020 and is not expected to impact the subject property based on the gradient of groundwater flow determined at the subject property (up-gradient from the Susan Kaelin Property). Based on the downgradient location and NFA status, this site is not considered a REC to the subject property.

The remaining listed sites on the VCP database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

No sites within 0.5 mile of the subject property were reported on the PTAP database.

Seven sites within 0.5 mile of the subject property were reported on the ICR database. None are within 0.125 mile from the subject property. The listed sites on the ICR database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

Two sites within 0.5 mile of the subject property were reported on the INST CONTROL database. One of the sites is over 900 feet and down-gradient from the subject property. It has an NFA issued by Ecology and does not appear to represent a REC to the subject property. The remaining listed site on the INST CONTROL database identified in the EDR report appears to be at sufficient distance from the subject property and/or cleanup activities have been completed so that it does not appear to represent a REC to the subject property.

3.1.1.5 Ecology Solid Waste Facilities/Landfill

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. No Solid Waste Facilities/Landfill sites were reported within 0.5 mile of the subject property.

3.1.1.6 Ecology Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination."

The subject property is not listed as a State Brownfields site. No State Brownfields site were reported within 0.5 mile of the subject property.

3.1.1.7 Ecology SPILLS Databases

The Ecology SPILLS database reports potential small releases to the subsurface that have the potential to cause contamination.

The subject property is listed in the SPILLS database:

- Pacific Xpress (currently operating as Gull Station) at the subject property address is listed on the SPILLS database. According to the listing, 15 gallons of diesel fuel was released in 2008. Further discussion on listings for the subject property is present in Section 4.

The remaining listed sites on the SPILLS database identified in the EDR report appear to be at sufficient distances from the subject property and/or cleanup activities have been completed so that they do not appear to represent a REC to the subject property.

3.1.1.8 Ecology Solid Waste Facilities/Landfill

The Solid Waste Facilities/Landfill records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a Solid Waste Facilities/Landfill site. No Solid Waste Facilities/Landfill sites were reported within 0.25 mile of the subject property.

3.1.1.9 Ecology Drycleaner Database

The drycleaner database is a listing of former or current drycleaners in Washington. No drycleaners were reported within 0.25 mile of the subject property. No inactive drycleaners were reported within 0.25 mile of the subject property.

3.1.2 EPA Database Review

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following subsections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-13 search radii from the following databases:

- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS) database
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)

- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 NPL List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within one mile of the subject property; however, there is one NPL site which impacts the vicinity of the subject property:

- The Asarco Tacoma Smelter Plume is a part of the Commencement Bay Nearshore Tideflats NPL site and includes large portions of Pierce, King, Kitsap, and Thurston Counties related to windblown contamination of arsenic and lead deposited from operation of the Asarco Smelter in Ruston, Washington, for a period of nearly 100 years (Ecology 2020). The area of the subject property is mapped within an area of impact from arsenic of less than 20 parts per million. Based on the mapped concentrations, this represents *de minimis* conditions at concentrations less than Model Toxics Control Act (MTCA) Method A cleanup levels and is not considered a REC for the subject property.

3.1.2.2 SEMS Database

The EPA's Superfund Enterprise Management System (SEMS) database identifies sites that may potentially pose a threat to the environment or the health of the public.

Information contained in the EDR report indicates that the subject property is not listed as a SEMS site. One SEMS sites was identified within 0.5 mile of the subject property:

- The Petarcik site (911 Pacific Highway E) is located approximately 1,190 feet east of the subject property. This listing is related to corrosive waste and halogenated organics contamination confirmed in soil and suspected in groundwater. Soil has been remediated at the site, and there is ongoing monitoring and cleanup at the site. This site is not an NPL site and is not considered a REC based on the proximity and position related to the subject property.

The EPA also publishes the SEMS-ARCHIVE list, which identifies SEMS sites that have been designated "no further remedial action planned" and removed from the SEMS List. Information contained in the EDR report indicates that the subject property is not listed as a SEMS-ARCHIVE site. No SEMS-ARCHIVE sites were identified within 0.5 mile of the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicated that the subject property is not listed as a CORRACTS site. No CORRACTS sites are listed within one mile of the subject property.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Very small quantity generators generate less than 100 kilograms (kg) of hazardous waste or less than 1 kg of acutely hazardous waste per month. Small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste or more than 1 kg of acutely hazardous waste per month. Non-generators do not currently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA generator database.

Four RCRA Non-generators are listed within 0.125 mile of the subject property. Based on lack of violations or the nature of violations, these sites do not represent RECs for the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal (TSD) facilities. Information contained in the EDR report indicates the subject property is not listed as a TSD site. No TSD sites are identified within 0.5 mile of the subject property.

3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed near the subject property.

3.1.2.6 US Brownfields List

The EPA's US Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a US Brownfields site. No US Brownfields site is listed within 0.5 mile of the subject property.

3.1.3 Other Databases

The following subsections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may pose a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Because of the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to, gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that the subject property is listed on the EDR Historical Auto Station database:

- Express Stop was identified as a gasoline service station between 1972 and 2014. Further discussion on listings for the subject property is presented in Section 4.

Three EDR Historical Auto Stations sites were identified on the EDR report within 0.125 mile of the subject property. None of these sites are located upgradient of the subject property. Unless otherwise noted, the mere presence of historical auto stations near a site does not, in itself, constitute an REC. Based on lack of reported releases and other supplemental information, the identified sites do not appear to represent a REC to the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The byproducts from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No manufactured gas sites are listed within one mile of the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there is one EDR Historical Dry Cleaner site within 0.125 mile of the subject property:

- M Best Cleaners (4420 Pacific Highway E) is located approximately 230 feet east of the subject property. This site was identified as being a cleaners in 2004 and 2010. The site is now a restaurant. The site does not appear on any databases that report releases or spills of hazardous materials and is not listed as a cleanup site. Based on the distance from the subject property and the lack of reported releases, the site does not appear to represent a REC for the subject property.

Unless otherwise noted, the mere presence of a historical dry cleaner near a site does not, in itself, constitute a REC. The identified site does not appear to represent a REC for the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for the orphan sites, none appear to represent a potential REC for the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-13 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface" (ASTM 2013). The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The target property and adjacent sites were reviewed in an effort to determine whether vapor migration has, or has the potential to have, occurred at the site from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. Groundwater and soil contamination on site are limited primarily to diesel and oil-range hydrocarbons, metals, and polycyclic hydrocarbons, which do not typically cause vapor intrusion issues. Limited detected concentrations of volatile organic compounds in groundwater and naphthalene in soil are at levels that do not appear to warrant a concern for vapor intrusion. According to the RI Report (Maul Foster & Alongi, Inc. 2020), vapor migration exposure pathways are incomplete and not considered a concern at the subject property.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the Certified Sanborn Maps and the historical aerial photos.

3.2.1 Certified Sanborn Maps

A copy of the Certified Sanborn Map Report for the TDLE project area is included in Appendix C (EDR 2019). Maps were not available for the Gull Station site.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area examined for the years 1941, 1957, 1968, 1980, 1990, 2006, 2013, and 2017. Copies of the aerial photographs are included in Appendix D. Observations are discussed below.

1941 The subject property appears to be undeveloped, agricultural land. A roadway (Pacific Highway) is visible to the north of the subject property. Some rural residential development is visible to the north of the roadway. The vicinity of the subject property appears to be rural residential development and undeveloped, agricultural land.

1957-1980 The subject property appears to be developed with two structures, one situated on the southeastern portion and one situated on the southwestern portion of the subject property. The vicinity of the subject property remains undeveloped agricultural land and rural residential properties.

1990 A canopy/structure is visible on the western portion of the subject property, replacing the former structure. The structure on the southeastern portion of the subject property is still visible. Commercial development is visible to the north and southwest of the subject property.

2006-2009 The subject property appears much as it did in the 1990 photo and similar to present day conditions, developed with a gasoline service station. The car dealership to the adjacent south is partially developed. Much of the rest of the vicinity of the subject property appears similar to the 1990 photo.

2013-2017 The subject property and vicinity are developed similar to present day conditions. The car dealership to the adjacent south of the subject property is further developed with several large buildings.

Based on the historical document review, the subject property first appeared developed with two developed structures in the 1957 aerial photograph. Prior to the development, the subject property was undeveloped, agricultural land. The subject property appeared developed similar to current conditions in 1990. There have been no significant changes to the subject property between 1990 and the present. The presence of a gasoline service station on the subject property shown in the aerial photographs is a REC.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following subsections.

3.2.3.1 City of Fife

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or ASTs) was completed. Multiple UST permits were listed for multiple years. No additional permits of environmental significance were identified on the City of Fife's Permit Search Tool (City of Fife 2020). A copy of the permit list is included in Appendix F.

3.2.3.2 Pierce County

Based on information from the Pierce County Property Assessor-Treasurer Information Portal, the subject property is located on Tax Lots 320013136 and 320013141 and is approximately 1.6 acres. The subject property is currently owned by Thorp Properties, Inc.

Pierce County records indicate that one structure constructed in 1992 is located on the subject property.

3.2.4 Additional Environmental Information

The following subsections provide a summary of additional environmental information obtained for the site.

3.2.4.1 Asbestos

The manufacture of most asbestos-containing material was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the structure (1992), there is low potential for asbestos-containing materials to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

3.2.4.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the structure (constructed in 1992), there is low potential for LBP to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

3.2.4.3 Polychlorinated Biphenyls

Transformers can potentially contain polychlorinated biphenyls (PCBs). There are no transformers located on the subject property. Based on the age of the structure (constructed in 1992), there is low potential for PCBs to have been used in the construction of the building. A Hazardous Building Materials Survey has not been conducted on the subject property.

3.2.4.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors, such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Pierce County ZIP code 98424 is located in Federal EPA Radon Zone 3. The Zone 3 indoor average radon level is less than 2 pCi/L (pico Curies per Liter). Based on this limited information, radon likely does not represent an environmental concern at the property. In addition, based on lack of a basement and the occupational nature of the site (limited working hours), radon is not expected to be a potential REC for the subject property.

4. FILE REVIEW

In accordance with ASTM Standard E1527-13, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on the subject property's listing in Ecology's CSCSL database, Parametrix requested available site records from the agency. The subject property is listed as the 'Pacific Xpress' site (CS 14611), a gasoline service station that has been in operation since the 1980's according to the RI (Maul Foster & Alongi, Inc. 2020). The Pacific Xpress site was designated on the CSCSL as a result of contamination found during site upgrades and UST replacement in 2018.

Investigations were initiated after excavation at the site in 2018 found petroleum contaminated soil and shallow groundwater due to a leaking UST system and associated fuel lines. The UST system was replaced, contaminated soil was excavated, groundwater was pumped from the excavation and treated, and an oxidizing agent was applied to the subsurface to support bioremediation of remaining impacts.

During the RI, the lateral extent of groundwater contamination exceeding MTCA Method A cleanup levels was determined to be contained with the boundaries of the subject property. Soil contamination exceeding MTCA Method A cleanup levels was determined to be only in the areas adjacent to the existing diesel UST. In accordance with the recommendations outlined in the RI report, quarterly groundwater monitoring is ongoing at the subject property to determine whether contamination is stable or declining. An environmental covenant could be placed on the property to restrict the use of groundwater at the site. Additional oxidizing agent could also be injected near the area of the LUST to expedite the degradation of contaminates in the groundwater. During the RI, standing water was observed in the manholes of the City's stormwater system due to a drainage issue. The RI recommends the City of Fife resolve this issue so that potential groundwater intrusion can be assessed.

The RI report is tentatively approved by PLIA with the requirement that the data gaps outlined in the RI report are addressed (PLIA 2020). The feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated. The presence of contamination in soil and groundwater at the site is considered a REC. The RI report and Ecology's tentative approval letter is included in Appendix F.

4.2 Adjacent Properties File Review

Several nearby properties were listed on environmental databases, as described in Section 3. In general, sufficient site-specific information was available through review of the EDR report as well as online Ecology files to develop an opinion on the potential for these properties to have affected the subject property.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on November 20, 2020. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site walk are included in Appendix E.

5.1 Subject Property

The subject property is developed with a gasoline service station and a convenience store. The property has two covered pump areas, one for larger trucks and one for commercial passenger vehicles. The northern edge of the subject property is fronted by a wide sidewalk along Pacific Highway E. UST fields were observed to the southeast of the easterly pump island and to the west of the westerly pump island. Monitoring wells were observed throughout the subject property. The confirmed presence of petroleum products and the monitoring wells indicating a release are considered a REC for the subject property.

No evidence of ASTs or other indications of environmental significance were observed on the exterior portions of the property. No evidence of staining, adverse odors, or other indications of potential releases was observed. The monitoring wells are part of the ongoing cleanup at the site further discussed in Section 4.

5.2 Adjacent Properties

The vicinity of the subject property is developed primarily with commercial buildings. Adjacent properties were examined from public areas for the presence of environmental conditions that have the potential to impact the subject property.

The subject property is bounded to the east and west by restaurants and commercial businesses, to the south by 16th Street East followed by a car dealership and service center, and parking lots, and to the north by Pacific Highway E followed by a tobacco shop and parking lots. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials identified on visible areas of adjacent properties.

6. INTERVIEWS

An interview was not conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-13.

A user questionnaire was submitted to Sound Transit to assist in identifying potential RECs affecting the site and identification of background information on the subject property. No RECs were identified through the review of the user questionnaire. A copy of the user questionnaire completed by Sound Transit is attached in Appendix A.

Parametrix completed an interview with Rob Olsen, Environmental Health Specialist of the Tacoma-Pierce County Health Department Environmental Health - Contaminated Properties division on February 4, 2021 (TPCHD 2021). According to Mr. Olsen, TPCHD issued a remediation permit in 2018 and he indicated that the last TPCHD annual cleanup permit was issued in July 2020. TPCHD has not received reports documenting cleanup activities with the permits. Mr. Olsen noted that TPCHD should be notified of cleanup activities but often reports are only sent to PLIA or other appropriate agencies.

7. CONCLUSIONS

Parametrix conducted a Phase I ESA in conformance with the scope and limitations of ASTM Standard Practice E 1527-13 on the subject property identified as TDLE properties TD 3947 and TD 3933. Any exceptions to, or deletions from, the Standard Practice are described in Section 1.3 of this report.

The subject property is located on Pierce County Tax Lots 320013136 and 320013141 (Figure 1) and is currently occupied by a gasoline service station and convenience store. The subject property encompasses an area of approximately 1.6 acres and is zoned for commercial use. The convenience store on the subject property is 4,050-square-feet in size.

The first known development of the site was in the 1950s with two structures. Prior to the development, the subject property was undeveloped agricultural land. The subject property appeared developed as a gas station, similar to current conditions by1990. There have been no significant changes to the subject property between 1990 and the present. Surrounding land use has remained commercial and industrial. According to City records, the convenience store structure was built in 1992.

This assessment has revealed no evidence of RECs in connection with the subject property except for the following:

Recognized Environmental Conditions

The subject property is listed on multiple databases on the EDR report, including the CSCSL and PTAP databases. Contamination originating from a LUST and associated fuel lines resulted in soil and groundwater impacts at the subject property. Cleanup levels were exceeded for diesel and gasoline-range hydrocarbons in soil and groundwater as well as associated benzene, toluene, ethylbenzene, and xylenes. Remedial actions, including the removal of the tank, soil excavation, and injection of an oxidizing agent, have been completed at the site, and groundwater monitoring is ongoing. Additional remedial actions are on-going including quarterly groundwater monitoring to determine whether contamination is stable or declining. An RI report is tentatively approved with the requirement that the data gaps are addressed, including stormwater drainage issues. The presence of soil and groundwater contamination at the subject property represents a REC.

According to the RI, the feasibility study process is ongoing; thus, prior to acquisition of the property, the progress of the feasibility study should be evaluated.

The storage of petroleum products, two UST fields, was noted on the subject property during site reconnaissance (from public rights-of-way). Monitoring wells were also noted throughout the subject property indicating cleanup activities. The storage of petroleum products and the observed monitoring wells are a REC to the subject property.

Data Gaps

An on-site reconnaissance (within subject property boundaries) and interview were not able to be conducted with a property representative to identify any potential environmental conditions or to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-13 (2013). However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

EXHIBIT "A"

Legal Description

PARCEL1:

That portion of the Southeast quarter of the Southwest quarter of Section 1, Township 20 North, Range 3 East, W.M., in Pierce County, Washington, lying South of the South line of Pacific Highway East;

Except that portion lying East of the West 794.5 feet thereof;

And except the West 514.5 feet thereof.

Together with that portion of vacated P.S.H. 1 (Pacific Highway) adjoining as vacated under Ordinance No. 558 of the City of Fife which upon vacation attached to said property by operation of law.

PARCEL 2:

That portion of the Southeast Quarter of the Southwest Quarter of Section 1, Township 20 North, Range 3 East of the Willamette Meridian described as follows:

Beginning at a point on the South line of said Section which is East 241.5 foot from the Southwest corner of the Southeast quarter of the Southwest quarter of 3aid Section 1;
Thence East along said South line 273 feet;
Thence Northerly parallel with the West line of said subdivision to the South margin of Pacific Highway;
Thence Westerly along said margin 273 feet;
Thence Southerly to the point of beginning;

Together with that portion of vacated P.S.H. 1 (Pacific Highway) adjoining as vacated under Ordinance No. 558 of the City of Fife which upon vacation attached to said property by operation of law.

This map/plat is being furnished as an aid in locating the herein described land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

2418176

SHORT FORM LEASE

THIS INDENTURE, being a SHORT FORM LEASE, dated as of October 17, 1971, by and between PUGET SOUND POWER & LIGHT COMPANY, a Washington corporation (herein called Lessor) and JOHN O. BULL and BELVA LEE BULL, his wife, (herein called Lessee);

The Lessor in consideration of the rents reserved, hereinafter referred to, and of the terms, covenants, conditions and agreements on the part of the Lessee, does hereby lease unto the Lessee, and the Lessee does hereby hire from Lessor, the following described real property (hereinafter called the Premises) situated in Pierce County, Washington:

A portion of the former Puget Sound Electric Railway right of way in Section 1, Township 20 North, Range 3 East, W.M., more particularly described as follows:

Beginning at a point 5 feet north and 514.5 feet east of the southwest corner of the Southeast 1/4 of the Southwest 1/4 of said Section 1; thence continuing east 5 feet north of and parallel to the south line of said Section 1, a distance of 150 feet; thence northerly 95 feet to the south line of Pacific Highway East; thence west along the south line of Pacific Highway East 150 feet; thence southerly 95 feet to the point of beginning.

TO HAVE AND TO HOLD the Premises for an initial term commencing July 1, 1971, and ending on June 30, 1976, upon the rents, terms, covenants and conditions in a certain collateral lease agreement between the parties hereto and bearing even date herewith.

Said collateral lease agreement containing a covenant by Lessee that at the expiration or sooner termination of this lease all improvements on and to the Premises, whether presently existing or subsequently installed, shall become the property of the Lessor.

IN WITNESS WHEREOF, the parties hereto have hereunto set their hands and seals the day and year first above written.

AMENDMENT OF LEASE AND SUBORDINATION OF LEASE

Thorp Properties, Inc., a Washington corporation, leased the property described on the attached exhibit A to South Center Oil, Inc., a Washington corporation. That lease is dated March 1, 1990. The March 1, 1990 lease is hereby amended as follows:

Paragraph 3 Term is amended to read as follows:

> 3. Term. The term of this Lease shall commence on July 1, 1990, and shall terminate 20 years from the date that the Evergreen Community Development Association's debenture is sold pursuant to a United States Small Business Administration (hereafter SBA) authorization and debenture guaranty number CDC-406011-30-08-WA (hereafter "Authorization").

Paragraph 4 Rent is amended to read as follows:

> 4. Rent. Lessee shall pay to Lessor as rent for the premises equal monthly installments of $12,590, in advance of the first day of each month of the term of the lease. This amount of rent is based on estimates of the Lessor's expenses for debt service, insurance and real estate taxes for the project authorized by the SBA's Authorization. During the term of this lease the rent shall not exceed the amount permitted by the Authorization for the guaranty of a debenture to be issued by the Evergreen Community Development, the proceeds of which are to be loaned to Lessor. If the Lessor's expenses for debt service, insurance and/or real estate taxes are different from those anticipated, and when these expenses change during the term of the lease, the Lessor shall change the Lessee's monthly payment to the amount necessary to reimburse the Lessor's expenses for these costs. The amount of rent may be modified by giving the Lessee 30 days' written notice of the change in rent payments.

The undersigned also hereby subordinate the lien of their March 1, 1990 lease to the lien of $544,000 deed of trust in favor of the Evergreen Community Development Association which deed of trust will be assigned to the United States Small Business Administration. This $544,000 deed of trust in which Thorp Properties,

10

Inc. is the grantor is being recorded simultaneously with this amendment of lease and subordination of lease.

DATED this 7 day of September, 1990.

ASTM 1527-13 USER QUESTIONS

ASTM 1527-13 includes a user questionnaire that must be completed by the user in order to qualify for Landowner Liability Protections (LLPs) under CERCLA. The following questions are to be completed by the user or representatives of the user.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
   __No_____

2. Are you aware of any activity and use limitations, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? __ No
   _____

3. As the user of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? ___ No
   _____

4. For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? ___ No
   _____

5. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? _I am not aware of the purchase price_____

6. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? __ No
   _____

   For example, as user,

   (a) do you know the past uses of the property? _ No
   _____

   (b) do you know of specific chemicals that are present or once were present at the property? _ No
   _____

   (c) do you know of spills or other chemical releases that have taken place at the property? __ No
   _____

   (d) do you know of any environmental cleanups that have taken place at the property? _ No
   _____

7. As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination on the property? _ No
